### Boston Cloakmakers Renew

Agreement for One Year

The agreement between the Cloak Contractors' Association of Boston and the Cloakmakers' Union expired about a month ago, as our readers will recall, the union invited the employers to confer on the terms of the new agreement some time before the old pact went out of existence. Owing to the slack time and the general apathy in the trade, however, the initial conference came to nothing and matters were left for a while in abey-

# Chicago Joint Board

Condemns Left Officers Must Withdraw From Opposition Organization

After the sound rebuke administered to the adherents of "Leftism" in the Philadelphia Cloakmakers' Union two weeks ago when they were roundly defeated in the election held for executive board members and for executive board members and for Joint Board delegates, comes now the news that the Chicago Joint Board has also gone on record in adopting stern measures against such members or officers as would join outside or-ganizations and leagues and attempt through these agencies to control the union and commit it to allen policies and tactics. and tactics.

The Chicago Joint Board received The Unicago Joint Board received several weeks ago charges against two of its officers, Brothers Davidson and Kanevsky, that they belong to an or-ganization called the Trade Union Edof its officers, Forbitze Davidson and Board votet to statish the Hopfitzer Bardeon and Escaverity, that they being to an organization called the Tribe Chine Escaverity, which carries with it the unquisition called the Tribe Chine Escaverity of qualified condemnation of all who must Workers and that through case and groups, endower to rule the article and the Chine Escaverity of the Chine Chin

not belonging to our union, they have attempted to direct the affairs of the union. The Joint Board appointed a committee to investigate this charge and on August 7, at a special meet ing, this committee brought in two reports. The majority report recom reports. The majority report recom-mended finding Davidson and Kanev-sky not guilty. A minority, however, was in favor of recommending that the Trade Union Educational League is an opposition organization to our union and that those members or officers who would not withdraw from it should be expelled from the union.

After a thorough discussion, the Joint

Whoever wishes to spend the Labor Day week-end at the Unity House in Forest Park should make reservations as early in advance as possible. A large crowd is expected and those who will come first will naturally be served

## Topics of the Week

By MAX D. DANISH

PRESIDENT HARDING is no HARDING AND COOLIDGE

PRESIDENT HARDING is no more.

It is hardly the time, in this hour of national mourning, to take stock of what the two and a half years of the Harding administration have meant for the American workers and their movement. On the whole, the men and women who toil for a living in this country have farred no worse and no better under the Republican administration of Harding than they did under the Democratic administration of Wilson. Surely one will not contend that even a Daugherty could excel in his harsh treatment of Labor

that sterling example of bourbonism, A. Mitchell Palmer.

One thing, however, stands out definitely. In the last two or three years, that deadly weapon, the injunction, more and more has been inevitable sledge-hammer which is without exception being applied, par-ticularly by the Federal bench. to crush the workers' resistance in times of

stricts.

Serial organized Labor may expect of President Coolings in regardle by everybody as a question-mark. When one, reverbless, considers that Calvin Coolings was nominated for the vice-presidency by the Republicant behavior of the coolings was nominated for the vice-presidency by the Republicant behavior of the presidency of the Republicant in a manner that endeared him to the hearts of every standpatter in the land, the labor unions of American will be puttided in viewing the future with

#### THE EXTRA SESSION

With the passing of Harding, whatever hope there may have been of the part of the farm bloc or the progressive group in Congress to force the summoning of a special session of Congress to deal with some of the burning questions that face the farmers and, to some extent, the workers of the country, has definitely disappeared.

The next regular session of Congress, which adjourned in April, will begin not before December. Under Constitutional regulations, a period of

almost eight months elapses between one Congress session and another, and it cannot be called together, no matter how urgent legislation relief might be, unless the President wills it so. For the last two or three months, the farmers in the Middle and North West, with the price of wheat plunging farmers in the Middle and North West, with the price of wheat plunging downward, have been clamoring for such an extra session to come to their aid. It was no doubt on the crest of the wave of this discontent and clamor that the recent political upheaval in the North West was accomplished. Senators Brookhart & Iowa and Frasier of North Dakota, the principal

advocates of such an extra session, are pressing for legislation involving governmental price fixing of the entire wheat crop of the country, selling what the domestic market would consume and having the Government take over the balance at a fixed price. The opposition to an extra session has come from the conservative elements in both parties, who fear that the newly elected

members of the Senate and the House, if summoned to a special session, would be in a position to push through some "radical" legislation. The sudden elevation of Coolidge to the Presidency will probably put the quietus on the demand for an extra session. If the late President Harding could, perhaps, have been affected by the strong demand from the farmers in West and Middle West, the new incumbent of the White House will quite likely be little inclined to bow to the demand of the progressive Congressional

group

FORD AND THE LABOR UNIONS

ITTLE BY LITTLE, the veil is being lifted from that "man of mystery" for a long time in American industry and now in American politics, Henry Ford

Last week in a brilliant interview written by Charles W. Wood for Colher's Weekly, Ford made known the platform on which he would run for President in case the country demanded it. Among the salient points of this platform, which we shall not undertake to cover in this item, there is only one which sizes him up at full stature and gives an insight into the mental and intellectual makeup of this aspirant for America's leadership.
Said Ford: "You probably think the labor unions were organized by

Labor. But they were not. They were organized by these Jew financiers, The labor union is a great scheme to interrupt work. It speeds up the lost ing. It is a creat thing for the Jew to have on hand when he comes around the com ing. It is a great thing for the Jew to have to get clutch es on an industry.'

THE COLD MARK BASIS IN GERMANY

PRESS reports from Berlin announce that the Cuno Government, in cooperation with the Reichsbank, is feverishly engaged in switching cooperation with the Rischsbank, is feveriably engaged in switching from the practically worthloss paper mark basis to the gold mark. Only a few days are left to complete the financial seform bills for a special sension of Rischsbang, an eleventh-bour measure to aver the complete financial collapse of Germany and to save the Cano Government.

First practical steps in this direction have already been made and hereafter all big basiness in Germany will be fixed on the Brittish stering or the American dollar bank. And what is none important, wages will, as a result

of this new arrangement, henceforth be computed on the same gold mark basis

The next session of the Reichstag will also consider the new ta The next sension of the Intellecting unit also consider the new Landson Trace in uncomposed Germany. Both the shift is the direction of the gold basis and the capital levy are a distinct gain for the trade unlocated next Societies of Germany. Organized later and the Societies of Germany. Organized later and the Societies of Germany. Organized later and the Societies of the paper mark, which has carried energonized the profiters and hasta for the paper mark, which has carried energonized the profiters and has taken the acont bread and-butter out of the worker's mostle in the last

To avoid its own collapse and the financial collapse of the country, tottering Cuno Government is now rushing to overhaul the financial syst Germany. The near future will tell whether this precipitated more of Germany. The

#### Russian-Polish Cloakmakers

A very important meeting of the Russian-Polish Branch will be held on Friday, August 10th, at 7:30 p. m. sharp, at the People's Home, 315 East 10th Street, N. Y. C.

It is the duty of every member to be present at this meeting.

A. F. SAULICH, Secretary.

THE TWELVE-HOUR STEEL DAY ENDS

With remarkable speed, amounting almost to agility, President Gary of the Steel Trust announced last week that the twelve-hour day in the steel industry is definitely at an end. At the meeting of the

In the steel industry is definitely at an ond. At the meeting of the presidents of the attent companies complying the Steel Trux, it was decided to substitute for it the three-shift system.

In the Chicago rated plants, they have already started this week the three-shift thank. Within a short time, it is expected that this system will United States Steel Corporation, and the hardreds of the three-shift basis. Within a short time, it is expected that this system will United States Steel Corporation, and the hardreds of theorems of the state of th

The steel executives were, of course, faced with the highly important problem of adjustiff the wages of the workers with the decreased number of hours of labor. To be sure, it does not take much sagacity to divine that this was from the very beginning the most important obstacle in the path of the eight-hour day in the steel mills. According to the announcement made by President Gary, the hourly and base wage rates of the workers whose day will be reduced four hours will be increased 25 per cent, thus making the total wage for eight hours about 16 per cent less than the old wage for twelve hours. In other words, the steel workers having gak four hours of leisure will be compelled to accept silently a reduction of 16 per cent in their earnings.

Nevertheless, it was a sacrifice well worth while. It is to be hoped that the steel workers will utilize this additional freedom from the hellish environment of the steel mill to gain a greater measure of enlightenment and to come in closer contact with their fellow-workingmen in the steel industry. Then will come inevitably the labor union, and the steel workers, once organized, will find it not difficult to gain back whatever wage-cuts were forced upon them in lieu of the additional four hours of life, ...

### FROM OUR JOINT BOARDS AND LOCALS

### The Rutton Makers

By HARRY DUBINSKY

Several weeks ago, the button makers of New York had a general strike which turned out to be quite successful. Very few of the readers of this journal, I take it, know arthing about the button tende, the samings and labor conditions of the workers in the trade. though ago orkers in the trade, though every on every garment which he

r she helps to make.

Our first step was to organize the eliuloid button workers, a branch f the big button industry. There re several kinds of makes in the mutton business—ivory buttons, com-musition buttons, glass buttons, galo-ik buttons, covered buttons, celluloid outtons and metal buttons, most of ng of women's wear. The big atme attached to capes, coats, gowins, and dresses is made of celluloid. come of these buttons are quite coatome of these buttons are quite cost-, These buttons serve also as rimmings, and are decorated with aulti-colored flowers, with Chinese, apanese, and Egyptian figures.

In proportion to the large capital equired in this pusiness—it takes no lars to start a modern button plantthe profits from it are smaller than in any other branch of the ladies' gar-ment industry. The trade is generally very poorly organized both on the part of the workers and the employers and has suffered from sharp and injurious competition. The work-ers, naturally, have been the greatest sufferers from this chaotic condition. It must be kept in mind that button making is a hard job. The tempera-ture in a button shop is usually 50 per cent higher than in the streas steam is used to warm the cellu-loid and make it flexible for buttonmaking—and the noise from the ma-

The workers in the trade consist of Jews, Italians, Spaniards, some Poles, and a considerable number of Ne groes. This variety of nationalities has also contributed to the exploitation which the workers in the button industry are being subjected to. The average earnings for 50 hours per week used to be 22 dollars.

A few months ago, several bottom makers—Gringians, Boayrsky, Warhardy, and a few others—came to me with the request that I sale one of the several sev tioned they may still regard then selves a part of the L. L. G. W. U.

They took my advice and went to Brother Sigman who received them warmly and assigned a sum for the beginning of an organization cam-paign, promising further help in the future. For three months a feverish future. For three months a feverish campaign was waged in the trade to organize the workers. Daily meet-ings were held in the auditorium of the International Building. Mean-while the employers also formed an organization, and Mr. Rosenberg, the head of the New York Button Works, a firm which has been for 48 years the leading establishment in the button industry, finally had a conference with President Sigman and at this conference worked out a basis for a settlement. Later, when the Presi-dent had to leave New York on business, General Secretary Baroff and Arture Giovanitti worked out the full terms of the agreement with the As-

On July 3rd our general strike was declared, on July 5th the agreement was signed and on Monday July 9th about 600 button makers went back about 600 button makers went back to work in union shops, having won a 44-bour week, a flat increase in wages of \$3 per week and many other concessions. The few workers who remained on strike settled shortly after that on similar conditions.

Now we are beginning to organize the other branches of the trade, and we have every reason to believe that with proper efforts we shall soon enwith proper efforts we shall soon en-roll into our local a membership of several thousand. Already we have almost a thousand men and women in Local 132, some money in our treasury and our hopes for the fu-ture are indeed high and bright.

B- A LOCAL OBSERVER

CLOAKS AND SUITS The agreement with the Cloak Contractors' Association was finally ratified at a meeting of the Joint Board on Thursday, August 2. The agreement was read to the members and every one of the clauses was ap-proved. This agreement, having been approved previously by the associa-tion, it will be effective for one year beginning July 1, 1923. Now that peace has been established in the cloak and suit industry, all that the qakmakers here in Boston wish for some work. The cloak and suit saxon, especially the suit season, has far turned out to be a complete failure. The cloakmakers have gone through a long slack season. Many of them have been out of work for ost four months and now, because of the failure of the suit season to of the failure of the suit leason to materialize, find themselves without immediate prospects for work. The officers of the Joint-Board have their hands full in trying to obtain as many Tobs as possible for those who are

uation is the fact that the dress trade is a little more busy than is usual at this time of the year, and, with th cooperation of Local 49, a number of cloakmakers are placed to work in dress shops. Still we hope that the season will not delay much longer in coming. We will surely welcome it

WAIST AND DRESS

The all day excursion to Province-town on Saturday, July 28, was an immense success. It was a much greater success than the most opti-mistic in the Union had expected it mistic in the Union had expected it to be. Every one of our members who participated in this excursion had a jolly time. A great many are clamoring for another excursion, and only the fact that the summer is all most over and the time too short is which to arrange one, prevents the executive board from repeating the affair. As a result of this excursion, for a unity house for next sums to be bought and owned by the

### A "Borer from Within"

dealer. His office and show room occupied a corner in the loft of a large factory building. He had no partner, and the only help he employed, be-sides an office boy, was a secretary, sides an office boy, was a secretary, who was r young lady wha attended to the bookkeeping and correspondence and even substituted for Mr. Stone when he was out. This had meant a good deal lately for he had been on a business trip to Europe, which had lasted four weeks and from which had early four weeks and from which his had only just returned.

from which he had only just returned. Miss Durand went over the stock with him on the morning of his return and he was pleased to note that a few new things had been bought very wisely. And when she accounted for the things that were missing, he noted how earfully, as per instruction, they had been disposed of. And while Miss Durand was out

And while Miss Durand was out to lunch and he sat smoking a cigar and congratulating himself on the possession of an exceptionally effi-cient secretary, Mr. Stone had a

The caller was Mr. Davis, an underwear manufacturer whose factory was a fisor above the office of the diamond dealer. Stone knew him by sight and, while inviting his visitor to be seated, he wondered what the latter's business might be. He could not be a buyer for there was lacking in him the bustling air of self-im-portance which announces these gentry. Instead, there was a suspicior of doubt in the manufacturer's manner, as if he were not quite sure of a welcome. He was of medium height, forty-five years old

"You must be wondering what I want with you," he said as he seated himself. "Well," as Stone nodded affirmatively, "I shall not keep you long in doubt. I am here as a friend to warn you against your secretary."
"Sir," said Mr. Stone rising, "in

that case, you need go no further. Miss Durand is unworthy of any sur

"In money matters, perhaps, but she is dangerous in another way." "In what other way?" inquired Mr. Stone beginning to think that his visitor was out of his mind. "She is an agitator!" exploded the

facturer. "An agitator?"

"Yes, an agitator, a snake in the grass, a destroyer of peace and a breeder of discontent; one who stira breeder of discontent; one who stirs your employes and spurs them on to rebellion. A . ."
"Stop, you are mistaken. Miss Durand is none of these things. If she

were, would she be wasting time in here where there is none but an office boy to influence?"
"You do not know the breed yet

Their field is the world. No opponent is too powerful for them and no sub-ject too humble."
"Yes," reflectively, "I have learn

ed a good many things these last few weeks, since the strike began."
"The strike? Is there a strike on at your place?

Oh. And you suspect Miss Durand being in some way connected with

"Not exactly, but she has openly ded with the strikers."
"She has, eh. Any particular insided with the

"Many, and if you would care to intend."
"Many, and if you would care to intend. I will cite you one."
"Go shead."
"To begin with, I must remind you that the strikers are a despersit which is the strikers are a despersit while and, not ever wishine. The production who want to work are afraid of them. Why, two sickly-looking stalkam following in the wake of a

dozen workers, protected on all sides by guards, will make the whole army tremble." As Mr. Stone smiled, "this self.

"Yes, but where does Miss Durand come in?"
"I will co

"I will come to her presently. On morning we, that is the detectives is employ, the office staff and myself were on our way to the elevated sta-tion to meet my employes, for they dare not come to work unescorted, and wait there every morning until we come to fetch them. As we neared the station I noticed two pickets al-ready at its foot; a girl was descend-ing the stairs. She greeted the strik-ers warmly and joined them. Imme-diately I put her down as one of dare not come to work une

them.

"As we walked along the street from Third Avenue to Broadway, the strikers increased, for they had pickets stationed all along the way; they followed us and managed to make things pretty lively. Every little while they would single out some poor unhappy strikebreaker and notwith-standing the bodyguard, make a rush unhappy strikebreaker and notwith-standing the bodyguard, make a rush at him or her as the case might be. Then, to vary the performance, they would shout their abuse in chorus ac-companied by looks burning with hatred. Oh, the time I am having! The worst of it is that the public seems to be with them. If we do manseems to be with them. If we do man-age to get one of the strikers arrest-ed, it is impossible to get a serious conviction. All that a judge dare do is to impose a paltry fine which is immediately paid by the union, and that offender is none the worse. "But to return. When we got here, I stood in the doorway while my em-

ployes were being taken upstairs. strikers were on the sidewalk and as it seemed to me, holding a consulta tion. All at once, a girl stepped from the group; I recognized her; she was the one I had noticed before, walking down the elevated stairs and she walked directly into the building. Believing her to be bent on mischief, I sprang forward barring the way, beside myself with rage at her audacity. I grasped her shoulders, in-

tending to put her out. But with a force unexpected in one so slight, she threw her whole weight against me I fell back against the wall. My head struck the marble moulding and made an ugly gash. I can show you the scar. "I was dared while she as coolly as

you please walked toward the elevator. It was occupied by some of my employes. I was near enough to notice that the elevator boy waited for her to enter but, as she stood aloof with an unmistakably haughty air, he asked, 'Aren't you going up, Miss Durand?' To which she replied, loud enough for everyone to hear, 'Do you expect me to go up on a car w scabs on it?

"By this time I began to realise that I had made a mistake and that she was not one of my strikers. I made haste, however, to find out who she was and when I learned that she she was and when I learned that she held a position of responsibility with you, I knew that it was my duty to inform you of what nad happened." He had scarcely finished before the office door opened and Miss Durand came in. Seeing the manufacturer,

she stiffened and walking to her desk, without a word busied herself with oe papers. dr. Davis arose to go. As he followed the latter to the door; Mr. Stone said: "Thank you, Mr. Davis; you were quite right."

He was vexed. He had never imagined a side like that in his secre-tary's makeup, and the knowledge of its existence opened a vista of possi-

wards that end. The recent increase in air astimates, the "warton excaped of Singapore,"—as Ramay MacDonald called our enormous expenditure on a new avail hase in the East—all this shows that there is no reality in the pious desire for peace expressed by the other political parties, and summed up in the Prima Minister's chilling and accelerate repty, which showed that he and the interwhich showed that he and the inter-cets he represents have no sense of the "will of the common people of all countries"—the people, as Mr. Tom Shaw said, who never want war and are quite ready for all the implied in the Labor motion. dy for all that was

#### NEED FOR PEACE

Never was there greater need for Never was more greater need for peace, or for the peace attitude of mind, than at present, when, await-ing the French and Belgian reply to the proposed note to Germany, rela-tions between the Allies cannot be said to be cordial. The Labor party's warning that another war may be sprung upon us as it was sprung upon us in 1914 cannot be said to be without foundation when one reads some of the fulminations of a section of our Tory Press, which is already hinting at a possible trial of strength be tween us and France. In France very much the same division of opin ion is to be seen between those who urge that the Entente be maintained at any cost and those who take the

line that the Entente is a thing of the past; but the same elements who wish for a policy that steers between these two extremes and wants neither war between Britain and Prance nor the complete ruin of Germany, has no expression in the French Chamber as it has in the English Parliament, thanks to the presence there of strong Labor opposition.

Yet in this country Labor has not Yet in this country Labor has not yet the power to control off own for-eign office, which still lives in the past, as the Lausanne Treaty, signed at last, amply testifies, for, in its sur-render to the Turks in all important tters in order to secure the rig of entry for warships into the Black Sea (which can be simed only at Rus sia) it shows that in Lord Curson's mind the predominant motive was his dislike of the Soviet Government. The astonishing news that, in spite of the nature of this treaty, the Soviet Gov-ernment is prepared to sign it, is another proof that, however, dista ful this or any other capitalist agree ment may be to the only people's goy ernment in Europe, war is still more distasteful. Not for the first time the new Russia is showing the older untries a real will to peace.

THE INDUSTRIAL POSITION Meanwhile, the trade depre instead of improving as we were as-sured by our Tory governors a few months ago it would improve, is get-

ting worse. Even the president Commons a day or two ago that trade prospects are "nothing like as good as they were last December" while several notable company chair men have in the course of the las week or two strongly contended that his is due to the French occupation of the Ruhr. The Labor economis and financier, Alderman Emil Dayles L. C. C., is of opinion that a satis factory settlement of the renaration mmons a day or two ago L. C. C., is of opinion that a sa factory settlement of the reparati question might have such a payche ensue, but short of that, as he tole an interviewer, "the outlook is ver ensue, but short of that, as he toll an interviewer, "the outlook is ver-black indeed." Unemployment which was declining; is now station ary, while short time is on the ir

ary, while short time is on the in-crease, the number drawing benefit for this latter reason having increas-e. last month by 15,600. The dock strike is over, practically, in all the ports except that of Lon-don where it now shows signs of

the refusal of the em breaking ployers to negotiate except with the union's leaders, Ernest Bevin as union's leaders, Ernest Bevin and Harry Gosling, M. P., places the strike Harry Gosling, M. P., places the strike leaders in a newheard position, for they, have definitely repudiated the leaderning of their old leaders and carried the men so far with them. One cannot go down to Deckland, these days, and see the man standing hungrily at street corners, and fears how school dinners have increased by bundreds in the last week or two, without realizing that the grievance

a cut of a shilling a day in wages based on a disputed fall in the cos of living—which still keeps the mer out in defiance of the advice of their tried leaders, must be a very real one

no bitter invective, such as one expect. The party, says its organ, has fight other labor groups—its bu is to fight the common enemy of the worker. "It has no time nor innation for red-baiting. It has abuse to heap on revolutionaries. has a constructive job to do. . .

It is on its way. Let's go."
On this policy the New Majority parts company with the bulk of the American Federation of Labor press and some of the other union papers as well. "Radicalism hates American labor," declares Organised Labor in California, believing that the reds aim to destroy trade unions. The Black smith's Journal echoes the sentiment smith's Journal echoes the sentiment. The American Federationist writes on the danger of the reds to Labor. Most bitter of all, the United Mine Workers' Journal condemns the at-tempts of the reds to oust the present

leaders of the union.
On the whole, if one may judge labor opinion through the labor press there is almost no question on which

they feel more strongly or write more beatedly than on this question of rev-olutionaries. It is something to think

### The Labor Press for July

By BERTHA WALLERSTEIN

For the most part the labor jourals in July have been talking about nation-wide labor issues rather than out their own particular affairs in their respective industries. There are exceptions, of course. The Bakers Journal is still full of the struggle against the Ward Company. The United Mine Workers Journal takes a firm tone about the anthracite con-"The United Mine Workers of America," says the organ of that union, "is committed to the principle of collective bargaining as a means for the proper adjustment of such matters, and the union does not pro-pose to accept anything else as a subitute for that long-established prinple." Advance records the gains ade in the Shirt Makers' Union, and the progress of the strike of 85 per cent of the clothing workers in Buf-falo against the open abop campaign in that city

Of the nation-wide labor issues, the steel campaign takes the lead. Labor ees no halo sprouting on Gary's head ecause he has promised to put the ight-hour day into partial operation. eight-hour day into partial operation.
The Usics Leader points out that
public opinion has scared the steel
magnate into something like decency.
A heavy broadside has been fired at
the twelve-hour day in steel by religton, public sentiment, engineers, and Labor. From the point of view of ethics, decency, efficiency, and justice, the twelve-hour day stands co ned. Public opinion works slowly, but it has finally wrung a concession from the stronghold of steel. It is as a concession, not as a voluntary icy, that Labor views the intro duction of the eight-hour day in steel. Nor does it consider the concession

stirely made to public opinion. For came, as the Garment Worker sints out, precisely at the time when points out, precisely at the time the the newspapers gave publicity to the campaign to organize the steel work-ers. "It looks," says that paper, "as if the Steel Trust may have really de-cided to end the twelve-hour day in

the hope of depriving the steel work-ers of an argument for unionization." But labor opinion thinks that, if that was Steel's hope, it is doomed to dis-appointment. Public opinion is too slow a method for the workers, just as indirect influence was too slow for the women before they got the vote. Labor journals are confident that steel workers demand something more effective, and that something is recog tion of their union. The work will

be slow at first, but it will pay.

Next to steel, coal holds the atten tion of the labor press. There is fre quent, but nowhere extended, com ment on the preliminary report of the Coal Commission. The idea of fixing rates by law, or by Presidential ordies not appeal to Labor. Railroad Trainman points out that it is positively unconstitutional, accord-ing to the Supreme Court's decision on the Kansas law

. Labor also objects to the no strike clause. The News Letter of the American Federation of Labor abows that this would inflict a penalty on the miners, but that no similar one could be inflicted on the operators.

Gompers' statement to this effect appears in a number of union journals.

The general labor sentiment is against Government regulation in any degree. The journals remind their readers that the miners wanted a strictly fact-finding comm ernment control, says the United Mine Workers Journal, proved a failure during the war, and they are not anxious to make another trial. are content to argue out the iss cause they suspect that Governm control is not altogether impartial that the miners prefer to have the Government keep out. The use of the Lever Act against their strike in 1919 would give them some ground to think that, to say nothing of the recent policy of the Administration when it interfered in labor disputes. There is the permanent Wilkerson injunction, for instance. Labor, of the railroa brotherhoods, does not think that will prevent strikes, but it certainly has shown that the Administration is no friend to Labor. There would be still more danger to the miners. if coal wages were Washington, and strikes were for-

The Administration is no friend t

What are Labor's chances of putting friends in power? The labor press is not over jubilant about this. There is general rejoicing in the elec-tion of Magnus Johnson. But com-ment is remarkably scarce on the conment is remarkably scarce on the con-vention called at Chicago by the Farmer-Labor Party. The New Ma-jerity, the organ of that party, feels that all its efforts at cooperation with other like-minded groups have failed. The party, it said, made no previous plans because it wanted to talk things over with the Communists in a per feetly friendly mood, and find a comground. It had no de anything over. Apparently that party wins which does plan to put party wins which does plan to put something over. The New Majority frankly admits that the workers' party played politics and played it well. It comments little. There is

#### Winning 44 Hours In Australia

A thrilling story has just come out of Australia. It shows the value of trade-union publicity, and how that publicity reaches even over international boundaries to help the workers It comes in the form of a letter from the "Australian Worker" to

the Workers' Health Bureau of 799 Broadway, New York City. All the American labor press has been ringing with the recent victory of the New York union painters-for the 40-hour week, abolition of th bonus system and the establishment of the permanent health board for the supervision of the trade. victor victory came largely from the "health facts," which the painters had

at their finger tips as a result of hav ing their own health department.

The news of this great gain reach-

ed Australia just when the painters of Sydney were in the midst of ar-bitration proceedings. The workers had demanded the 44-hour week, as a health measure

To quote the letter from Australia: "The painters here in Sydney had a case before the arbitration courts on the question of hours. They urging a reduction to 44 hours per week on the grounds mainly, that the trade was an unhealthy one. Your bull was able to give valuable assistance to their case, with the result that they were able to get their hour reduced from 48 to 44 per week. I have no doubt that future buletins issued by ou will have a ne ess important bearing on other rades in Australia.

TO THE NEW CLOAK AND DRESS JOINT BOARD TO THE NEW CLOAK AND DRESS JOINT BOARD
The inevitable has taken place. The Joint Board of the
Dress and Waistmakers' Union of New York is no more. It has
accomplished all it could do for the dressmakers of New York
accomplished all it could do for the dressmakers of New York
honor. It will be able to point with pride to a record of having
made its affiliated locals stronger and better fit to fight the battles of the workers; of having won for the dressmakers, during
the last conflict in the winter of 1925, a 46-hour and a five-day
found neglected and in precarious circumstances are now in
splendid financial condition, as a evident from the report submitted by 3c-other Sheinholtz, the secretary of Local 22.

The Ireas follow Rose is leaving the ways with a bound to

The Dress Joint Board is not leaving the areas with a bowed bead or in a state of helpleasenes, but is, on the contrary, carrying away into history a fecord of substantial achievements. Nevertheless, the hour for the uniting of this Joint Board with the Joint Board of the Cloakmakers' Union has struck; the interests of the workers demanded it, and the amalgamation has taken place.

place That this amalgamation be fruitful of greater result, it would gerhap not be amist to mention here that the former would gerhap not be amist to mention here that the former joint board-did not succeed, with all its efforts, in organizing the dress industry of New York in a manner that would yield to the workers the full benefit of organization. There are a cinese control, but side by side with these there are a number of others in which the union has no influence whatever. Needless to say, this condition has had a bad influence upon the entire dress industry and upon the workers in particular. Our leading officers have realized, together with the great majority of the members of the dressmakers' union, that if the dress industry is to be organized like the cloak trade, it must be placed under the control of a stronger and bigger organization than the joint board in the dress industry. In a word it must become a part of the Joint Board of the Cloakmakers' Union of New York.

We are calling attention to this important point for the pur-pose of laying at rest the erroneous notion still entertained by the control of the control of the control of the control of the craft unions have outlived their sense and purpose and on mak-complianted by so-called "industrial" unions, have played a part in the consolidation of these two joint boards. The only moving motive for this amalgamajion was the desire to improve as quickly and as thoroughly the economic interest of the dress. makers and the cloakmakers, and the assurance that both parties are bound to win through such an amalgamation has led and was bound to lead to this important reorganization.

Let it not be misunderstood, nevertheless, that the dress-ments have given up, through this change, their organization, stronger, having been augmented by, the dressmaker members of Local 23, which will be transferred to it. The dress industry thus remains under the control of the dressmaker windows and its thus remains under the control of the dressmaker windows and its stronger. The control of the dressmaker windows and its development of the control of the dressmaker windows and Dressmakers' Unions, which is better situated to take care of the interests of the dress industry in general than was the former Joint Board of the Dressmakers' Union.

We do not believe it necessary to go over again in these We do not believe it necessary to go over again in these Columns the various and sundry reasons which prompted the General Executive Board to decide upon amalgamation. Never-theless, in order to put the quietus on any suspicion that might be attached to the motives of those who proposed and carried out this consolidation, we desire to offset an argument which we occasionally hear to the effect that the affiliation of the dress-makers' locals with the newly created Joint Board might lead to the usurping of the dress industry by the cloakmakers and the eventual swallowing up of the dress locals by the cloak

Such suspicion, unwarranted though it is, might seriously interfere with the plans of complete and thorough amalgamation. As a matter of fact, however, Local 23, in part a dress of the contract of the Cloak Joint Board, and the contract of the contract o

that, if the clearnakers have not swallowed and did not desire to swallow the comparatively small number of tresmakers which they have had under the control of the Joint Board for many years, they will not attempt to gulp down the tens of thousands of dressmakers who now become affiliated with them?

We desire to underscore this point as strongly as we can possibly do it. True unity and genuine improvement in both industries can only be had when this feeling of "they" and "we' in the new Joint Board will entirely vanish. It is against this they we then the strong with the west of the strong with the west of the w

THE LESSON OF THE LAST ELECTION IN PHILADELPHIA THE LESSON OF THE LAST ELECTION IN PHILADELPHIA
The so-called "lefa" in the Cloakmakers" Union of Philadelphia, who for a full year have had complete control of the
the coals, met with defeat in the last election. This second year
duced a rather loud grashing of teeth among a group of persons
who are sailing under the name of "Trade Union Educational
League." These fellows are now calling out in stenforian tones
to extense the great wrong committed against the Philadelphia
who have wrested control from their colleagues."

We should like to ask what has this so-called Trade Union Educational Lague to do with the election of officers in the which is brace enough to condem the members of the Cluster which is braces enough to condem the members of the Cluster and elected others in their place? Ostensibly they are a group whose task it is to "educate" the trade unions, how to manage themselves. It requires a Footer to create, by the wave of a magic wand, an "educational" league which would keep the unions upon the right track.

would keep the unions upon the right track.

But who is this Foster and from when does heldraw his
with the state of the Moscow Red Internationale. This league, consequently, like Punch and Jody, moves and acts as the strings from Moscow pull and jerk it.

Judy, moves and acts as the strings from Moscow pull and jerk it.

In The recipies is quite simple. If a labor union will obey the

functions and follow the "education" of this league, it is
movement" in America. If, however, the trade union resents
the inter-meddling of the league and refuses to be treated as an

### The Sub-Manufacturer and the Jobber

By MORRIS SIGMAN President, I. L. G. W. U.

In the two previous articles, we we endeavored to make clear the uses which led to the rise of the which led to the rise of the ub-manufacturer and the jobber in he closk industry. We shall now ait for a while and analyze the posi-ion which these two factors, now rown to full maturity, occupy in this idustry.

The jobber, as a matter of fact, is day the manufacturer in the trade. He controls the raw material, but, instead of making up his work in his own shop and employing a superin-tendent and a foreman at substantial ekly salaries, he sends out his un-

weekly salaries, he sends out his un-cut material to some sub-manufactur-ers who make up the garments for him. They do for him the work of the foreman and the superintendent and leave nothing undone to produce se garments for him at the cheapest cossible prices. This position of be-og able to choose his sub-manufacturers from a large competitive field gives the jobber-manufacturer the ance to keep up a keen rivalry b tween these sub-manufacturers. The latter are compelled to come to the jobber to ask for work and it stands to reason that he can play them one against the other and cut prices frequently to his heart's content.

The jobber thus gets his work do for him more cheaply than it would have cost him if made under ordinary market conditions. He accomplishes oth at the expense of the subnufacturer and also at the expense of the workers employed by these sub-

This is one of the advantages which his method of doing business has gain-ed for the cloak jobber. Another important advantage consists in the fact that the workers who indirectly make his garments for him are scattered in endition of which he has no responsibility whatever. The jobber can at any time engage dozens of shops full of workers and can discharge them at his will without coming into a conflict with the union. This is a very important point and we shall en-deavor to make it somewhat clearer.

When a jobber, for instance, engages at the beginning of the season 50 men each, he indirectly engages one thousand men to do his work. A week to two later, however, ten other week to two later, however, ten other sub-manufacturers may come to the same jobber and propose to do his work at a lower price. This jobber will forthwith withdraw his work from

ten of his former sub-manufacturers and 50 cloakmakers will remain with-out work. In other words, the job-ber has discharged as many workers from their jobs and has engaged other workers in their place. Until now such practice has been tolerated even by the union, for it was argued that the jobber and the manufacturer cannot be dictated to as to who they might or might not get to buy their

What has actually happened in this case is that the jobber, by stopping his work in those ten shops, has literally locked out 50 union men. Were he an inside manufacturer and had acted in this manner against his workers, the union would surely not acquiesce in his lockout and no one in general would justify his conduct. Today, however, the jobber is a "free" mer-chant and no one is supposed to have chant and no one is supposed to have any grievance against him. The ef-fect of such a practice on the locked-out workers directly and on the gen-eral labor conditions in the trade can easily be imagined. It undermines the union standards and brings demoralization among the members of the union. The sub-manufacturers in such a case naturally tell their workers that they cannot obtain any more work from the jobbers because there are other sub-manufacturers who can do the work more cheaply. The workers in these shops do not have to be told twice that they lost their jobs because other union men in other shops have consented to work for lower wages. They come thus to realize that, in order to enable their employers to get work, they must compete with the workers in those

What I have stated here is the ex-act truth and it is not exaggerated in the least. There is nothing in the present situation in the cloak trade that would prevent the occurrence of such things. The jobbers and even such things. The jobbers and even the sub-manufacturers are surely not sufficiently concerned in the deplorable effects of these practices on able enects of these practices on the entire trade as long as they get their work done for them at the cheapest possible rate. The union, on the other hand, has not today the required control over the jobber and manu-facturer to check the inevitable ruin which is bound to befull the cloal trade if this anarchy continues. The reason for this is that the union has reason for this is that the union has not the required control over the wages of the workers. The union protects only the minimum scale, while the wages over the minimum

shops who succeeded in taking the

work away from them.

are not fixed or regulated.

When a worker is engaged on a new job, he is to get not less than the minimum scale. If he succeeds in getting from his new employer \$20 above the minimum, his price cannot be reduced as long as he works in that shop. If a \$70 per week worker. shop. If a \$70 per week worker, however loses his job — on account, let,us say, of the firm's going out of heusiness or through having been dis-charged for some cause, and not rein-stated, or by giving up the job in a slack reason—and he takes on a new job where he is compelled to work for ten or fifteen dollars a week less for ten or fitteen dollars a week less than in his former shep, the union cannot compel the firm to pay him the wages to which he is entitled ac-cording to his ability, as long as his wages are not below the minimum

And now that we have made it clear, the question arises: What must be done to abolish these evils and to put the labor conditions in the cloak industry on a sound and se

Already in 1919, when we had ou conference with the cloak manufac-turers for the introduction of weekwork, I attempted to put up some safeguards against the occurrence of the deplorable conditions which are the deporance condutions which are rampant today in the cloak industry. I proposed that a definite clause be inserted in the new agreement that, when a manufacturer engages a new worker or a number of workers, the union and the association together union and the aspectation together should fix the price for such workers if they are to be paid above the minimum price. The basis for such wage fixation, as I proposed it, should be the existing level of wages above the minimum scale in the ahop in question. In other words, as I stated at that time, the fixing of the price of the individual workers is not to be left to the worker and to the boss themselves. Our trade, I argued, is a seasonal trade and, because of that, a seasonal trace and, because of that, it frequently occurs that our workers leave their shops at the end of the season and, before each new season, a large number of workers are compelled to take on new jobs. As the height of the season does not occur in our trade at the very outset and, as the demand for work at the beginning of each season is much great er than the demand for workers, it would stand to reason that the manufacturers whose workers had left them at the end of the preceding sea-son would take the opportunity to engage new workers at a much lower price. This would naturally create

sharp competition between both the workers and the manufacturers.

Though my suggestions we carried out, my guess was right, exthe cloak industry has become far more entangled and far more diffi-

Today we must, in addition to the suggested, adopt many other con structive methods in order to place the industry on a better basis and to make safe tolerable living conditions

the cloak shops.

Here are several concrete points:

1. It must be firmly settled that
the jobber is the manufacturer and
we must demand from him full re-

2. We must regulate the shop mar-ket wherein the jobber-manufacturer might produce his wares so as to check the practice of scattering his garments all over Greater New York and vicinity which undermines and

demoralizes labor conditions.

3. We must hold the jobber and manufacturer responsible for the work done in the shops of their sub-manu-facturers and not allow them to make lockouts whenever they see fit as they do now.

-as they do now.
4. We must demand that each jobber and manufacturer engage no more sub-manufacturers than they actually need, and that the Union actually need, and that the Union shall have the right, together with the jobber or manufacturer, to determine how many shops he requires to make up his work, and likewise to see that these shops meet union rules both with regard to size and cleanliness. 5. The Union must demand that

5. The Union must demand that the jobber shall at all times divide his work equally among all his shops so that he might not be allowed to util-ize to his advantage the workers of one shop against the workers of the other during the slow periods of the seasons. The Union must demand compliance with this regulation also from manufacturers who do inside manufacturing.
6. The Union must demand the

 The Union must demand the right to control the amount of work made for the jobber or manufacturer during a given period; the amount shipped by him to his customers and the amount left in his stock rooms the amount of raw materials pur chased by him and the amount sen by him to his sub-manufacturers, as well as the amount kept by him in the sponging shops and in his sto

rooms-so as to prevent the growth of additional shops where work might be done under non-union condit These clauses added to our pregent agreement with some modifications, on which it is not important to dwell right now, are likely to bring a cided improvement in the labor conditions in the shops and more system and order in the trade

SMALL EMPLOYERS IN REVOLT

The thought of our cloak sub-manufacturers in a strike is rather a startling supposition. The very idea speaks volumes of the folly of these men in having continually helped the bigger manufacturers and jobbers against the efforts of the workers to improve their condition—in the remote hope that for this the manufacturers would be grateful to them and allow them to

After having done the "dirty work," and having relieved the jobber from the "yoke" of the union, these sub-manufac-turers are now getting in return the full weight of the big man's heel, a fate which they had honestly deserved, we saw.

Now they are up in arms and are leadly declaring that they will close down bine shape. By his hreat they of course, only accentuate their deplorable condition. Had they felt and acted like business men, they would arrely not have uttered this threat of closing down their shops. The union, indeed, could from the piph in the piph of the contractors. But if does not. Rather, it pittes them, for it recognizes their helplessness and their inability to do anything effective even now without the aid of the union.

Despite the unenviable condition of the sub-manufacturers, the union is opposed to this proposed shut down. The union realizes that in this controversy between the sub-manufacturers and the jobbers there are involved to a very large extent its own

interests and the interests of its members. Not the sub-manufacturers with their gesture of a shut-down can solve this jobber problem but only the workers through their union by their own methods and in their own time.

The sub-manufacturers will, therefore, have to be patient until the union is ready to say the word in this matter. The contractoriar are not in a position to revolve on their own account without the sanction of the union. It is not that the saction of the union. It is not that the good and become rank and ilse workers. But if they still desire to remain contractors and sub-contractors, they might as well make up their mind charles the workers. But if they still desire to remain contractors and sub-contractors, they might as well make up their mind charles to the workers. But if they still desire to remain contractors and sub-contractors, they might as well make up their mind. It is not in the sub-manufacturer is absolutely necessary for the trade, will the union see to it that his condition is also made tolerable and that he case to be the chattel of the manufacture as a traction.

he union will do this not because it loves the sub The union will do this not because it oves its sub-manufac-ture. The union will do this not because it oves its sub-manufac-ture. The union will be union the union might be used to shaves —the position in which they actually find themselves now. That would be the only incentive the union might have in helping the abound decide, that for the time being it still needs him in the clock industry.

### In the Realm of Books

(O. Henry Memorial Prize Stories of 1922, Harcourt, Brace & Co., 1923) By SYLVIA KOPALD

It may be an excess of critical co It may be an excess of critical cases or part of contrainment that makes to regard "prize" series and "best" rises and others, and the rises and other time with smediate suspicion. But whatever enauses, the fact remains that I do. and I do think there is good basis or such suspicion. For, after all, prize" and "best" imply selection of a series of the selection of a selection in the selection of a selection in the selection of trained in their fields, but in a faul analysis there are only two formulae by which one may compound judgments. He may need exists in danked to of the land and ambatical contendents of value and ambatical contendents of value and ambatical contendents of value and the land with the land and the land and the land with land may make his town likes and distillant, he cold test of judgment. The same ranked the critical has little in common with the critical field was all order. For the land with the critical field was all contended to the land with the critical field in an electric of the land with the critical field in the land with the lan

but in this mechanism of judgment, as the difficulty in appraising "prize" bollmen. If the following but he judges have accepted extain standards of value they at more precipitate an inevitable doubt: larg not some sphendid piece of work all to fit into straight-jacket stand-duck the property of the p as waten represent merely a crystal-ation of what past generations have ought best in art? If the judges, a the other hand, proceed from their wn likes and dislikes and these only, sw do we know that their prejudices at those of the readers coincide?

of the resident coincide?

Of concrue, there has always been anthogy that bested his assumption and the residence of the residence and the

materpieces are directed by a wise howevege and a large capacity for understanding and feeling. The great anhelector certic is not a state. The multiple citizans of The Shadh, categories are supported by the con-clusion of the Shadh and the con-clusion of the support of the particular support of the support of the

parrotting his opinions.
Yet in spits of all the delicate philosophical entanglements involved, the
last of "price" and "best" grown
steadily larger. There is O'Brien's
annual Best Sheer Steries. There is
Braittwaite's Authology of Magnaine
Portyr. There is Mantle's annual
Best Plays, There is the annual culling from the poetry in the college magazines. There is the O. Henry Memorial Prize Stories. And perhaps some others that have so far escaped

It is not to be understood that these volumes do not fall a very definite need. They do. It is convenient to have some one wade through the passing show of magazine literature and current drama and chose from it what he thinks best. But the reviews of such volumes frequently bear wit-ness to the underlying difficulty. I ness to the underlying difficulty. I remember a review of Braithwaite's anthology that berated him soundly for his choices. I have read story after story in O'Brien's volumes only to wonder "Now who did he included the story of the story o

distinguishable. The O. Henry va-umes, for different reasons, fall in the same class. Even though one can-not pass upon what has not been chosen, the stories included in the volume are generally enjoyable and good (don't ak me what I; who said at that, has gone before, mean by

theory. The committee of produce who good. The citizent for an old. The citizent for an old. Heary Memorial Award make a conpromise. They are furth several very general usts by which a story may be mind the complete reading at one sitting (Pow's size qua non). It must have several to the complete reading a story of the complete reading the complete reading the committee of the complete reading from the warmer of the committee o

After stating these large generalizations, the committee at once dilates upon the difference of opinion brought forth by the task of actual brought forth by the task of actual judgment. In other words objective criticism may leave room for the subjective. The atories finally chosen represent the balance, and opinion. Some won the approval of all committee members; some only of a portion of the committee. The balance of several judgments has more chance of general endorrement than the balance of one. The O. Henry Memorial Prize Stories make an interesting

#### The Government Strike-Breaker

(Review by Theresa Wolfson)

A strike is a strike-and deserves no front-page news item unless some terrific piece of violence is connected with it. -In the course of a year one ds many news stories on many in dustrial crises, but little is stored away in our memory vault unless it is some outstanding phase of indus-trial warfare, such as the Herrin "massacre." The very term "maswhich was not applied to miners who were murdered but to the killing of the men who were aired to break the the strike-breakers

The average worker forgets the in strial conflicts which happen day after day-and, what is more serious forgets the part which the govern-ment plays in these conflicts. It is, therefore, no wonder that at election time the worker becomes a shuttle-cock tossed between the Republican and Democratic parties - and he votes "heads or tails."

The book just written by Mr. Jay Lovestone is an excellent compendium of industrial conflicts since the war, "The Government Strike-breaker" (a unique title for a book which shows our government in a new, yet old, rôle), the lowly thug who uses his fists to gain his ends. It makes no difference which political party is of-icially in power, the real forces are he barons of industry.

The author declares his purpose in

compiling these facts about labor con flicts, "to present to the American workers the story of their recent heroic battles against employing-class oppression in such a manner as to aid them in their new struggles for freedom." What he has actually done freedom." What he has actually done has been to gather the facts for a great labor epic-facts which have become a part of American labor his-tory since the great war for de-

The first part of the book deals w the great textile strike of 1921-22, when almost 100,000 workers left the mills. How the courts, the national guardsmen, the Burns detective age cies, were used to break the strike, makes interesting reading in itself, aside from its inherent importance. The next conflict was the miners strike and again the national govern ment became a strike-breaker and sent troops to break the spirit and backbone of the workers.

Then there is Herrin, that heart breaking revolt of the miners which will be carried down in the annals of will be carried down in the annals of American labor conflicts, as blasing an episode as the revolt of the slaves of old. Again the government de-manded justice and made a plea for the "sacredness of life"—not the workers life—but the strike-breakers'

agreement. The executive board of | conference with the association was Local 12 decided once for all to put a stop to it, and so has adjusted this radical measure of expulsion from the union. Four weeks were granted to these pressers, within which time they can come forward and report any violation and the office will see that they are retained on their jobs, on a week-work basis as per agreement. When this decision of the executive board became known among the members of Local 12, complaints of this nature began pouring in. Brother Frank, business agent of the pressers, and the office of Local 49 were kept busy all last week adjust ing these. So far the union has been successful in every instance and it is to be expected that before the season is in full swing, all pressers will work by week only.

#### WATERPROOF GARMENT WORKERS, LOCAL 7

Our agreement with the Water-proof Garment Manufacturers Asso-ciation as well as with the independent employers expires on August 15. A

arranged for Monday, August 6, for the purpose of negotiating the terms of a new agreement. While we have no reason to expect any serious difficulties in renewing our agreement especially since the trade is quite busy for this period of the year, still the executive board of Local 7 deemed it advisable to prepare for any eventualities. At the last meeting of the executive board a general strike com mittee was elected. This general strike committee is headed by Vicepresident Fred Monosson, manager of Local 7. The executive board also Icoal 7. The executive board also regameneded that an assessment be levied on all members of our local. The money derived from this tax will be considered as a defense fund. The assessment will be \$10.00 for men and \$4.00 for women. A special meeting of our local is called for Wednesday, August 6, at which all these recommendations of the executive board will be discussed. There is no doubt that these important or the second state of the contraction of the contract ommendations will be approved by A this special meeting.

### With the Waist and Dress Joint Board

By M. K. MACKOFF, Secretary

COMMUNICATIONS ived from

Two letters were received from Brother Sigman, president of the In-ternational, which read as follows: "At a meeting held on Thursday, July 25th, between committees of the Cleakmakers' Joint Board, Locals 22 Cleakmakers' Joint Board, Locals 22 and 89, and also the committee in charge of the amalgamation, repre-senting the International, the phases of the affiliation of these locals of the Cloakmakers' Joint Board have finally been concluded, and the Cloak-makers' Joint Board will begin Aust 13, of Locals 22 and 89 and also 60, which comes under Local 35 is intely.

mediately.

"This will also include the dress cutters now with our Joint Board."

"Accordingly, Brother Kaplowits has been instructed to make arrangements for the merging of the business of all these locals with the Closk-makers Joint Board.

"You 'are therefore requested to give Brother Kaplowits all the cooperation processes in consistent with

ation necessary in connection with transferring all funds belonging to these several locals to the Cloakmak-ers' Joint Board and also the transferring of records pertaining to Joint matters: securities held for s manufacturers, wages held for workers of the dress industry, and all other books, records, monies and what-ever may be in the possession of your Joint Board to be transferred to the Cloakmakers' Joint Board, during the

ree of this time." The second letter addr Joint Board and dated July 28th,

"At the meeting held Thursday, July 26, between committees of the Cloak-makers' Joint Board and Locals 22 and 89 respectively, and also the com-mittee in charge of the amalgamation presenting the International,

following agreement was reached: "That Locals 22 and 89 are to send in delegates to the Joint Board Cloakmakers' Union, beginning with the makers' Union, beginning with the meeting on Friday, August 10th. The delegates of Local 22 are to be seated provisionally until such time that the transferring of the dressmakers of transferring of the dressmakers of Local 22 to Local 22 will be completed. Then these locals will have their regu-lar elections for the Executive Board and send in permanent delegates to replace these provisional delegates. "That the General Manager of the Cloakmakers' Joint Board should im-

mediately proceed with the plan of merging the work, of attending to shops of the dress department now ontrolled by both Joint Boards. This is to be done as soon as possible and to be completed not later than August 15. The Cloakmakers' Joint Board is to begin attending to all matters af-fecting the merging of the dress trade feeting the merging of the dress trace including all financial arrangements beginning Monday, August 12, and as of that date expenses and payments will be distributed by the Joint Board proportionately among all locals, in-cluding the newly affiliated locals.

"Secretary Philip Kaplowitz of the Cloakmakers' Joint Board (which will be known hereafter as the Joint Board of the Cloak and Dressmakers) is in-structed by the committee to immediately begin making arrangements with the secretaries of Locals 10, 22 and 89 and with Secretary Mackoff of the Waist and Dressmakers' Joint Board for adjusting all financial matters connected with the affiliation of these cals with the Joint Beard of the

Cloakmakers' Union."

The Board of Directors expressed their confidence that the officers concerned will lend their full cooperation

in order to bring about the amalgama-tion without unnecessary delay.

In connection with these communica-tions the attention of the Board was called to the fact that, due to this ex-pected. Imalgamation, there are a sately like immediately in order to expedite inatters. The Board then took up the matter of the assessment expense matters. The Board the took up the matter of the assessmen levied by our Joint Board, the amoun of money collected on that by the re spective locals and deficit, i.e., the expenses incurred in connection with the general strike and after due delibera-

general strike and after due delibera-tion it was decided:

1. That those dress locals which are going to affiliate themselves with the Joint Board of Cloak and Dressmak-ers' Union, should continue to collect the balance of that assessment on the same basis as we had decided in the th of May.

month of May.

That those locals which are going
to remain independent shall not be
obliged to pay the balance of that assessment to the Joint Board, it being,
however, understood that the deficit
incurred by our Joint Board on that account should be covered pro rata share by the respective locals.

2. That securities held by our Joint

 That securities held by our Joint Board should be transferred to the Joint Board Cloak and Dressmakers' Union with the understanding that-se-curities held of embroidery and waist abops should be turned over to the respective locals.

spective locals.

3. Monies in the treasury of our Joint Board, which are known as collected wages for members, should be transferred to the Cloakmakers' Joint

Roard . 4. In regard to the Unity House, the Board of Directors considered that as our Joint Board is going to dissolve, the locals concerned in the Unity House should make immediate ar-rangements to see that the interests of the Unity Home will be well taken

5. The Board took into 5. The Board took into consideration the financial standing of Local 25 which is the only local that is going to remain independent. The Board further considered, in view of the close relations between the waist and dressmakers, that it would be advisable to strengthen the organization of the waistmakers. In order to accomplish this, the Board of Directors decided an additional \$5,000 from the Joint Board surplus fund should be donated to that local.

Brother Mackoff advised the Board

at he intends to invite the local secretaries to a consultation in regard to the transferring of finances as well as of Joint Board records to the Joint Board Cloakmakers' Union.

This suggrestion was well taken, it being understood that all final ar-rangements made and reported to the last meeting of the Joint Board should be subject to the approval of the loncerned.

6. Revolving funds. It was bron out that the locals affiliated with the Joint Board advanced funds amounting to \$23,600. In view of the dis lution, the Board of Directors decided that upon settling the bills due to the Joint Board, the respective locals should be paid out the revolving funds

7. The Board of Directors then alidered what is going to become of the outlying districts, the labor bu reau and the arrangements made with Brother Rothenberg, our attorney. It was the consensus of opinion of the Board of Directors that this should be referred to the Cloakmakers' Union

In regard to the final adjusts

all financial transactions and transfer of monies as well as of records to the Joint Board of the Cloakmakers' Union, a discussion brought out that in view of Brother Sigman's letter that all business will be transacted by the Joint Board of Cloakmakers beginning August 13, the secretary's office should be open till that day. The secretary was instructed to make arrangements that the auditor of the International

make a complete final audit.

A committee consisting of Brothers

3. To the main office, there will be assigned managers for an Independent Department, Andociation Department and Jobbers' Department. Brother Feinberg offered him, Brother Hochman stated, the office of manager of the Independent Department. In regard to the Organization Department Brother Hochman stated that Brother Feinberg fold him that according to the prevailing system of the Cleakmakers' Joint Board they have no special organization depart-ment but each and every business agent is charged with the duty of organizing non-union shops in his or her district.

Brother Hochman further stated that he advised Brother Feinberg that this is not our conception of how or-ganization work should be done. Among other arguments he advanced, he stated that in the case of dresshe stated that in the case of druss-makers, a great majority of whom are girls who are constantly coming in and going out of the industry, organ-ization, drives periodically are abso-lutely imperative in order to keep pace with the outgoing members as well as spith the outgoing shope. On the other hand, Brother Hochman argued that with the columnater this is not the case. Though they, too, have a great number of unorganized shops, the men in that industry do not leave as fast as the girls

In conclusion Brother Hoche stated .hat the final development is that he was offered a position as or ganizer of the Cloakmakers' Joint ard. Nothing definite resulted fr

that but he expects to get together with Mr. Feinberg again in order to In connecti n with the reco

by Brother Hochman, Sister Wolko-witz informed the Joint Board that Local 22 at its last executive board Local 22 at its last executive boars meeting on Tuesday, July 21st, con sidered the various phases of th amalgamation. In view of the fact that they were informed that the dressmakers of Local 23 are not being transferred as yet to Local 22 and that the conception of the representa-tives of the Cloakmakers' Joint Board about the dress department differs about the dress department differs greatly from their own views, they were greatly concerned lest the inter-ests of the dressmakers might not be taken care of. They therefore deeld-ed that before the amalgamation takes place suitable arrangements should be made for the welfare of the dressmakmane for the weather of the areasman, ers and accordingly the executive board appointed a special committee to see Brother Sigman on the propo-sition. On the following day the com-mittee had a long talk with Brother Sigman and they made known to him the wishes of Local 22, laying much stress on the fact that if the dress de partment is not established to take care of the interests of the dressmakers, much friction will arise among the member

Brother Sigman differed with the stand of the committee and an understanding was reached that they should see him again the next day and he also promised to attend their membership meeting which is called for Thursday, August 2.

The report of Brother Hochman and the statement made by Sister Wolkowitz brought about a lively discussion in which it was brought out that due to the expected amalgamation, the or ganization work is being neglected and as from the outlook of things the present season is not going to last long, it is absolutely urgent to organize as many open shops as it is at all possible.

A motion to instruct the manager to make arrangements to launch a reanization cumpaign was carried.

## The Week In Local 10

R. IOSEPH FIEL

GENERAL There have been a number of in-quiries from members of our organi-zation as to the Union Health Cen-ter,—its scope of activity and func-tions. We are therefore going to briefly outline the purpose and aims of this institution.

The Union Health Center, which is located at 13f East 17th Street, was organized some three and a half years ago by seven locals of the Innal, Local 10 included. The ternational, Local 10 included. The Health Center grew out of a series of dental and medical clinics which were conducted by the Joint Board of Sanitary Control, an organization composed of manufacturers' associa-tions as well as unions.

Today the Union Health Center has Today the Union Health Center has no connection whatsoever with the Joint Board of Sanitary Control and is actually the health department of our International, and as such fulfills a number of functions. The work of this institution is carried on by a ard of directors, consisting of rep-sentatives from each of the locals fliated, and is under the direct su-ervision of Dr. George M. Price.

The medical department of this in-itution consists of a general diagstitution consists of a general diag-notic clinic, which is open every day from 12 to 2 p. m. and from 5 to 7 p. m., with the exception of Friday and Sunday. The work of this clinic and Sunday. The work of this clinic is carried on by a number competent physicians. General physical exam-inations are given to those workers who do not know specifically what

Aside from this general clinic, there are special clinics held on dif-ferent days of the week with special-ists in charge of them, so that the sats in charge of them, so that the most expert service is assured to the workers at a nominal fee of \$1.00. The following are the special clinics which are conducted by the Union Health Center:

Eye Clisic—This department, which is in charge of specialists, holds ses-sions on Monday and Wednesday from 5:30 to 7 p. m. to examine those who have trouble with their

Nose and Throat-This department is in charge of nose and throat specialists, and sessions are held on Monday, Tuqoday, Wednesday and Thurs-day, from 5:30 to 7 p. m., to take re of those who complain of trouble with their nose or throat.

Castro-Intestinal Clinic-It has its

ssions on Monday from 5:30 to 7:30 p. m., and on Saturday from 12:30 to-2 p. m. This clinic is in charge of lists on stomach or intestinal troubles.

Gynecological Clinic-A special elinic with women physicians in charge has been arranged for the women members of the International well as the wives of our members. department treats diseases com mon to women. Its clinics are held on Tuesday, Thursday and Saturday, from 12 noon to 1:30 p. m., and on Monday and Thursday, from 5:30 to :30 p. m

Surgical Clinic-Sessions a Surgical Clinic—Sessions are held on Monday, Wednesday and Thurs-day, from 11:30 a.m. to 1 p.m. This department takes care of surgical treatments as well as minor surgical

Skin Clinic-The skin clinic has its ns on Saturday from 11:30 a. m.

rological Clinic-Which treats nervous diseases, is held on Wednes-day from 5:30 to 7 p. m. Orthopoedic Clinic-Treats de-

formities and its sessions are held on Tuesday and Thursday, from 5:30 to

Physiotherapeutic Clinic-Has its

Saturday, from 2:30 to 7 p. m., and gives electrical, baking and massage

treatments.

treatments.

There are also special appointments made for X-ray work and special electrical baking and massaging.

The work in every clinic has been arranged to suit the time and convenience of our members and every possible treatment for every possible backens has been arranged for by the Doard of directors of the Union Health Center and its director, Dr. George M. Price.

In addition to these clinics the medical department to be house a gray clinic department to be been a gray clove, which is composed to the error our members and all exceptions will be filled by a compactant pharmactic. Prescriptions will be filled by a compactant pharmactic. Prescriptions of those prescriptions that mecasitate exception that mecasitate exceptions are exceptions that mecasitate exceptions are exceptions and the exception of the exception The Union Health Center also

houses the dental department, which houses the dental department, which consists of ten fully equipped denti-rooms in charge of expert dentists and dental hygienists. The aim c. this department is to give competent this department is to give competent and expert services at minimum rates. It is open every day from 10 a. m. to 8 p. m., with the exception of Friday. This department is in charge of Dr. Max Price, under whose able supermax Price, under whose able super-vision this department has grown con-siderably, indicating how successful and popular it is with the members of the International.

In addition to the above named clinics, the Union Health Center has carried on an extensive health educational program. It consists of health claused and Friday night at the Union Health Center. The course given are Anatomy, Physiology, Shop Hydron. Personal Horizon Ser Health Canada and Priday night at the Union Health Center. The course given are Anatomy, Physiology, Shop Hydron. Personal Horizon Ser Health Personal giene, Personal Hygiene, Sex Hy-giene, etc. Lectures are also given in Yiddish and English on important in Yiddish and English on important health subjects, which are illustrated by motion pictures and lantern slides. They are given by competent physi-cians and public health specialists. The Union Health Center, as al-

ready mentioned above, has been organized by local unions of the International for the purpose of giving our members the best possible service our members the best possible service at the least possible cost, as the members fully realise that the Union Health Center is not in business for profit but to serve our members will take full advantage of the services offered to them by this institution, conducted under the able management of the Center M. Price and its ment of Dr. George M. Price and its

CLOAK AND SUIT

oard of directors.

Although last Monday night was a very hot one, the attendance at the meeting, we believe, was a record-breaking one for this time of the year. Our members are beginning to realize the necessity of attending to the business of the organization and are turning out in large numbers at each meeting of the organization, be it s tional or general, as evidenced at the last cloak and suit meeting

The meeting, although a brief one, attended to the necessary routine work of the organization, and also listened to the report of the manager, which covered the violations commit ted by the cutters in the shop of D. Klipstein, and the strike conducted by the Joint Board against the shop of Charles Meisel. Both of these cases have been previously reported in JUSTICE and will therefore not be

repeated in this issue General Manager Dubinsky touched also upon the situation confronting the union regarding the intended stop-

ganization have not as yet come to

any definite conclusion in the matter. In conjunction with the D. Rilipstein shop, however, we do want to mention the fact that the men'in this shop were fined for teaching two name have the cutting business, and when the recommendation of the executive board was read off, an amendment was offered that the organization prefer charges against the subject of the configuration of the D. Rilipstein shop for permitting this violation to great the subject in the prefer charges against the prefer charges against the violation to great the subject in the present the subject is subject in the present the present the subject in the present the subject is subject to the present the subject in the present the subject is the present the subject in the subject in the subject is the subject in the subject in the subject in the subject is the subject in the subject
