A HOME IN FLORIDA

From the East Centrality

The appeal to the public to buy bonds, as a way of saving for retirement, has been a success in Florida. The state has sold over $500,000 worth of bonds, which will help to finance the building of new schools and universities.

The Modern Sort of Today.

Railroad men are sort. They get their start against the proposed railroad rates. Now the dispatchers are making up lists of the railroad's customers that consist of thousands of names. These names are given to a lawyer, who will send them to a railroad agent who will send them to a man who will send them to the local railroad people. The railroad people will then go through the names and make the scheduling of the trains for the day. This process continues until the trains are scheduled for the night. Then the trains are put into service, and the process begins again.

The Sacredness of Private Property.

Private property is sacred! Yes, indeed, it is! But if you look around you, you will see that people are not using it properly. They are not using it for the benefit of the nation. They are using it for their own benefit. The Constitution says that private property is sacred, but the people are not following it. They are using it for their own benefit, not for the benefit of the nation. They are using it for their own gain, not for the benefit of the nation.

The Agitation League is composed of Socialists who constitute the vast majority of the working class. They are not interested in the sacredness of private property when it interferes with the public interest. They are interested in their own interests. They are interested in the sacredness of private property when it benefits them. They are not interested in the sacredness of private property when it benefits the public. They are not interested in the sacredness of private property when it benefits the nation.
