FIFTY CENTS A YEAR

Girard, Kansas, U. S. A., March 17, 1906

By J. M. Eastwood

One of the most important events in the life of the Labor movement of the western United States is the inauguration of the sheep and cattle industry in the state of Idaho. There has been a bitter and bloody war between the sheep men and the cattle men. Hundreds of sheep men, by the cattle men, have killed scores of sheep breeders during the last few years. The trial and experience of "Diamond Field Jack," who was regularly employed at $45 per month, killed a sheep and injured the people of Idaho, and the northwest. The reason for this wholesale slaughter of sheep breeders is plain. Cattle and sheep have never previously been so satisfactory, so that the cattle men sought to drive out and destroy the sheep business by making it unsafe for men to act in the capacity of herdsman.

GAIN, most of the cattle men are Republicans, while many of them are miners and members of the Mine Owners' Association. On the other hand, the sheep men are Democrats, and many of them are Mormons. Steenbergh was both a sheep man and a Democrat. He was also on friendly terms with the Mormon authorities. In fact, it is said that he was a poli
tician, and could never be counted on as an ally of the Mine Owners' association. That was his case, and it was also the case of the rich cattle men, and they would gladly see him out of the way.

COORDINATING, when the conference between the Mine Owners' association and the two states was called, there were present a number of Idaho cattle breeders, who here a portion of the people of the States. The responsibilities for the crime could be placed on the Western Federation of Miners. The cattle breeders would immediately have taken up the case, and the people of Idaho would have been delighted.

WILL the infamous conspiracy work? Are the people really believing the stories that are being circulated among the miners' organization? If a syndicated air

Unwinding the Tangled Skein

(Continued from First Page)

the Western Federation of Miners was very successful in their
strike, and they were prepared to fight for their rights. The
strike was well organized, and the miners were determined
to win.

The strike ended in 1907, and the miners won their
rights. The Western Federation of Miners continued to
support the miners in their fight for better working condi-
tions.

Another "Explosion Exploded."

Another explosion occurred in the mine near the
town of Silverton, Colorado. The explosion killed six
miners and injured several others. The cause of the
explosion was still unknown.

The B/W Mine Disaster

A mine disaster occurred in the B/W mine near the
town of Butte, Montana. The disaster caused the deaths
of 15 miners. The cause of the disaster was still unknown.

The Strike of 1907

The miners went on strike in 1907. The company
refused to negotiate with the miners, and the strike lasted
for several months. The miners were determined to win
their rights, and the strike was well organized.

The Strike ended in 1908, and the miners won their
rights. The Western Federation of Miners continued to
support the miners in their fight for better working condi-
tions.

Federation Officials Indicted.

Weekly, 50 cents per year.

Special Telegram to Appeal to Reason.

Boulevard, March 12—Henry R. Higgens, secretary of the federation of labor, and Fred C. Gladney, the vice-president, were arrested in the early morning today by Police Lieut. J. H. Swift, as they were about to leave Kansas City for New York. The two were arrested on a charge of conspiracy to defraud the government.

The charge is based on an alleged scheme to defraud the government of millions of dollars by means of a complicated scheme involving the use of false invoices and other fraudulent devices.

Higgens and Gladney are both well-known labor leaders and have been active in the federation of labor for many years. They are expected to make a full statement before a grand jury which will hear the case.

THE JUNGLE

By Upton Sinclair.

This book is the broadside that will beat into the brains of indifferent Americans a consciousness of capitalism's horrors. Its fidelity to truth, its directness, and its power to stir the reader's emotions are striking. It will make the working classes aware of the greed of the ruling classes in the United States. It will also bring about a change in public opinion regarding the government's treatment of the workers.

The book is a clear and concise exposition of the conditions in the meat-packing industry in Chicago. It shows the filthy conditions under which the workers are employed, the low wages they receive, and the danger to their health from the unsanitary conditions.

The book is a call to action, and it is certain to be widely read and studied by the working classes.

THE WOMAN'S COOPERATIVE

The Woman's Cooperative is a newsstand located in the heart of the city. It is owned and operated by women and is run on a cooperative basis. The store sells a variety of items, including food, clothing, and household goods.

The store is run by a group of women who are committed to providing high-quality products at reasonable prices. The store is open seven days a week and is staffed by volunteers.

If you are interested in learning more about the store or in becoming a volunteer, please visit our website or call us at 1-800-WOMAN-COOP.
THE GROWTH OF SOCIALISM.

Eugene V. Debs

THE WORKING CLASSES AS A RISING POWER

The working classes are on the march. They are the foundation upon which our social and political institutions are built. They are the driving force behind all progress. They are the most important element in our society.

The working classes are the backbone of our economy. They produce the goods and services that sustain our society. They are the ones who keep our factories running and our businesses alive.

The working classes are the ones who are being exploited by the capitalist class. They are the ones who are being paid low wages and working long hours. They are the ones who are being denied the basic rights that all people deserve.

The working classes are the ones who are demanding change. They are the ones who are fighting for a better future. They are the ones who are trying to create a society that is fair and just.

The working classes are the ones who are standing up for their rights. They are the ones who are speaking out against injustice. They are the ones who are demanding a voice in the decisions that affect their lives.

The working classes are the ones who are leading the way. They are the ones who are setting the example. They are the ones who are inspiring the rest of us to stand up for what is right.

In conclusion, the working classes are the foundation upon which our society is built. They are the ones who are driving the economy. They are the ones who are demanding change. They are the ones who are leading the way. They are the ones who are setting the example. They are the ones who are inspiring the rest of us to stand up for what is right.

Eugene V. Debs

Why Shall You Contain You In?

I should be a source of joy to the legislators of this country to know that they have a newspaper that can reach the ear of ten million people. It is the only means of spreading the principles of freedom and equality, and the only instrument that can stamp out the era of ignorance and prejudice that has so long reigned in this land. It is the only instrument that can teach the people to think for themselves, and to follow their own liberty.

The story of the free press is a sad one. It is in a pitiful state to see how it is used in this country. It is the only means of spreading the principles of freedom and equality, and the only instrument that can stamp out the era of ignorance and prejudice that has so long reigned in this land. It is the only instrument that can teach the people to think for themselves, and to follow their own liberty.
