SABOTAGE.

The employing class and its agents have something to fear from the increasing spirit of sabotage which they have discovered an inability to control. The fear of war and taxation of sabotage has increased the spirit of sabotage and the spirit of the intruder is making the matter a plus.

MILL OWNERS FEAR SABOTAGE.

A MILL owner in the northeastern part of the United States, who has had his mill ripped out and burned by wildcat unionists, told his story to a committee of the New England Industrial Workers Union this week.

"I had a mill in the hills of Maine," he said, "and I wanted to build another one. I ordered the plans, and the lumber, and I had a small company of mill workers. I thought it was going to be a good business venture. But then the unionists came along and said that it was going to be a union mill. I didn't want that. So I told them to go to hell, and I went ahead and built the mill. But the unionists came back and burned it down. They said that they were fighting for the rights of the workers, but they were just destroying property."

Unionists said that there were many other mill owners who had similar experiences. "We are fighting for the rights of the workers," they said. "But we also want to make sure that we don't destroy property."

"I don't understand why they do that," the mill owner said. "I just want to make a living, and I don't see why I should have to suffer.

Unfortunately, many mill owners have had similar experiences. The unionists say that they are only fighting for the rights of the workers, but the mill owners say that they are just destroying property. It is a difficult situation that we find ourselves in.
