A WORD OF INFORMATION

To those who do not know why the capitalist press is so eager to take the side of the conservatives and rant against the radicals during the past week, we have a word to say for years the department store clerks have suffered long hours and low wages at the hands of their employers, without any sign of low wages at the hands of their employers, without any sign of work, but to no wall.

work, but to no avail.

While some of the stores were ready to give up the Saturday night business, others, backed by the Chamber of Commerce, insisted on keeping open. We have shown that many of the girls and boys received as low as \$2.50 and \$3.00 per week for their work, and we believe that eight hours is all any worker should be compelled to put in for a day's work.

Reference of Ruffalo realized this condition of affairs and

in for a day's work.

The Socialists of Buffalo realized this condition of affairs and knew that the only way to remedy the evils was to organize the clerks into a union that would DEMAND a reduction of hours, an increase of pay, and the abolition of Saturday night work.

We also realized that others had made feeble attempts to organize these workers; others had tried to do away with the Saturday night work, but had FALLED.

We knew that it would be opposed by those who style themselves as conservatives; in fact, this element had proven positively tives proved themselves the real pessionists, taking the attitude that "it's couldn't be done."

The Socialists, as radicals, saw that the conversity was estimated to the control of the same control of the same control of the same couldn't be done.

The Socialists as radicals, saw that the conversity was estimated that the conversity was at the convention of the same control of the same co

press, stating that the Traces and Labor Council was not benind the strike.

Mr. Coleman knew that these poor girls were not acquainted with the labor situation in Buffalo, and that it was easy to deceive them. The scale in the stores were immediately posted by the bosses to the control of the strike that the strike them and they lost no time in telling the pressure of the strike that the strike that the strike the strike. As a result a large number of the girls returned to work immediately and all possible chances of getting out any of those that had not the courage to sacrifice a few days' pay in order to win a shorter work day and bettle wages were gone.

Undaunted by their loss there was a large force of those who refused to be thus beaten by treachery, and that force composed the flighting material of the strike.

Whatever is gained is due to the strength and fortitude of that band of stalwarts who had the grif and courage to stand by their course.

band of stalwarts who had the grit and courage to stand by their that band of workers has caused the department store owners to aboliah the Sturday night work.

They have forced the Sweeney Co. to grant the eight-hour day, notwithstanding Mr. Coleman's work of destruction. The girls took the radical method and did things at the right time. Had they negotiated and parleyed with the bosses for weeks and months before, it would have allowed the bosses plenty of time to hire stribebreakers to take their placed by the strike, and Buffalo would have had a strong clerks' union.

Notwithstanding the work of Mr. Coleman, the radicals have improved conditions for both clerks and drivers. We forced the old guard to wake up and will continue to do so.

Result: The department store drivers are organized in a union and were winning demands, and the clerks have a start that will result in a good union and the ciph-hour day in every store.

This man believes he has a perfect right to take other people's money and gets away with it is most cases, but when he is threatened with the loss of a couple of dollars is ready to cry like a baby.

This same mountain of flesh under-tripall takes to tell the workers in his paper that the extilters' "made one serion mis-take when they allied themselves with the Socialist element of the labor move-ment of Buffalo."

We do not fear that the working class the will heed what he is apt to say, and

NO SPORT

Socialism is no sport for idle minds, it is for the beginner a hard and difficult study and, when once understood in its true sense and full significance, a philosophy of life to live and to die by. And the Socialist movement is no joke, though some of our commendes seem to make light of its difficulties and problems. It is a world straugles and the expression of the life interests of the expression of the life interests of the movement, and he who takes part in it is called upon to devote himself to it neart and soul.

OUR DAILY

At a great expense to the Buffalo Socialist we published a daily paper all last week for the purpose of assisting the strikers of the department stores in the battle against the capitalist owners.

repartment stores in the battle against the capitalist owners.

Owing to the fact that we lack the money to procure facilities for a daily at present, the cost in labor and money to those responsible for its production was very great, but we do not begrudge the effort. We are here to fight the battles of the workers, and we felt that during the brilliant uprising of the past two weeks it was our duty to issue a paper that would plead the cause of those who have suffered the sting of the class struggle and had the manhood and womanhood to revolt.

issue a paper that would piead the cause or those who have suffered the sting of the class struggle and had the manhood and womanhood to revoit.

We knew that the so-called conservatives would try to insimate that we did not back them up in their work after turning it over of this five were not on the job, but we have proved to the workers of this two are behind them at all times, no matter what happens. We know the strength of class solidarity, and we will fight the common enemy, the capitalist class, at every opportunity. We have no time for perty squabbles, there are too many big things to attend to, but if any individual stands in the path of progress of the workers' interests, let them beware.

We are well pleased in the way the public patronized us, and it goes to show the necessity of a paper of our kind. It has encouraged us to go ahead with the work, and we hope that in the near future we will be in a position to give to the workers of this city a daily paper published in their interest.

So long as you depend upon someone else for a job you are not free man, bu' a slave.

The aim of the Socialist Party is to bring about a system that give everybody a chance to own his own job.

NOT THE ONLY ONES

Since the revival of the labor movement in Buffalo we have not had much room to give our readers the news of many of the big strikes going on in other parts of the country.

nies going on in other parts of the country.

Buffalo is by no means the only city that has workingmen out strike. Some great battles are being fought by the workers at a time, and every one of them are bringing the working class to realization that the only real remedy for the whole thing is

That the capitalist class is concentrating its energy in preparation for that who when the control of their toil is apparent. Everywhere the manufacturers' associations are gathering all their strength, as in Buffalo, where IA. A Meldrum, as its president, is campaigning at present for members.

The banks are now so organized that they can demand almost any legislation they wish, and it is their desire to pass further laws that will make them the practical rulers of the country.

All these things are proving every minute the falsity of the claim of those who would deceive the workers with that old story about the 'identity of capital and labor.' These influences are making the breach between capital and labor greater, and everything that is good for the capitalist is bad for the worker, and the worker is getting wise to it.

The more are making the breach between capital and alabor greater, and everything that is good for the capitalist is bad for the worker, and the worker is getting wise to it.

The workers see their chances to live getting poorer and poorer and become desperate. Something must be done, and, realizing their weakness as individuals, they organize and strike collectively.

What we want to do is to own the jobs ourselves collectively. We produce the goods and the capitalist owns them. The capitalist gets everything and does nothing. We do everything and get nothing.

The Socialists want those who do everything to own everything and get nothing.

nothing.

The Socialists want those who do everything to own everything. We workers produce everything collectively. Let us own everything collectively. That's the remedy.

Will you throw away your vote on election day by voting for the men that called out the police and militia to shoot you down during the strike?

WHERE WE STAND

WHERE WE STAND

The last few weeks has proved to any working man with his eyes half open the possibilities for organizing the workers of this city. Within the short the hornous properties of the city within the short to be the case before in Buffalo. Who is responsible for it?

Did you stop to consider that point?

Well, if you have not noticed it, we will call your attention to it, and believe that you will agree with us.

From the inception of the Buffalo Socialist we began to pave the way by telling the truth in regard to conditions and wages under which the workers of Buffalo were forced to labor.

Wherever we could obtain this information we set to work to inform the public, and we did not need to exagerate, all that was necessary was the truth.

We told of the conditions and wages on the International Rail-way and brought home to every one of the men in the employ of that company the necessity of organizing, finally culminating our efforts in a mass meeting of the workers and pulling off the most secondary.

No time was allowed for the bosses to secure strikebreakers in advance, and those that were induced to work were worse than none. The expressmen forced through the same stages, but without an immediate strike, but as soon as the express companies began "firing" union men, these men also called a strike and are now out fighting like tigers. They deserve to win, and we are here to back them.

Our reputation for organizing having been established, we were overwhelmed with letters for aid in this direction, until the active in members of the Socialis Party hardly know what a good night's rest means.

Our heart job, was the department stores, which were always and our properties.

RADICAL DEMANDS: Life, Liberty, Happiness

RADICAL DEMANDS: Life, Liberty, Happiness

The department store cirls by their brave fight for better conditions have put to shame many older
and more experienced and stronger workers who could not as yet moster courage carough and selfreliance enough to organize themselves of join existing organizations of their fellow workers and
care in the control of the course of the courage organization of their fellow workers and
care in the course of our country had the spunk those girls displayed, we should never
pave us an inspiring example which should not be wasted. They struck at evils which it should have
been the duty of society at large to exterminate long ago. They opened the battle which will never
cease until every working woman and every working girl in the United States, as well as in every other
civilized country, will receive wages sufficient to afford them a decent living. This may be a very
radical proposition in the eyes of the journalistic hirelings of organized capital; but so was, and still
is, the proposition of the Father's of our country, that life, liberty and the pursaint of happiness without the possession, or the possibility to obtain, the means neaamong the indicable rights of every human being. And can you imagine a decent life, the full enjoyment of liberty and real happiness without the possession, or the possibility to obtain, the means neasary for the satisfaction of the needs of body and soul!

The women and daughters and sisters of our well-to-de fellow citizens would feel very much outraged if they were asked to live just a single week under conditions such as those which the depart
ment store girls and humdreds of thousands of factory girls, are compelled to live all they ear round
and many years. They never think it radical on their part to demand merely for pocket-money amounts
and sendent of the society entertainments cost more than the average working woman earns
in ten years of arduous, soul-destroying labor.

THOUGHTS OF THE WORKER

All things must have had a beginning, so there can have been no first cause, for causes. Thus we are driven to the conclusion that the universe, which contains all existing things and is the expression of all powers and forces and processes by which and things live and have their being, is all things live and have their being, is uternal. The very thought that there was a time when nothing existed is untainable, for we cannot even have any conception of space and time without highest had processes of life of some kind or other.

The expression forced through the same stages, but without an immediate strike, but as soon as the express companies began "fifting" union men, these near also called a strike and are now out fighting like tigers. They deserve to win, and we are here to back them. Our, reputation for organizing having been established, we were overwhelmed with letters for aid in this direction, until the active members of the Socialist Party hardly know what a good night's rest means.

Our next job was the department stores, which were always considered impossible, and already concessions have been made by the proprietors which assures the universal eight-hour day in all the stores of this city and no Saturday night work.

We feel that we have "started superthing" and intend to continue the work. No Socialist ever thinks of defeat, but goes straight and the stores of this city and no Saturday night work.

We want this city to be one of the best organized labor towns on the continent and will work to that end.

Solving can stop it now that such a good start has been made to organize on the continent and will work to that end.

The work mast continue or we will know the reason why.

We want to organize so that we case make DEMANDS, and suggested and the continuent of the work of the control will be:
