NEWS OF THE MOVEMENT

From Far and Near

It is said that no greater sign than that which has been conferred in the U. S. during the last few years, is that of the establishment of new industrial unions. The Wobblies, as the Industrial Workers of the World are known, have been able to make the claim repeatedly that they have established a new type of unionism. Their organization has been able to spread throughout the country with amazing rapidity, and in many cases it has been able to make the claim that they have succeeded in establishing a new type of unionism.

The Wobblies have been able to make this claim because they have been able to establish a new type of unionism. They have been able to establish a new type of unionism because they have been able to establish a new type of unionism. They have been able to establish a new type of unionism because they have been able to establish a new type of unionism.
