BREWERS ON STRIKE IN LOS ANGELES

That the interests of labor and capital are blind, the same as in any other city, was evidenced by the recent strike in Los Angeles. Workers’ strike now in full swing in Los Angeles and capital are fighting one another in that city.

The intensity of the strike indicates that the capitalist is not the one who is fighting, but the workers. The strike is in fact a struggle between two classes, - the wage earner and the employer.

The strike is the result of the failure of the employers to recognize the workers’ demand for a living wage.

The workers are not asking for more than they are entitled to. They are asking for the right to live.

Our Fellow Workers, Preston and Smith, Are Still In Jail!

George D. Horne, in the Independent Labor Party, has written a most interesting article on "The Big Strike," and his statements as to what took place when the Big Strike is on the verge of returning to a new development are most interesting.

It is a well known fact that the working men everywhere are the most honest of men, and that the objects of the strike are not to be achieved by force of arms but by the force of public opinion, that the object of the strike is to make the working man a man, and that the strike is not a matter of personal gratification but a matter of business necessity.

The strike is going on and the strike is against the working men everywhere, and it is for the working men everywhere to see that the strike is going on and that the working men everywhere are the most honest of men.

REAL ESTATE SHARKS AND SPOTTED FEVER

A. V. Roe, The Rambling Rebel

Real estate sharks and spotted fever. This also applies to the North Side, W. A. W. - your correspondent.

NEW FROM A GOOD REPORTER

Editor Industrial Worker: A word of the sale conditions on the real estate market. We have been told by those who take part each year in the sales in the North Side, that in the past it has been a sordid business, more or less, with the speculators sometimes having more to say than they should. There is, however, no doubt about the fact that many of the real estate sharks have been in the business for a long time. In the past, the sales have been conducted by the city's officials, who have been known to make a profit out of the sales. In this year's sale, however, the real estate sharks are making a better profit out of the sales, and there is no need for the public to be afraid of them.

Mississippi is a state where it is worth something to be on good terms with the local political bosses. It is there that the real estate sharks are to be found. They are the ones who have the power to make or break a deal.

The real estate sharks in Mississippi are making a better profit out of the sales, and there is no need for the public to be afraid of them. The public should be aware of the fact that the real estate sharks are making a better profit out of the sales, and there is no need for the public to be afraid of them.
