INDUSTRIAL UNIONISM

To all workers employed in the Metal and Machinery Industries, such as Strength, Plumbers, Mechanics, Carpenters, Cabinet Makers, Ironworkers, Electricians, Building Contractors, and the like, this is to announce that the time has come to act and to put into practice the principles which have so long been discussed by the working men of this country.

Our Industrial Unionism movement has been growing in strength and influence for the last few years, and we have reason to believe that now is the time for us to make a decisive move towards the establishment of a truly democratic and equitable system of working conditions. We believe that the working class has the right to determine their own conditions of labor and that they should not be subjected to the exploitation and oppression of the employers.

In order to achieve our goal, we must first come together as a united force and demand the right to negotiate for our own wages and working conditions. We must also demand the right to form unions and to strike, if necessary, to protect our interests.

The success of our movement will depend on the support of all workers who are willing to stand up for their rights. We urge you to join us in our struggle for a better life and a fairer society.

Sincerely,
