

AS WE SEE IT
By T. O'FLAHERTY

Among those excited by the news of the treaty... William has not broken into print for a quite some time, but he has a nose for publicity and is as clever a poseur as even Samuel Gompers, the best showman since Harrison...

Speaking of the treaty, he is reported to have said: "The repercussions of this event will shortly be felt in the relations of all the European states, and it is bound to lead to deep thinking and heart searching in Germany and among the allies. France is backing the black race, Russia is backing the yellow, and the United States and Britain are backing the white. Where will many stand?"

France is exploiting the black race and so is England. The latter has the opportunity. So is every other capitalist country. So was Germany under the Kaiser. But there is backing the yellow races against their white exploiters for their own good.

Russia is growing in power every day. The problems of evil of only a few years ago were in the past. The front pages of the capitalist press with tales of the downfall of Soviet power are now the advance-ments of second hand radios and modern terraces.

Another sign that normalcy is traveling on seven legs is the recent congress on Soviet Russia held in Moscow. This congress was called on the initiative of the Russian Communist Party, which is in a position to "well enough" but is always aiming at perfection in a country of 150,000,000 people or more.

Certain capitalist officials being set free for the government in the calling of this congress. But there was no serious trouble. The congress was an orderly, peaceful, but lively affair.

U. S. STEEL ORDERS
UP 220,647 TONS
DURING JANUARY

New York, Feb. 10.—United States orders for steel during January 1925, according to the American Iron and Steel Institute, amounted to 220,647 tons.

When you buy, get an "Ad" for the DAILY WORKER.

SEATTLE LABOR
BACK DEFENSE
OF COMMUNISTS

Protest Central Labor Council Pogrom
(Special to the Daily Worker)
SEATTLE, Wash., Feb. 10.—Despite the red-baiting campaign opened here by the labor fakery, several local unions have passed resolutions defining the past week condemning the criminal syndicalism laws and endorsing the Michigan defense.

Among locals taking such action are: Maintenance of Way Men; Building Trades Council; and the Metal Trades Council.

Following the meeting of Communists by Seattle Labor Council Wednesday, the Building Trades Council took similar action. The Building Trades Council was held by Tracy secretary building trades department of A. P. F. J. who was present at the meeting of H. Jones, business agent, Paterson's local No. 300, Communist infiltrator in the building trades.

Bakera Condemns Espionage
The Central Labor Council of Seattle and vicinity grinds.
"Bakera's main No. 8 at their regular meeting unanimously passed the following resolution: Whereas the Central Labor Council of Seattle and vicinity has been endangered by the action of the Central Labor Council at its meeting on February 10, 1925, in passing a motion to unseat all delegates of local unions alleged to be Communists and to withdraw this money by the Central Labor Council is calculated to demoralize the organized labor movement and to work directly in the interests of the bourgeoisie by creating a bitter factional struggle in the labor movement.

Whereas it nullifies the constitution of the A. P. F. J. (which gives the freedom of political opinion to all members thereof) and eliminates many of the best unionists, the most able, fearless, militant and devoted workers from active participation in the council and the labor movement in general, therefore be it resolved that we Bakera Union No. 9 protest the action of the Central Labor Council and urge that the government of harmony and the labor movement the motion of February 9, 1925, be rescinded and delegates on account of political beliefs be readmitted and we further urge that the Central Labor Council instead of waging a campaign against a group of earnest workers and militant workers who are doing their best to advance the labor movement and mobilize all forces for the struggle against the bourgeoisie and the various local unions in the city of Seattle to support us in this protest until these disruptive tactics are stopped within the ranks of the labor movement in Seattle.

Michigan Prosecution Making National Drive To Spread 'Red' Alarm
NEW YORK CITY, Feb. 10.—The Michigan Communist Party is making a national campaign to stir up hysteria against the party, according to the speech of O. L. Smith, Michigan prosecutor of the Communists, at a meeting in New York City.

JUDGE ENGLISH TOOK
GRAFT FROM ILLINOIS
BANKRUPT IS CHARGE

WASHINGTON, Feb. 10.—An investigation looking to the possible connection between Judge George W. English of the eastern district of Illinois was ordered today by the house judiciary committee.

The investigation was asked by Representative Hayes, democrat of Missouri, who, with citizens of East St. Louis, Ill., charged English with grafting fraudulently from bankruptcy cases in his court.

BOOTLEGGERS
SAT PRETTY N
ATLANTA PRISON

Provided They "Fixed" Chaplain and Warden
ATLANTA, Ga., Feb. 10.—Father Thomas P. Hayden, a Roman catholic priest, and former chaplain, at the federal penitentiary here, testified today in court that he had provided bootleggers with liquor in the United States district court, that A. K. Sartin, deputy warden, and J. Fletcher, deputy warden, accepted bribes in return for "soft snags" given to wealthy criminals who were committed to the penitentiary.

The principal clients of the prison bootleggers were wealthy business men. Father Hayden was in a deal he received at least \$2,000 for his part.

The "out" in the game was law race Rabel, of Columbus, Ohio, one of the "Ohio gang." He was the "boss" of the racket.

It is reported that Father Hayden has formed state evidence in return for immunity.

Airplane Trip To
Nome Cancelled As
Epidemic Dies Out

NOME, Alaska, Feb. 10.—Steady improvement in the diphtheria epidemic situation here was reported today by the health department.

PLAN TO FILL CHILD MINDS
WITH "PIE IN SKY" DOPE IS
HOPE OF NEW YORK PARSONS

(Special to the Daily Worker)
NEW YORK, Feb. 10.—The proposal, unanimously made by exploiting dog dispensers of all creeds to introduce religious trainings into the public schools, as already reported in the DAILY WORKER of Feb. 6, is no longer a pipe dream.

The general membership meeting of the Workers Party in Seattle with 20 members present was the most enthusiastic ever held. All fully realize the seriousness of the present situation, nevertheless members assert the party will grow as a result of this proposal. Collection of \$20 was taken to carry on local organization.

FEW DELEGATES
AT VIC BERGER'S

Pre-Chicago Gathering Manuever Falls
(Special to the Daily Worker)
MILWAUKEE, Wis., Feb. 10.—Victor Berger's "socialist" machine in Wisconsin planned a grand maneuver to square itself with the banking and business interests, being careful to maneuver so as not to "air up the opposition too much."

Business Men Legislature.
The result of such tactics is that the delegates show here is based by outright upholders of the capitalist system, for example, something like 200 and economic evils under which the struggling farmer now suffer.

Why Labor was Absent
The handful of delegates boded in a corner presented a very pitiful picture.

Madison, Wis., Feb. 10.—A strike is not fully determined by the action of the workers, but by the action of the plant, and although a strike has been called, a strike may not be in effect if the plant continues to run without restriction of output.

STATE RULED BY
FOLLETTE HITS
AT ALL STRIKES

If Scabs Are Working There's No Strike
MADISON, Wis., February 10.—"A strike is not fully determined by the action of the workers, but by the action of the plant, and although a strike has been called, a strike may not be in effect if the plant continues to run without restriction of output."

FRANCE WOULD
PAY DEBTS WITH
GERMAN MONEY

Capitalist Papers Spurn British Note
PARIS, Feb. 10.—Money with which to pay France's debt does not only exist in Great Britain, but to the United States must come from Germany.

TELEGRAPHERS TURN
DOWN COMPANY UNION
AND GET PAY RAISE

The United States railroad labor body yesterday rendered a decision in favor of the dispatchers of Missouri Pacific railroad, who are seeking a wage raise of approximately 10 percent.

Political Friction in Persia
Alahabad, India, Feb. 10.—The British policy in Persia, stated by Premier Freres between the Sultan and the British, was becoming greater.

MILLER, COMMUNIST IS ONLY
FIGHTER FOR FARMERS IN THE
LEGISLATURE OF NORTH DAKOTA

By ALBERT KNUDSON
(Special to the Daily Worker)
BISMARCK, N. D., Feb. 10.—The leadership of the nonpartisan league in North Dakota has completely lost contact with the masses of farmers and workers as the state legislature opens.

There is no longer any effort made on its part to find out what the rank and file need and want; it is concerned almost entirely with how it can "compromise" and "trade" with the so-called independent voters' association opposition.

Banker a Farmer Leader.
B. A. Vogel, banker, is the nonpartisan league's leader in the house of representatives and also the chief director of the league legislative caucus.

Japan Claims To
Have Fulfilled Terms
Of Four-Power Pact

TOKYO, Feb. 10.—Japan has completely fulfilled the obligations of the Four-Power Pact, according to a statement issued by the Japanese government.

CARPENTERS
LAUGH FAKER
OUT OF CHAIR

"Open Forum" at Local 181 Meeting
There was an open forum at last Monday night's meeting of Local 181 of the Carpenters' Union, when the chairman, lackey of Harry Jensen and Carl Huchison, presented a resolution which was the better part of valor and stepped down from his chair leaving the members in a state of confusion.

The reason for this strange procedure is that the chairman has not been able to contact the business of the union, and one of the other satillies of the faker Jensen literally forced his way into the hall.

But the worthy workmen, the members of the union, were not to be deceived. They recognized the role of the self-appointed vice-chairman when he attempted to conduct the business of the union.

Urge Emma Goldman to Teach Anti-Bolshevism in Capitalism's Schools

By J. LOUIS ENGDHAL

TODAY, the University of Minnesota, petted darling of the steel trust profiteers and the food gamblers, feels itself proud over the fact that one of its professors in sociology, Pitirim A. Sorokin, has been elected to membership in the International Sociological Institute in Paris...

It was under czarism that Sorokin was a chairman of the department of sociology at the University of Petrograd. He is the kind of Russian that finds favor with America's capitalists...

The counter-revolutionary anti-Soviet has it very comfortable banking in popular favor in the state's highest educational institution in France...

The hiring of Sorokin by the University of Minnesota to teach sociology is only another manifestation of the poverty of American capitalist intellectual life. It is unable to breed its own leading propagandists of its own...

Thus the Cleveland, Ohio, Plain Dealer mourns the fact that 15,000 workers attended the Lenin Memorial Meeting in New York City...

Of course, the Plain Dealer means that the 15,000 who attended the New York Madison Square Garden meeting thought crookedly from the capitalist viewpoint...

So the American capitalist class offers bread to the student of Soviet Russia. Sorokin has his job. Others also have them, or are getting them. Even Emma Goldman has her champions...

Only Few Delegates At Victor Berger's Pre-C. P. P. A. Meeting

proposed a slogan for adoption. "Ideal No Opportunism." But even this was rejected and the innocent reference to opportunism sounded too red to the delegates...

The question of the form of organization of the future party was the only question that disturbed the drowsy atmosphere of the conference. Utterance was frustrated at the suggestion that the new party should be a deep-seated organization...

Why, he stated, would you lose the support of the masses of the party? The conference was in the membership of the socialist party. It was clear that he was referring to the revolt developing in the socialist party against the Berger policy...

The conference was a new party should be formed with the only qualifications that it should be apart from any other party. The socialists while fearing to mention that the new movement should sever its connections with the capitalist parties, readily agreed to sign the death warrant of their own movement...

A suggestion was made that business men of the state should be given consideration since the conference should recognize that La Follette had more than 500,000 votes. A line trade union delegate suggested that Sammy Gompers' hearing upon La Follette had done more harm than good, and this did not seem very much liked by the entire proceeding and toward what in the devil the whole conference was called for...

To prove his point, he decided to label the conference as a resolution in favor of a new party. The La Follette is a resolution in the standard had a plan to do this. The letter of application was a letter of resignation. The resolution was to be a letter to the national conference choosing very wisely an international official of the machine union and an official of the socialist party...

SECTORS OF THE TRADE EDUCATIONAL LEAGUE

MINERS' DEMAND INTERNATIONAL LABOR UNITY

Christopher First to Assent Need

We print the following resolution in full without comment to tell its own story.

Resolution to the International Trades Union movement in behalf of Amalgamation and world solidarity by Local Union No. 2376 U. M. W. of A. Christopher, Ill. Feb. 4, 1924.

Whereas international unity of labor has now become imperative to safeguard the interests of the workers of the world to protect them from the ravages of imperialism and amalgamation of the many crafts in the various industries in the United States and the desire and the demand of the rank and file of American labor.

Whereas the voice of international labor has now the claim that only unity among the globe, calling for the workers of the British Federation of Trades Unions, the Red International of Labor Unions, the American Federation of Labor, and the American National Union of Laborers and other national unions and federations to immediately affiliate and cooperate in one international organization.

Whereas the statement made in the constitution of the U. M. W. of A. Federation of Labor of El Paso, Texas, by one so-called leader, that foreign labor should not be invited to affiliate with our organization, is not the decision of the rank and file American labor, and is not in harmony with the principle of international unity.

Whereas international unity is, and must be, the only means of attaining world solidarity, and the only means of solving the revolutionary aspirations of labor, whose only reason is a revolutionary overthrow of the present economic system.

Whereas the American Federation of Labor, through its fraudulent policy to reorganize the American labor movement, is now in a position to offer to the workers of the world, particularly the pillars of the so-called reform movement, such as the Marxists, the Socialists, and the Communists, a platform of world solidarity, and the only way to the overthrow of the capitalist system.

Resolved, that we call upon all the workers of all nations to repudiate the American Federation of Labor, and to affiliate with the rank and file of American labor.

Resolved, that we call upon all the workers of all nations to repudiate the American Federation of Labor, and to affiliate with the rank and file of American labor.

WHAT IS WRONG IN THE COAL MINING INDUSTRY AND THE WAY OUT FOR THE MINERS

By Freeman Thompson and John Watt

(There is great unemployment and consequent suffering among the union miners in the bituminous coal fields. At the conference with the operators' association held in Jacksonville, Florida, last year when a three-year agreement was signed by the officials of the United Mine Workers of America, John L. Lewis agreed with the operators that the industry must be "defatted.")

Freeman Thompson, president of District 4, of District 12, state of Illinois, and John J. Watt, secretary, have a different view of the problem. They take issue with the plan of driving out men who have spent their lives digging coal. They analyze conditions in the coal fields, explode several of the pet theories of the coal operators and the reactionary officials and set forth the left wing program for the mining industry.

The following series of articles contain a wealth of material dealing with technical but highly interesting facts having a vital bearing on the subject as well as a militant program.—Ed. Note.

Article II. And Finally Fat (E) "The rapid growth of output of minerals... About twelve years ago there was only one 4,000 ton a day mine in Illinois, and it was located in Lexington, Illinois, but today we are mining..."

Another interesting factor of the mines are not working full time on labor in the amount of coal surplus coal that is on top, the last figures have been taken from a report of the National Association of Mercantile Agents, and that report shows that on November 1, 1924, there was a 60 day supply on top of about 275,000 tons of coal now stored on top is greater than it was on November 1, 1924.

All of the above information has been given to show the kinetic power of the mine workers and confronting. And the mine workers problem is the same problem that many other workers in other crafts are facing, and the workers in this area can supply to abundance all the commodities and necessities that goes to make human progress, in less than four hours a day.

When you buy, get an "Ad" for the DAILY WORKER.

So you see that we will not need to be met dressed by a vicious propaganda which is being spread by the enemies of labor, demanding lowering of wages to meet competition with the organized firms. We say if you should immediately agree to go back to the pre-war wage scale, that the wage scale in the nonunion field would be forthwith lowered to suit market conditions, and therefore you would not get one hour more work than you get now.

STEEL TRADE BOOMING, BUT UNION OSES

Reactionary Officials Kill Amalgamation

McDONALD, Ohio.—The Byers company, Great Lakes makers of their capital by several million dollars, planning expansion of their holdings, get in the face of this, the problem employed in their mills have suffered again and again from the loss of their jobs without even a word of protest coming from the reactionary officials, now in control of the Amalgamated Association of Iron, Steel and Tin Workers headed by M. F. Tichauer, who has been busy in Mahoning valley addressing lodges on such subjects as "Co-operation."

The rank and file have concluded that the brand of "Co-operation" that results in reductions of wage scale and constant decreases in membership should be thrown on the scrap along with its sponsor.

Wages Reduced As Union Weakens. Union mills are rapidly entering non-union ranks and the introduction of new machinery in these mills of industry is throwing out of employment old workers out of employment of their own industry.

This Union Can Organize. This union in the localities is being organized, the complete organization of the unorganized steel workers yet not one organization meeting has been held in the past several months.

The only solution. This is the only solution that can be made, to get the workers to get together and organize a union of their own.

When you buy, get an "Ad" for the DAILY WORKER.

Another Jolt for Lewis Comes from West Virginia. So many returns on the miners' strike that the operators are in a state of panic.

Material sent for the T. U. E. L. District No. 1, section not appearing in this issue will be printed in tomorrow's page.

CENTRAL DISTRICT ASKED MINERS TO GIVE UP 50 PCT. OF WAGES

Operators Helped by Farrington

WEST FRANKFORD, Ill.—The Southern Iron Coal Co., West Frankford, Ind., has asked the miners to give up 50 percent of their wages for the last three years.

A certain advance proposal to buy the West Mine and the mine in Essex, Ill., provided the miners to take 50 percent of their wages and withdraw all further claims for the last three years.

Parliament held a meeting on that particular night in West Frankford. Here the Frank Farrington, secretary of the local defense council, led a vote of a bunch of capitalist profit hawks, cheating the mug out of their hard earned wages.

A Violation of Agreement. We know that an acceptance of the proposal would be a violation of the agreement made by the miners.

WOOLEN MILL BOSSES LOCK OUT TAILORS

Violate Contract and Advertise for Scabs

(Special to The Daily Worker)
 PARKERSBURG, West Va., Feb. 10.—The National Woollen Mills, located here and owned by local people locked out its employees who are members of the Journeymen Tailors' Union two weeks ago and refused to take them back except as individuals, which means that this concern will no longer recognize the union.

An amusing feature of the situation is that the owners of the mills, when they started up business, forced their employees to join the union. Since then the union has developed a backbone of its own and refuses to take orders from its former owners. Hence the lockout.

Can't Hire Scabs.
 While the mill owners had a contract with the Tailors' Union, which has several months to run, they simply shut their doors when they got ready to. The members of the union, about one hundred and sixty men and women are firm in their determination not to go back until the union is recognized and are receiving the support of the railroad and other unions here. The prospects for their victory are bright as the owners of the mills have not been able to fill their places by far, tho they have widely advertised for help in other cities. The local papers are suppressing all news about the lockout, which has created much excitement here.

Secure Injunction.
 The firm of Ambler, Metcalf and Ambler, attorneys for the National Woollen Mills, entered a suit in bankruptcy asking for an injunction against the local branch of the Tailors' Union, which would prohibit its members from picketing the company's property.

The notorious "Jenny" Sullivan of Chicago never displayed more alacrity in accepting the request of the Windy City's scab garment operators for an injunction than the Parkersburg court. The injunction was immediately issued and served on the others, agents and members of the union. It does not even permit a member of the union from going near the National Woollen Mills.

Communist Candidate in Third Ward

EDWARD L. DOTY
NEGRO WORKER IS THE COMMUNIST CANDIDATE IN THE THIRD WARD

Edward L. Doty, a Chicago leader of the Workers' Communist Party, candidate for alderman of the 3rd ward, was born in Union, Mo., in 1893. Working people's children do not often have advantages for education, and especially for a colored boy in the far South, this is usually an admitted unnecessary luxury. So the young Negro child was developed to be a leader of his class and race started to work at the age of seven leaving for as a helper on an iron mine at 12.

Capitalist culture is well exemplified by the fact that he was brought to work at the first streak of dawn at 10 and worked until 10 p.m. at the mine.

Red Revel Masquerade Ball, 37 South Ashland Avenue, February 23.

FOOD WORKERS' SHOP NUCLEUS GETS RESULTS

Guides 150 Restaurant Employees

NEW YORK, Feb. 10.—Shop nucleus No. 1, food workers, at its first regular meeting demonstrated how effectively a shop nucleus can function. Already the workers in the restaurant are alive to the fact that they are not a group in actively concerning itself with their affairs.

The result has been that the committee of the shop nucleus are now in control of the shop committee. In the shop they officially represent the workers and fight for their interests. At their first meeting they enrolled two of their fellow workers in the party and they expect in a short time, due to their activities in the shop, to enroll many more.

The organizer stated they soon will control the kitchen—the most important department—in a big restaurant. Efforts are being made by the members of the shop nucleus to draw two of the cooks into the party.

Effective Work.
 The shop nucleus has worked so effectively since its organization that they have the confidence of all the workers, 150 in number, that work in the restaurant. This makes the members of the shop nucleus an important element in the union organization of the food workers because they can depend upon their fellow workers in the restaurant to support them in any fight they may have to make in the union.

On the Job All the Time.
 The shop nucleus is most regular in its activities. It meets every day. Its members in the shop work the workers feel most the tyranny of the boss because they are in the daily being fought and where Communist propaganda and work can be done effectively. Many of the workers for the party, the members of the shop nucleus carry on Communist work their work immediately brought results.

The experience so far of the shop nucleus is that it is a very effective organization. The Workers' Communist Party is organized on the basis of shop nuclei, it is the only way to win the workers in industry reflecting in its struggle the needs and interests of the workers.

Council Would Delay Traction Ordinance Until After Election

The members of the transportation committee of the city council in an effort to delay action on the trolley traction ordinance until after the upcoming election, stepped away from committee hearings Monday afternoon.

The move was called to mind by Mayor Dever. In his last report to the city council, delivered in October, he told the aldermen that he had had no time to consider the ordinance because he considered \$163,000, demanded for the lines by the bankers, too high. Now, however, the mayor has given out the report that the ordinance is a political matter.

Graduates a Communist.
 Philip K. Wrigley, who the Communist Party has named as its candidate for alderman of the 11th ward, is a graduate of the University of Chicago. He is a member of the Communist Party and is a member of the Communist Party.

Make Job for Wrigley, Jr.
 Directors of the William Wrigley Jr. company in meeting, elected Philip K. Wrigley, president of the \$25,000,000 chewing gum business that bears his father's name. Young Wrigley is not yet thirty years old.

There Will Be More of Everything in Detroit!

The City Daily Worker Agency for Detroit is Alfred E. Goetz—pronounce "gats." Because, really, he gets ideas that are sure-fire BUILDERS. Of course, in addition to his natural inclinations there is also the environment. Detroit has long had the reputation as a "DAILY WORKER City." Not satisfied, the local put on this comrade as full-time agent (pardon the pun) so it Goetz more election.

This is the idea. During the last presidential election Local Detroit had three special editions. They did so well on them that they are ready for more. The local DAILY WORKER Committee, always looking for ways and means to do more BUILDING send Comrade Goetz out for the "dope." He wrote us and got it and they are going to pay for the special edition with commissions on advertising they will accept.

Here is a method of building up the local that is certain, tried and PROVEN. It has shown in results what can be done and we want other locals to write us for information on how they can do it.

Correct! It will mean all that in a nutshell, and everything to the local. Write us we suggest NOW—and have the DAILY WORKER build up your local for you—that's what it is for!

MILWAUKEE SOCIALISTS REFUSE TO HOLD DEBATES WITH COMMUNISTS

MILWAUKEE, Wis., Feb. 10.—Following the crushing defeat inflicted upon the socialist party by the district organizer of the Workers Party, Arno Swabek, the socialist party cancelled arrangements for all future debates. The last debate in which C. R. Shklar, city secretary of the Workers Party, was scheduled to meet Leo Wolfson, city editor of the Milwaukee Leader, was turned into a lecture when Wolfson declined to appear before the committee. This was given too much publicity.

Shklar was introduced by the secretary of the Workers' Circle and a few introductory remarks stated that the Workers Party is not afraid of publicity, that the Communist Party is not afraid of the teachings of Marx as stated in the Communist manifesto do not desire to conceal their position and will state it to the workers.

Shklar expressed surprise that the socialist party was afraid to state their position on the political problems embracing millions of proletarians. "Should we keep our position secret from the workers when it involves our attitude toward the political opinions of millions of proletarians?"

In his lecture Shklar pointed out the bankruptcy of the socialist party when that party pretended to represent the interests of workers, and gave its support to LaFollette who does not support the abolition of private property.

Workers Party Gains in Influence.
 Shklar pointed out that Workers Party received over four thousand votes notwithstanding its first appearance on the Wisconsin ballot, while the socialist party was losing not only ideologically, but also in the support of the masses.

The meeting decided in the future to unite with the Workers Party in propaganda lectures.

The Workers Party is growing in influence here. At the last meeting of the Federated Trades Council, the delegate of the Workers Party disturbed the confidence of the socialist party machine by a denunciation of Berger's machine and its allies of the LaFollette camp.

SEVEN THOUSAND IN CHICAGO SEE WORKERS' MOVIE

"Beauty and Bolshevik" Has Big Attendance

The great Ashtabud Auditorium with its 5,500 seats was filled to overflowing twice on Monday night at the showing of "The Beauty and Bolshevik" under the joint auspices of the Daily Worker and the International Workers' Aid. Admitted as a continuous show from 7 to 11 the crowd began arriving at 6:30 and by 7:30 every seat was taken. Fully 2,000 waited over two hours to get into the hall and the last show did not end until after midnight.

The pictures were received with greatest enthusiasm, a ripple of almost continuous applause and laughter accompanied them and at the high spots they evolved into waves of cheers. A large and active group of "Red Star Volunteers" were on the job looking for the Michigan Defense, and William P. Kruse and Morris J. Losh made collection speeches.

Music was furnished by a triple of working class groups, the Young Workers League, the South Star Ballade Orchestra, and the Michigan Defense, and William P. Kruse and Morris J. Losh made collection speeches.

It will be shown in the Russian, Slavic and Jewish sections of the city in smaller theaters.

Federated Press Holds 5th Annual Meeting in Chicago

The fifth annual meeting of the Federated Press, labor news service, which was held in Chicago Feb. 6, authorized steps toward an organized far eastern news bureau, adopted the 1925 budget carrying \$25,000 and elected four members of the executive board in addition to the routine business.

The new bureau will have head quarters in Paris and will devote itself largely at first to Indian news. The affiliation with the Federated Press is to be loose until the field is better known.

The newly elected members of the executive board are Thomas R. Downey, Galveston, Tex., re-elected as chairman; Arno Swabek, Chicago, re-elected; Vera Smith, Chicago, to succeed J. A. Lockyer; Phil Zerkow, Cincinnati, to succeed R. D. Cramer; Joseph Schiberg, New York, was re-elected vice chairman.

British Urge Growth of Opium Prohibit in Oriental Centers

GENEVA, Feb. 10.—The international opium conference in plenary session today adopted the findings of the British investigation of opium growth in oriental centers to ascertain the extent of growth and a reduction over a period of five years.

It is expected opium cultivation be sufficient in a fifteen year period to make suppression possible, the cultivation of opium over medical needs will be stopped, the conference decided.

The conference adopted the plan of making the signatories of the Hague opium convention responsible for the strictest enforcement of provisions against smuggling.

Morgan "Organizes" Miners

The organization of a company union by the Morgan merger interests in the West Virginia coal fields, a company organization headed by an ex-director of the United Mine Workers, throws light on what course this new and gigantic industrial combination will follow in its relations with the workers it employs.

It shows further that the so-called Rockefeller plan launched by the Standard Oil controlled Colorado Fuel and Iron company after its massacre of coal miners at Ludlow in the 1913 strike is to be tried out on a larger scale.

Industrial foulness accompanied by wholesale murder of miners and their families have given to the steel trust and its West Virginia coal company subsidiaries much unwelcome publicity.

The gullible "public" will not be told that the kindhearted company has allowed the miners to have a union and that everything is lovely except that labor union and "red" agitators are attempting to corrupt "our well-paid, loyal and contented employees."

We can expect now another flood of "Poison Ivy" Lee publicity such as followed the initiation of the Rockefeller plan in Colorado.

Our reports from West Virginia show that it is going to be much harder to fool the miners than it is the "public." Most of them are going to keep their heads in the water, even though they are forced into the company union for a time.

The Boiling War-Pot

News from London is that the coming conference of the admiralty board, at which the report of Admiral Fisher on his inspection tour of British possessions will be heard, will adopt a plan for a huge Pacific fleet as a further strengthening of British "influence" in the Far East that is being begun with the project of a huge naval base at Singapore.

The British press in a very frank—unusual thing in the public discussion of the imperialist adventures of the British ruling class which is generally "saving" some backward people from domination by other than the Anglo-Saxons who bring only sweetness and light into the lives of the darker-skinned masses—see India and the Sudan. It is pointed out by the British pressmen, as journalists are termed in dear old London, that the destruction of the German fleet makes it possible for Britain to utilize her own navy to greater advantage in the Far East.

It is not hard to read between the lines the intention of British imperialism to make its greatest bid for power in China, where it is already in conflict with American, Japanese and French imperialist interests. We recommend a careful reading from now on of the British imperialist press to the social pacifist elements who were so enthusiastic over the Washington disarmament conference.

In connection with the new naval plans of the British government the recent announcements of the semi-official French press are of great importance. We commented on them a few days ago and quoted its statement to the effect that the French government must choose now what power or powers it will support in the Far East.

All opinions like those cited are bubbles breaking over the rim of the imperialist war pot. It boils more noisily each day.

Zinoviev's Warning

Zinoviev, in a recent conference of the Russian Communist Party, warned of the danger of a new offensive against Soviet Russia.

He pointed out that British imperialism faces two great dangers.

The volcanic situation in the Far East threatened loss of British control in China and India, etc.

The growing revolutionary sentiment and organization among the British working class as a result of economic demoralization and the activity of the British Communist Party.

Zinoviev reached the conclusion that Great Britain would not start an expedition at home or in the Far East, but would start war on Soviet Russia from Poland or Romania and perhaps would use both naval tactics.

Since the delivery of the speech dispatches tell of renewed military activity in Poland—the speeding up of munitions factories, concentration of forces on the Russian frontier, etc.

In a war of this nature, Zinoviev said, in spite of the deadly rivalry existing between her and the United States, would have the full support of our ruling class. Every effort would be made to enlist the sympathies of the working class in America for the crushing of Communism at home and abroad.

The Workers (Communist) Party must be ready.

Pittsburgh Machinists and C. P. P. A.

The Westinghouse local union of machinists, working in one of the gigantic plants of this powerful industrial corporation, located in Pittsburgh, the stronghold of the steel trust, has endorsed a resolution denouncing the class collaboration policy of the conference for progressive political action, headed by William Johnston, president of the International Association of Machinists. The resolution urged the adoption of the Workers Party program.

The resolution failed of endorsement at the Pittsburgh district council of machinists by only one vote, the chairman casting the deciding ballot.

In this influential section of the machinists union, right on Johnston's doorstep, is class-conscious opposition to his scheme of betrayal. The action of the Pittsburgh machinists comes on the heels of the Chicago C. P. A. conference, showing that the efforts of the Workers (Communist) Party in exposing this organization as another weapon of capitalism against the workers have been successful.

Scab Creameries and Counter-Revolution

In Los Angeles the socialist Daily Forward carries an advertisement of a scab creamery which is on the unfair list of the Labor Council of that city.

In New York it slanders Communists and boosts Abraham Lincoln, the enemy of Soviet Russia, of the Communist International and the social revolution throughout the world.

Is there a connection between these two incidents three thousand miles apart?

We'll say so. The Forward is the foe of the working class. It represents the middle-class hoodlums, the lawyers and other professional gentry—the crumb-gatherers from the table of capitalism.

Support of a scab creamery and counter-revolution are not so far apart as Los Angeles and New York.

Not Quite Correct.

A Washington correspondent who should know better attributes much of the difficulty of the postal workers to the alleged fact that President Green of the American Federation of Labor is not yet well acquainted with the capitalist party leaders in the house and senate.

Our opinion is that the better acquaintance of labor leaders with capitalist politicians the worse off are the workers by whom the labor leaders are paid.

The friendly and fraternal atmosphere which prevails among the American Federation headquarters and the congressional and senatorial chambers whenever labor leaders and capitalist politicians meet, is one good reason why the labor movement is principally an organization which, like theNaples' beggar, always goes with knickerbocker and hat in hand.

Green is not well-versed to the postal workers because he does not know Washington, but because he knows it too well.

Forgery As an Imperialist Method.

The striking duplicity revealed by the alteration in the text of the Paris pact made before it was submitted to the committee eliminating the words "troops" as far as possible, reveals a condition of affairs in the Morgan-Hughes state department as rotten as anything in the czar's pre-war diplomacy and comparable with the forgery of the famous—or infamous—telegram by Bismarck just preceding the Franco-Prussian war.

The Paris pact is so dangerous to American masses, its obligation to collect by force the German reparations in the event of revolution or other reasons for default so certain, that none of those engaged in putting it across dare to admit its full meaning or even to face the little group of middle-class politicians in the senate with a truthful statement of its far-reaching provisions.

American imperialism and its agents have been caught with the goods. They have been found flinching with forgery as an alternate course to fighting for their murderous and greedy schemes in the open.

The whole incident is just about the best evidence yet furnished of the way in which the lives of millions of workers are staked in the game of international finance, diplomacy and war.

Some day the American Soviet government will publish documents, now hidden in the archives of the state department, that will be even more enlightening.

With 50,000 unemployed in Cleveland, there ought to be a powerful unemployed council in the Ohio metropolis. The organization drive starts Tuesday night. It should make rapid headway.

The so-called "baroness," Olga Wrangell, has departed for other scenes of activity. No announcement of funds raised in Chicago for the counter-revolutionary activities of her husband has been made. Alas, she didn't get very much. The "socialist," Abramowitz, reported as the next anti-Soviet scheduled to visit this city.

The Locomotive Engineers' Journal has a lengthy article by William Green in its latest number. To understand the meaning of this new conciliatory attitude towards the American Federation of Labor, it should be remembered that the Engineers' Brotherhood is in very bad with the United Mine Workers because of its ownership of scab mines in West Virginia. Revolutionary labor officialdom has its own diplomatic methods.

Sixty Thousand Rebels to Fight Lewis

By Tom Bell

The sixty-two thousand vote "al-lowed" the left wing slant according to the official bulletin by the Lewis bureau was not the result of the United Mine Workers' election for International officials in a tremendous vote of the Progressive Miners (Communist) Party and its militants in the United Mine Workers.

The full significance of this event has not appeared only in the light of the following facts:

- (1) The Lewis gang "counted" the ballots which means that may thousands of votes for the left wing formed their way to the Lewis column.
- (2) The Lewis gang has full possession of the union apparatus which means unlimited funds to spend on secret votes for the officialdom, and dozens of "organizers" to form double districts to "fix things" during the election.

- (3) In districts 18 (Alberta) and 14 (Kansas) the left wing district slants were ruled on the ballot. In Kansas Alex Howard was nominated by 59 per cent of the locals, and every ballot which Howard's name had been "written" in was thrown out. In Alberta the yellow scab, Sherman, declared his caucus elected by acclamation after debating the left wing candidates.
- (4) Together with these advantages of the Lewis officialdom there goes the blacklisting of militants, stealing and taking of ballots (as in Illinois) was nominated by 59 per cent of the locals, and every ballot which Howard's name had been "written" in was thrown out. In Alberta the yellow scab, Sherman, declared his caucus elected by acclamation after debating the left wing candidates.

- (5) The left wing campaign was a struggle for the workers' interests. The only paper that supported the

Factory Nuclei Reorganization

By G. PIATNITZK

At a discussion which took place recently in a commission, appointed by the Communist Party regarding the question of the reorganization of the Communist Party in the United States, the special difficulties which the reorganization of the Party would raise for our British comrades, Comrade Piatnitzk, speaking on this subject, pointed out the special difficulties which the reorganization of the Party would raise for our British comrades. Comrade Piatnitzk, speaking on this subject, pointed out the special difficulties which the reorganization of the Party would raise for our British comrades.

It is not possible to prevent the party committee from coming into direct contact with the masses. The leaders who arise from the factory nuclei are not able to make an action which does not correspond to the instinctive demands of the workers. The only way to make a party committee is to have a nucleus of workers in each factory.

WHEN there are less than three workers in a factory, the party committee must try to find sympathizers in order to found a factory nucleus. The duty of the party committee is to make a nucleus of workers in each factory, not only in the factories and workshops, but in the trade unions and co-operative societies.

If the members are not in a factory, street committee must be organized, or a nucleus of workers in each factory. The factory nuclei are not able to make an action which does not correspond to the instinctive demands of the workers. The only way to make a party committee is to have a nucleus of workers in each factory.

THIS group must distribute the party literature and, if possible, issue a factory paper, even if it is only written or typed. I would emphasize point that by means of the factory nuclei, the leading organization is kept in constant contact with the masses, and that this discussion from the right way are avoided.

MUSIC & LITERATURE & PRAMA!

"Don Quixote" in Music
By ALFRED V. FANKENSTEIN.
Hard on the heels of Paganini's performance of the ballet "Don Quixote" in the city of New York, on Friday and Saturday of the symphonic poem "Don Quixote," by Richard Strauss, it was played by the same symphony orchestra at Orchestra Hall.

Strauss' work is called "Don Quixote" and is a variation on a theme of Knighthood Character. The program of it concerns the Don who becomes mad in the reading of books of chivalry. A theme in the solo cello represents the Don through a simple story of his life. The Don is the knight of the white shield, receives his sanity, and finally dies in his bed.

The Strauss music overwhelms one with its richness of orchestral color, the novelty of some of the effects, and with the brilliant variations. There is an imitation in the second variation of the beating of sheep that is a stroke of genius. A most remarkable effect is the way in which Strauss has discovered new color in old instruments in this work, too, for example, the use of the oboe and the powerful tones of the tenor tuba. Perhaps the most unusual of all is the use of a theatrical wind-

played by Lewis himself; and the commissioning of new music, mostly in the fields upon the union districts. The left wing program lays out a program which will result in great achievements for the miners and the entire working class. It breaks with the Lewis policy of a conscious betrayal and knowing to the bosses; it opens up a path by means of which the miners can fight the bosses. This program is practical and leads to action, both defensive and offensive.

On the basis of this six-tens thousand and miners held up against Lewis and declared themselves for a policy of class struggle.

Organize the Rebels.
What is the next step in this struggle against the capitalist agents in the United Mine Workers? First, the crystallization of the militant force of sixty-two thousand miners into a definite organization to meet the United Mine Workers from the hands of Lewis, and to give leadership every day to the miners at every turn in their struggles.

How can this be accomplished?
First, the policy of the Trade Union Educational League and the Workers (Communist) Party. Third, the militant miners. Third, rendering the Lewis policy of betrayal into a clear class conscious understanding of the Communist policy of class struggle in the mining industry. Fourth, the propagation and organization of mine committee control of the union as far as possible in the future.

The free press for administering this program is the only one that can be trusted. The thousands of miners who supported the left wing program are not organized so that they can act as a disciplined manner against Lewis and Co.

In the past the left wing has been defeated at International convention through lack of organization. In 1927 and again in 1928 the International conference of the left wing forces in the convention was their lack of coordination in policy and discipline in action against the officialdom. This can be allowed to happen in 1929.

The masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.

With the masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.

THE masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.

YOU know what happened in Germany in the autumn of 1922. The fact that the party was found wanting was a blow to the whole International Communist movement. It was a blow in touch with the masses. The Communist conference, from which decisive steps were taken, was expected to be a conference of workers from the factories, but a conference of party functionaries. You know the result: defeat and retreat. The true feeling of the masses found expression in Hamburg, where the workers actually fought in the street.

THE masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.

THE masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.

THE masses and party the leadership. Lewis will take place at Indianapolis—there the Communist-led left wing will take place and his bureaucracy on the run.
