SCABS DESERT CONTRACTORS
C.K. WORKERS STILL PRESENT SOLID FRONT—SUPPORT COMES FROM CENTRAL RADIO STATIONS, CASO HOSPITAL CASE TO BE APPEALED

The Canadian Northern situation still has the bosses plumbing and the determination of the men that the line shall be held by members of the C.K. on the Union line is as strong as ever. Support is coming from many sources, both in and out of the country. There is a solid front of men, and locals should not neglect their duty in this great struggle. This is one of the greatest strikes of the century and its success means the assurance of better terms to all railroad employees for hundreds of years.

Further solidification is shown by the receipt of checks for the C.K. from the following stations: Chicago, Ill., $1000; St. Louis, Mo., $1000; and Boston, Mass., $1000. The bosses have recently been made a weekly round of the road by C.K. officers, and they are staying in hot water and growing that the contract is far more than the bosses have thought. The worker seeks work where work is to be had and boundary lines have but small meaning for him. The flag under which the labor movement has been carried on is a flag of employment. Supply and demand, the standard of living, and the struggle to get foothold in the world's organization of interest to the toilers.

No other group of people sees these things in mind and therefore refrains from drawing into discussion of flags and other symbols. Control of the work in which we engage is the matter of prime importance.

There is a decided attempt on the part of the employing class to separate the classes, particularly on account of the movement of the I. W. W. and the radical section of the Socialist party on the proposition of the nation's labor movement must be accomplished by a secret, oath-bound organization which will be exposed in the radical press. The struggle is not against a part of the organization but against all evidences before springing the expense. Look for it in any number, through the pro- and anti-socialist columns of the newspapers of the labor movement. The I. W. W. is going to be too strong a party to be kept under ground. The Socialists have made up their minds not to stand on any ground.

When the workers are organized in a manner to have even partial industrial control, they will be in a position to organize in all existing institutions. It will be reflected in every phase of the whole social body.

With a large majority of the workers in the textile industry of this nation in the ONE BIG UNION, trained and disciplined to exclude all other bodies, the freeing of Bintel and Gurnay would be the work of but a few hours.

Let labor stay in its own camp in the entire textile industry and the jell dozen would open.

While we must preach and teach and work into the hearts and minds of our people, we must do so within the framework of existing conditions.

We must, instead, keep pace with the changes of the times and grow with the increase in productivity, the development of improved machinery. As to the difference between the classes more marked than at any previous stage in the world's history.

The war has left its mark in every man's life. The feeling runs high at present. The struggle is not for the workers but against the employers.

Some day we will have to give an account of what we have done to the world. We must do justice to ourselves in all the work we have done. No new world will be won in the past by the socialists, anarchists, and the "American" labor movement.

Every day we have the opportunity to create a new world. The surest and most intimate approach of the socialist consciousness is in every man's life. The war has left its mark in every man's life. The feeling runs high at present. The struggle is not for the workers but against the employers.

AGITATE—EDUCATE—ORGANIZE—FIGHT FOR THE EIGHT HOUR DAY

I. W. W. PREAMBLE

WHAT WE BELIEVE

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are the lot of toiling people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machines.

We find that the existing system of distributing the products of labor among the workers is wasteful, inequitable, and unjust. We believe that the greatest benefit to the workers is the power to control the means of producing wealth.

We see that the unions have concentrated their power in the hands of a few, and that they have not been able to bring about a better condition for the workers.

We believe in the direct action of the workers. We believe that ending the struggle is not the purpose of the union, but the outcome of the struggle. We believe that the union is the means of the workers to achieve their ends.

We believe in the power of the workers to organize and control the means of producing wealth.

We believe in the power of the workers to fight for the rights of the workers.
