"The Appeal has reached its zenith. Without Wayland it will have far less circulation and influence."

"The Appeal to Reason is a menace to the workers and to our country, and the death of its founder paves the way for its end."

...The ABC of It...

**ANARCHY** is a capitalist condition. Capitalism sells everything on the market and the worker buys. If the worker can't buy it, he can't have it. If the worker can't have it, he can't live. Therefore, the worker must work. And if the worker works, he must be paid.

**CAPITALISM** must have an army, otherwise it would not be able to control the workers. The workers are the army of the working class.

**DESIRE** is the desire of the people to have a better life. The workers desire to live in a better world. The workers desire to have a better society. The workers desire to have a better country.

**EXPERIENCE** teaches us that when we have power, we have everything. When we don't have power, we have nothing. When we have power, we can do everything. When we don't have power, we can do nothing.

**GOODNESS** does not exist in a capitalist society. Capitalism makes everyone mean and selfish. The workers are always fighting each other. The workers are always competing with each other. The workers are always trying to get the best of each other.

**RATIONALISM** is a system of thought that is based on reason and logic. RATIONALISM is a system of thought that is based on facts and evidence. RATIONALISM is a system of thought that is based on the ability to think clearly and logically.

**JUSTICE** is the ability to make things right. **JUSTICE** is the ability to make things fair. **JUSTICE** is the ability to make things just.

**RELIGION** is a system of belief that is based on faith. RELIGION is a system of belief that is based on the power of God. RELIGION is a system of belief that is based on the power of the spirit.

If you have a question, you must think about the question and then answer it. If you don't think about the question, you can't answer it. If you don't think about the question, you can't answer it. If you don't think about the question, you can't answer it.

The Appeal Army Moves

"The Dynamiters"

The recent labor disturbances in the steel industry brought to mind the experiences of the working class during the depression of the 1870s. During that time, the steel industry was in a state of flux, with new technologies and production methods being developed. The laborers, or workers, were at the mercy of the steel owners who controlled the industry. The workers were constantly battling for better wages and working conditions, often resorting to strike action. Some of them turned to violence, using dynamite to destroy factories and other property owned by the steel owners. This led to a series of violent confrontations between workers and owners, with the workers often being the victims of the violence. The period of the dynamiters was a time of great upheaval, as workers sought to establish their rights and improve their lives.
Can a Common Laborer Educate His Children

BY AN AMERICAN AUTHOR

A Personal View of Wayland

Wayland, Kansas, February 11, 1913

I have often thought that the average American is a common laborer. He has never had the opportunity to learn how to read and write, let alone go to college. But, during his lifetime, he has worked hard and saved money, and now he is able to buy a house and send his children to school.

During the first few years of our marriage, we lived in a one-room cottage. Our only furniture was a bed, a table, and a chair. We had no money to buy books, but we somehow managed to educate our children. We worked hard and saved money, and now we have a house and a car.

The Army and the Rule

The Army has its rules, and I must follow them. I have never thought of deserting my country, but I do not think it is right to fight for it. I believe in peace, and I hope that someday we will be able to live without war.

The Rich Man's Plaything

The rich man's plaything is a luxurious yacht. He likes to take his family on long cruises, and he enjoys the luxury of the yacht. But, when he gets home, he finds that he is still poor, and he can never afford to buy a yacht.

Socialism Wins Again

Socialism will soon win again. The people are tired of the rich man's playthings, and they want something better. They want a government that will take care of the poor and the ill. They want a society that will be fair to everyone.
