The Tragedy of the Farmer

By Franklin P. Wuthnow

1

I was standing one evening with a friend in front of the church in the village where I had lived for thirty years, and we were talking over the changes that had taken place there. "You know," said my friend, "I used to leave my farm in the spring and return in the fall, and the only difference was that the crops were harvested." "Yes," I replied, "but there was more grass then." "That's what I'm sure of," said my friend. "But now, every year, the farmer has to spend more money, and the crops are harvested, but the grass is still there." "That's true," I said. "But the grass is not the problem. The problem is that the farmer has lost his way. He doesn't know what to do with the land." "That's right," said my friend. "But what can we do about it?" "We can work together to try to help him find a new way," I replied. "We can talk to him about the different ways to use the land, and we can help him to find a new direction." "That's a good idea," said my friend. "Let's do it."
