The Strike Move

The strike move, the story of which appears on page one of this week's issue, shows the development of a national strike that is beginning to be recognized by labor leaders as a serious threat to the industrial unionism of the country. The strike, which has been growing in strength and scope, is the result of a number of factors, among which are the failure of the federal government to pass adequate labor laws, the failure of the commonwealth of Pennsylvania to pass adequate labor laws, and the failure of the state of New York to pass adequate labor laws.

The strike move, which began in the steel industry and has spread to other industries, is a direct result of the failure of the federal government to pass adequate labor laws. The federal government has failed to pass adequate labor laws because of the failure of the commonwealth of Pennsylvania to pass adequate labor laws, and the failure of the state of New York to pass adequate labor laws.
