

GERMAN WORKERS SOLIDLY AS WE SEE IT

SHAKEN BY AMSTERDAM FIREFIGHTS TRADE UNION UNITY

(By International Press Correspondence)

MOSCOW, Aug. 19.—(By Mail).—All groups of the German workers' delegation have returned to Moscow where a meeting of the chief delegates with the chairman of the Trade Union of the German Workers Unions under the chairmanship of Tomsky has taken place.

The delegates put many questions to which Tomsky and others returned exhaustive replies. To the question, what conditions the French Union of Amsterdams International, Tomsky replied that it would be more correct to ask such a question to Amsterdam.

Despite all the attempts of the Soviet unions and the Proletars to bring about unity, the Amsterdam showed no signs to assist, it wanted and wants still to have such a deal with the representatives of the Russian organizations. The delegates would be able to convince themselves of this through the exchange of letters.

SYNOPIB.—The official report of the British trade union delegation to Soviet Russia described the workings of foreign trade, transportation, industry, finance and other important departments...

Wherever possible the worker receives free quarters with heating, water, and light in the neighborhood of his work...

Housing. Housing accommodation on the oilfields, where land is extremely valuable, has always been a very serious question...

II.—A Visit to the Grassy Oilfields. While in the Caucasus the Delegation visited Grosny. It found that housing under the Soviet Government compared well with that of the capitalist countries...

The scale of water is supplied free on the Bakou oilfields, but the conditions of life are better, owing to the surroundings...

This field is of later origin than the Bakou fields, and is situated some distance from the town and the railway...

V.—Tiflis Electricity Schemes

Tiflis, like other towns in Russia, is to have a great electricity power station. Plant that will harness 36,000 horse power is now being constructed along the banks of the Kur river...

The distance of the power station from the city is approximately twelve miles. It is reached by a road that has been traversed by the oldest tribes of men, who tramped for centuries...

The formation of the dam is as of three fingers; the left arm is the longest and is the most important. It is a concrete canal dug out of the rock, faced with smooth cement, and has a drop of 25 meters...

The machinery is already in position and a perfect plant has been set up. The undertaking has another twelve months to run before completion. The total cost of the project is approximately a thousand workers in each shift...

A hospital is erected, where the latest and most efficient medical appliances are obtained. Bathing is a great feature; some 400 men obtain their daily bath in the hot mineral water...

The scheme is a part of that suggested by Lenin for the electrification of Russia in general and industrial centers in particular. The results of this electric power will be the saving of transport and the conservation of the timber supply...
