Right behind our very eyes we observe the inner forces of the capitalist power which are working very closely to control the present-day workers movement. If we are to be free from the Socialist revolutions of the past, and if we are to avoid the mistakes of the past, the first thing that we must do is to organize the working class. We must organize the working class in order to gain control of the present-day workers movement.

In order to do this, we must organize the workers into unions. We must build up a strong union movement in order to be able to fight back against the capitalists. We must develop a strong union movement in order to be able to fight back against the capitalists.

TRANSLATED NEWS

CONDITIONS IN SWEDEN.

The old trade unionism in Sweden is more and more in the hands of the players. The old unionism was successful until a few years ago. At present the employers attack whilst the workers, if the unions are formed, are rare. To make the unions effective, the unions have declared war on the employers. The result of this has been that the trade unions are elected as deputies with the employers. To command the employers, the trade unions are elected as deputies with the employers too. The employers are organizing and the workers are organizing, and I am told that there were 20,000 new workers who were trade unionists. Trade unionism is not only in the hands of the workers, but in the employers' organizations too.

The lockout in the Swedish boat trade which has lasted for over a week has ended in a compromise, rather more in the employers' favor. The lockout is still going on in the boat trade, and the lockout for the workers is still going on. The announcement of the marriage in the boat trade is still going on, but the workers are still in lockout, and they have been in lockout for over 100 days. A lockout in Bremen was planned, but the details are not yet available at this moment. Lockouts and strikes are not the only forms of disturbance in different parts of the country. The workers' movement is a strong and persistent one, and it is full of hope for the present.

Revolutionary Syndicalism in Australia.

The Australian syndicalist movement is making remarkable progress in the trade union movement on the basis of the principles of syndicalism. The Australian boat trade is one of the industries which is most advanced in the adoption of syndicalist principles, according to revolutionary syndicalists. The boat trade is one of the industries in which the trade union movement is making rapid progress. The boat trade is making rapid progress in the adoption of the principles of syndicalism, and is also making rapid progress in the boat trade. The syndicalist movement in the boat trade is making rapid progress in the boat trade as well as in other industries. The boat trade is also making rapid progress in the adoption of the principles of syndicalism in the boat trade.

SEATTLE CHAMBER OF COMMERCE SUMMERS UP BUSINESS-ONEYEAR AGO JOB LOST.

The executive committee of the Seattle Chamber of Commerce has adopted a plan which is expected to result in the elimination of all the existing unemployment in the city. The plan will be put into operation immediately. The city is in the hands of the unemployment committee, and the committee has made a report of the results of the plan. The unemployment committee has made the report of the results of the plan, and the committee has made a report of the results of the plan. The unemployment committee has made a report of the results of the plan.

THE INDUSTRIAL FIGHTING FOR THE RIGHT TO STAY AWAY.

Please insert in the "Worker" that a strike is in progress at the factory for the manufacture of tin cans and brass in the city. The strike started on Monday, and it is expected to continue for some days. The strike was called to protest against the factory's refusal to recognize the workers' union. The factory's refusal to recognize the workers' union is the main cause of the strike. The factory has not agreed to the workers' demands for better working conditions, better wages, and a shorter working week.

The strike has not yet ended, but the workers are determined to continue the strike until their demands are met.
