THE CAPITALIST TREASON

By H. W. B. MACKEY

The Wall Street Journal reports that the highest levels of the government, military, and intelligence agencies are being targeted by a new series of cyberattacks. These attacks are believed to be the work of a group of hackers known as "The Anarchists," who are seeking to disrupt the economy and bring down the capitalist system.

The attacks have been relentless, with targets including banks, energy companies, and major corporations. The hackers have used advanced techniques, including malware and ransomware, to gain access to sensitive data and disrupt operations.

The government has responded with a series of countermeasures, including increased surveillance and the deployment of cyber defenses. However, experts believe that the hackers are one step ahead, and that the attacks will continue.
