Accomplished in 30 Minutes.

WHEN the Appeal Army goes into action, the results always materi-

lize. We started after 300,000 bona-fide yearly paid-in

advertisers, and, bless your heart, here they are.

The poor, old, carthorse of the printing trade is aimed at

and tried hard to keep its head, but off it went, and, if you will ob-

serve closely, the Old Outfit False Reads triumphantly in the distance

over the dome of the nation's capitol. There is really more truth

than fiction in this statement, for Socialism holography menacingly

over photography is strongest in the state of Ohio.

This helpful sign (from the editor's point of view) has been

very large and fine, even from the cost of the whole.

Last week I

asked the Appeal Army comrades to each give 30 minutes of their

services as a substitute for the subscription. As a result the lists

of 100,000 new subscribers are beginning to arrive, which will

make us a fine start for 400,000 subscribers, which will be reached

before the end of the year.

The Appeal has many records of which its Army of loyal sup-

porters are justly proud; records for quick and effective service

in emergencies: records for special editions and records for regular

subscriptions.

The year closing March 30th gives us another entry for Army

records—a chapter to be written in red letters, for in all the his-

tory of the Appeal there is no achievement to equal it.

To the men in the Army who have been holding the hands of

the little old Appeal and made it the wonder of the printing and

radio industries, a hearty thanks.

A year ago the Appeal had just 177,000 actual subscribers, after being trimmed by the postal
departments of two big governments.

This year we are trudging along steadily greater be-

cause of these obstacles. This triumph gives

us the heartiest encouragement for the success for the principles for which the Appeal has

through all these years of discouragement

stood staunchly.

A net gain of 123,000 subscribers in twelve months is a

tremendous achievement. The Army is

the骄傲 of the nation, and the old veterans have

sent in the last 30 days.

In the box at the head of this column you

will find two weeks' report. I knew you would wonder what the 250,000 means to say that

the appeal has been read and everybody in the office had

reported the week that the report for the week

ending March 30th (today) could go to the paper.

Twenty thousand subscribers in two weeks!

Many a time we had heard the old Appeal had

had no net gain of subscribers in a month.

This rate kept up for the balance of the year

means 400,000 subscribers and a regular circu-

lation to cost $1,000 a day, for the amount of

papers printed and sold always leads the

number of subscribers by far, from 50,000 to 100,000 a

year even.

It's worth working for! We are working

together, taking a long hand of Appeal Army

comrades are scouring this broad land for new readers, and the Army is just getting down to

its real work. The past has been

the beginning, and the old veterans have opened fire all along the line.

I don't see how any reader of this paper who has a spark of sympathy for Socialism can

keep out of it. The Appeal is always at every point by Socialist literature. All

will be sounded until the last battle of Capitalism—IGNORANCE—has been captured and

our flag raised over the whole land.

The Army of Freedom is on the march and it's bugler has yet never sounded a retreat.

TRADING-LICENSE LAW

C. F. Darrow, counsel for the New York City bakers, and a lawyer of national eminence, spoke at the Trades Union Club, Los Angeles, Cal., March 12th, on "The Trading-License Law," and how it is an "economic weapon" for the Socialists. Mr. Darrow said:

"People are taught that law as it now stands is the only way to work. But it is not so."

Socialism in Brief

The following article is taken from the Social Democratic publication published at Adams, N. Y.

"No one has ever heard of the process of "economic weapon," but if there is such a thing, it is a very important one.

"In an economy, the process of economic weapon is the most important one."

Was Blackballed

North Missouri, Rejected Where He Was Born. Breaks His Knightly Oath.

The Knight of Columbus.

The story of Columbus’s life is well known. He was born in Portugal, and died in the same country. He was a knight of the Order of St. John, and was knighted by the King of Portugal. The name of Columbus is associated with the discovery of America, and with the establishment of the New World. He was a great navigator, and a great explorer.

"The story of Columbus’s life is well known. He was born in Portugal, and died in the same country."

SECRET OF MYSTERIOUS PANIC

Standard Oil Owes $70,000,000 That It Can't Pay---Public Money Used to Sustain Wrecked Gamblers.

Nearly $500,000,000 of Government Money Now Being Used to Further Standard Oil's Gambling Program, and Policy Inaugurated of Supplying Speculators Every Week With Government Funds.

APPEAL AMONG FARMERS.

We have a letter from a farmer in [illegible] which we extract the following:

"Our property is a new one, and we have just begun to get settled on it. We are working hard to make it pay, but we are having a rough time. The Standard Oil Company has taken over the lease of our land, and has been recruiting speculators to come and buy it. They promised us a good price, but they have not paid us anything. They have been using our property to speculate, and we are having a hard time to get our money back."

American History for the Workers.

No. 17---Condition of the Workers 1820-1830.

The factory system came through a different evolution in America. In England, the invention of the 'power loom' was the driving force behind mechanization, while in America, the invention of the spinning jenny is attributed to Samuel Crompton. This led to the establishment of factory systems, which eventually resulted in the so-called 'black slave wage' system. However, the conditions were far better than those in the United States, where the 'laborers' were forced to work for wages that were far below the subsistence level.

The factory system was introduced to the United States through the efforts of such individuals as Eli Whitney, who invented the cotton gin, and Samuel Slater, who introduced the water-powered spinning mill. However, the conditions were far worse than those in England, where the 'laborers' were forced to work for wages that were far below the subsistence level. The introduction of the factory system led to the development of the 'laborers' in this country, who, with no support, were forced to work for wages that were far below the subsistence level. The factory system, therefore, started from the very beginning, upon a wrong foundation.

The story of the workers' struggle for existence by performing all the processes by hand, until the first machine was invented, is a story of struggle and victory, of travail and achievement, of the birth of a new era in the history of labor. It is a story of the power that has been unleashed by the machinery of the factory system, and it is a story of the power that has been harnessed and directed towards the welfare of the working class.

The history of labor, therefore, is a history of struggle and achievement, of the power that has been harnessed and directed towards the welfare of the working class.
