Will Force Trade Issue

. The free trade issue will be forced through the utter hopelessness of expecting a compromise between the insurgents and the standpatters, the rep resentatives of such industrial corpo-rations as are clinching their monop-olies through the aid of a high tariff. Under the guidance of Aldrich the duties on cotton gloves were increased and that on stockings cut somewhat, a result which caused much indignaresult which caused much indignation among the representatives of the department stores and the large im-

The main points at whic hreductions the tariff schedule-have been made in the lumber and steel schedules, the former because the forests of the United States are almost stripped and in the latter because of a combi-nation of superior natural advantages and the wonderfully effective organization of the properties comprising the United States Steel corporation. Am-erican steel is thus produced at suffi-ciently low cost to make all fear of foreign competition in the home market

Protective Taxes Higher

While the Payne bill was a revision of the tariff in an upward rather than a downward direction, the Aldrich bill still further increases protective taxes. The ad valorem tax has been raised from level of 44.16 to 45.72 by the Payne bill, and from 52.07 to 55.49 in the Aldrich bill. When certain schedules were considered yesterday there was a hot tilt between Senators Beveridge and

Aldrich, the recognized boss of the sensite, wanted to know who was lead-ing the "hetrogenious mass" which was opposing the tariff bill. H esaid that opposing the tariff bill. H essid that he could see a lot of privates, but not leader, unless from certain actions Beveridge might be considered the commanding general. Beveridge was teuched and said that he followed the lead of his own conscience and preferred that guide to any one which Aldrich could offer. Aldrich could offer.

MacVeagh's Speech Causes Stir

There was a spirited tilt over Mac-Veagh's tariff speech delivered in Chi-cago. Several members of the senate recalled that MacVeagh was a free trade Democrat when Grover Cleverecalled that MacVeagn was a free trade Democrat when Grover Cleve-land was elected and they took pains to tell the senate so. Beveridge rose to champion MacVeagh, whose food-stuffs have often been found to be

adulterated.

"Does the senator object to hundreds of thousands of such men coming to our party, especially when they included such splendid men as the secretary of the treasury?" inquired Mr. Beverldge.

Straus Says Bovine and Man Will Be Made Extinct by Plague

Budapest, June 8-That time and persistence in present mothods will cer. NATIONAL LEAGUE AMERICAN LEAGUE. fainly assure the extinction of the dairy industry and of the human race was the alarming statement made yesterday by Nathan Straus, the New ork philanthropist, who has been fighting tuberculosis for eighteen years. Mr. Straus read a paper before the in-ternational dairy congress, in session at the Vigado.

In Tuberculous Milk

Stating that the great white plague of tuberculosis persists and spreads among cattle and among people largely because of the white peril of tuber-culosis milk, Mr. Straus sald: "Tuberculous cows bear healthy culves and straightway infect them

with this disease through the milk that they give to their young, and when the calves are weaned these diseased cows supply the germs of the white plague to the human beings who use their milk. Thus we are inviting the extermination of the dairy industry and of the human race, for this plague is increasing both among cat-tle and among men, and it will increase like the spreading of a fire so long as the milk swarming with tubercle ba-cilli is used as food for calves or bables. There is a mathematical cer-tainty as to this fact.

would soon be regarded as a crime feed a young child upon milk that I not been pasteurized. I was op-istic. Intelligent farmers now regard it as folly to feed a calf or a pig with unpasteurized milk unless they know by the tuberculin test that the cow is free from tuberculosis, but Chicago is the only city in the world that takes such precautions to save its peo-ple from tuberculosis."

BOBUST VARIETY DURING 1909

Chicago's health is of the robust variety this year, according to the city health department's weekly bulletin is-

rent year has been entirely among children under five years of age, there being 274 fewer deaths at this age period than in the corresponding period of a year ago. Of this saving, 97.6 per one year of age.

FEDERAL REBATE LAW VIOLATED

Findlay, O., Paper Has Evidence That Two Roads Infringed on Act

Findlay, O., June 8 .- That two railoads and a stone company disregarded the federal rebate law in the year 1907, after twenty years of legislation and just after the \$29,000,000 fine had been rendered against the Standard Oil company, is shown by evidence in the hands of the Findlay Call, and which, so doubt, will be placed in the hand of the federal authorities.

One of trese roads is the Lake Shore & Michigan Southern and the other is the Lakeside & Marblehead, a road that is to all appearances owned by the Kelley Island Lime & Transport company and which is a connecting line of the Lake Shore road. The motive was apparently to give the Lakeside & Marblehead road an advantage over com-peting lines in the matter of hauling freight the routing of which was conrolled by the Lake Shore & Michigan

Knew of Its Violation

That officials of the Kelley Island Lime & Transport company knew that it was violating a law and somewhat feit the necessity of acting cautiously is shown in a letter dated April 1 of this year, which said:
"I think the better way to to on this

The shipment referred to was 600 yards of stone screenings for the Lake Shore & Michigan Southern Railroad company, which were to be hauled over the line of the Lakeside & Marblehead road from Marblehead. O., to Danbury, O. The Lake Shore had ordered the screenings and the officials of the Kel-ley Island Lime & Transport company could not exactly agree how much less than the regular rate of 15 cents a ton should be made by the Lakeside & Marblehead road.

Call Has Convicting Evidence

On similar shipments, as shown by a tissue copy of a waybill, dated November, 1907, and now in the hands of the Pindlay Call, it was shown that two cars had been billed at 8 cents a ton, sllowing a rebate of 7 cents to the Lake Shore road, and 13 other cars had been billed absolutely free of

The Interstate Commerce commission and the Thio Railroad commission do not allow a "construction tariff," and in no case must a through rate be less in no case must a through rate be less than a local rate, so there can be no question that this is a clear case of rebating in favor of the Lake Shore & Michigan Southern railroad and the compensation which this Lakeside & Marbiehead road was to get for hauling this stone at less than tariff rate is shown in correspondence between shown in correspondence between the officials of the Kelley Island Lime

& Transport company.

The wording of a letter dated April 2. this year, from W. M. Marsh, gen-eral superintendent of the Kelley eral superintendent of the Kelley Island Lime & Transport company, to A. Y. Gowen, purchasing agent at Cleveland, is not exactly clear, but there is no doubt that for the reduced rates given the Lake Shore & Michi gan Southern company, the Lakeside & Marblehead company would be given preference over competing lines for such other shipments as were under the control of the Lake Shore road.

sentence in this letter reads: "The

company point to the fact that the ar-fairs of the Lakeside & Marblehead road were controlled by the Kelley Island company. These letters pertain-ed especially to rates which should govern stone shipments over the Lake-side & Marblehead.

NEWS BUREAU IS PLANNED

New York. June 8. - Mrs. Carrie Chapman Catt, president of the International Woman's Suffrage alliance, has returned on the Minnewaska from London, where she attended the recent woman suffrage convention. One of the hopeful developments of the recent conference, Mrs. Catt said, was the organization of a great international suffrage news bureau

suffrage news bureau.

In the past it had happened that matters of importance to suffrage workers in one country were distorted when they appeared in print in another country, and because of lack or organization it often had been found impossible to get the correct version resisted.

The International alliance hoped to correct this. It now numbers twenty-one national societies, she said.

CATHOLICS WILL STOP SOCIALISM

Germans See Specter in Its Growth Inside Church; Plan to Check It

Williamsport, Pa., June 8. - The growth of the Socialist movement inside the Roman Catholic church could not be better illustrated than by the action of the convention of the German Cath olic societies here. The societies decided that Socialism must be stamped out and a committee was appointed to organize an active campaign against the spread of radical doctrines inside

CNATIONAL SOCIALIST PRESS BUREAU

Can't Check Its Growth

Socialism has entered the Catholic fold in such an insiduous man ner that it is very difficult to fight it except by thunderings from arch-epis copal thrones and by occasional out-bursts from the pulpit. Both of these attempts have failed to check the growth of the movement juside the church and hence the decision of the German Catholic convention here.

1 was decided that the work of all future German conventions of the state of Ponnsylvania should be directed against Socialism and its spread among the Catholic people. Incidentally the convention decided to adopt measures for the increase of the use of the Ger-

man tongue in America.

With the opening of the business session at Turn Verein hall resolutions drawn up by the committee on changes were adopted. It was decided that the work of future state conventions would be directed against Socialism and that all the resources of the order would be brought to bear in an attempt to combat its growing influence

To Work Among Prisoners It was further decided that it should

be the duty of each county organization to visit the different local pena institutions in their vicinity and to carry to the prisoners moral support and to extend to them sympathy cal-culated to mitigate their condition.

It was agreed that every effort would be made to increase the use of the Ger-man tongue; the latter language as the vernacular of the fatherland, being, it was claimed, the proper vehicle for the lessons as well as for the more staid and dignified pursuits of the clergyman and the schoolmaster.

VIEWS CLASSES "WITH ALARM

Judge Carter Opens Conference on Criminology by Citing "Menace"

Judge Orrin Carter of the Illinois Supreme court, speaking on behalf of Governor Deneen at the national conference on criminal law and criminology at the Northwestern University Law school, this morning, "viewed with alarm" the industrial and social forces which are clashing in society and making sport of legal interference with modern industrial evolution. While he did not mention them by name Judge Carter clearly showed what he meant by saying: "The greatest menace of today is the rise of classes and organizations, business and otherwise, which seem to think themselves above law and government."

Law Follows Behind

Nor was this statement the sole point at which the Illinois jurist touched modern social and industrial forces, for at another time he said: "Law follows civilization, but never leads it. We can not make society by legislative enactment. We can not put society on the procrustian bed of law, and, if society is too long, cut off a leg of society."

These statements were significant, as Judge Carter spoke as the representative of Governor Charles S. Denesn, who deftly sidestepped all discussion of things like "the indeterminate senfence." Among other things, in speaking of reform in judicial practice, Judge Carter said: "Lawyers and judges are too conservative. They are too apt to think that things are all right as they are and so should not be changed."

Too Many Appeals Seen

At another time, speaking of the law's delays, the judge said: "Many people blame the law's delays on the difficulty In securing pe. juries in criminal trials and they say that the responsi-bility rests with the trial judge, who fears reversal and so does not limit the questioning of veniremen. As I see it, the trouble lies in too many ap-President Abraham Harris of North

conference was then effected, with Jas. Hagerman of St. Louis elected to the chairmanship and Nathan McChesney of Chicago elected secretary.

Many Topics Discussed

During its sessions the conference will discuss through its departments 131 topics. The appointment of com-missions of alienists as part of the state machinery, the care of depend-ents while the breadwinner of a family is in jail and scores of other things will be taken up.

O'SHAUGHNESSEY PAYS HIS RESPECTS TO MAYOR BUSSE

In a speech before the North Side Woman's Suffrage club yesterday afternoon John Patrick O'Shaughnessey, who was formerly a tax expert in the board of review, paid his respects to the Busse administration and declared that the bankrupting of the city was absolutely unexplainable in the fact of the vastly increased taxes and the numerous other added sources of rev-

enue now enjoyed by the city.

The speaker declared that the tax rate had mounted from \$1.50 in 1906 to \$2.15 in 1908, thus adding millions to the city revenue, while the city was also receiving an additional revenue of nearly \$4,000,000 from the increase in saloon licenses and almost as much more from the wheel tax and other sources, all of which he declared was being dissipated without any return. to the city.

The shameless manner in which corporations shirk their taxes was also laid before the women, who were as-tonished at the figures presented by the speaker in support of his conten-

16-Year-Old Youth Tells Conversation Between Three Men on Street Car

Sensational "clews" to the solution of the mysterious death of Dr. John T Binkley of Evansville, Ind., who was found shot to death in the notorious Wellington hotel, came to Captain O'Brien's office at detective headquar ters today. The latest, according to the captain, was furnished by a 16year-old boy, who insisted that he had heard three men in a street car talking of the affair.

Boy Hears Murderer's Tale

According to the story told by th boy, whose name and address the captain will not disclose, one of the men told the two others that he had committed the crime, and when one asked how he had happened to shoot him, said that "when he went to open his vest the old man woke up and he had to shoot him."
When the alleged murderer was

ed about the revolver, said the boy, he remarked that it would never be traced, as he had bought it from a "bum." The boy also stated that they were smoking cigars when he over heard their conversation.

Woman Gives Another "Scare" Another "scare" upset the detective uresu when a woman called Captair O'Brien on the telephone and informed him that in letting go of a man, held for a day or so as a suspect, he had made a mistake. St. Petersburg, Russia, June 8.-The Port Arthur Benevolent society held a meeting here today and as a result of an investigation found a deficit of \$7,500 in the accounts of the society under the presidency of Mme. Stoessel. It was decided to lay the matter before the crown prosecutor. Mme. Stoessel is the wife of Gen. Stoessel, who was in command of the Russian forces at Port Arthur at the time of the capitulation to the Japanese. It was during that period that the deficit occurred.

THREE HEAD HUNTERS WHO KILLED CHICAGOAN ESCAPE

Manila, P. L. June 8.—The three natives convicted of the murder of Dr. William Jones, anthropologist of the Field Columbian musaum in Chicago, who was killed while studying the hill who was killed while studying the fill tribes some months ago, escaped from their guards while on the way to this city, where the death sentence was to have been executed, and are still at large. The prisoners were heing brought overland through the mountains of Nueva Vizcaya province to Pangasinan. They sluded their guards in the night and disappeared into the fongle.

As soon as the next constabulary station was reached patrols were sent out to follow the trail and these are still in chase of the fugitives, but their recapture is considered doubtful.

COMMON SENSE AND HONOR

When you see a baby hungry or sick common sense and humani- Ed Callahan of Breathitt tarian instincts dictate that you feed it or secure a doctor and nurse to attend to its immediate necessities without wasting much time inquiring into all the details of why it is sick or who is to blame for its hunger. When the baby's life is secured the next thing common sense dictates is to consider the best methods of making the child self-supporting and self-respecting and place the responsibility for its existence and condition.

The Chicago Daily Socialist is in more than one sense the child of a big section of the Socialist movement. You brought it into existence. You have kept it going for nearly three years and nursed it through most of the infant diseases which the Socialist press has from ambush early today and, it is bebeen subject to in every country.

The benefit picnic at Riverview park bids fair to furnish sufficient oxygen to pull it through this crisis. The sustainers' fund will probably furnish nourishment enough to keep it alive during convalescence, BUT WE WISH YOU, ONE AND ALL, TO UNDER-STAND THAT MORE SUBSCRIPTIONS IS THE ONLY fred. THING WHICH CAN MAKE YOUR PAPER GROW HEALTHY AND STRONG AND SELF-SUSTAINING.

REMEMBER, A NEW SUBSCRIPTION ALWAYS LES-SENS THE WEEKLY DEFICIT. So bear in mind while you are selling picnic tickets and signing sustainers' fund pledges that it put on the trail of the assassins, who, is your most important task to pick up a few subscribers along the

The maintaining of the Socialist press is the most important thing to be looked after at the present time. Without our press the future of the Socialist movement would be fearfully handicapped.

hundred into action you can easily make it unnecessary for future front page urgent appeals. Below you will find extracts from letters which have arrived the last few days bearing messages of hope and cheer to the Daily's staff, giving the command to us to go forward.

"Comrades of the Daily: I have read your appeals for help and assure you of my sympathy, but hard up as I am I know sympathy without cash will avail nothing, so I am sending you an order for \$1.50," writes Lester Geer of

The Thirteenth ward branch handed in \$5 Saturday for the Sustainers' Fund and promised to do it over again twice a month.

The Twentieth ward is in line and has a committee out securing pledges from its members to the Sustainers'

The biggest day in June will be June 27. The only place big enough to hold it will be Riverview Park.

Morris Eldredge, an old-time Chicago Socialist, in Seattle, sends in an order for a bundle of ten every day, which the local will sell at its street meet-

Street meetings in Chicago are in-creasing in number and interest, and almost every one of them results in new members and many new subscrib ers for the Daily. The new steplad-der stands have arrived and look as though they will be quite an improve-ment on the old (assigned soap box.

Have you sent in your name and nonthly pledge to the Sustainers'

Those of you who can't see your way clear to pledge something monthly to the Sustainers' Fund, because of financial stress should at least make a special effort to get a new subscriber once a month which will in the end be just as serviceable if not more so than a straight donation.

We want every Chicago Socialist to sell tickets for the Riverview Park plenic to as many friends as possible. We should add at least 1,000 names to the city subscription list the day of the picnic. You get your friends there and we will see that they are secured as subscribers.

Wireless psychic waves are now the order of the day. Be sure you send one from your brain battery to Riverview Park, June 27, no matter on what part of the continent you live. There will be 10,000 or 15,000 Cook county receivers there to record and interpret

F. H. Delm writes; Comrades of the Daily, enclosed find \$1 as payment of my June pledge. Don't think of giving up the fight; the Daily must live. The comrades in and out of Chicago will surely rally to your assistance.

"I sent two subs, yesterday and paid for them. Received your letter this morning calling for help, so am sending you doother dollar. My means are very limited, but I am willing to wear old clothes to help establish the Daily Socialist on a firm foundation." This is the message H. C. Mewerth, Sac City, Pa., sends to the Daily staff.

"Will be with you by wireless, June 27. In the meantime I am sending you a dollar to help hold out. Capitalism keeps me so busy with my work I harden by have time to think Will help when yer I can," writes C. L. Jones.

ON HNEAID LIST UN UNTAIN LIGI

The White City is on the unfair lis of the Chicago Federation of Labor. It was put there at the request of Dele gate Winkler of the American Federa tion of Musicians because of troubl with Creatore, who is now conducting a band at the south side amusement park. Creatore imports Italians every year and when they become informed of the union scale of wares and demand more money, they are discharged and new men hired in their place, according to Winkler who saked the services of the grievance committee to investigate. Luna Park, Jim O'Leary's place, where the musicians have had trouble.

Winkler made a hot speech against Creatore and a ked that union men withhold their patronage from the White City until Creatore's contract is cancelled.

"We want to make him hire union men or put him out of business," said Winkler. "Ridnap him and cut his hair," suggested John J. Brittain of the Carpenters' union.

(SPECIAL TO THE DAILY SOCIALIST.) New York, June 8.-The case of Ephriam Siff against the Socialist Labor party, which borrowed \$1,000 of Siff's money and then fired him out of the party when only \$500 had been paid back, the firing being accompanied by a refusal to pay back the other \$500 has been decided in the court in favor of Siff, who has been awarded the amount of \$765 and court costs to the extent of \$238.67, making a total of some \$993.

In August, 1902, Sift made a loan of \$1,000 to the Socialist Labor party, of which De Leon was the moving spirit. Of this amount \$500 was paid back to

of this amount \$500 was paid back to Siff. After the payment had been made it was found that charges had been preferred against Siff and he was expelled from the party. He then demanded the remainder of his loan, which was denied him by the Socialist Labor party managers, the party managers claiming that the executive committee was responsible and the committee throwing the blame back upon

mittee was responsible and the committee throwing the blame back upon the party managers. A suit in the courts followed with the result as above stated.

Incidental to the court decision awarding the 1998 to Sift the political record of Daniel De Leon was brought out. It was shown that in 1884 De Leon had been a stump speaker for the Democratic party, in 1886 a single taxer, in 1885 a Bellamy nationalist, in 1880 a Socialist and in 1898 a helper of the Tammany ring in New Tork. This record was only an incidental of the trial, but it had its effect upon the jury.

The trial further developed that the executive committee of the Socialist Labor party had no authority over the funds which had been loaned but that a referendum membership was necessary for their expenditure.

Where To Go There are 186,000 judicial election posters, the size of one page of the Dally Rocialist, ready for distribution throughout the city at the county headquarters. Call and set a bundle of them and see that they are placed where they will do the most good. The educational class conducted by the Chicago Socialist club meets as usual. The publication of a signed article does not mean indorsement by the Daily Socialist of thions expressed therein. Inclose postage for return of unused manuscripts.

An Indifferent Electorate

The most sensational fact about the judicial election is its lack of sensation. Its most interesting feature is the almost complete lack of interest shown by the voters.

For more than twelve years, in spite of increasing population. the vote of Chicago has steadily grown less. The vote of 1908 for president was less than that of 1896. The vote yesterday was less than half that of 1908. There were 414,000 voters in Cook county who were sufficiently interested to cast a ballot for president. There were 170,171 who took the trouble to express their preference for

The Socialist voters have shared this indifference. Although the percentage of Socialist votes was higher yesterday than at the presidential election, yet the falling off indicates a dangerous lack

It is easy to find excuses and explanations. In fact, there were few Chicago Socialists who expected a larger vote yesterday. It was generally recognized that with the extremely large percentage of removals since the last election, with the thousands of workingmen who had left the city looking for the employment which spring brings on the lakes and the railroads running out of Chicago that the vote would be light.

The fact is that nearly every vote that was cast for any other than the Socialist party candidates was personally brought to the polls by paid workers. It is impossible for the Socialists to have such workers. Its members cannot afford to leave their regular employment, nor are there any funds with which to pay for such professional workers.

These are the facts. What is the remedy for this condition?

There seems to be but one, and that is nothing startlingly new. It is simply to carry on an energetic house-to-house campaign of education prior to each election that shall awaken the voter directly to the interests which he has at stake.

The indorsement of the Federation of Labor, as usual, proved more of a hoodoo than a boost. Nearly all of the judges condemned were elected, and it is impossible to see where any benefit accrued

The fact is that the indorsement, like that of Gompers in the presidential election, was completely ignored. The only possible effect which it may have had was to add to the indifference of the workingmen, and perhaps to discourage some men from voting the Socialist ticket because of a feeling of divided allegians

If this latter result was accomplished, and it is pute conjecture as to whether it was, then it is one more illustration of the foolishness of such indorsements. In such a case the only rult of the attempt to "reward and punish" was to completely deil oy the influence of the labor vote and to make it appear as if the workers of Chicago are absolutely satisfied with "government by injunction."

Our Critics

The Daily Socialist welcomes criticism. No matter how severe the critic may be, or how abusive the language he uses his opinions are given careful consideration. It could not be otherwise. Of all papers this one must be attentive to the opinions of its readers, since they are also its owners and managers.

Moreover, no criticism that could be made would be more severe than those which are made daily by the editorial staff. No one is so conscious of defects and no one works harder to remove them than those who must bear the brunt of the blame and the injury arising from any defect.

But each critic must remember that he is but one of thousands changes. One of these complained that not enough attention was given to the union movement, and the other (without a signature)

and the first place no constitutional amendment is necessary. Some instances at half past six, amendment is necessary. Some instances are not six, and amendment is necessary. Some instances are not six, and amendment is necessary. who must be considered. Moreover, the critics do not agree. Monit filled its columns with union news. Incidentally this letter recommended that the present editor be fired and suggested another man for the place, whose main criticism of the paper since its beginning luxuries any oftener than is absolutely necessary.

This incident could be duplicated a hundred times from the correspondence received since the establishment of the paper.

Yet such letters are of value. They give a means of knowing mind of the readers and of guiding policy, even though they are of that slave be patronizingly given a bargain counter price?

I have heretofore suggested that the juster way is to provide that when the party members must pay the party members must pay the man pursue that a 10 or 15 the more concentrate their minds on the more party members must pay the more concentrate their minds on the more party members must pay the more concentrate their minds on the more party members must pay the more concentrate their minds on the market pay the more party members must pay the members and the slave pay that the party pay the more party members must pay the members and the slave pay that the pay the more party members must pay the more party members must pay the more party members and the slave pay that the party pay the more party members must pay the more party pay the more pay the more pay the mind of the readers and of guiding policy, even though they are not often directly followed.

The Daily Socialist is far from perfect. It has, however, shown its ability to fight the battles of labor. It has won some great victories. It has published hundreds of facts of interest to the workers which no other paper dares to print. It has put before hundreds of to join. This can be arranged by to socialist literature and no amendmen Socialist literature ever issued in the English language. There is scarcely a writer of any prominence on Socialism who has not at some time contributed to its columns.

Most important of all, it is a foundation on which we can, in the future, build whatsoever we will. Editors can be fired and new ones hired. Additional departments can be added. New fields can be invaded, new victories won, if we but make the best of what we now

. The task of the present is to maintain what we have, to improve it as fast as possible and to lay the basis for the greater things of the future. Without the present there can be no future.

SOCIALIST TACTICS

BY W. C. BENTON

The Socialist party can never win a , in harmony decisive victory in any of the large industrial centers of the United States without first gaining-in a general way at least—the sympathy and support of organized labor.

In other words, in these industrial centers the political movement cannot outrun the economic movement of the vorking class.

The political parties of the capitalist class are powerless without the cympathy and support of the economic organizations of the capitalist class—the corporations, trusts, manufacturers' associations, etc.

A political party representing the in-

main powerless until it gains the sym-pathy and support of the economic or-ganizations of the working class. Whether it be on the economic or political field, we must view all questions in the full light of the fact that it is

erests of the working class

the organized part of a class which represents that class.

Economics and politics being inseparable, it is therefore of the utmost importance that the economic and po-litical organizations of a class be in

izations, then hopeless indeed is the cause of the working class.

The most discouraging talk I have ever heard from Socialists is to the effect that the labor unions are hopelessly in the clutch of ignorant or con rupt leaders and that it is a waste of ime to try to do anything with them. Had there been much of this sort of

sentiment among the Socialists of Mil-waukee for the last few years, they would not have carried the city last spring by electing Comrade Seidel as alderman at large.

The statement that organized labor only includes about one-fifth of the working class of the cities, becomes of small importance in view of the fact that it is the organized part that is representative of the class. It should also be remembered that the organized part of the capitalist class is even smaller in proportion than in the working class

Economic evolution has brought us to the point where union men are ex-tremely susceptible to Socialist thought and if the henchmen of capitalism continue to turn these union men away from the Socialist ideals and logical importance that the economic and po-litical organizations of a class be in from the Socialist ideals and logical harmony with each other, and if the aspirations of the working class, it is political organization of the working only because the Socialists fail to seize class (the Socialist party) cannot get their opportunities.

THE DEEPEST WELL

The record for the deepest well in the world is claimed by a French newspaper for France. Situated at Ronchamp (Haute-Saone), the Buyer oil well is said to be the deepest tha has ever been sunk for industrial purposes. It reaches a depth of 310 feet. The temperature at the bottom of the well is never less than 115 degrees Fahrenheit when it is 50 degrees Fah-renheit at the mouth of the well. Apart from wells, the deepest boring on earth's surface is probably that of the Paruschowitz mine in Upper Silesia, tains a depth of 6,408 feet.

THE ROAD TO POWER

BY KARL KAUTSKY CHAP. VII.—THE SOFTENING OF CLASS ANTAGONISMS

(Continued from yesterday.)

It is only necessary to refer to the foregoing table showing the progress of railroad construction to recognize how little Arrica has been touched by this extension. To be sure, the length of its railroads during the years from 1880 to 1906 has grown from 4,600 to 28,000 kilometers, but what coes this signify beside the growth in Asia during the same period from 16,000 to 88,000 and for America of from 171,000 to 473,000. Even in Africa itself the lion's share of the railway building was not in the new colonies that have been established since the '80s, but in the old colonies and independent states, as is shown by the following

Length of railroads in kilometers:

Algeria	1880	1890 3.104	1968 4,906
Egypt	1,449	1,547	5,252
Abyssinia	1 457	2,922	5.812
Natal	158	546	1,458
Orango State		120 237	1.283
Remainder of Africa		919	6,985
Totals	4 607	9.356	98 193

Only 7,000 kilometers, one-fourth of the railroad mileage of Africa, less than even one per cent of the railroads of the earth, was constructed in those districts which, to be sure not all but in large part, have been acquired through the recent colonial politics of the great European powers. It is evident how little this colonial policy has had to do with the extension of the world market which has taken place during the last twenty years, or with the revival of production.

But this revival is very plainly connected with the opening of foreign markets, which has taken place simultaneously with the development of modern colonial policy since the '80s. Consequently the mass of the bourgeoisie connect the colonial policy with the improvement in economic conditions. The result is that a new ideal has arisen for the bourgeoisie of the great European powers, Imring the '90s this ideal began to be placed in opposition to Socialism, the same Socialism that had captured so many of the thinkers of this same bourgeoisie a decade before. This ideal was the linking together of transoceanic territory with the European government, the so-called IMPERIALISM.

The imperialism of one great nation, however, implies a policy of conquest, and implies enmity toward the other great powers which have entered upon the same policy of conquest in the same transoceanic fields. Such a policy cannot be carried out without great military preparations, without great standing armies, without fleets, that shall be in a condition to carry on battles in distant oceans,

Until the '60s the capitalist class was generally hostile to militarism, because it was hostile to the government. It hated the standing army that cost such vast sums of money and was the strongest support of a government that was hostile to it. The capitalist democracy looked upon the standing army as superfluous, since it confined its endeavors to national boundaries, and had no wish for war

Since the '70s the sympathy of the capitalist class for standing armies has steadily increased, and this not alone in Germany and France, where the war of 1870 had made the army popular—in Germany as the bringer of brilliant victories, in France as a means of avoiding such desolation as that war had brought. In other countries also there began to be enthusiasm for the standing army, as much as a means of repressing the internal enemy as of repulsing external foes. The possessing class became friendly to the army in just the degree that they became friendly to the government. However much they might be divided by antagonistic interests, all joined hands in the willingness to sacrifice for the warlike preparations. Here the radical democrats and the conservative defenders of feudal privileges joined hands. The proletariat, the Socialists, presented the only op-

So it was that the government was extraordinarily strengthened during the last decade, and the possibility of its overthrow, of a revolution, appeared to dis-

appear into the infinite. The fundamental opposition—not to be confused with the opposition of the 'ins' and 'outs' of the office holders and seekers-was more and more confined to the proletariat. Many sections, even of the proletariat, lost their revolutionary impulse, after the last political upheaval of 1890.

The Rain

By George E. Bowen Softly the rain falls thro' the smoky pall That winds about a city's joyless heart. Softly it falls upon the battered street, And here, against a sullen wall,

It falls with a subduing art, Triumphant and complete. Surely it softens, to my straining eyes, The rigid horror of these fortress walls that darkly frown Thro' hopeless ages, as I pray release.

Thro' steaming mists I see dim forests rise, And now a garden calls, as from this prison tower my gladdened eyes look down

Where feeding flocks explore the dear, green ways of peace. Swiftly the rain has scattered and suppressed The grime, the grief, the gloom, that clutch my soul, And, with an artist's skill, transplanted, o'er this fray, The grass of long ago, the hills at rest, The very freedom that this brutal commerce stole.

Before I knew its way. Swiftly the rain restores my sovereign right To the sweet things of life these grubbing years have lost. Renews in me the buoyant heart of youth And teaches with old ecstasy my faded sight. Ah, bitterly have rain and endless starvings learned the cost

Of truth. Thrice blessed rain! In your sure alchemy I lose My exile, slavery, despair and blind unrest.

In you I find those long, forsaken days no city keeps or knows. And thro' your mystery, O rain, I find the need to choose Not these false riches and rewards to fill my higher quest: Beyond the town life's first contentment grows.

Softly the rain redeems for me a vanished past. Softly it melts away these walls of gray. Surely it sings my heart's first song anew, And makes my conscience true, at last. O, for an hour, such miracles a steady shower can play, As never in Aladdin's visions grew.

In order to live man must have food, clothing and shelter. In order to get food, clothing and shelter by his own effort man must have the use of land and the tools which are used to produce food, clothing and shelter. If man owns land and tools which he must use, whatever he makes will belong to him, but if he does not own them he must work fer someone who does own them and pay for the permission to pay for his living.

At the present time there are thousands of men and women who do not own the means of life and because of this they are compelled to work for those who do own the means of life. For working they receive wages which is the price of their labor power. The articles they make belong to the man who employs them and they are sold by him. The owners must make their products as cheaply as they can in order to find a market for them. Wages is one of the most important elements in the cost of production, hence the owners and exposure the workers whose better life depends on a high price for their labor power wages in the cost of production, hence the owners and two the workers whose better life depends on a high price for their labor power wages in the cost of production, hence the owners and two the workers whose better life depends on a high price for their labor power wages in must follow.
