GENERAL STRIKE IN SWEDEN

By JOHN BAGNOLD

The strike in Sweden is to me a matter of much interest, but as a writer, I cannot help but feel that the authorities are being too lenient. The workers have been striking for a long time, and yet the government has not done anything to stop it. The workers are demanding better working conditions and higher wages, but the government is not willing to listen to them. I believe that the authorities should take more severe measures to stop the strike, and I hope that the workers will be able to achieve their goals.

Necessary evils.

How often we hear people speak of 'necessary evils'! Is there anything so necessary as free speech? Is there any evil so necesary as the right to express our thoughts and opinions freely? The government should not interfere with the workers' right to strike, as this is a matter of freedom of speech.

GILLMEN MUST URBANIZE INDUSTRIALLY

The full acres of America have been thrown open to the Gillmen, and they are reaping the harvest.

Revolutionaries of Latin Europe

Revolutionaries acting in the industrial and political struggles of Latin Europe are the vanguard of the people of those countries. It is quite probable that the political and economic situation of those countries makes it possible for their working class to carry on such a struggle, and thus the source of real revolutionaries. They are in a position to carry on the struggle, to work towards the realization of a new society, and to carry on the struggle for the betterment of the working class. They are the people who are carrying on the struggle for the betterment of the working class, and who are working towards the realization of a new society.

The Russian Workers

This is the first Russian Revolution. It is the result of the industrial and political struggles of the working class in Russia. It is the result of the fight of the working class for the betterment of their condition. It is the result of the struggle for the realization of a new society. It is the result of the struggle for the betterment of the working class, and for the realization of a new society. It is the result of the struggle for the betterment of the working class, and for the realization of a new society.
