POPE'S ASTIC ORDER; CENSO.: CATHOLIC PAPERS

Rome, Sept. 16.—Alarmed by the spread of extreme liberalism even among the Roman Catholic clergy, Pope Pius X. te-day issued an encyclical in condemnation of "modernism," bit terly attacking the ideas of the new theology.

He said: "Modernism is a peril for the church. Its reforms in faith, philosophy, theology and history are all errors and drive those who believe in them to atheism. Boundless curiosity, pride of individualism and disregard of true Catholic knowledge and discipline actually have spread modernism among the clergy."

The encyclical decrees that philosophy and theology bereafter must be taught in the Catholic schools and universities in the cumplete spirit of the Catholic church and in accordance with the rules of the church.

It is decreed that all tenchers imbued with the spirit of modernism must be dismissed and bishops must compel the clergy and the faithful to abstain from reading papers inspired by the spirit of modernism or advocating the new theories.

A board of censors is to be established in every bishopric to revise and edit all Catholic publications.

The ecclesiastics are forbidden from sending papers through the mails or otherwise directing them without the consent of the bishop. COMPANIES SHUT

Telegraph Companies Are Tied Up Tighter Than at Any Time Since Strike---

End In Sight

News was received in Chicago today to the effect that the Western Union and the Pestal Telegraph offices at Denver, Colo., have been closed, locked up tight and all business in that city abandoned. The Western Union had three men in its Denver offices, consisting of the manager, the wire chief and the chief operator, and they have been brought to Chicago to help but here. This means a desperate condition of affairs on the part of the companies, and is one of the strongest evidences that could be adduced that they are tied up worse than ever.

MASSMEETINGS HELD.

The operators held a big massmeeting this afternoon at the Revere house, on the north side. One of the big features of the affair was the appearance of Miss Margaret Haley of the Chicago Teachers' federation. Besides giving the strikers words of cheer and encouragement she took a whack at the proposed new charter.

Prices advanced horizontally on, all grades of ment. The order went out from the headquarters of the packers saturday night to increase the prices on pork, beef and mutton from 1 to 4 cents a pound.

Retailers could not get carcasses at the opening of the Monday markets without paying the advance.

Fork jumped from 1 to 13-4 cents. Mutton went up 11-2 cents and beef was sold at from 1 to 4 cents advance. The slighter increase was on chuck and rump steaks; the highest prices on porterhouse steaks and choice cuts.

Harrisburg, Ua., Sept. 17.—Dairy and Food Commissioner Foust has sent to Frofessor Frear of state college one of the leading pure food experts of the country, samples of seventy-five brands of breakfast and other patent foods for analysis.

These samples were taken as a result of an agitation to know what was in them, which began some time ago. The samples were secured all over the state, every brand known having been taken and Professor Frear will ascertain if they are true to name, if chemicals have been used, whether they are bleached and what they contain.

This is one of the most important works undertaken by Mr. Foust and will clear up questions which are of long standing. The charge was recently made to the department that corn staiks are used in some of the patent foods.

GIRLS START AND STOP AT TAP OF BELL, LIKE AN ENGINE

Some of the women and girl workers of the establishment of Albert Pick & Co., 199 East Randolph street, manufacturers of bar fixtures, are indignant over a new arrangement of the toilet rooms on the third floor.

The partition has been cut down so that a person's head and shoulders are plainty visible from the outside, and a girl or woman who is inclined to be particular about her personal make-up cannot spend too much time before the mirror without a "calling down" from her "boss."

Manager M. L. Brede was seen by a Daily Socialist reporter yeaterday afternoon. He explained that the women workers had "abused the privileges" allowed them until this step was absolutely not provided the privileges allowed them until this step was absolutely not provided the privileges allowed them until this step was absolutely not provided the privileges and much. At 1 p. m. the bell again calls them to work and at 5:30 p. m. it rings from the bell starts the force to work at 7:30 a. m. It rings at noon and 1 p. in the same as for the office force, and at 5:50 it notifies all to "wash up." If any finish this operation before 6 o'clock they cannot leave until the bell rings again at that hour.

Los Angeles, Sept. 17.—The Mexican labor agitators who have been persecuted and pursued throughout the linited States by United States officials, backed by American capitalists, who employ labor in Mexico, were released from full here.

But they were immediately rearrested on the charge of murder. These men, Antonio Villareal, Ricardo Flones Magon and Librado Riviera, have been arrested a score of times and charged with every crime, from not paying their, debts to plotting to murder President Diaz.

They had been held here for three weeks on the charge of criminal libes and resisting law officers. These charges could not be made good and

OPERATORS LOOK FOR HALL

FREE HEADQUARTERS FOR OPERATORS.

A meeting place for Chicago telegraphers is here offered!

The Chicago Daily Socialist building has two floors, each 100 by 40, that are not we king. They are hereby offered to the striking telegraphers, free of cost, as a meeting place.

There is one condition.

The building laws will allow only a limited number to gather in the protection of the strikers

If the offer is accepted, the operators will see the building depart-n and learn the regulations and see that they are obeyed to the letter. The number is 180 Washington street.

Telegraphers were amused yesterday at the reports in the Chicago morning papers that the strikers had left trades Union hall, at 55 North Clark street, because some of those now out had seen the "33 bhost."

They thought the papers, like the telegraph companies, delighted in reminding the strikers of "83, when the telegraph companies, addighted in reminding the strikers of "83, when the telegraph companies, addighted in reminding the strikers of "83, when the telegraph companies, and the union was broken up by the Western Uh..."

They do not seem to be afraid of Uhlich's, even if the '33 strike was lost that the typos had made a winning fight from this hall.

There are two reasons why this story

was broken up by the Western Un. In company.

There are two reasons why this story is untrue. First, the strikers of 1883 used Uhiloth's hall, which is close to Trades Union hall, and second. Trades Union hall is too small to accommodate the present army of strikers when they assemble in massmeeting.

Old timers who went through the strike of twenty-four years ago say that they see no ghost of '83 around and sirke headquarters of the present and sirke headquarters of the present day, and say there is no comparison tetween the two strikes.

The strikers meet in the corridors of the Revere house today, on the second floor.

Dai Jones, who is active in securing another meeting place, said that halls seemed unusually hard to get, and sevend on any terms. He believed the Western Union and Postal companies had taken steps to prevent them from his hau.

A SUCCESS

Fifteen hundred enthus astic workers filled Garrick theater Sunday morning at 10:20 o'clock to 'asten to the lecture delivered by A. M. Simons on the work of the international Socialist congress at Stuttgart.

The lecturer described the first day of the great congress, when the delegates and trades unionists marched to the Volksfestplats, outside Stuttgart, and literally filled the acres of space of the open parade ground.

The various questions taken up by the congress, trades unionism, militarism, colonization and wornan's suffrage, were outlined.

"One of the great lessons of the congress," said Simons, "was that the Socialist parties of the world that are most alive are no longer mere theoretical parties, but have become great organizations for action, taking part in every struggle of the working class and warms the factory ivery struggle of the working and waging the fight at the

woman suffrage in every country of the world.

Speaking of the discussion on militarism, Simons said:

"Nothing in an, hall of any parliament of the world could have equaled the magnificent speech of Bebel on militarism, and when Bebel said that such was the oppression of modern fullitarism in Europe that sery army defeats its own country before if has marched to the borders every war office of Europe sat up and took notice and the capitalist press of Europe was filled with the Asikary discussion."

Numerous questions were asked at the close of the meeting and throughout the lecture the audience was regaled with the many amusing incidences that enliven the serious work of the congress.

the congress.
Financially the Garrick theater meeting was a success for the Daily So-cialist. Over \$300, including the collec-tion of \$85 and pleages amounting to over \$100, were cleared for the benefit of the Daily.

WANTED TO AID SCIENCE.

This was the first intimation any of Mrs. Martyn's friends had that she had tried to give her life to science. Sometime ago Mrs. Martyn wrote the following letter to Professor Poe:

"This morning's papers tell of your wonderful invention and I will be gisd to offer myself for the human experiment. I am a very healthy woman, 2s years old, and trust you will seriously consider my offer."

Professor Poe did not seriously consider the proposition, but finally decided to answer the letter, not knowing that Mrs. Martyn had since died. At the time she made the offer she was living at the Saratoga hotel. Later she moved to other apartments, where she died. It is understood that she was wealthy.

Work, Patterson and Others Made Saturday Night a Warm One: Charter Ripped; No Arrest are Undertaken

Soap boxing apparently has won. The police have stopped interfering with the Socialist speakers and indications are that the Republican ma-chine does not care to get into the limelight as attempting to suppress free speech

Saturday night John M. Work, So-clalist writer and member of the So-clalist mational committee, spoke at Clark street and Chicago avenue. Two miles north on the "raid" corner—Al-dine and Clark—J. M. Fatterson deliv-ered a soap-box, speech that continued longer than an hour and no police ap-meared.

longer than an hour and no police appeared.

Hundreds of persons aurrounded the speakers and listened to the working class side of the political controversy. The Young People's Socialist league escorted Work to his box. When he was well under way a strong detachment was dispatched to Aldine and Clark streets, where Patterson, all alone, was holding forth. The young guardsmen and "guard women" were ready je fill the places should either of the speakers be pulled from the box. But the police and the meek "Johnson" falled to make their appearance.

Throughout the city street speaking continued and County Seretary Fraeneker says he has had no reports

Fraenckei says he has had no reports of trouble anywhere. TESTS WERE MADE.

In order to test this present police interference yesterday three members of the T. P. S. L. whit our speaking.

The first place of attack was Forty-seventh street and Ashland avenue, where they tore the charter to pieces and ridiculed the police force to the last degree. After two hours of this they picked two subscriptions for the Daily and returned to town.

In the evening at Aldific and Clark streets, the now famous corner was chosen as a good place to do some work. On reaching there one of the number went in a saloon for a box. A Few of the Happenings of the Day That Are Somewhat Out of the Ordinary

Here are a few of the strange, un-usual or odd things happening in Chi-

Martin A. Knapp, chairman of the interstate commerce commission, declared that co-operation, not competition, is the hope of the future. He made this statement at a meeting of the American Association of Freight Traffic Officers Saturday. He says the anti-trust act, if observed, would bring about chacs and make the situation so hopeless that it would be pure savagery. He said the ultimate end of the theory of competition under present conditions in the age of steam, the telegraph, the telephone, electric light, etc., would only mean ruliation and extinction for the weaker party in endless procession. Cooperation, therefore, is his slogan. He words supervision, which he believes is essential, but says he does not mean that it should consist of government ownership or Socialism. Thus does not mean that it should consist of government ownership or Socialism. Thus does not mean that tendencies.

SHERIFF'S OFFICE PROTECTS JOHNSON

Protection for Julius Johnson, the criminal court bailiff, who with Municipal Court Clerk Herman Carl wantonly assaulted Joseph T. Burms and James Bly Sept. 5, is alleged to be the program of Sheriff Strashelm's office. It has also developed that Deputy Johnson is, or was, the proprietor of a tough saloon. He could not be found yesterday, but it has been ascertained that the has been bragging about the pull he has with the sacriff's office and that no one will get his job.

When asked about the matter the sheriff is reported to have said that Johnson's case was being considered. He has been suspended, but the sheriff could not say that he has been cut off the pay roll. He has put the investigation into the hands of Chief Deputy. Charles W. Peters, and Peters, so Johnson claims, le such a close friend of his that he has no fear of his job being sattracted from him. In the meaning the two men who were assaulted by the officers continue to assert that it was malicious and that if there is any possible way for redress they mean to have it.

High schools and universities are to have a newspaper. The Chicago Daily Socialist will begin shortly to publish a department devoted entirely to the interests of high schools. High schools students will be the correspondents, and from their ranks are to come the men and women who will manage the great Socialist press now in the course of construction. Volunteers from schools not now covered are needed. All those who desire to take part in this entemprise for their own fun and profit and for the building up of a lively school spirity should address the ly school spirity should address the style school spirity should address the String of Chicago. Enlisting the Young

Some one said, "Give me the children until they are ten years old and I care not who has them after that."

Some one else has also said, "No great generalization is wholly true—not even this one," and we suppose that it is possible to over- and looked at me uncertainty. Then estimate the influence of early impressions. It is certainly true that early impressions can be changed, and that men come to see new truths and make new decisions after they have attained to manhood. Otherwise there would be little use of Socialist propaganda.

But it is also true that in the grip which early impulses retain upon young minds capitalism finds much of its strength.

Until in recent years but little attention has been paid by the Socialist movement to those who had not reached the full maturity of manhood and womanhood. Today a new impulse is sweeping over the Socialist world. Not alone are the very young being reached with Socialist "Sunday Schools," but a special effort is be- ute. ing made to enlist those who are just entering into the fullness of strength and energy.

Here we are striking at a vital point of rulership. For ages the master class has sought to capture the fancy and the enthusiasm of the young and bend them to its purposes. With the glare and glitter of flags and drums and uniforms and medals it has drawn them into the military net and taught them to murder their fellows that rulership and exploitation might prevail.

The eves of the youth have been dazzled with the prospect of the conquests that lay before him in business. He has been cold of the countless opportunities to rise. The magazines are filled with to dress this morning and found "advice" that is intended to delude him into the belief that the world lies at his feet awaiting his coming.

Hitherto these means have been highly successful. The larger portion of the young people of the working class are defenders of the existing society, or else they are so thoroughly absorbed with amusements that they seldom have a sober thought upon anything. Only when the stern realities of the shop and factory have dispelled their dreams do they awake to rebellion against the conditions that have condemned them to industrial slavery.

The last few years has seen the growth of an organization of the young and their enrollment under the panner of Socialism that promises much for the future.

At the International Socialist Congress at Stuttgart there was an auxiliary congress of young Socialists that was one of the most inspiring things connected with that greatest of labor gatherings.

Reports were, presented from Belgium, Austria, Hungary, Bohemia, France, Germany, Switzerland, Holland, Italy, Spain, England, Bulgaria, Sweden, Norway, Denmark, and Finland, while the of concern. existence of similar organizations in other countries was noted.

The two leading objects aimed at by these organizations are education and fighting the military spirit. In the countries where there is conscription, great processions and demonstrations are organized at the time of the annual drawings and the newly drawn soldiers are urged not to forget that they come from the people and loughby." he added when I had finguist return to them, and should therefore not permit themselves to isseed, "Williams must be in a bad way, must return to them, and should therefore not permit themselves to be used against their fellow workers. Such work as this is not without its element of danger, since it strikes at the very heart of militarism, and already a long roll of young Socialists have suffered imprisonment and fine for daring to try to prevent organized murder.

On the educational side some splendid work has been done in training and drilling of men for speaking, writing and working in the army of Socialism.

ALREADY MORE THAN SIXTY THOUSAND YOUNG WORKERS HAVE BEEN ENROLLED IN THESE ORGANI-ZATIONS, AND THEIR NUMBERS ARE INCREASING EVERY HOUR.

In Sweden the organization of the young forms a flying squadron that distributes hundreds of thousands of Socialist leaflets. In Bohemia they are fighting for better conditions for apprentices. In many nations they have organized gymnastic corps that serve the Socialist cause while ministering to the health and enjoyment of the

Twenty-two different periodicals are edited and circulated by and in the interest of this new movement, not counting a number of annual publications issued regularly at the time of conscription, in connection with the anti-military propaganda.

Here is a movement that is bound to mean much for the future. It is a movement that is gaining for the proletarian battle the same energy and enthusiasm that has for ages done such valiant service for the ruling class.

It proposes to offer to the youthful warrior an opportunity to expend the same exuberance that, devoted to militarism has bathed a world in blood, in the work of freeing the world forever from the curse of bloodshed

The cause of labor, of Socialism, of a world freedom, offers all neroism and sacrifice that are to be found it. And we all thought he was laying in the world of arms or of industry. There is a grander patriotism in the struggle of the working class than in the commercial conflict of robber nations, and the opportunity for enthusiastic expenditure and she's in about as bad shape as any of energy in co-operative effort is something to stir the blood far more than the sound of flapping flags or rolling drums.

This movement is but beginning in the United States. It is bound to grow and become a force. It will unite the school, the university and the work shop. It will give the men and women that will be needed in the days to come. It will train them until their work will be effective. It will furnish the most active, enthusiastic, energetic portion of the Socialist army.

There is little fear that an organization of the young will become stuck in the bog of dogmatic doctrine and forget the doing

The young love a fight more than a phrase, a battle more than a book, and are fitted for combat rather than counsel. They will bring just the element that is most needed into the working class

The work of organization of the young should be taken up and pushed until it shall reach into every corner of the country. In closest co-operation with and subject to the larger Party organization they will play no small part in the stirring days that are

The Daily Socialist offers its columns to be used in any manner that will further the work of organizing the young for Socialism. Let us have the names of those who wish to form new organiza-

tions—the news of those organizations already formed.

Everybody looked.
"Why-its Williams!" they all cried.
"Why, so " 4," he said. "How very odd."

And he glanced around at me with a smile that was childlike and bland.

It was three months later to a day when we next saw Williams. He came in one afternoon, all tanned and browned—for the first time for many years with some natural color in his face.

He passed at once into the president's office, but waved his hand to us as 'te disappeared from view. The cashier, who was in there at the time, was good enough to tell us later what occurred.

After the usual-or, rather, unusualgreeling from the president the gradi-dent asked Williams to take a seat Villiams did so.

"Why, yes, Mr. Williams." he re-sumed aloud. "Yes, of course. The duties of a private secretary are, of course, well understood. He must look generally after the details, you know, and then he must—well, yes, he must look after the details. That is about the scope of his duties—to—to look after the details."

Harmony at Stuttgart

One of the surprises which met the American delegates to the International Socialist Congress on their return home was to learn that the Congress was one long series of rows and was several times on the verge of

This falsehood was particularly foolish on this occasion. There have been plenty of Socialist gatherings, and International Congresses, for that "I've got it!" he excla med. "Here matter, where the discussions were so heated that an outsider might have been pardoned for thinking that the body was about to explode into as

many divisions as there were delegates. . To be sure, these often expected splits seldom or never appeared, which, lowever, never prevented the capitalist press from heralding them and

describing the fragments. But at Stuttgart it was altogether different. Over and over again delegates remarked on the almost chnormal harmony of the proceedings. There

was never an occasion when anyone even hinted at division. With very few exceptions the reports of the committees were unanimous. On the especial question over which the enemies of Socialism an-

nounced that the Congress was forn into dissenting factions-militarismthe committee brought in a report which was adopted without discussion Herve, who represented one extreme wing of the anti-militarist idea, and who was certainly in a appeless minority so far as many of his positions

are concerned, was so well satisfied with the resolution as finally formulated that he voted for it with both hands Immigration was another subject which was long discussed and on which there was considerable difference of opinion, but on which the committee finally reported unanimously, and whose report was adopted without

disserting vote. The report of the committee on woman's suffrage found a single vote in opposition, after several days of discussion.

The trade union proposition was also accepted, with an insignificant opposition, and at no time was there any general cleavage line concerning it, The only question that was fought out on the floor of the Congress was

that of colonial policy, but to imagine a Congress of Socialists dividing oversuch a purely theoretical question as the attitude toward colonization requires a stretching of the imagination to an extent only possible in a capitalist editorial room. The fact is that if there was any point on which the Congress deserved

riticism, and the point on which it was most frequently criticised by the delegates, was that there was almost too great a tendency to "harmonize" things and to smooth out differences rather than to fight them out and bring on a tes" of strength. Everywhere there was a willingness to concede and yield poin's of difference such as is all too seldom met with in S cialist gath It was an object of frequent remark that there were almost no divided

national delegations on the floor of the Congress. Hitherto there were always a half dozen nations that occupied the opening days of the gathering with their internal dispute. Nothing of the kind appeared this year, and from start to finish the proceedings were marked with probably greater harmony than was ever present at a political gathering of even half the size.

All of which illustrates the point that no foundation whatever is necessary for the erection of a mass of lies by the capitalist press.

I want to say a word about the red flag. Many Socialists are opposed to the red flag and many are in favor of it. Which are right? It is claimed that the red flag is the emblem of the not true of non-Socialists. To them it revolution, of assassination, of overthrow of the government, etc. Socialists have become so by stud

Socialism and not by means of the red flag.

Any flag other than the stars and stripes is invariably interpreted as a threat to overthrow the government.

may say, "do we not want to
overthrow the government." No, indeed, we do not. We are not fighting
the government. We are fighting capitalism. We are trying to obtain control of the government, which is in the
hands of the capitalists, who use it to

sustain them in robbing the workers of the 'product of their toll and administer it in the interest of the workers—to establish Socialism.

It is not necessary to overthrow the government in order to establish Socialism. On the contrary, we cannot establish Socialism peaceably and orderly in any other way than by means of the government. After we get Socialism those fellows who think they cannot be happy without the red flag can carry' one around all the time, if they so desire. But for humanity's sake, comrades, let the red flag rest for the present, as we have something vastly more important to attend to just now. We have the task of educating the voters of this country in the principles and philosophy of Socialism. This is a big enough job without trying to make it bigger by waving the red flag.

One who signs himself Ben Kallis sks the question, "Is Religion Opposed

In answer to that question permit me to ask another question:
"Does Ben Kallis mean the religion spoken of by St. James or the cant, hyprocisy and superstitution swhich seems to be prevaient (and not only seems to be, but is) in a great majority of the so-called Christian churches?"
St. James says: "Pure religion, undefiled, means to care for the widows, orphans and those not able to take care of themselves. Under socialism here of themselves. Under socialism here

means.

Let the repeat that religion of itself is not opposed to Socialism as a revolutionary force, as Socialism is the only system that will permit religion to become implanted in the hearts and minds of those who may choose to be religiously inclined.

Socialism in itself is a religion, in that it seeks to inaugurate a system that will assure to those who will partake of its benefits the best that is, and those who from any cause may be incapable of performing their share of work will have the assurance that they need not starve, and it at least will beach the principle. Is the Air Pure?

O we all realize that air coming from the lungs is poisonous—filled with foul gases? It requires but a few moments to charge all the air in a room of ordinary size with these retuse gases, if there is no provision made for the bad air to excape and fresh air to enter.

bad air to escape and fresh air to enter.

No one would drink water or taste food which had once been in the mouth and yet the great majority or persons are quite indifferent as to whether or not they are breathing air which has already done service in the lungs—their own or those of some one else. It is not a pleasant subject, but an important one, nevertheless, for it is scarcely more important to have a sewer system of a city carefully constructed that it is that people generally should

understand the necessity for ventilation

and how to secure it.

Since heated arises, some provision for the escape of air at the top of the house should be made when possible; it follows, also, that the purity of the air in the callar should be carefully looked after, and that the living rooms upon the lower floors should be well alred the last thing at night, in order that the air ascending to the upper floors should fet be vitiated.

fast the sir ascending to use upper floors should not be vitiated.

An excellent way to air a room when it is sought to avoid a draft is to secure a board as long as the window is wide and insert this under the sash—a simpla-kevice and not at all uncommon but leas universally in use than it ought to be.

As the cold weather comes on there is a tempitation to shut out the cold at the sepense of the purity of the air. While greater cold outside makes it waster for air to penetrate into a warm room than when there is less difference between the indoor and outdoor temperature, yet, except when there is an open fire, the air is exhausted much more rapidly when stoyes are runn its help exhaust the oxygen. Make a that sir is pure and the children was

Socialist Music

May I suggest that sometime in the near future that the Daily publish in full sheet music size "The Marsell-lajse," after first announcing their intention to do so, in order that all parties desiring a copy may order in advance. I believe this piece of nusic should be reproduced in every Socialist paper, so that we may make of it a "Tankee Doodle" of our own.

Suit jackets for misses are being fashioned in different leugths, according to choice, but the three-quarter, length is preferred. These coats are either single or double-breasted and are fitted into the figure slightly, on the popular Prince Chap lines. The back side-body seams running into the shoulder and giving the box want at the bottom are favored.

The large salior hats for misses, made short in front and wide behind are to be worn in felt for school hats for winter. They are simply trimfined with wide looped hows of self-colored ribbon and perhaps some added wines or quills or coque feathers. The musi-room shape will also reappear, and those turned back from the face are preferred for young girls.

The Dutch neck is not merely a summer-time fancy, but will be seen on the guinness worn with the pinafore frocks throughout the winter. It is a sensible fashion, because the 'throats of growing girls should not be com'ned in stiff, high bands. This styl, must be utilized-only on the guinnes, however, and not aftempted on the recks of wood gowns.

asks the question, "Is Religion Opposed to Socialism?" In answer to that question permit me

defled, means to care for the widows, orphans and those not able to take care of themselves. Under socialism there would no doubt be pensions for such, while, on the other hand, the brand of religion handed out today by its exponents has become commercialized to such an extent that it has cast its great leaders. Christ, Buddha, aside for those who now seek to do their dirty work beneath the cloak of those great teachers, who tried "to do unto others as they would be ve others do unto them," one of the great dictionaries has said that the ethics of Socialism and Christianity are identical.

If we can realize Christianity as the religion of the time and dispense with Confucius and Buddha for the time and age in whie! we live we can atone realize the inconsistency of those who cry, "Socialism is opposed to religion." Therefore religion must retainte and oppose Socialism.

Then we must admit that religion today is different from what if was at the time that St. James penned those words to provide for those incapable of providing for themselves.

The church as now constituted is absolutism personified, but will become democratic in so far as the majority of the church soing people have their eyes opened to the realization of what pure religion, undefled, really means.

Let fre repeat that religion of itself

It is not his craft or creed,
It is not the winged word
That springs from his soul to his dips.
at need.
And, flying is felt and heard;
But something down in us all
That makes us respect the man
Who says unto great and small:
"You've a right to great and small:
"You've a right to preserve and keep
Such things as the gods gave you:
You've a right to your hoars of sleep,
And the worsh of the things you do;
You've a right to the million or dime
That your brain or your brawn has
won;

won:
But hot in the length of time,
In, he light of the moon or sun,
Have you a right to a thing
That you steal or wring
From me, or any one."
