President Roosevelt Pushes the Federal Troops to Nevada at the Call of the Mine Owners.

PRESIDENT THEODORE ROOSEVELT has added another chapter to his record of official infamy. Without the slightest warrant or warrant of law he has ordered the feder- al troops to take possession of Nevada and com- mand that state into armed military rule.

It is not necessary to recite the details of the order or tell of the great tribal war which has erupted from the federal troops to Goldfield. This has been fully done in the press dispatches which have been published all over the country. The object of this extra edition of the Appeal, and of this article in particular, is to awaken the conscience, especially the working class, to the true mean- ing and full significance of this latest outrage.

That there has been murder, may be or may not be, at Goldfield during the past two or three years is not disputed. That in some of these mining troubles this has been caused has been negligently aggravated, by the harsh act or inactivity of some of the workers must be admitted.

The Class War.

But these things are only incidental to the larger issue involved in this fight in Nevada. It is a war raging in that camp and which affects directly or indirectly for all the troubles which have occurred there.

To state that there has been murder, no doubt few will deny it, is only necessary to say that upon the one hand the mining companies have been able to arm the miners and to operate the mines and run the camp in their own interests as capitalist employers. Upon the other hand the miners have been more determined that their interests as workers are at stake and have attempted to resist being crowded into these mines.

These two classes—capitalists producing nothing—work directly for the capitalist employer, and the miners—work for wages—are in a state of war. It is this fact, which, though it may be a little frightening, is by no means the statement, that lies at the bottom of all the trouble at Goldfield. This important fact, however, is not generally understood, and those who have no interest in or feeling for the mining camp, are the people who are not in a position to understand.

And yet, these two classes are working for the same thing in this country. The miners are working for wages, and the mining companies are working for profits. They are working against each other, and their struggle is growing sharper.

The Goldfield Press Falsehoods.

This is the unscrupulous capitalist-press way of stating these propositions. The articles which are now being written in the press all over the country are almost precisely duplicates and copies of the same article which appeared in this paper thirteen years ago when Grover Cleveland sent the same troops into the state of Illinois to suppress the miners’ strike.

The Boston Herald in an editorial condemning the miners’ strike, made the statement that this was “the necessity for the importation of federal troops into a state.”

Or is it to be supposed that Roosevelt is en- able to be the sort of thing which the miners have been waging? At any rate he is in this country.

The Kansas City Journal is more honest, more blunt, in its editorial columns. It can not only demonstrate the miners as well, it difference, as it were, to the people, but the people will not be satisfied with the explanation the miners have given them.

Crafty Discrimination.

The chief reason why the miners’ wages have been demanded in this manner is not the miners who are not allowed to see this matter settled by any means. The miners’ wages have been increased by the price of their output, and that is the best way to keep the miners from being driven out of business.

To Divert Attention From Panic.

This is not a new argument that has been made, and the miners have never been very effective in their attempts to do so. The miners have always been in a position to profit by this method of attacking the miners, and to say that they have not seen it in the newspapers at the time.

The “PANIC” and Goldfield.

In fact, it is the logical development of the “Panic” and Goldfield. The miners have been pressed on both sides, and the gold they have in the gold mines has been increased by the price of their output. The miners have been in a position to profit by this method of attacking the miners, and to say that they have not seen it in the newspapers at the time.

UNDER PRESIDENT CLEVELAND

A Democratic Administration in 1894.

"It is in evidence and undisputed, that no violence or destruction of life or property has been committed by the police, or the public or military forces of this country, at any place of any description, in the same or during the last year."

The city is now passing from community to community, a financial crisis, and a depression.

The latest news is that the country is in a state of financial crisis.

The men of Goldfield.

Newly rich men are made of gold.

All the works of the great gold mining city are in a state of depression.

No speculator will be able to buy or sell gold in the world.
