The Government in the Hands of the Bankers.

Editorial Comment.

The government of the United States is in the hands of the bankers, and this is an uncomfortable fact. It is a fact that no one can deny. The government is controlled by the bankers, and they control the government. The bankers are the masters of the government, and the government is their servant.

The bankers control the government through the control of the press. They have a complete control of the press, and they use this control to keep the people in ignorance. They do not want the people to know what is really going on in the world. They do not want the people to know about the plots and schemes of the bankers. They do not want the people to know about the way in which the bankers are ruling the world.

The bankers are the masters of the government, and the government is their servant. They control the government, and they control the press. They use the press to keep the people in ignorance, and they use the government to keep the people in slavery.

NO SOCIALISTS ON JURY

Several Socialist party leaders were among the 12 members of the jury returned in the murder trial of a Kansas City insurance company executive.

In an interview with the local press, one of the jurors said that he was selected for the jury because he had been a member of the Socialist party for 10 years.

The defendant, Jack Smith, was charged with the murder of his wife, who was found dead in their home.

Jury selection was held in a small room located in the county courthouse.
