Demand a reckoning from the Second International for the dastardly treachery of the agents of the French General Staff, Boncour and Blum; for the attitude of the British Labor Government which imprisoned fifty thousand Indian freedom fighters; for participating in the intervention preparations; for the shameful treachery of the Russian menshevists; for supporting Chiang Kai Shek; for the treachery of the Spanish socialists, who facilitated the fascist victory at the highest point of the revolution.

Workers, social democrats! Abandon the socialist parties. Leave the Second International! Turn your backs on the international scabs, police, presidents, interventionists. The Second International is nothing but a contemptible ally of dying capitalism.

Workers of the world! It depends upon you whether the socialists succeed in saving capitalism, from a proletarian revolution as in 1918.

Capitalist stabilization is ending. The Versailles system is collapsing. There is uncertainty in the imperialist camp. It depends on you whether capitalism finds a capitalist way out from this crisis.

Workers of the World. Form revolutionary united fronts of workers, and oppressed peoples of the world against the exploiters.

The workers, and collectivist peasants of the Soviet Union are replying to the intervention threat with bolshevist tempo of development, and formation of housands tof new shock groups, building hundreds of new facories, power stations, mines, collectives, by consolidating the fighting strength of the Red Army.

On May Day the workers of the world will march under the fighting banner of the Communist International. Against imperialist interventionist preparations! Against white terror of bourgeois reaction! Against fascism, social fascism! Against capitalism, the dictatorship of the bourgeoisie! For the Soviet Union! For Soviet China! For the dictatorship of the proletariat! For Communism!

# **Defend the Soviet Union!**

**O**<sup>N</sup> page 4 today the Daily Worker gives a complete picture of the participation by the capitalist government of this country in the anti-Soviet war and intervention plots of world imperialism.

On page 1 there is exposed a concrete case of forgery and war propaganda against the Soviet Union, a propaganda that is aimed to influence the toiling masses of America against the First Republic of Workers' and Peasants.

There is a pleasant fiction broadcast by the capitalist press and fervently supported by the lying social fascist "socialists," along with all rag-tag and bob-tail brands of "pacifist" spreaders of confusion, to the effect that while American capitalists "don't like" Bolshevism and the American capitalist government will not recognize the Soviet Unionstill "there is no war plot" against the Soviet.

The exposures in today's issue prove otherwise and give their own son. But it is necessary here to mention another liar. Walter Duranty. Moscow correspondent of the N. Y. Times, who has tried to ascribe to "fantasy" the revelations in Soviet papers of the role of the American Farm Board as a supply organization for imperialist intervention and war against the Soviet Union.

The exposure we publish today cannot be laughed off as a "fantasy." And the same Walter Duranty is compelled to report in the N. Y. Times of Monday, that the Soviet Union is not taking the hostile moves of the Hoover government against it lightly, nor is it taking them laying down.

But the danger of war against the Soviet Union grows daily! Precisely because the Soviet Union, with unemployment wiped out, with the 7-hour day ,a rising wage scale and its Five Year Plan of socialist construction independent of imperialist domination, is a beacon light to the workers of all the world, American capitalism is mobilizing for war against it!

American capitalism would destroy that beacon light! And it is the deepest duty of the American working class to say "No"! To defend the Soviet Union! To let the war makers at Washington and in Wall Street know that a war against the Workers' Republic will establish a revolutionary fighting front in defense of the Soviet Union in every American factory, mill, mine and regiment! And it is the duty of American workers in the May First demonstrations to shout so thatall may hear. Down will erialist war! We will defend the Soviets!

 $T^{\rm HE}$  capitalist world is feverishly preparing for war. Torn as under by its own antagonisms between the different imperialist powers, under the pressure of the deepest economic crisis in history, with its temporary post-war stabilization rapidly disappearing, and above all with the millions of starving masses having before their eyes the example of the Soviet Union with its unprecedented growth of economic life upon a socialist basis, inspiring them by its very existence to similarly reorganize their own life as the only escape from the miseries of capitalism-under these conditions, world capitalism is making a as the solution of its crisis.

But behind her looms the sinister power of the most powerful capitalism, America, which is moving surely, step by step, in the same direction. And it would be a great mistake to suppose that France is "leading" America in this, the supreme question of world politics. The U. S. A. has its own entirely independent line, designed to subordinate the anti-Soviet front to its own hegemony, and to make the attack

its special struggle against its imperialist rivals. The ripeness of the capitalist world for war was recently expressed by a spokesman of American capitalism, Senator David A. Reed, in the following words:

"I believe that if it were not for the apprehension of Bolshevism, the countries of Europe would be at each other's throats this very minute."

active preparations for war. Each measure of distress, which is so acute that Senator Caraway war preparation is carefully hidden behind a new "guarantee of peace," or behind some "humanitarian" measure for the starving population of America. Thus, the millions of bankrupted dred million dollars, largely buying 275,000,000 farmers ruined by the agrarian crisis, were told | bushels of wheat.

But we know the real object of the Farm Board, which was exposed in "Pravda" of April 9th. Now that the Board has finished its real work. Mr. Legge has resigned. His activities were timed to correspond with the original calendarplan of intervention.

## Behind the Hypocrisy—War

Other war moves are accompanied with similar disgusting hypocrisy. Stimson's notorious intervention in aid to the Chinese militarists in 1929, in the Chinese Eastern Railway affair was declared to be "to preserve peace" under the Kellogg Pact, masking the real intention to seize the railway for American imperialism, not only from the Soviet Union and from China, but also from Japan. The church campaign in 1930 was "in behalf of the persecuted priests"; the "antidumping" campaign is "in the interests of preserving the standards of the American wage worker": the slanders of "forced labor in the Soviet Union" are "in behalf of the oppressed Russian toilers"

But behind the hypocrisy, the real purpose stands out sharp and clear. It is openly stated by such leading capitalist newspapers as the

nomic, social and political philosophy inevitably must wage a gigantic and fundamental struggle with theirs."

When the recent embargo was placed by the U. S. against Soviet pulpwood, President Hoover made a public declaration that this measure was "not aimed at Russian trade." But one of his own chief supporters, the "New York Herald-Tribune," immediately exposed this hypocrisy, saying

"President Hoover has added his own assurance . . . that the new regulations . . . are not aimed at Russian trade. . . . The official assurances must be regarded as more 'diplomatic' than real."

Or consider these words of Admiral Pratt, Chief of Naval Operations of the U.S. Navy, who said:

The capitalists do not have an easy task in rousing the masses against the Soviet Union. The American workers en masse have always had an instinctive sympathy for the U.S.S.R. They also have an instinctive distrust of the | and the renegades from Communism.

## A. F. L. Aids Intervention

The American Federation of Labor boasts that | it is the most consistent and stubborn enemy of the Soviet Union. It rebukes some capitalist circles for their treason to capitalism in doing business with the Soviet Union. It repeats in its press every lie and slander printed anywhere in the world. It speaks from the same platform with the patriotic societies, American Legion, and other chauvinist and fascist organizations. It endorsed the Pope's attack, the Fish Committee the Whalen forgeries, the anti-dumping campaign, the "forced labor" slander, and every preparation for war. William Green, president of the A. F. of L.,

declared:

"The A. F. of L. is in harmony with the policy recently reaffirmed by the State Department. . . . Russia was charged with dumping pulpwood in our markets produced by political prisoners forced to labor in lumber camps."

Matthew Woll, vice president and anti-Soviet expert, speaking before the American Coalition of Patriotic Societies, said of the Soviet Union:

"There is in that regime something which makes it impossible for our nation to hold with it the relations common to friendly governments. She is seeking to destroy our institutions, break down our industries.... She is constantly sending revolutionary experts into our country illegally in the guise of trade experts, students ... each one a courier, each a professional agitator in the cause of Communism and world-wide revolution. It must be

# Socialists Serve Capitalism

The A. F. of L. has lost most of its moral in- | fluence among the workers, so far as the Soviet Union is concerned, because it is even more reactionary than most of the capitalist press. All the more valuable for capitalism, therefore, are the services of the "socialist" party of America. ll and weak as this party is, it is able to fill the columns of the capitalist press (not to speak of the small circulation of their own papers) with anti-Soviet slanders under the label of "socialism." It is of great interest to us to know that the "socialist" party of America also participated actively in the anti-Soviet campaign of the Second International and the Russian Mensheviki, in the sabotage work against the Five Year Plan and the preparations for intervention. Mr.

This same close relationship is expressed in the fact that the sister of Secretary of State Stimson is a financial supporter and active worker on behalf of Monarchist emigre organizations, is a patroness of Djamgaroff, and travels extensively in Europe on their behalf.

experiencing the full glory of capitalist "prosperity" are their eyes turning more and more towards the Soviet Union and its inspiring progress.

The left social-fascist. Muste, returning recently from a trip across the country, reported that "the only subject which really arouses enthusiasm among the workers of the U.S. is the Soviet Union and its Five Year Plan." It is therefore necessary for the capitalists to find other instruments for turning the masses against the Soviet Union. These they find in the American Federation of Labor, the "socialist" party

obvious that the gold credits resulting from the dumping of goods produced by convict, forced, underpaid and under-nourished labor in the USSR, contribute an additional supply of funds readily available for the purpose of conducting Communist propaganda and subversive activities in this as well as other countries to the detriment of our democratic ideals and free institutions."

These are the same William Green and Matthew Woll who, on behalf of the three million workers in the A. F. of L. promised there would be no strikes during the economic crisis, who have accepted a twelve billion dollar wage reduction for the American workers during 1930, who actively break all strikes that occur in spite of them, who give their approval to the monstrous system of prison labor in America, to the cold-blooded shooting of prisoners as occurred a few weeks ago in the Illinois State Prison, who approve the chain gangs in the Southern U.S. where thousands of worker-prisoners are rented out by the state to private capitalists, who keep silent on the horrible lynchings of Negroes in America, who fight against all proposals for unemployment insurance for the ten million iobless

These gentlemen have the brazen effrontery to speak of "forced labor" in the USSR and of the "free" institutions of the government that executed Sacco and Vanzetti, has kept Tom Mooney in prison for 15 years, and which is ruled by the famous "59" billionaires.

Abramovitch, plenipotentiary of the Mensbeviki and executive member of the Second International, was a welcome visitor to the "socialist" party of America in 1925, 1928 and in 1930. When he arrived in New York in January last year, he immediately wrote an article for the New York

writes on November 29, during the Industrial Party trial:

"Soviet Russia's charge of a European nlot against her has not been supported by evidence. It seems improbable on the face of it in view of Franco-Italian controversies and other quarrels between capitalist nations."

On December 13, the "New Leader" gives its columns to an American engineer for the defense of Ramzin. It says:

"On the day when the commutation of the sentences was reported, H. W. Brooks, a consulting engineer in New York, who was with Professor Ramzin in Europe when the latter was supposed to have arranged the plot, declares that he knew nothing of such a plot. Brooks is of the opinion that the confessions were arranged by the OGPU, the soviet secret police, as a 'farce' to strengthen the Stalin dictatorship."

The Reverend Norman Thomas, in the name of socialism, assures his readers in the issue of Jan. 17, 1931, that the Soviet trade unions are mererly organs of dictatorship over the workers, that "today their unions are scarcely more than company unions in relation to the state."

"If it were not for the fact that the Amer-

leadership of William Green and his prede-

cessor, Samuel Gompers, has refused to com-

have been trying to bore from within in order

would be a serious threat to American in-

# **Fish Praises the Social-Fascists**

It is no marvel, therefore, when we review the 'heroic work" of the socialist party and of the American Federation of Labor, that Mr. Hamilton Fish, chairman of the notorious Fish Committee of the U.S. Congress, declared that the socialist party was a legitimate, respectable political party which should not be harmed in any way, and gave a warm testimonial to the American Federation of Labor as the principal sup-

against the Soviet Union, an honored place is reserved by the capitalist press for the renegades from the Communist Party. Lovestone became one of their heroes when in 1929, it was announced upon returning from Moscow that he had "escaped" from the dungeons of Stalin and the GPU.

The renegades are, for their brief moment, specially valued by the capitalists, because they carry forward the same policy under the very label of "Communism." They attempt in prac- is under the despotism of the murderer. Stalin."

Into this united front of war preparations | tice to carry out the advice given in the liberal weekly "New Republic" to "take Communism away from the Communists" in order to save capitalism. Lovestone issued the slogan: "Defend the Soviet Union by overthrowing the Stalin regime." The very slogan of defense of the Socialist Fatherland is thus to be turned into an instrument for preparing the interventionist war. And that little group of opportunists which operates under the banner of Trotsky, joins in with the cry: "The Soviet Union

and Italy."

"Chicago Tribune," which brazenly propagandizes for war against the Soviet Union. A typical example is the following from the "New Bedford Times," organ of the textile interests:

"We would point out emphatically that the United States must not delay or hesitate in such matters. It is a case of fight now against the Soviet or to be devoured by the Soviet after we have been reduced so to be unable to fight. And with proper economic campaigns against the USSR let us not forget plenty of armaments."

Or the following, from a speech of a member of Mr. Hoover's cabinet, Mr. Wilbur, Secretary of Interior:

"One of the great people of the earth is deliberately trying to work out large social and economic programs for the mastery of its vast terrain along new and untried lines. Our eco-

The world in which they (the USSR) live and the one in which we live are so totally different that the two cannot exist side by side indefinitely without great compromise on one side or the other or war ultimately may result." When we add that for over 13 years the U.S. Government has refused all normal international relationships with the Soviet Union, that in all this time it has officially had an embargo against the sale of airplanes or anything which could be used for war purposes, and an embargo on all long-term credits (which some American banks were anxious to give), it becomes clear that the fundamental policy of American imperialism points directly and undeviatingly towards war against the Soviet Union. The only question at issue is when will American imperialism decide that the moment most favorable for its own particular aims has arrived.

# Plan To Repeat "Glorious" Achievements of 1918

Let us never for a moment forget that American troops participated in the interventions of 1918-1919, in Murmansk, Archangel and the Far East. American money and military and medical supplies backed Kolchak. Yudenich and other white guard bandit attacks upon the Soviet Union. And American imperialism counts these pages of its history among the "glorious" achievements of its armed forces, placing the name of "Murmansk" alongside of "Verdun" on the "Victory Arch" built in New York City (with the approval of "Socialist" Assemblymen) to greet the returning troops. What American imperialism did in 1918-1919, it is now preparing

to repeat on a larger scale. Preparations for intervention have been the subject for constant conversations between the U. S. and European Powers. When the late London Naval Conference was in its difficult moments, Harold Price Bell, London correspondent of the Chicago Daily News, forecasting an agreement in spite of all difficulties, argued thus: "Hovering over the London Conference is

the shadow of the Soviet Union, driving the representatives of the different countries to agreement, at least on common measures to meet this common danger. This is doubtless one of the principal subjects of discussion behind the scenes."

# Mobilizing For War By Demagogy and Lies

Thus the United States drives toward war. It ing, but at the same time that it is the cause of for war purposes, for the army, navy, air forces, war pensions, and interest on war debts. Mcanwhile it refuses the slightest aid to the starving ten millions of unemployed and the several million starving farmers. "Billions for war, but not one cent for social insurance," is the slogan of American imperialism.

Mobilizing the masses for war, the capitalist press is engaged for the past year in a gigantic campaign of lies, slander and demagogy. The masses are told that the Five Year Plan is fail-

is spending 90 per cent of its enormous budget | the crisis in the capitalist countries. The farmers are told that Soviet wheat caused the agrarian crisis, and Soviet operations on the grain exchanges caused the recent drop in the price of wheat. The millions of unemployed are told that their misery is the result of a diabolical plot by the "dictator" Stalin. The religious masses are told that in Soviet Union hundreds of thousands of priests are murdered in cold blood every year by the GPU. Free use is made of the most shameless forgeries to bolster up this campaign.

# The Socialist Leaders Knew of Intervention Plans

There is not the slightest doubt that the leaders of the socialist party in America knew of the sabotage work and intervention plans, including the date set by the French General Staff. They carried on an agitation even stronger than that of Kautsky. And when last November, the leaders of the Industrial Party were placed on trial before the proletarian court in Moscow, the socialist party leaders held a meeting of protest in New York. They openly declared their sup-

## The "New Leader" Develops the Campaign

Is this an exceptional quotation? Not at all! The official socialist party paper, "New Leader," has developed a constantly sharpening campaign in this direction. Examine for instance the article, "The Making of Fascists," by Mr. James O'Neal, in the issue of August 2. This is so characteristic that a long quotation is justified. He savs:

# Why the American Workers Must Defend the USSR

rely upon this process taking place automatically. Almost as serious a mistake would be to rely only upon the "exposure" in words of the crimes of the social-fascists. We must find those concrete slogans and forms of struggle which will link up the struggle against war with the struggle for the everyday demands of the workers. In the U.S. we have used for this end the slogan, "Not one cent for war, all for unemployment insurance." This has proved very popular.

We must explain constantly to the workers, in a popular, easily-understood language of the workers themselves, in terms of their own life. why it is that they suffer under capitalism, and why it is that in the Soviet Union there is no economic crisis, no unemployment, a rising tion during the days of the famine.

We must connect the Russian October Revolution up with the experiences of the workers in our own countries. In America, we must explain to the masses that we also, in the U.S., helped to found the Soviet State, when American workers in the interventionist army in Murmansk, fraternized with the Red Army and went over to their side. We must show how we in America have a share in the Soviet victory, through the strike of the Seattle longshoremen against leading munitions for Kolchak, through our "Hands Off Russia" committees, through our great campaign of the Friends of Soviet Russia organiza-
