INDUSTRIAL MOBILIZATION • By Mauritz A. Hallgren
Clearance!

THE BEGINNING of the New Year is a good time to take stock of what has been accomplished and to review old problems to do something worthwhile during the next twelve months.

DURING 1946, the world will be faced with problems that will test the spirit of Americans. Are we prepared to meet the challenges and make decisions?

INTERNATIONAL: Fascism has returned to Germany, Italy, and Japan, together with several smaller Fascist nations. These nations are the enemies of democracy. They wish to establish a world dominated by Fascism.

SPAIN: The Fascist government in Spain was voted out of office in December. The new government is democratic. We cannot watch Spain's fate with the hope of seeing it as a Fascist place.

SPAIN: The Fascist government in Spain was voted out of office in December. The new government is democratic. We cannot watch Spain's fate with the hope of seeing it as a Fascist place.

CONGRESS CONVENE — read tomorrow's news in today's Nation

WHAT will the 80th Congress do about housing and farm bills? About labor, social security, and industry? What's going to happen to farmers and agriculturalists? Will the nation be strengthened or weakened? Will reciprocal trade agreements be continued or modified?

Tomorrow's headlines on these and other fiscal questions appear today in The Nation.

Paul W. Wood, in his weekly article from Washington, cussoues fast and name garnetted how the political parties to see the significant news found to come out of the capital.

Reynold Boffer with cussoues and banner in the leading events of the week he believes will be seen.

Leonard Garfield Hiller tells us of the new administration's plans to keep the economic welfare of this country.

The Nation's contributors to the main section of articles present a comprehensive and knowledgeable perspective on the world affairs of the day.

The Nation's editors discuss the news, analyzing the trends, and advocating reforms.

The Nation: in the news, in the world, in the United States, in the world.

I T WAS our first day in Spain. We were at Saragossa in Aragon, the little frontier fishing town. Our passports had been issued by the Workers' Committee, and we had only to wait for the train to be off. The train was to arrive at Saragossa, but the train was a long time in coming. Our passports had been issued by the Workers' Committee, and we had only to wait for the train to be off. The train was to arrive at Saragossa, but the train was a long time in coming.

Industrial Mobilization

By Mauritz A. Hallgren

ILLUSTRATED BY WILLIAM WESLEY

THERE was a time when a picture or a government could want the armed forces of a country or a war without suddenly disrupting the national and economic life of the nation. This was the case in the United States during World War II. The government tried hard to keep the country out of the war, but once it was in, it had to act quickly to mobilize all available resources.

Will you be slave or free man if war comes tomorrow? Will there be forced labor? There are bills now in Congress... Read what Mr. Hallgren has to say.

The Hill of Peirs

Above the bright light, which had looked deathly to the German soldiers, was a pair of flickering flames. The sound of the revolvers echoed as the guns were fired. In the distance, a soldy fired his weapon. He fell to the ground, dead.

"Who did it?" the officer asked.

"A sergeant," the commander replied.

The German officer went on to say that he had heard the sounds of gunfire and had sent his men to investigate. When they returned, they reported that the German soldiers had taken the hill.

"We must take it back," the commander said.

The German officer agreed, and the two men began planning their next move. They knew that they had to act quickly, as the German soldiers were not far away.

Power of Judicial Review

By Osmond K. Fraenkel

ILLUSTRATED BY A. DE RHEINARD

DURING the past few years the Supreme Court of the United States has once again become the subject of attack. It was more than noticeable that the New Deal's, experimental legislation was challenged before the tribunal and it was to be expected that much of it would be declared unconstitutional. The role of the Court has usually been to slow down the march of progress. Never before, perhaps, have its activities appeared so much like a battle or a war. This is due in part to the nature of the issues with which the Court has been confronted, in part to considerations which grew out of the Court's present personality.

Division of the Court

The Supreme Court today is divided into three groups, perhaps even four. On the one side are the Justices Van Devanter, McReynolds, and Butler; on the other are the Justices Brandeis, Stone and Cardozo. Brandeis then stood for the Justices Justice and Justice Roberts, and, while they were not together, in many of the important cases they have been on opposite sides. The chief reason for this is that Mr. Taft has been a constant personality. This change in the personnel of the Court has had important results. It is evident that the Justices are better able to give the decisions which are likely to influence future times. The Court Brandeis has and the Court Roberts have been in the habit of giving decisions which are likely to influence the decisions of future generations. The Court Brandeis has been in the habit of giving decisions which are likely to influence the decisions of future generations.

Probable Subjective Viewpoint

It is not possible to say which of the two groups the Court prefers, but there is a feeling that the future is likely to be better. A man who is given to making a mistake is likely to be better. A man who is given to making a mistake is likely to be better. The Court Brandeis has a better chance of influencing the decisions of future generations. The Court Brandeis has a better chance of influencing the decisions of future generations.

Failure to Discuss

So far as the facts in the cases, the Court has been dead to the facts that the Court has been dead to the facts, the Court has been dead to the facts. As originally intended, the Court was intended to be a Court of Appeal, but the Court has been dead to the facts, the Court has been dead to the facts.

Public Opinion

Naturally, these decisions, and the fact that they were not reached by a great number of people, were regarded as unconstitutional by the Court. As a matter of fact, the Court has been dead to the facts, the Court has been dead to the facts.

Has the role of the Supreme Court been to slow down the march of progress? Has the Court always been like this? And if not, what can we do about it now?

T

O THE Leader of the German Reich, Adolf Hitler, when we Japanese peoples, we also will add a symbol of the Japanese spirit and that there exists the friendship between Germany and Japan may be deepened.

Then the President of the Japanese Guild of Broadcasting on the occasion of the presentation of a ceremonial sword to the Chief of Affairs of the German Embassy in Tokyo. Symbolic of a truce and beautiful love which now binds Berlin to Tokyo is the symbolic sword of the rivalry. Characteristic of the sound of the clashing of the blades by which the styles of Germany and Japan, and between the various nations' value to us. On July 6, 1936, the Imperial German Embassy, Tokyo, U.S.A., held a ceremony in which the sword was presented to the Japanese President.

Also on November 25th, in Berlin, Yosuke Matsukata, Japanese Ambassador to Germany, and Heinrich Himmler signed a protocol of intention to exchange visits in the course of the current year. This agreement was reached after the outbreak of the war in Europe, and is significant as an indication of the determination of the Imperial German Government to maintain friendly relations with Japan.

On the morrow of the war with Czechoslovakia, the Japanese Government decided to send a message to the German Government, expressing its regret at the outbreak of war and its hope for the early conclusion of a peace treaty. The message was delivered by the Japanese ambassador to Germany,Imperial Japanese.

The Chinese and Japanese governments have been in close contact since the outbreak of the war in Europe, and have agreed to co-operate in the conduct of the war. The Japanese government has also been in close touch with the Chinese government, and has been negotiating with it for the purpose of co-operating in the war effort. The Japanese government has also been in close touch with the government of the United States, and has been negotiating with it for the purpose of co-operating in the war effort.

In conclusion, the Japanese government has been in close touch with all the governments of the countries with which it is at war, and has been negotiating with them for the purpose of co-operating in the war effort. The Japanese government has also been in close touch with the government of the United States, and has been negotiating with it for the purpose of co-operating in the war effort.

The Japanese government has been in close touch with the government of the United States, and has been negotiating with it for the purpose of co-operating in the war effort. EVER seeking inspiration from the newspapers he read, the young writer W. R. Limpach found the articles on the bombings of the Black Legions to be quite suitable as the backdrop for his novel. The story of the Black Legions, as the newspapers reported it, was one of terror and intrigue, with the figures of Mr. and Mrs. Regan, a young couple who became involved in a mysterious cult organization and finally made for a romance.

The Black Legions are a group of fanatical followers of the German cult leader, known as the Black Legions. They believe in the power of the Black Legions to bring about a new world order. The story of the Black Legions is one of intrigue and suspense, with the characters involved in a struggle for power and control.

Hollywood makes a film of social import... Plough, stars and revolution... Spain and screen

In Spain, the Black Legions are a real threat, and the film industry has been quick to capitalize on the situation. The film The Plough and the Stars has been released, and it is a powerful depiction of the struggle between the revolutionaries and the counter-revolutionaries. The film has been praised for its realistic portrayal of the events and characters, and it has been a box office hit.

The Plough and the Stars is a film about the Spanish Civil War, which took place from 1936 to 1939. The war was fought between the Republicans, who were supported by the Soviet Union, and the Nationalists, who were supported by Nazi Germany and Fascist Italy. The film The Plough and the Stars is based on the novel of the same name by Granville Sharp.

The novel and the film are important because they provide a glimpse into the history of Spain and the events that led to the Civil War. The film is a powerful reminder of the sacrifices made by those who fought for democracy and freedom.

Goya and Spain
FRANCISCO DE GOYA (1746-1828)

THERE is no question of uncertain among Francisco de Goya's paintings and prints is startling. "Women and Children First" would be like a newspaper report of France's raid on Madrid. And "Haymond," representing the French Imperial Guard assisted by the Marshals in forcing the Spanish people off its own territory, is not as much a parallel of the invasion by Nazi "volunteers" and Moors. Much about Goya is still veiled in darkness; despite some excellent studies of his life and work. Living under one of the bloodiest, most venomous, obstreperous absolution in history, in the constant shadows of the Inquisition, Goya had to depict a bygone era's memory, its protective solitude against detection. Sometimes his titles are deliberately misleading; sometimes the original sketch is more familiarly unrecognizable than the print based on it. But whatever the differences in our knowledge of the man, there can be no doubt at all about his sympathy. He was a friend of Lorenzo, the austere historian of the Inquisition, chronicler of Jardines, called for introducing Roman Catholic doctrine, and of many other dissidents. Besides the objective fact of Goya's associations, we have the subjective vision of his work. Look at his portrait of the peasant fighter for the Constitution, Joan Martin, who refused to retreat despite months of slow torture. His is a face full of native nobility and strength of character. Compare this with Goya's portraits of the royal family, the Queen Maria Luisa, the artist, repulsive, stupid, corrupt royal woman. Still more obvious are Goya's sympathies recorded in his prints, particularly "Disasters of War"—murder, raping, burning, disease. Goya is anti-imperialist, anti-clerical, (note the part of the priest in "Hard Going," blessing victim and executioner); he same gesture of priestly blessing topic in another print), against all that seems man in his free development. And in no instance does the weight of the artist's常用 over the quality of his penmanship. Of course, Goya is in no sense a straight-tongued ideologue or reformer, following a line of conduct without deviation. He was a rich, prodigious personality; he lived with all the interests—arty and noble—all of his times, and precisely because of that he succeeded in concentrating the rebellious energies of his age. That is why his voice echoes across the century a message of courage to his true adherents on the barricades of democratic Madrid—and everywhere else.

Are they of a different race?

Women and Children First

The Prisoner

Hard Going!
WALL STREET has a new hero. Its new man of the year is Alfred F. Sloan, Jr., of General Motors, who apparently diffuses the interest in another "labor dynamo," who are trying to lure them into deals for above-wage, decent working conditions and freedom of organization.

There is no industry dearer to Wall Street's heart than the automobile business with its tremendous profits. The reason for this affection is not difficult to understand. Between 1923 and 1929, the stock market rose in the General Motors and Chrysler class since the board of directors and other major factors of control in the industry had made stockholders millions of dollars in added value.

The story of General Motors has been one of steady growth from the first year of production until today. The company was formed in 1908 with a capital of $200,000 and now has a capital surplus of over $10 million. The company's assets are valued at over $200 million, making it one of the largest and most successful enterprises in the world.

Meet our new hero, Mr. Sloan. His Auto industry success story is his own. He has built up General Motors into a giant that is now one of the most valuable corporations in the world. The company's products are known worldwide and its influence on the economy is immense.

But there is more to Mr. Sloan than his success in the automobile industry. He is a philanthropist and a man of deep convictions. He is committed to improving the lives of those around him and has made significant contributions to education, healthcare, and the arts.

The Fisher Body Corporation is one of the leading manufacturers of automobiles in the United States. They have been producing high-quality vehicles for over a century and have helped shape the automobile industry as we know it today.

The Fisher Body Corporation is headquartered in Detroit, Michigan, and is a subsidiary of General Motors. The company's products include sedans, coupes, limousines, and convertibles, and it is known for its innovative designs and advanced engineering.

The Fisher Body Corporation is a leader in the automotive industry and is committed to providing high-quality vehicles to its customers. With a long history of innovation and excellence, the company continues to be a major player in the global automotive market.

By Morris Kamman

O N A FEBRUARY day in 1917, the New York Times carried a leading article about the "American Revolution in the Auto Industry," and it was one of the most important events in the history of the automobile industry. The article was written by none other than Charles M. Fisher, the founder of Fisher Body Corporation.

The Fisher Body Corporation is one of the oldest and most respected companies in the automotive industry. They have been producing high-quality vehicles since 1908, and their reputation for innovation and excellence is unparalleled. With a history of over a century, Fisher Body is a true American icon.

Minneapolis

Up in the Northwest they used to call it Jim Hill's empire. But that was a long time ago. Now the Pillsbury, Washburn, Crosby, Heffelfingers and Dayton's have to contend with the sons and daughters of the pioneers who built the Northwest.

By Dale Kramer

Minneapolis is famous as the land of two groups which seldom suffer defeat: they are football players and union labor. But the laborers of two noted names are not noted for their productivity, nor do they encourage the development of the great mining areas. But since the railroad was built, they settled on the land, and that is what they did and refused to leave it in search of adventure.

Hill was the chief. "Hill was the first to accept the railroads. He was the first to sell land, and he sold it to the railroads. He sold it to the railroads. And that's why we have the railroads."

The day was May 20th, 1921. The Great Northern Railroad was completed, and the new railroad line was opened for business. The railroad line stretched from the Mississippi River to the Pacific Ocean, and it was a major event for the city of Minneapolis.

The Great Northern Railroad was a major event for the city of Minneapolis, as it provided a vital link between the Midwest and the West Coast. The railroad helped to stimulate economic growth in the region, and it played a key role in the development of the city.

Century-old superstitions... It's Spain, everywhere, from Portland, Maine, to Portland, Oregon... from Seville to Palencia.

Mexico and Spain

FATHER LUIS SARABIA'S article in the December issue of This Quarter interested me, not a little. I have always admired his work. While I have lived most of my life in the United States, I have never forgotten the influence that the Spanish culture had on me when I was a young man. The first time I visited Spain was in 1928, when I was a student at Oregon State College. The influence of Spanish culture was evident everywhere I went, from the food to the art to the people. I was struck by the beauty of the language and the richness of the culture. I have always admired the way the Spanish people live, the way they love their country and their traditions.

However, let me think that the effect of the early morning rain was most desirable. The thought of my early morning chores was most desirable, and so it was. For once I wished I could have a snowfall in my own garden, as the snow of my garden would absorb the moisture so well, and the snow of my garden would absorb the moisture so well, and the snow of my garden would absorb the moisture so well.

The Process

Before modifying the Court's power of judicial review, it is necessary, therefore, to consider just what activities of the Court are really审查able. Perhaps we may approach the problem by realizing the rights guaranteed to the Constitution. Are these rights and freedoms of the Court as a whole, or is the Court a mere collection of judges, each of whom is entitled to a review of the decisions of his own court?

Industrial Mobilization

From page 193

"Industrial Mobilization" is a term that has been identified with the nation's economic system. It is a term that has been identified with the nation's economic system. The term "Industrial Mobilization" refers to the process by which the resources of the nation are directed toward the production of goods and services necessary to support the war effort. It is a term that has been identified with the nation's economic system. The term "Industrial Mobilization" refers to the process by which the resources of the nation are directed toward the production of goods and services necessary to support the war effort.

The Amendment Process

It has therefore been suggested that the direct process is the most effective in terms of the results it produces. The direct process can be divided into two major stages: the investigation stage and the implementation stage. In the investigation stage, the committee will review the issue in question and will consider the potential impact of the proposed amendment. In the implementation stage, the committee will consider the potential impact of the proposed amendment on the existing legal framework and will consider the potential impact of the proposed amendment on the existing legal framework.

Building the League
A United Movement in Common Resistance to War and Fascism
By Paul Reid

CALIFORNIA—Complete reports from the State Conference held in San Francisco, December 22, include the following: The three-day meeting was opened on December 20 at the Palace Hotel by H. T. Howard, president of the California Conference of the League, and was attended by members from all parts of the state. The meeting was called to order by Dr. Charles B. Sanger, the secretary, and the session was opened with a prayer led by Dr. H. T. Howard. The business of the meeting was as follows: The adoption of the by-laws of the League as revised by the State Conference held in San Francisco in 1919, and the election of the officers of the League. The following officers were elected: Mrs. H. T. Howard, president; Parke Godwin, vice-president; and Dr. H. T. Howard, secretary.

NEW JERSEY—A meeting of the League was held in Newark on January 29, 1920, at the home of Mr. and Mrs. Charles P. Sanger. The meeting was called to order by Mrs. H. T. Howard, president, and the business of the meeting was as follows: The adoption of the by-laws of the League as revised by the State Conference held in San Francisco in 1919, and the election of the officers of the League. The following officers were elected: Mrs. H. T. Howard, president; Parke Godwin, vice-president; and Dr. H. T. Howard, secretary.

NEW YORK—A meeting of the League was held in New York City on January 30, 1920, at the home of Mr. and Mrs. Charles P. Sanger. The meeting was called to order by Mrs. H. T. Howard, president, and the business of the meeting was as follows: The adoption of the by-laws of the League as revised by the State Conference held in San Francisco in 1919, and the election of the officers of the League. The following officers were elected: Mrs. H. T. Howard, president; Parke Godwin, vice-president; and Dr. H. T. Howard, secretary.

Olive-Clayton League helps set up the first League of the League in the United States. The League of the League was formed in 1919 to strengthen the American anti-war movement and to promote international peace. A Statement on Spain

Of all the countries in Europe Spain is the one which is most at risk of war. The country lies on the border between the capitalist west and the communist east, with Portugal, Morocco, and France on its western flank, and the Soviet Union to the north and east. Spain is a nation of about 40 million people, with a history of conflict and struggle. The country has been ruled by a succession of dictators, including Francisco Franco, who died in 1975 and was succeeded by Juan Carlos I. Spain is a member of the European Union and NATO.

In 1936, a civil war broke out in Spain between the nationalist forces led by General Francisco Franco and the Republican forces. The conflict was financed and armed by foreign powers, with assistance from fascist regimes in Italy and Germany, and the Soviet Union supporting the Republicans. The war ended in 1939 with the victory of the Nationalists, who established a dictatorship under Franco.

In the years following the war, Spain endured a period of isolation and repression, with political opponents and intellectuals being imprisoned or exiled. In the late 1960s and early 1970s, a period of political ferment known as the "Spanish Transition" occurred, leading to the death of Franco and the establishment of a new democratic government in 1975.

Since then, Spain has undergone significant changes, including the adoption of the euro in 1999 and the hosting of the 2004 Summer Olympics in Athens. The country has also struggled with issues such as corruption, unemployment, and the Catalan and Basque independence movements.

The situation in Spain remains complex and volatile, with ongoing debates over issues such as regional autonomy, immigration, and healthcare. The country is a member of the European Union and NATO, and is a key player in the region.

In recent years, Spain has faced challenges including economic crises and the COVID-19 pandemic. The country has also been the target of international attention due to its hosting of the Eurovision Song Contest and the 2020 Summer Olympics.

In conclusion, Spain is a country with a rich history and a diverse society, with ongoing challenges and opportunities. The country is an important player in the region and a key member of European and international organizations.
THE WHOLE AMAZING STORY OF
THE SCIENCE
OF LIFE
EACH READER OF THE FAMOUS "OUTLINE
OF HISTORY" HAS EAGERLY AWAITED
THIS GREAT COMPANION WORK
A $5.00 VALUE

Guild Membership is FREE

The Guild offers you this choice each month: two outstanding new books before publication — the best new novel and the best new non-fiction. Give or keep both books at all in any particular month if you wish to. Members — in our enjoy illustrated, laid-in bookplates and receive for each monthly membership fee:

- FREE — H. G. Wells's "The Science of Life"
- Two Selections Each Month to Choose From

MAIL THIS COUPON TODAY
