SYNOPIA.—The report of the British trade union delegates to Moscow described the workings of foreign trade, transportation, industry, finance and agriculture in the Soviet Union. The trade union delegates also reported on the situation in the various industries and the level of production in being raised. The finances have been on a sound basis, the report showed. Harms is being done to England by the absence of goods.

Schools and universities, and literature, music and opera and the theatre are well developed. The general conditions of life in the Soviet Union are good. The report stated that, "The U. S. R. is a strong and stable state. The government is not only in every way better than anything Russia has ever seen, but it has done and is doing more than which other state systems have failed and are failing."

Menshevik Party Dissolved
