Victims of Leavenworth Bastile Have a Hearing

Appeal to Reason, Girard, Kansas,
May 6, 1911

The ultra-left press is not a new phenomenon. As early as the 19th century, newspapers like the Cincinnati Enquirer under the editorship of Horace Greeley, published radical and anti-establishment views. However, the term "ultra-left" has evolved over time to refer to more recent political movements that advocate for radical social and economic change.

In this article, the author describes a meeting between a group of victims of the Leavenworth Bastile and their supporters. The Bastile was a prison in Leavenworth, Kansas, where many political prisoners were held during the early 20th century. The meeting seems to have been a gathering of supporters and prisoners to discuss their situation and possible actions to gain their release.

The article highlights the sense of solidarity and determination among the prisoners, who are described as "hardened" and "determined". The author also notes the presence of a "radio station" where the prisoners could listen to news and receive updates on their situation.

Overall, the article provides a glimpse into the political climate of the time and the struggles faced by those advocating for social and political change.

Socialist Classics Free

*The Communist Manifesto* by Karl Marx and Friedrich Engels

*The大纲 of Historical Materialism* by Vladimir Lenin

The book, "Socialist Classics Free," is described as a selection of works by prominent socialist figures like Karl Marx, Friedrich Engels, and Vladimir Lenin. These works are considered foundational texts in the development of Marxist theory, and their availability as free resources is seen as an effort to make these ideas accessible to a wider audience.

The book appears to be published by a progressive or socialist organization, possibly aiming to promote the ideas of communism and class struggle as a means to achieve a socialist society.
