NEEDLE CONVENTION STRESSES GROWTH AND STRUGGLES

They Are Our Loyal Allies! EL CENTRO SPIES

ONLY a few days ago, the fascist government of Cuba, which is thoroughly an American colony, not being even as "independent" as New York State from the Washington government, arrested five. Communist workers on charges of "sedition."

We are wholly unaware of what "evidence" they have, but from what we know of the Cuban government under the bloody tyrant, Machado, being seditious in Cuba is the most honorable action possible for a Cuban worker.

The assassinations, "disappearances" of trade union leaders, the tortures, deportations and even the throwing of workers to the sharks in Havana Bay, are proven. If there is anything possible to do with such a government but overthrow it, we are at a loss to say what it might be. If these Cuban Communists, in fighting for the interests of the Cuban workers have been "seditious" in the eyes of the murderer, Machado, and his Washington and Wall Street bosses, we com-

These five, however, are only a part of those thrown into jails since the Cuban workers showed their anger at being starved and oppressed by Yankee imperialism by their strike of 200,000 on March 20.

Every American worker, knowing that the fight of the Cuban working class is his fight, will back the demand for the release of all these workers with all his-or her-strength.

The International Labor Defense is calling on all organizations, especially Cuban workers' groups in the U. S. A., the Anti-Imperialist League, the Anti-Fascist Alliance, the Trade Union Unity League and all who know the meaning of class solidarity, to join in a campaign to fight for the release of every one of the victims of fascist

There can be no better way to show the Hoover administration of clubs, machine guns and poison gas for workers in the U. S. A., the government of Hoover whose ambassador in Cuba, Mr. Guggenheim, is the boss of Machado, that the American working class stands foursquare behind the Cuban workers, Communists, sedition and all!

As in all countries, only the Communists fight in the front line of the working class against the bosses; for that reason we urge all organizations to rally with the I. L. D. to the defense of the workers

On "Hopeful Aspects"

THE "socialist" leaders of the 5,000,000 workers in the German trade unions are dickering with the bosses, or rather are agreeing with the bosses to put over a wage cut on the whole working class.

The Berlin correspondent of the N. Y. Times puts it thus: "One of the hopeful aspects of the deliberations is the spirit of moderation being exhibited by the labor leaders."

Too lovely! Too lovely for words! We recall back in December when Hoover called his "Council" to fight against business depression; we recall how it was promised by Green and other leaders of the A. F. of L. that there would be "no strikes," particularly no strikes for higher wages. And Hoover, out of the goodness of his heart, like all bosses (!) promised, or got the bosses to promise, that there

Green has done his best to keep the promise, to prevent the workers from striking-as is the function of a strikebreaker and agent of the bosses in the ranks of the working class. But Hoover!

A continuous stream of wage cuts have been put over, hundreds of thousands of more workers have been thrown on the streets to starve, and now the big bankers' papers say that they are really only beginning to cut wages and speed up the workers, to fire more tens and hundreds of thousands and make a general attack on the working class as shown by the way the Unemployed Committee is held in jail while the starving millions and their families are asked to get excited about "red plots" by the fascist Fish "investigation."

As we remember, the strikebreaking promise of Green and the A. F. of L. was noted by the capitalist press as one of the "hopeful aspects" Hoover and the bosses saw ahead. It was, certainly, "hope-

The thing applies to the German trade unionists, who, being "socialists" are even trying to go Green one better. That is, on hypocrisy. It's hard, but they're trying. They have a beautiful trick. It

If-bear in mind that "if"-if prices are reduced, they will agree (oh, sweet souls!) that millions of German workers must take a wage cut. Of.course, like Green's December boloney about the bosses' not outting wages, the German "socialist" trade union leaders are said to be "demanding assurances," etc., and so forth, that prices will be

But that is only hokum just to cover up the treachery in agreeing to a wage cut.

In the same article giving us this news, it is said that a German pnomist remarks that if only ten per cent of the \$7,500,000,000 tied up in merchandise throughout Germany, could be converted into cash, it would be a god-sentl, etc., to German industry. Maybe so, but how are the German masses going to buy 10 per cent more if they get 10 per cent less wages by a wage cut?

Will the German capitalists cut prices on that \$7,500,000,000 worth merchandise ten per cent? What? And lose \$750,000,000? Capitalists are not built that way. They may dump goods on the world market, yes, but they will not cut prices voluntarily to the German masses on articles of working class necessities. In fact, only recently they have raised prices greatly.

The net result is: The German workers will get a wage cut, but they will fight like hell against it and dump the "socialist" traitors in doing so. The American workers should do the same with the fascist A. F. of L. and join with their German comrades in battle against the Young Plan of robbery and starvation against the German workers. Because, it is a fact, that if the German workers are forced to produce more cheaply, it will hurt the wages of American workers.

LOSE MEMORY IN TESTIFYING

Prosecution Jumps to Aid Provocateur in Cross-Examination

I.L.D. Meet Broken Up

Angeles Communist Party Has Office

EL CENTRO, Cal., June 8. quirming under the cross examination of defense attorney Henderson in the trial here of the nine agricultural workers charged with criminal syndicalism, the three spies testifying for the prosecution suffered sudden lapses of memory and were aided by the prosecutors in refusing to answer.

When Henderson asked Collum, a provocateur of the growers, whether on May 30 at Bristol Bar in Mexicali, Mexico he (Collum) had stated to a women "we had to provoke these people a little bit and are fixing the testimony to get a conviction" the prosecutors jumped to their feet and objected to the question. The objection was sustained by the judge, enough to give the spy a chance to answer no. The judge then sustained the prosecution's objection to further testimony

Oscar Chormicle, the third spy to testify, showed a remarkably poor memory and inability to coordinat much of the testimony he had offered the grand jury. While unable to recall either dates or places, or give the substance of what he alleged had been said, his chief memorized formula in referring to the defendants was that they spoke of "overthrowing by force." What he did not say.

CANDIDATES AT

8 Cities Represented; One Third Are Negro. Delegates

Bosses Want Party 'Kept from Ballot

CLEVELAND, Ohio, June 8 .-Eighty-seven delegates, representing many working-class organizations and trade unions from eight large Ohio cities, unanimously endorsed the Communist Party candidates and program at the Communist State Ratification Convention here. For the first time at a Communist ratification convention in Ohio at least one-third of the delegates were Negro workers.

The stubborn fighting spirit of the workers, their readiness to follow the Communist Party in a sharp struggle against unemployment, wage-cuts, speed-up, starvation and eviction, their growing militancy and their determination to fight the capitalist system was expressed in the speeches, resolutions and general spirit of the delegates.

Comrade Alomen, a Negro woman worker from Cleveland, raised the rousing appeal for revolutionary solidarity of Negro and white workers and for a determined struggle against race discrimination and lynching.

In his acceptance speech as Com-munist candidate for Governor, I. O. ture had quietly passed a new law aimed directly at the Comunist Party, which excludes the name and em of a political party unless more than 300,000 names are collected in petitions. The Communist candidates will be forced to run as "independents," but in the campaign meetings the workers will be told the real meaning of this maneuver of the bosses' legislature. This new class law was attacked and exposed

Calling for a sharp struggle against fascism in the United States, the convention demanded the release of the New York Unemployed Delegation, Foster, Minor, Amter and Raymond. It also demanded the release of the hundreds of class-war prisoners who are today rotting in the dungeons of "democratic" Amer-

A state-wide campaign is being made to bring the program and candidates of the Communist Party, as Communists, before the workers and farmers. The slate of the Communist Party in Ohio is I. O. Ford, candidate for Governor; William Patterson, Secretary of State; J. Odell, · Attorney General; Robert Sivert, State Treasurer; W. E. Douglas, State Auditor; Edward Williams, U. S. Senator.

John Marshall of Youngstown is a poor farmer. J. Odell of Youngstown and E. Williams of Cleveland are Negro workers. R. Sivert is a

BOSSES' NEWS ON CHINA WRONG

Daily Worker Correct on Fall of Changsha

Recent news reports show that the Daily Worker was right in doubting the truth of the capitalist report, especially the special despatch of the New York Sun, that it was the Red Army which captured Changsha. The quietness surrounding the

absence of significant revolutionary action on the part of the workers, such as the expropriation of the expropriators, etc., and the fact that the Chamber of Commerce is still in existence and is even allowed to fall of the city all point to the conclusion that the city was not captured by the Red Army, but merely by a branch of the Kwangsi mercenary troops in ally with the northern Coalition.

This incident furnishes another example of the necessity of closely crutinizing capitalist press reports before accepting them as "facts."

capital of Shangtung province, by Nanking forces which means the General Organizer J. Magliacano and Ironside forces are advancing toward Hankow in three columns. one against Kiukiang, in Kiangsi province, another directing toward Yochow, in Hunan, and a third toward Shasi, up the river from Han-Union, gave his report on the na- kow. The future of Chiang Kaishek, the tool of American imperialism in China, certainly looks

tive committee for the organization forces of reaction, Chiang Kai-shek and the Northern Coalition, the Chinese workers and peasants are ighting a heroic battle for the Soviet power in China, with the prospects of final victory looming larger and larger as the days pass by. even Victor Keen, the China correspondent of the New York Horald Tribune, the Wall Street organ, has to admit in a letter dated May that 'Communism is more wide in China today than at any time since April, 1927," which was the to represent the Independent Shoe time when Chiang Kai-shek betrayed the revolution.

COMPANY GREED KILLS 4 MORE METAL MINERS

LEADVILLE, Col., June 8 .- Insufficient timbering and bad engineering, all to save the employer money, caused a cave-in at the Climax Molybdenum Mine, near here, with four men killed and six injured. The accident took place in the lowest tunnel, 2,200 feet be-

low the mountain peak. Molybdenum is one of the relatively new metals in industry, something like tungsten. Under capitalism, industrial advance gives opportunity for more slaughter of work ers for profit.

Meyerhold's Moscow Players May Come Here Next Season

Plans are afoot to bring V. E. Meyerhold and his Russian company here next season. Although nothing definite has been settled as vet. Marion Gering, a friend of the noted regisseur, has received a letter from Meyerhold that he may pay us a visit early in the season and bring a number of his well known players along.

The plays which he has in mind to present here are Gogol's famous comedy and satire on the old officialdom, "The Inspector General," capture of that important city, the and Ostrovsky's "The Forest." Meyerhold has just closed a successful season in Berlin, and has returned to Moscow.

Charles Hopkins will start his next season with "Mrs. Moonlight," organize its own patrols after the a play by Benn W. Levy. It will open in September. Edith Barrett, now playing in "Michael and Mary," at the Charles Hopkins, and Guy Standing will have the leading roles. The play was produced in London two years ago. "Three Little Girls," the Vien-

Shubert Theatre, has been added to Theatre. the regular repertoire of the Theatre of Comic Opera, at Prague, and The evacuation of Tsinan, the will in future be presented there regularly by the resident cast. Reinald Werrenrath, noted congiving up of the province by Nank-ing, is imminent while the Kwangsi day by RKO for a limited appearance in vaudeville.

FASCIST BROACH HELPS NEEDLE WORKERS BOSSES, NOT 3,000 N. Y. PLAN TO BUILD JOBLESS ELECTRICIANS

Fakers Push Overtime Work to Bring in Money While Jobless Starve

Broach and Police Work Hand in Glove to Fight Communists in Union

(By a Worker Correspondent)

ASTORIA, L. I .- Here are some of the conditions as they exist in the Electricians' Union of New York City. There are over 3,900 men out of work, most of them from 3 to 8 months. Whenever one meets another he says, "Hey Bill, can you lend me enough for carfare or a bowl of soup." Men are being thrown out because they have no rent to pay. And at this time of the year everyone is supposed to be working.

This is the second time the Brooklyn Power house at Hudson Avenue has gone non-union, the other trades are union. The subway work is 90 per cent non-union. A job at 112th St. and Lexington Ave. is non-union, other trades union.

The business manager, Preiss, and Dictator Broach are pretending they are trying to get the electrical work on the subways. Here's how they go about it. A squad of high priced lawyers and through the courts they expect to get the work.

Under the prevailing wage law, the city could be compelled to give the work to union men. But these false labor leaders don't want to fight Tammany Hall for the work. They get \$125 per week rain or shine, after electing themselves this year. What do they care for

the men out of work suffering with their families. On the other hand hundreds of men are working overtime. Every man that works overtime is taxed 50 cents for every hour he works. In 8 months they, the union, collected \$200,000. A special office had to be put up and about 4 girls to handle the overtime money. In other words the men are starving amidst plenty. Whether you work or not you must pay your dues. Broach hasn't done a thing since he is in New York, outside of dictating and terrorizing.

Since Broach is now International president did he ever try to organize the best part of electrical workers in America, which are practically non-union, for instance, the power houses, the electrical manufacturing materials, public utilities, etc.

Far from it. What he is interested in is attacking all opposition and the Communists who have his number. What's more he doesn't allow opposition to exist. At all meetings there are secret service men of the industrial squad of the police department.

Don't you think that a new electricians' union ought to be formed? Cannot the TUUL rescue these men suffering under the fascist Broach and his cohorts.

-ELECTRICIAN.

Soviet Spring Sowing Is Success

MOSCOW, (IPS).—The work for the spring sowings has now reached its highest point. By the 15th of May 50 million hectares had been sown or 56 per cent of the plan. The collective undertakings had sown 23,853,000 hectares, the individual farms 24,383,000 and the Soviet farms 2,086,000 hectares. The individual farms are now picking up and the general course of the sowings is satisfactory. It is already possible to say with confidence that the hope of the kulaks that the sowings would fail will not be fulfilled. The most important grain areas have almost completed the tasks set to them, and with regard to wheat have considerably increased last year's area. In the Ukraine 111 per cent wheat has been sown as compared with last year, and in northern Caucasia 110 per cent, Volga district 103.1 per cent, etc. The total wheat sowings plan has already been carried out to 76 per cent and the total spring sowings plan to 74.3 per cent. The industrial crops sowings are also proceeding satisfactorily and the sugar beet plan has already been carried out to the extent of 96.4 per cent.

PRE-CONVENTION DISCUSSION

The Building Trades and the T.U.U.L.

By JACK TAYLOR. (Section 5.)

THE recently formulated policy proposed to our building trades comrades within the A. F. of L., to speak in the name of and openly state the program and demands of the T.U U.L .- is an opportunist policy and if carried into action will lead to the immediate expulsion of our comrades from the building trade unions, where we have as yet no T.U.U.I.

Such a policy if carried into action would also tend to completely isolate workers in the reactionary building trades unions from revolutionary influence and would completely abandon them to the tender mercies of the A. F. of L. bureaucracy. Such a policy, while correct in the building trade unions where we have succeeded in building T.U.U.L. groups and can therefore continue the struggle for our demands as well as for reinstatement, does not and can not apply to those A. F. of L. building trade unions where we have no T.U.U.L. groups and are therefore in no position to continue the struggle after expulsion.

The Policy of the A: F. L.

Some enlightenment as to the preparations of the A. F. of L. to speed up the expulsion of revolutionary workers in the A. F. of L. unions, is contained in the following paragraph of an article by H. H. Broach, International President of the I.B.E.W. in the May issue of the Journal of Electrical workers and opera-"The local Executive Board now tries cases for alleged violation of working rules.

It should be the permanent trial committee and try all cases. The verdict and penalty, if any, should then be reported to the local union, but that is all. That should end it-except for the accused having the right to appeal, the same as in the courts. The local union should not be allowed to discuss the case.'

Thus, if our comrades in those building trade unions where we have no T.U.U.L. groups are expelled, there is little likelihood of the issue involved being presented to the membership of the A. F. of L. building trade unions.

If we are to win over the thousands of disontented building trade workers to our revolutionary trade union center, the T.U.U.L., we must first intensify our work in the direction of building strong T.U.U.L. groups within the A. F. of L. building trade unions on the basis of the day to day struggles of the workers.

Reorganize Party Fractions.

In order to actively lead the building trade workers in their day to day struggles, the Party fractions in the A. F. of L. unions must be reorganized and those fraction secretaries that do not function must be replaced with more reliable and more active comrades. The Party fractions and fraction secretaries must intensify the work in the direction of building T.U.U.L. groups within the A. F. of L. building trade unions as well as among the unorganized building trade workers, and must coordinate the work of the organized with that of the unorganized.

Persistent effort coupled with correct policy will broaden and strengthen the building trades and construction work section of the T.U.U.L.

The Situation in the Building Trades and Our Tasks

By A. FISHER.

THE deepening economic crisis has greatly affected the building trades Although not an exporting industry, it is closely related to the export industries, which were the first to feel the crisis, an outgrowth of the shrinkage of markets, the speedup and wage cuts, because of the declining markets and which limits the consumption of the masses

The Wall Street crash, which is an ou of the economic crisis intensified it tenfold. It was right after the November stock crash that building declined at an unheard of pace, until today there is hardly any building going on except subway construction.

This crisis resulted in a great unemployment, speed-up and wage cuts (not officially) in the building industry. In March, when various of-ficials of the A.F.L. unions were interviewed as to the extend of unemployment, the figure given out by them was 40 to 80 per cent. The head of the Building Construction Association, Mr. Norman, stated that building declined 50 per cent. According to the N. Y. State Labor Department figures, building declined in the months of March and April 69 per cent of the same months in 1929 and 71 per cent of 1928.

We have reasons to believe that none of these figures given out by these people are exaggerated, on the contrary, we believe they are underestimated. It is already a fact that the crisis in the industry is not a temporary one although it may vary at times. Just as many thousands are walking the streets today in the "height of the season" as there were in March

Union Conditions Non-Existent.

While this situation is taking place, which has thrown 75,000 organized workers out of employment in New York and probably more in the unorganized field, speed up and a cut ir wages for the rest, the officials of these unionhave done nothing to stop the onslaught of the bosses. On the contrary, they are working more hand in hand with the bosses to beat down the wages of these workers, to speed up and to persecute those who raise a voice of revolt against these conditions. It is known to all that union conditions do not exist in this industry any more. The Building Trades Council is only an executive committee for the boss-

There are approximately 120,000 organized building trades workers in New York and about as many unorganized. American capitalism, due to its strength, has been able to bribe these workers for some time and also use them against the unorganized workers. It has hoped to develop a sort of an upper strata to be used against the semi-skilled and unskilled and the unorganized in general. To some extent it succeeded, telling them through the mouths of their officials that if the rest of the workers will be organized they will take away the jobs from them and that the unorganized building trades workers are inferior in skill to the organized, etc. But this partial success lasted only as long as their wages were high, steady work and plenty of overtime. But this is not the case now. The bosses have started a war against these workers too, and in order to meet this offensive of the bosses and their agents, the organized workers will have to ally themselves with the unorganized under the leader ship of the Trade Union Unity League.

Workers Discontented.

These workers are beginning to realize that they cannot expect anything from their reactionary officials, who are working against In connection with this it must be admitted that we have not been able as yet to utilize this discontent. Our work up till not long ago consisted in exposing the officials of a given local as grafters, without exposing the whole leadership and their tactics and putting forth our own program as the only remedy. We have allowed the expulsion of members and revoking of charges without organizing a mass protest against it. In addition to this, we have made united fronts at times with fakers in order to defeat bigger fakers. We have participated in signing agreements with the bosses, which were to the detriment of the workers. We failed to organize the rank and file within the union on the basis of a militant program. In addition to this, our work among the unorganized was almost negligible with the exception of organizing the electricians and a painters union and then dissolving it because we did not succeed in bringing them into the

However, our work after the Cleveland Convention of the T.U.U.L. has greatly improved ;

(not without any defects). For the first time we succeeded in breaking away from the fake progressives in the painters unions in the last elections. Our comrades and supporters ran for election on a militant program. We have succeeded in putting forth our program in several locals of the carpenters, despite the threats on the part of the fascist officials. We have spread propaganda in the electricians locals which resulted in the barring of our comrades from the union meetings, but not making an attempt to organize the rank and file sentiment for us. Our present groups are being organized on a clear-cut T.U.U.L. program. We have made inroad among some sections of the unorganized workers. Mass meetings of organized as well as unorganized workers were called. Our program was read by tens of thousands of building trades workers.

But despite the improvement in our work there are still many shortcomings. The following can be listed of the most important 1. Failure to organize the unemployed into

councils. Although this work was started it was quickly given up. 2. Failure to broaden our group within the

A. F. of L. locals, bringing in new rank and 3. Failure by the building trades league to

link up its work with that of the groups in 4. Failure to bring together the organized

and unorganized. 5. A very small per centage of our comrades are active in the trade union field, only about 15 per cent.

6. Having hardly any contact with the native workers although they comprise a great majority of the workers in the industry. 7. An erroneous policy given out by the

District T.U.U.L. in regards to the unorganized painters, which was later corrected. 8. Not sufficient work among the unorgan-

ized, especially construction workers. Not recruiting sufficiently into the T.U.

The possibilities are great if we will pursue the correct tactics. Our main task at the present time is to intensify our activities among the organized as well as the unorganized. Our aim is to build an industrial union. But before we do this we must strengthen our position among both organized and unorganized workers, which means strengthening the Building Trades League. We must work so in the old unions as to not only limit ourselves to pronaganda but do actual organization work. To broaden our groups and to recruit the best elements into the T.U.U.L. The Building Trades fraction, which is next to the biggest in the New York district must be activized. Unless this is done we will not be in a position. to carry out our work, i. e., to win the mapority of the members for our program. The work among the unemployed must be renewed. Our demands must be concretized, more immediate in order to rally a bigger section of the workers around our activities. And last, but not least, intensify greatly our work among the unorganized, which are the most exploited.

The Party and the T.U.U.L. must analyze the conditions in this industry and pursue a line which is adaptable to the conditions in this industry. It seems to me that the T.U.U.L. is too general in its present line. The present policy of the T.U.U.L., if applied would mean isolation from the organized workers without any benefit to the Party or League. It would result in the expulsion of our comrades from the union. It is wrong to say that what applies to the needle trades or the miners also applies to the building trades (Gorman). It is wrong to say that all the organized workers are the aristocracy of labor, therefore we haven't much to lose if we are expelled. It is likewise wrong to say that we must put 85 per cent of the emphasis on the unorganized (Gorman). While it is true that there are just as many unorganized as organized, working under bad conditions, a big portion of these are unorganizable due to conditions under which they work. It is also worth while mentioning that the unorganized do not work on new work, they only work on repair or alteration, with the average big contractor employing about 10 men. It is incorrect to say that a comrade has adopted the theory of excep-tionalism because he does not believe that building trades workers are just as ready to follow the Party and the T.U.U.L. as the textile or the miners are. That if we are ready

Organizing the Unorganized in the Building Trades

By L. BRAVERMAN (Building Trades Secretary.)

of the most important tasks confronting the Party in this period is the activization of the Party members in the campaign to organize the unorganized as well as building T.U.U.L. groups as the leader of the struggle in the old unions. How true this formulation is can only be exemplified very definitely especially in relation to the comrades of the building trades. Out of a fraction of 500 Party members in N. Y. only 50 to 60 come to meetings when they are called upon, while the rest of them do not know what our policies are nor do the workers with whom these comrades come in contact know anything from them as far as our campaigns are concerned. It is a very bad situation when we have Communist contacts in 70 building trades locals of the A. F. of L. and not even in one tenth of these locals did we make any attempt to come out with a program of the T.U.U.L. for these

Is it possible to build the Party and the I.U.U.L. on such activity as we witness from the comrades of the building trades? Not only would we not be in a position to build up any sort of a movement amongst these workers but to my estimation it would lead to a great amount of confusion and disorganization if these comrades would attempt to organize, because they are away from the Party, away from the meetings of the T.U.U.L. and as a result of that they do not understand the Party line and therefore could not organize correctly and in line with the policy of the Party and the T.U.U.L.

The Building Trades and the Crisis. What is the situation in the building trades at the present time and what are our prospects to organize the unorganized as well as building up effective T.U.U.L. groups in these locals of the A. F. of L.?

The crisis of unemployment that is becoming greater from day to day has hit the building trades to such an extent that more than half of the building trades workers are idle and have been for the last year or so.

Wages are being reduced, the speed up is being increased. Union control is being eliminated day after day. The prosperity inheritance that has been attached to the building trades workers in the past is now only a shadow.

In view of this crisis and the ills that follow it (speed up, cutting of wages, etc.) the opportunities for us to organize have increased tremendously. The workers are disgusted, they are beginning to lose the little confidence that they did have in their leadership. Hundreds of them are dropping out from the unions. Do we, as Communists have something to learn from these facts? Is it necessary to adopt a more concrete line for our work in these locals? The tasks are clear. We must utilize this mass discontent of the building trades workers. With these facts in mind we must bring forward the main task and that is building the T.U.U.L.

Fight Inactivity.

Are we utilizing this discontent among the building trades workers for our purpose? Are we basing our activity on these lines? No. The very fact that at the present time, almost a year after the Cleveland convention of the T.U.U.L., we cannot show anything concrete as to where we have made any inroads or have broadened the base for our revolutionary activities. Of course, there are some small exceptions. What is the reason for this inactivity? What is the reason why we are not making use of this situation? The basic reason, to my opinion, is the lack of clarity on

we are also ready in the building trades. Existing as well as existed conditions must always

be taken int consideration. And finally, the Party must activize our comrades, help develop a leadership in the Building Trades League, enlighten the comrades on a correct line and I am sure that in the very near future we will make great strides in organizing the unorganized as well as winning a majority of the workers from the treacherous A. F. of L. officials, for an indus for a union in the textile industry therefore, trial union in the building trades.

the part of some comrades as to our tasks. (1) The failure to apply the T.U.U.L. policy correctly. (2) The hesitation and refusal on the part of some comrades to apply the line of the T.U.U.L. in a given situation.

Comrade Taylor in his article on the role of the T.U.U.L. in the building trades A. F. of L. locals shows us very clearly the lack of understanding correctly the line of the T.U.U.L. and consequently a wrong application of the line. He states that the policy of the T.U.U.L. in the building trades is an opportunist line and that if applied would isolate our comrades from the building trades unions where we have no contact or T.U.U.L. groups. It seems to me that Comrade Taylor does understand that we cannot apply the T.U.U.L. line in those locals where we have no groups, that the T.U.U.L. groups are built around the T.U.U.L. program and not around "progressive programs." How comrades can be expelled from A. F. of L. locals without them organizing a militant fight around the revolutionary program is still unclear to me. Apparently Comrade Taylor does not see that building the T.U.U.L. is not a thing in itself but that it is organically bound up with the every day struggles of the workers.

What the T.U.U.L. Program Is Not.

Comrade Taylor further states that it would be criminal to continue with this program in the locals where we have no T.U.U.L. groups. What program he does not state, nor does he propose any immediate steps how to broaden our activity in the A. F. of L. Comrade Taylor fails to understand that while in general the T.U.U.L. speaks openly to do away with the fascist A. F. of L. it also states that we must apply our program according to the situation as it presents itself. Comrade Taylor does not orientate himself towards building a revolutionary building trades union but just the opposite, orientating towards reforming the A. F. of L. (1) Trade union legalism. (2) Fear to attack the officials of these unions openly. (3) Constitutional regularity plays a very important part as yet with Comrade Taylor.

It is precisely for these reasons that we are not building the T.U.U.L. Comrades are still reasoning as in the period when we believed we must not organize outside the A. F. of L.

The Program of the T.U.U.L. The program of the T.U.U.L. is primarily

based on the organization of the unorganized and it is from this point that we have to orientate ourselves. How does this apply to the building trades? There are as many unorganized building trades workers as there are organized workers. The unorganized are the base from which our Building Trades League must set its drive to organize. This drive to organize the unorganized must not be separated from our work within the A. F. of L. but on the contrary it must be closely con-

As stated before, various opinions are held by some of the leading comrades of building trades, namely: the underestimation of the T. U.U.L. and therefore the overestimation of the strength of the fascist unions of the A. F. of This can be very well traced to Comrade Fisher's article dealing with building trades. Fisher's Article.

While Comrade Fisher points out correctly that there are as many unorganized building trades workers in New York as there are organized, he states that a great portion of these workers are not organized due to the conditions under which they work. By stating this Comrade Fisher loses the main task of the T.U.U.L., namely: the organization of the unorganized. He places a Chinese wall around the unorganized building trades workers and says they cannot be organized but he does not give the reasons for this formulation. True enough that most of these workers working in New York are engaged in alteration work and therefore work for small contractors but does that stop us from organizing? On the contrary, it is precisely for this reason that these workers are underpaid and are working long hours, that the base for organization is more favorable for us. Comrade

THE FIVE YEAR PLAN OF GREAT WORKS

THE Theses of the Political Bureau of the Communist Party of the Soviet Union on the Five Year Plan for Industry, to be presented to the 16th All-Union Party Congress, published in "Pravda" for May 23, give a thorough, analysis of accomplishments and shortcomings, point out the most important tasks on which all efforts must be concentrated, indicate new methods of utilizing the tremendous enthusiasm of the masses, and endorse the Leninist line of the Party leadership for industrializing the country. "Largescale industry, and that alone," Lenin is quoted in the Theses, "is the one and only basis for the foundation of socialist society.'

The tempo of development of industry, laid down in the Five Year Plan, as accepted by the 15th Party Congress, has not only been reached, but in many branches of industry, has been exceeded. At the very beginning, in 1027-28, industrial production was increased by 26 per cent, exceeding the quota which was 24.5 per cent. In 1928-29, the first full year, the quota was 21.4 per cent, but the Soviet workers increased production by 24 per cent. As a result of these successes, and in view of the tremendous enthusiasm of the workers, the quotas for 1929-30 were raised, from 21.5 per cent, which had been originally intended, to 31.3 per cent.

Although the figures early this year were higher than the original quotas, they were lagging somewhat behind the new quotas, and the Central Committee took a number of measures to broaden the mobilization of the masses, ruthlessly disclosing, and combatting the failings and defects in the economic, trade union and Party apparatus. As a result of these measures, a decided increase was ob tained, and while the figures are not yet up to the quota for the first half-year, the quota for the whole year will probably be reached. This will mean that industrial production in the U. S. S. R. will have increased in the two first years of the Plan by 65 per cent, as compared with the original quota of 47.5 per cent. More important still, products of heavy industry-those branches of industry producing means of production-will have increased by 88 per cent, as against 58.4 per cent originally

Figures are given for the increase in different industries: production of machinerymore than doubled in 2 years; electrical supplies, etc., produced will be 2.7 times as much as last year; agricultural machinery-250 per cent increase in 2 years; pig iron-66.7 per cent increase (quota was 31 per cent); coal -45.8 per cent increase (quota was 31.6 percent); oil-37.8 per cent (quota was 26.5 per cent); cement-84.9 per cent (quota was 63.9 per cent). Coal production is 78 per cent above pre-war, pig iron-31 per cent, oil-74

per cent, cement 79 per cent. There has been, as a result of the Five Year Plan, a great increase in the numbers of the working class-520,000 since the 15th Congress. And together with this has gone a considerable improvement of the material and cultural situation of the working class, an increase in its share of the national income, and an improved standard of living as a result of the increased wages, the 7-hour day, the decrease in unemployment, and the increased budget for social insurance (over 1.4 billion rubles in the current year). The victories in industry have strengthened the position of socialism in the country and have created the basis for the turn of the millions of middle peasantry to socialist forms of agriculture. The successes in the field of increasing pro

duction, however, have not been accompanied by the necessary increase in the quality of the products, which (says the thesis) is still at a low level and may become worse, unless corrective measures are taken. All economic organs, etc., must be held to the strictest accountability on the question of quality of production, not less than on quantity. All the organizations of the working class, the press, socialist competition and shock brigades must be utilized to the full in the struggle for improvement of the quality of products of industry. Costs of production have also not been lowered sufficiently (4.4 per cent as compared with 7 per cent required by the plan). Lowering of the cost of production is of the greatest importance to the whole plan, and for this reason, special attention must be directed towards socialist rationalization-improving the organization of production, raising the productivity of labor, more rational use of raw materials, fuel and equipment, and decrease of waste and loss in production. The theses enumerate the specific defects in the field of plant construction, etc.

The theses center attention on the so-called "narrow places" of Soviet industry, that is, those branches of production which have always been backward in proportion to the rest and on the development of which all the others depend. First of these, is fuel (coal, oil, peat) and electricity. Production of transport supplies and building materials must be speeded Industries necessary for the defense of the country are of the first importance. The rapid collectivization in the village raises to the greatest importance those industries producing tractors, automotive machinery and farm machinery, as well as the chemical industry (for fertilizers). This is why the opening of the Stalingrad tractor plant, the expansion of the Krassny Putilovetz, and the completion of other plant construction in these fields-freeing the country in the shortest possible time from the necessity of importing these machines, etc .- are of the greatest political importance.

The carrying out of all other industrial tasks are dependent, first and foremost on the production of machinery. Despite the great strides already made in this field, it is still behind, and the whole situation in this industry must be carefully reviewed. Metallurgy, the basis for machinery and other industries is fundamental. The decision of the Central Committee is approved, that the industrialization of the country can no longer be dependent on the one solitary basis of metallurgy (in the South), and that the establishment of a new center of the coal and iron industry in the East, through the utilization of the rich mines of the Urals and Siberia, is absolutely indispensable

Proposals for Formation and Organization of Workers **Defense Corps**

By WILLY GUCTHAT.

ONE of the main tasks of the Party today is to organize Workers Defense Corps. Fortunately, we have in the Red Front Fighters League (Roter Frontkaempfer Bund) of Germany a good model. The Red Front League has been a great success and a gain to our brother Party. It is, therefore, only well to use their experiences and there is no reason why we should lose time by trying to organize the Defense Corps in a different way and in a different system than the Red Front League.

The Red Front League is an independent organization, although under the leadership and supervision of the Party. Young workers are organized in the Red Young Front (Rote Jung Front) and marine workers in the Red Navy (Rote Marine). The members all wear the same uniform and consist in the main of exservicemen. The League, in the main is divided into Corps (Abteilungen), Sections (Unter-Bezirke), and Districts (Gaue). Each corps elects two corps leaders, aided by a staff functionaries. Sections, District Leaderships, and the Central leading body get elected at their annual Delegation Convention.

The ranks of the League are open for every revolutionary worker and thus, through the League, the Party has been broadening its influence over the masses. The Red Front League is a revolutionary depot, educating and drawing the workers into the Party. The Red Front League has been the bearer of many militant actions and of demands such as: "War Against War," "Defend the Soviet Union,"

I suggest that the Workers Defense Corps should be organized on the principles and along the line of the Red Front League, as briefly outlined by me. An organization on a shop nuclei and workers organization basis would split up the ranks and divide the Defense Corps into many small units, difficult to communicate with and slow moving. What we need is a compact, military, disciplined mass, responding quickly to every emergency call. Furthermore, such an organizational basis would bring the Defense Corps under the influence of all the different organizations and leaders, which must be prevented.

It would be wrong to wait until a certain organization raises the specific demand of organizing Defense Corps. On the contrary, the organization of Workers Defense Corps must be taken up by the Party immediately and on a nation-wide scale.

> Demand the release of Foster, Minor, Amter and Raymond, in prison for fighting for unemployment insurance.

Fisher fails to see further that a great porttion of the construction work operations out of New York are made by unorganized workers. Comrade Fisher places his main emphasis on the A. F. of L. since a big portion of the others are "not organizable."

In building the T.U.U.L. in the A. F. of L. Comrade Fisher says, "the present policy of the T.U.U.L. would lead to isolation, to expulsion of our comrades from the unions with out any benefit to the Party or the League." And what does Comrade Fisher propose? "To broaden our groups and draw the best out of them for the T.U.U.L.'

Fisher's Proposals.

This means that we continue functioning as

we did in the past instead of putting forward the T.U.U.L. groups as the leader of strug-gle in the old unions. Comrade Fisher proposes that we build "progressive" groups as the leader and makes a "concession" to the Party that we build T.U.U.L. groups as an ornament within the progressive groups. Instead of mobilizing the workers in the locals around a definite revolutionary line of the T.U.U.L. and organize these workers for the program of the T.U.U.L. Comrade Fisher wants "progres sive" groups. The program of the R.I.L.U. for independent leadership is buried. The T.

day struggles on which basis to win the workers for the T.U.U.L. organizationally and not towards reforming the A. F. of L. Our comrades will be expelled if we carry through the policy of the T.U.U.L., says Fisher. I can only agree with Comrade Fisher on this question in so far that if our policy will carried out mechanically, and as a frozen de-

cision, certainly we will be ousted from the

U.U.L. groups serve as the platform from

which we organize the workers in their every

A. F. L. This policy must be carried through in the locals openly as a general rule, but Comrade Fisher fails to understand that we have to change our tactics according to a given situation. In locals where we have a substantial section of the workers for our program we do not hesitate to place ourselves openly as a T.U.U.L. group; but in locals where we have small influence, certainly we do not come out openly as members of the T.U.U.L., but nevertheless we do not hesitate to bring forth our program before the workers.

To work on the assumptions that we will be expelled for the T.U.U.L. policy, this means what? (1) That we should not put forward our program to the workers. (2) That we must work in these unions only as far as trade union legalism permits. (3) In general it leads towards abandoning the work of the T.U.U.L. because of these difficulties. This policy, if practiced, will isolate us, this policy will compromise us in the eyes of the workers whe look up to us for leadership.

Our Main Tasks. Our main task at the present time is to organize the unorganized; to broaden our work within the A. F. of L. and building of T.U.U. L. groups in every local definitely for the program of the T.U.U.L. and not on the basis

of fake "progressive" groups. To achieve our revolutionary tasks, to give ladership to the building trades workers, we must activize every comrade in the building industry. We must develop broader cadres of leading comrades. We have still too few at the present time.

Forward towards revolutionary activity in the building industry! Forward to one union in the building in-
