The New Deal In Canada

by SARANY OHAI

The New Deal in Canada is not so much a program of economic relief as a reorganization of the political and social order. It is a movement to give the country a new lease on life, a new sense of purpose in a world that has seen better days. The New Deal is the result of a long and bitter struggle, and it is a struggle that is far from over.

One of the main achievements of the New Deal is the creation of a new political party, the New Deal Party. This party is dedicated to the idea that the government should be a servant of the people, and that the people should have a say in the running of their own country.

The New Deal has also brought about a great change in the way that the country is run. The old system of corruption and graft has been replaced by a system of honesty and integrity.
