Increased Terror Part of Italy’s War Against Ethiopia

BY ROMAIN ROLLAND

ITALIAN Fascist invasion is strangling the last free people of Africa, and is being justified by a phony "anti-fascist" propaganda such as has never been seen before. The Fascists have been described as "democratic" and "anti-fascist" by the United States government, even as they were committing crimes such as those described in this article. The Fascists are not democratic, but are avaricious in their desire for power and control. They are not anti-fascist, but are engaged in a war of conquest and expansion.

FASCIST PARADE

The Fascists are carrying out a propaganda campaign to make the world believe that they are fighting for "freedom and democracy." In fact, they are fighting for power and control over the resources of a whole continent. The Fascists have been described as "democratic" and "anti-fascist" by the United States government, even as they were committing crimes such as those described in this article. The Fascists are not democratic, but are avaricious in their desire for power and control. They are not anti-fascist, but are engaged in a war of conquest and expansion.

Save Ethiopia from Fascist Butchery

By F. A. COWAN

President of the Fellowship of Reconciliation

The next and present crisis of Ethiopia involves the fate of the Ethiopian people. The Fascist regime of Italy has annexed the ancient capital of the Ethiopian Empire, and the Abyssinian people are now in danger of being subjugated by a foreign power. The Italian army has already occupied the city of Addis Ababa, and it is feared that the Italian navy may soon attempt to blockade the port of Massawa. The situation is critical, and we must act now to prevent the annexation of Ethiopia.

The Fellowship of Reconciliation, an international organization of pacifists, has long been concerned with the plight of the Ethiopian people. We have worked to promote peace and justice in Africa, and we believe that the annexation of Ethiopia would be a disaster for the whole region. We call on all who care about human rights and justice to join us in our efforts to prevent the annexation of Ethiopia.

Munitions, Monopoly, Imperialism and War

By WILLIAM F. JENNINGS

This is a book about the arms trade and the policies of the major arms-producing nations. It is a call to action for all who care about peace and justice. The book is divided into two parts: the first part deals with the history of the arms trade and the role of arms in international conflicts, while the second part focuses on the policies of the major arms-producing nations.

The book is a call to action for all who care about peace and justice. It is a call to reject the arms trade and the policies of the major arms-producing nations. The author argues that the arms trade is a source of conflict and that it is time for all nations to work together to eliminate it. The book is a call to action for all who care about peace and justice.
Defend Academic Freedom!

By JAMES M. SHIELDS

The function of the university is to give to the young man seeking a higher education an opportunity to learn the facts of life, to learn to think for himself, to learn to observe, to learn to feel, to learn the meaning of democracy, the meaning of nationalism, the meaning of patriotism.

Academic freedom is the doctrine that a man has the right to study the facts, to form his own conclusions, to express his opinions, and to teach them to others.

Trade Unionism Under Fascism
by BEATRICE BLYTH

The political and labor movements in Fascist countries are characterized by a close interrelation of the two. In many cases the labor movement has been instrumental in the establishment of Fascist governments, and the Fascists have used the labor movement as a means of consolidating their power. The trade unions have been subjected to severe restrictions and have been forced to accept the dictates of the state. The Fascists have also made use of the labor movement to further their own ends, such as the suppression of political opposition and the promotion of social policies favorable to their regime.

Fascism Wins in Cuba
by NORMAN F. RINGSTED

The victory of Fascism in Cuba has been a significant development in the history of that country. The Cuban government has been supportive of Fascist policies and has sought to strengthen its position through the use of the labor movement. The trade unions have been suppressed, and the workers have been subjected to harsh conditions. The Fascists have also sought to control the media and to promote a propaganda campaign in support of their regime.

The Man Who Did Not Applaud
by SEIKICHI FUJIMORI

The man who did not applaud was a significant figure in the history of the labor movement. He was a union leader who had been active in the struggle for workers' rights and who had been arrested by the Fascists. Despite his imprisonment, he refused to applaud the Fascist leaders and their policies. This act of resistance became a symbol of the resistance of the workers to Fascist rule.

George Sokolsky—Munitions Salesman

George Sokolsky was a munitions salesman who had been active in the labor movement. He had been arrested by the Fascists and had been imprisoned for his activities. After his release, he went into hiding and continued to work for the labor movement. His activism was a symbol of the resistance of the workers to Fascist rule.

The Americas Against War and Fascism

The Americas Against War and Fascism was a group of workers who had been active in the labor movement and who had opposed the Fascist regime. They had been arrested and imprisoned, but they continued to resist the Fascists and to promote their policies. Their activism was a symbol of the resistance of the workers to Fascist rule.
