Who Supplied the Funds for Meriwether's Campaign?

The Public Ownership Party Challenged to Prove Its Purity---Serious Charges Not Denied.

Stung by the revelations made by A. I. Lawrence as to the inner workings of the Public Ownership Party the managers of that organization attempted a weak defense last week in the form of a letter from Mr. Swearngin, Chairman of their Seventeenth Ward Club. The letter, which is apparently inspired by the powers that be of the P. O. P. appeared in the Public Ownership Leader and is as follows.

To the Editor of The Leader.

It is needless to go in gave, the delegates he secured to understand that Meriwether was to be nominee, and that he insisted on all fore or during the convention to cast, the vote of the Seventeenth Ward for Mr. Meriwether. Mr. Lawrence refers to the City Central Committee as "creatures of the Executive Committee," and says they are chosen for their weakness. Speaking for myself, I may be weaker than I would like to be, mentally but I am by no means a trailor, I never gave a Judas kiss in my life, had flees in the Mr. Swearngin makes a very feeble Mr. Swearngin makes a very feeble Mr. Swearngin makes a very feeble I never gave a Judas kiss in my life, nor am I a coward, who flees in the face of first defeat. I am in the Public face of first defeat. I am in the Public Ownership Party to give it zealous support till it wins throughout the city and State. It has been wisely said that a drowning man will clutch at a straw. Mr. Lawrence is clutching now at the Social Democratic Straw.

JOHN SWEARNGIN.

Chairman Saventeenth Ward

Chairman Seventeenth Ward,

The intimation that Missouri Socialist is subsidized by the Transit Company would make the gods laugh, and is the height of absurdity when it is observed that our memorial issue on the Washington avenue massacre appeared simultaneously with the issue of the Leader containing Mr. Swearn.

Mother Jones' Visit. of the Leader containing Mr. Swearn-gin's letter if it were only Mr. Swearn-gin's own thoughtless utterances we would not consider them worthy of serious attention, but as it appears that men high in the P. Q. P. had a hand in framing the letter we will make a proposition that may jar them a bit. Missouri Socialist is sup-ported by the hard-working, self-sac-rificing Socialists of St. Louis, by men who earn their bread by the sweat of their brow, and to whom it means much to part with the quarters, dimes and dollars they give to the cause they love. We are able to show where every cent comes from to pay the expense of publishing this paper, as well as for conducting the recent campaign. We are proud of the source of income of our movement, because every cent given is a token of the love that good and true men bear the principles they advocate. But whence came the enormus sums of money used in the Public Ownership Party's compaign? Who paid for the vast quantities of literature distributed, for the expense of holding so many hall meetings, ets.? Was it not to the interest of certain parties to keep Mr. dred dollars for a contest, raised the speakers an extensive campaign by voluntary contributions from its rank and file? If it did not, then WHO PAID THE BILLS? If everything is honest and straighforward in the Public Ownership Party its Executive Committee ought to be glad to furnish this information.

The books of Missouri Socialist are open for inspection, as are also the books of our Central Committee, we mittee to examine them and assertain where every cent came from and for what it was expended, and we defy Mr. by the party or this paper which we cannot show to have been paid for by Socialists. Will the Public Ownership Party and the Public Ownership Lead or make the same offer? Will they show an impartial committee where their money came from, and how it was expended? Will they show their looks? Will they show how all their expenses were met? Will they lend all enses were met? Will they lend all Social Democratic Party on public essary assistance to such a committo enable it to ascertain whether p. O. P. or its leaders have received the force framing this reply. the P. O. We make this challenge, but we hardly expect it to be accepted, as there have public expression of public utilities will already been disclosed about that party more "queer" things than are conducive to the ease of mind of its bosses, and they will probaly not care to risk another dose.

The Allied Third Party

Socialists Not in the Get-Together Arrangement at K. C.

The daily press is heralding the third party conference held in Kansas City this week as a combination of Public Ownership men, Populists, Free Public Ownership men, Populists, Free Silve: Republicans, Single Taxers, Socialiss and Bryan Democrats, but the Socialists of Missouri want it distinctly unferstood that they have no part or panel in the Kansas City conference. It is reported that one Socialist, T. E. Palmer of Jasper County, was present and took part in the deliberations. Nr. Palmer, so far as we can tions. Mr. Palmer, so far as we can learn, is not connected with any branch of the Social Democratic Party and certainly does not represent anyone but himself. The six thousand Socialists who voted the Social Democratic ticket last November have no inter-est in the Allied Third Party and will be found at the next election true to the uncompromising policy of the So-

cialist movement. The Allied Third Party is the result of the Public Ownership Party's efforts to extend its organization into the State. As Meriwether had no following outside of St. Louis, he had to call to his aid the Populists, Reformers, et

etera of the country districts.

But it is not probable that Mr. Metiwether will gain any considerable strength in the State, and as his supporters in this city are rapidly desertporters in this city are rapidly deserting him he will cut a very sorry figure in the next election. The Socialist Party will be the third party in the next election unless all signs fail, and it will not be so many many roms until it will be second, and then in quick succession the first and most powerful in the State.

The platform adopted by the Allied

The platform adopted by the Allied Third Party is not even as strong as the Populist platform. It stops at Public Ownership of Public Utilities, omits the imperative mandate and denounces police interference with elections while it does not say a word about their in-Third Party such a thing as org labor seems to be unknown. It is a misfit platform constructed for office-seekers, and not with any idea of benefiting the laboring class. The poor old Pops and Single Taxers, many of whom are sincere, though mistaken men, seem destined to a brief chase after another will-o'-the-wisp.

The platform of the new party is

That there is a motive in the con-tinuous publication of false and ma-dicious statements by the daily press ament Comrade George D. Herron must be apparent to even the most unsophisticated. That the motive is a dastardis one and worthy of its source is be-coming plainer every day. The people who are carrying on this unjust and wicked crusade are not of those who could invite an investigation into their own private affairs with impunity, and their posing before the world as the conservators of public merals is as hypocritical and inconsistent as are all the pretensions of the corrupt and service defenders and beneficiaries of

he present system. The most striking feature of the whole affair is the manifestation of the close alliance existing between the various newspapers and magazines, which apparently differ in interests, views and methods upon other occasions. We see the Journal yellowest of yellow journals, a Democratic, de-The manicipal ownership of public letest and nost conscious the out-utilities, if carried out to its logical or of capitalism in the metropolis, ne-conclusion, will land us into State So-cialism, which we do not want, while

progress for humanity. Then we have such weeklies as The Outlook.smug representative of all that is irreligious in the erganized church of to-day, con-tributing its quota of misrepresentation and defamation. Along with these can be thrown in all the remainder of the hypocritical, falsifying enemies of progress that poison public opinion from the Atlantic to the Pacific.

The reason for this unanimity of action on the part of papers that other-wise appear to conflict in their politi-cal and theological views is not far to seek. We have before stated that the reason for it can be found in the fact that Comrade Herron has not only an-tagonized the organized church in its Christless attitude towards social problems and their solution, but because he has struck bold and deep at the foundation of social injustice, at the source from which the organized church draws its sustenance—the capitalist system of wage slavery. And in addition to that he has proclaimed the one alternative for the capitalist sys-tem—a Social Pevolution that will culminate in the Co operative Common wealth.

Confirmation for this statement is ound in an article in The Outlook itself. Commenting in the usual scrain-upon Comrade Herron's marriage—a marriage morally and legally correct—

it closes by saying:

"The only penalty which an offender can be made to feel is empty audience rooms and unmarketable books, and we trust that the American public

will visit this penalty on Dr. Herron."
In those few words is laid bare the full animus of the attack upon Comrade Herron. It is not his supposed "sin" that frightens the slavish souls of his detractors, it is the message herrors. brings in the written and spoken word that causes fear and alarm among the enemies of the exploited working class. If Comrade Herron could be ostracised by the public, if those he wishes to eh and rouse to a proper realization of the monstrous conditions existing to-day could be induced to turn away from him with eyes and ears closed to righteousness and reason, then his traducers would rest well satisfied.

But these sages know neither the time nor the people. Comrade Herron will be heard, and the people will listen because the time for him, and such as he, to speak and be heard is now. as he, to speak and be heard is now.

The people can no more be prevented from hearing the truth of Socialism than can the persecution of Comrade Herron prevent him from speaking it. follow after as it is inevitable that So cialism will triumph against all the obstacles, great and small, that may be thrust in its pathway toward victory.

A Socialist's View of Religion and Churches.

BY TOM MANN.

The astounding anomaly of our time is the complete separation of religious principles from every-day industrial life. Spiritual pastors teach the young to regard God as the common Pather; and when the young become of age to reflect upon the shameful inequalities created and maintained by our social system, they are discouraged by their elders from trying to alter it, and are treated as agilators and destroyers of treated as agitators and destroyers of

ne peace. Honesty demands a frank statement that the so-called religious of our time

Why? Be ause the wealthy in their congregations are anti-Socialists. If any say this is not so, then it will not be difficult to give an effectual reply by quoting instances where the minister has seen the light and dared to proclaim the truth, and where the men who "have great possessions tively) have very soon taken their de-parture. I have heard of complaints from one or two such ministers that they not only lost the employer class by their holdness, but that they did not succeed in securing the adhesion of any counteracting proportion among the workers. There is less to be sur-prised at in this than some seem to think. The churches having gone astray worse than lost sheep, are not likely very easily to win back Democracy. Whether they will ever do it or not is an open question.

The ciergyman is undoubtedly at a serious discount as an adviser. "Serve

The ciergyman is undoubtedly at a serious discount as an adviser. "Serve him right," say I. Nor will he ever redeem his position except by honest effort on behalf of Democracy. Not that Democracy will suffer materially if this is not done. The greatest trouble is past. Democracy is learning how to provide for itself, and never was the Democracy so truly religious as now. Democracy so truly religious as now. And it is gradually getting more so. This religious evolution will increase as the bad environment is altered on one side, and the ethical gospel is lifted up and followed truthfully on the other.

I know that many preachers contend that industrial and economic matters are nothing to them; theirs is a religious work, and men must be left to themselves to find out how to apply religious truths. "If they were to take sides, it would mean the break-up of Democracy so truly religious as now

sides, it would mean the break-up of the church," and so on. To indorse a religion apart from principles that are to guide our every-day behavior is monstrous. If one's religion does no empel one to take sides in favor of a righteous basis of society, the sooner it ceases to encumber the earth the better for all concerned. A minister who can't find time to make up his mind as to the direction in which he should travel on industrial and economic matters, will probably not find time to be of any practical use to the world, no, yet to the denomination to which he may belong. I am fully aware of the fact that by

many who might have been disposed to consider the possibility of some mild action favorable to Democracy, now stand off. To such let me say: I have purposely avowed myself a Socialist here, so that those who read this may whose behalf I can speak. We do not want, and will not have a parson's patronage, or goody-goody advice. If there is to be a various partonage with the control of the cont there is to be a rapprochement it can only be by the parson getting off his high horse, stopping his goodyism and meeting men and women frankly as such. If he doesn't, he'll get left high and dry for a certainty.

I am not here demanding that every parson who is to be of use shall be an out-and-out Socialist right off. I am telling him that we workmen happen to be Socialists are adding largely to our numbers every month, that the whole trend of modern effort in our Trude Unions, Co-operative cieties, Town and County Coun and Parliament is distinctly Socialistic, and if parsons and ministers want to stop it, they had better refurbish their weapons. I can easily understand that some genuine men among the clergy will be disquieted by wondering whether the Socialists are coming pression that is suffocating, and ther round their way for a general sharing- are intolerant of it. They do not bark, out arrangement, and so they are slow to make a move. Such is the enlightenment that exists in these quarters. The King of Italy is following the sample of his brother of Germany, in The King of Italy is following the example of his brother of Germany, in saying sweet, soft things about the Socialists as being true friends of the State, for all their economic vagaries and anti-monarchial tendencies. The chief business of a king these days is to jolly along the discontented and disaffected among his people. In the language of Lord Salisbury, the greatest living cynic, "we are all Socialists now," but the soft speech of the King of Italy will not turn away the wrath of the friends of Bresci. "The king business." the friends of Bresci. "The king burness is played out." There's no fun being a king if one has to get down and crawl to the carbonari, or if one is apt to be hit in the face with a missile every time one rides out in state. The logical kings and emperors are like Sardanapalus. Heliogabalus, ula, Titerius, Nero, Louis XI.— who hold themselves superior to all law but their own wills and pa sions. There's nothing in "divine right" if one has to cringe to the people. The King of Italy in soft-soaping the So-ialists is making the ground upon hich he stands too slippery for kingip. PRIVATE SOCIALIST PAPERS.

The Critic of Rich Hill, Mo., reaches us this week with the announcement that it has changed hands and will hereafter be published as a Democratic pyper. This affords an opportunity to ask, a word about privately owned Socialist papers. Now the former editor of the Critic, Comrade Fred D. Warren, who is at present connected with ren, who is at present connected with the Appeal to Reason, is known to us as a sincere and energetic worker in the cause of Socialism, and we desire to cast no reflections on him, but the sale of the Critic leads us to the question whether the proprietor of a Socialist paper has the right to sell it to any one who, will not continue to publish it in the interests of the cause. To this question there of the cause. To this question there can only be one answer. Every Socialist paper in the country owes to a greater or less extent its success, its existence, to the loyal and self-sacrificing comrades who spend their evenings and Sunday's in canvassing among neighbors for subscriptions. A devoted solely to Socialist propa paper devoted solely to Socialist propa-ganda depends entirely upon the rank and file of the Socialists, and what-ever success it has is due to their ef-the proprietor of the forts. If they thought otherwise they would not make the sacrifices for it. rould not make the sacrifices for it. They proudly boast that 'their' paper is a Socialist paper and cannot be bought by the enemy. This may be only partially true of a paper like the Critic, that devotes only a portion of its space to socialism and the remainder to cidinary news matter, but even such papers receive considerable support from the hard-working Socialists in their locality and the question their locality and the question see. Figures Told Him So.

its politics

W. R. Merriam, director of the cen-sus for 1900, is beginning to see the light. He got the figures all laid out before him and he couldn't help but do some thinking. It would seem, he "that the owning and management by a very few people of the large resources of production, like iron and steel etc. must result in a steady and equal output." It is urged by So cialists themselves, he remarks, that when a surplus of goods is thrown on the market to the detriment of labor and wages, these immense combinations, by controlling the output, may preserve an equilibrium between de-mand and supply, eliminating the dreaded hard times that periodically derange industrial operations. Mr Merriam believes that the "decennia panie" may thus become a thing of panie" may thus become a thing of the past and that "the community of ownership of railroads coupled with the practical combination of enormous manufacturing and mining interests. will oring about conditions the result of which no man case foretell."

At this point Mr. Merriam makes his most striking suggestion in the follow-ing words: "Whether this vast unity of finance with the toilers of the country

finance with the toilers of the country will result in the final absorption by the State of the industries named is an interesting point to contemplate.

Why, of course, why should not a church convention adjourn when its main power—the almighty dollar—adto Wall street? And why should not the working class adjourn to the trades union halls and to the Socialist meetings, where their interest lies. A Congregational minister kindly A Congregational minister kindly loaned me three copies of his church papers (The Congregationalist and Christian World and The Outlook of June 15th, The Advance of June 15th) for the purpose of proving an unblased treatment of our beroic Comrade, Geo. D. Herron at the hands of his erst-white colleagues. The Advance gives a single paragraph and several garbled extracts of the letter, and among its comments occurs the following:

"It will do no burt it may do mu good, t to begin a more energetic sifting process of the professions which lead and untried philosophies and experi-ments. The churches should recognize this fact and be on their guard.

Sounds as if spoken by a capitalist who had exchanged his business suit for a preacher's garb. But this is as it should be. What further congenial ity can the Socialist find in institutions whose exponent denounce even a trade unionist as ammoral; his union sign as the sign of a beast, and resolve in soleme convention that the law of Christ forbids joining of any labor urion that has a promise to keep in-violate." Is there not more religion in the gutter than in the churches?

The Outlook evidently was unable to procure an accurate copy of even a complete sentence, so it spouted its venom over two and one-half columns closing with: "Henceforth Dr. Herror is self-exiled from the society of honorable men, and we hope his name may be omitted from the columns of honorable papers." Well has it been said there is no hatred that equals the ferocity of theologians. Slandered and execrated from the day of the filing of the divorce suit to the mehurching of the divorce suit to the unchurching of the victim of their venom, and the consequent severance of all former ties and relations between these self-elect-ed bloodhounds of morality and our beloved comrade, any one but these fanatics, would say "Enough; we've fanatics, would say: "Enough; we' done with him; he is outside our pale But not so with these "meek and low ly." That would not complete the job which the capitalist ordered done. Herron must be destroyed socially. Make him a social outcast, as you have cast him out of your churches, and capitalism will say: "Well done." The firstnamed paper is the only church organ with Herron's letter supposedly pub-lished correctly. As I discovered several important omissions by a mercursory reading. I began an accurate correction and was astounded at the rearrange matter so as to obscure points, especially the most vital ones. For example, they changed "seems to to be the very soul of blasphemy and immorality" to "seems to me to be a blasphemy of the ve immorality." it changed very soul and immorality." secret to plural, "secrets," making Herron con-fess to a life full of "secrets." Herron did say: "The life of a man given to did say: "The life of a man given to the Socialist revolution cannot fail to be more or less the life of an outcast, as the revolution intensifies and arrays a ruling class against a working class in a final issue and crisis."

What is a rew age, and how does it come" What are its distinguishing traits? These are only a few of the questions confronting us, questions so important that they go to the root not only of social conditions, but of all evolutionery processes. For sociology is only a higher biology, the former dealing with the science of social re-lations, and with those unseen mental and moral forces that make such rela-tions possible; the latter with the sci-ence of life, or of living organisms.

The laws operating on the lower ani-nal plane of nature, in which instinct is the only guiding power, are carried up onto the higher plane by human activities. Thus the competitive system under which we are living, with all its horrible brutalities and inhu manities, is only the "struggle for existence" that has forever obtained in the animal world. And just as this process of "natural selection," the survival of the strong, and destruction of the weak, was the chief force in the development and preservation of higher, stronger species, those best fitted to their environment, so out of com-petitive strife have resulted the rulers and captains of industry, who hold within their merciless grasp wealth and power of the world. within cially it is the survival of the stre

through the destruction of the wea But now comes another law into play. Man is not merely an intelligent curning animal; he is more. He is endowed with reason and with the religious elements of lore/imercy and compassion. These qualities have per-meated the social system and modi-fied the operations of a so-called nat-ural law. And now that competitive strife has worked itself out to its in evitable conclusion, the monopoly by a few of wealth, place, power, opportunity, and the means essential to life and happiness; now that millions are being pauperized to sustain this bloodsucking, modern vampireism, the mo-ral, progressive, conservative forces of civilization, are working to crush out and overthrow, root and branch, this remnant or survival of the brute, east in human life, and to put in its place a system of universal co-opera-tion. This is the great change that awaits the world, and when it is evolved, it will be just as marked, just as important, just as far-reaching in consequences as the evolution of the human type from the animal. The change will come from the reorganization of the industrial system on the basis of co-operation. The steps are everywhere in progress that will bring about the change. UNITY DISCUSSION

Comrade Job Harriman on Strobell's

Editor Missouri Socialist;
A circular letter entitled "Real So-cialist Unity Suited to American Conditions" and signed by Comrade G. H. Strobell, was brought to my notice today. In looking over the file of The Worker I find the same propositions accompanied by more elaborate comwith the same signature

It is most important that this proly considered, inasmuch as it may prepare the way for real division, instead of "real unity." However worthy the the intention of the author may have been I am persuaded that his "real unity plan if adopted, would develop a war between the existing factions that would end only with the death of the organizations themselves: Stripping the plan of all the good

wishes, employed both to introduce and to close it, we will not find it difficult to discern why discord would fol ow its adoption. The plan is as fol-That the respective Socialist or

ganizations elect a national committee to consist of one member from each State and Territory, except as hereinafter provided.

represented shall cease to exist as in dependent national organizations, and become merged into this organization. representing the Socialist movement in the United States. "7. Complete State anatomy is here-

unaranteed

It will be observed that Paragraph 1 provides "that the respective Socialist organizations shall elect a national committee. Is it not clear that this ommittee shall be composed of members from the different Socialist or-ganizations? This proposition merges the national committees, but it does not merge the State organizations; no does the author intend by his "rea unity" plan to merge the existing facons into one party.

This fact is made clear in Paragraph

 by the following language: Where in any given State there shall be two or more independent Socialist parties. they shall be entitled to one member each" etc. Here we have a plan for two or more independent Socialist po-litical parties in each State. Paragraph 6 provides for continuing

these separate State organizations, as follows: "The said Socialist parties so represented shall cease to exist as mational organizations and become merged into this organization." The reader will perceive that the Socialist parties shall cease to exist as national organizations but not a word is breathed about their ceasing to exist as State organizations, but provision is actually made for the continuation of "indepen-dent" State organizations.

This fact is brought out in Para-graphs 3 and 4 as follows: "Each State shall have one vote." This looks like "real unity," but Paragraph 4 dispels the illusion: "Where there is more than one representative from any giv en State, the one vote of that State shall be cast in a fractional part by each representative, based upon the number of members in the organiza-tion represented by him." Thus we have as many representatives from each State as there are Socialist fac-tions in that State, each with a different voting power. There is not word, however strong the intimation, in this "real unity" plan, providing for merging the State organizations. Paragraph 7 provides that "Complete State is hereby guaranteed." Permanent State division is the founda-tion for discord and not unity. It is "real unity" to have one National Exentive Committee in the nation. it is not "real unity" to have one State committee to each State! Union nationally and factions locally—this is "Real Socialist Unity" on the Amerian plan! There being no further doubt that the plan provides for the continuation of the several factions in the States, let us inquire into the logical and inevitable results of such a meth-

Political parties are creatures of the laws of each State. There is no such thing as a national political party in the eyes of the law. Official standing is gained in each State as a State party and never in the nation as a national party. Hence, if we maintain separate organizations in each State, we main-tain the struggle in each State. Each cases, put up its own candidates, for this would be the prime reason for existence. Imagine the real Socialist unity" that would arise "real Socialist unity that would arise immediately or eventually, by reason of two Socialist candidates for Governor in each State. They could not combine on this office, because official standing goes with the vote cast for the head of the ticket.

the head of the ticket.

Instead of working harmoniously, each would fight the other. Final supermacy in most cases would be determined by prior official standing. The first to gain official standing would first to gain official standing would first to gain official standing would have every advantage both in argument and in general work One faction would gain official standing in some States, while the other faction would dominate

in other States.

The weaker faction in each State would be urged to maintain its separate existence and thus lend its moral and financial support to the corresponding faction in such States, when the fight was bitter and where they

had gained official standing had gained ometal stations of the versa, the organization which had gain-ed official standing, if the State fight was easy to handle, would encourage the weaker organizations in such States when the fight was close. Thus a per-manent split would develop and the temper would was hotter and the feelings more bitter, and the chasm be, tween the two organizations would grow wider as the years passed by and

their respective power increased.
Having maintained a split in State organizations, how long would it take to develop a split of this proposed national committee? Would cach State not withdraw its delegates from this merged committee and send them to a national committee of its own making. Especially when bitter feelings were

Are not al national committees n ly the outgrowths of State organizations? By maintaining the present State organizations, do we not lay the foundation of a later building of a national organization or committee of the same kind? Witness the split in the French movement, arising out of the same plan. What is a united committee worth when the party is divided? Would not the same interests man-ifest themselves in the national committee that develop in the separate State organization? Would not the committee voice the fight as it develops in the several States? Such a committee would be only an arena for reun-Socialist pugilism instead of "real Socialist unity."

Are we to rob our propaganda fund of thousand of dollars and expend it on a convention, in order to maintain, factions in the different States? Shall the delegates take the hard-carned money of the members and pay their expenses to a unity convention, and return with a plan for division? Could we not remain at home and maintain

The author of this plan for Real Saxialist Unity Suited to American Conditions' says, in The Worker of March 21, 1901 (then The Peoplet, com-

menting on his plan:
If the plan does not at once do away with the divisions in some States we may congratulate ourselves that un-der it two sets of national candidates are impossible, and then the tendency to unification and economy is there to work out our redemption in the years

Is it possible that the author thinks we are holding the Indianapolis con-vention of July 29 in order to effect union "in years to come." That is not the feeling, the wish, the hope, nor the purpose of the membership. They do not want a plan that promises union "in years to come." They want a constitution uniting them now and for years to come. Union now and ver of all Socialists, against the capitalist class and for the working class is the battle cry resounding from the voice of the multitude, and pity be unto those whose ears are deaf to the calling.

| high it may shoot up with the palace shoots up also in the same or in greater proportion, the occupant of the comparatively small house will al-ways find himself more uncomfortable, more discontented, more confined with-

A notable advance in the amount paid as wages brings about a rapid in-crease of productive capital. The rapid increase of productive capital calls forth just as rapid an increase in wealth, luxury, social wants, and so-cial comforts. Therefore, although the comforts of the laborer have risen, the social satisfaction which they give has fallon in contrast. fallen in comparison with these aug-mented comforts, of the capitalist which are unattainable for the laborer. and in comparison with the general development of comforts. Our and their satisfaction have their ori-gin in society; we therefore measure them in their relation to society, and not in relation to the objects which satisfy them. Since their nature is social it is therefore relative.

As a rule, then, wages are not deter-nined merely by the amount of commodities for which they may be exchanged. They depend upon various

What the laborer immediately recuives for his labor is a certain sum Are wages determined merely by this money price?

In the Sixteenth Century the gold and silver in circulation in Europe was augmented in consequence of the discovery of America. The value of gold and silver fell, therefore, in pro-portion to other commodities. The laborers received for their labor the same amount of silver coin as before The money price of their labor remained the same, and yet their wages had fallen, for in exchange for the same sum of silver they obtained a smaller quantity of other commodities This was one of the circumstances which furthered the increase of capita and the rise of the bourgeoisie in the Sixteenth Century. Let us take another case. In the win

ter of 1847, in consequence of a failure of the crops, there was an important increase in the price of the indispensa ble means of subsistence—corn, meat, butter, cheese, and so on. We will sup-pose that the laborers still received the same sum of money for their labor as before. Had not their wages fallen then? Of course, they had. For the same amount of money they received in exchange less bread, meat, etc.; and their wages had fallen, not because the value of silver had diminished, but beause the value of the meanse of sub-

Let us finally suppose that the money price of labor remains the same, while in consequence of the employment of new machinery,or on account of a good season, or for some similar reason, there is a fall in the price of all agricultural and manufactured goods. For the same amount of money the laborers can now buy more comodities of , all kinds. Their wages have therefore en, just because their money price has not changed.

The money price of labor, the nominal amount of wages, does not there-fore fall together with the real wages that is, with the amount of commodi-ties, that may practically be obtained n exchange for the wages. Therefore, if we speak of the rise and fall of wages the money price of labor or the nominal wage is not the only thing which we must keep in view.

But neither the nominal wages, that is the amount of money. for which the laborer sells himself to the employer, nor yet the real wages, that is, the amount of commodities which he can buy for this money, exhaust the relations which are comprehended in the term wages.

For the meaning of the word is the indispensable condition of the gain or profit of the employer—it is

The real wage expresses the price of labor in relation to the price or other commodities; the relative wage, on the contrary, expresses the price of direct labor in relation to that of stored-up labor, the relative value of wage-labor and capital, the proportionate value of capitalist and laborer.

Real wages may remain the same, or they may rise, and yet the relative wages may none the less have fallen. Let us assume, for example, that the of all the means of has fallen two-thirds, while a day's wages have only fallen one-third, as for instance, from three shillings to amount of commodities at his disposal for two shillings than he had before for three, yet his wages are neverthe for three, yet his wages are nevertheless diminished in proportion to the capitalist's gain. The capitalist's profits—the manufacturer's, for instance—has been augmented by a shilling, since for the smaller sum of exchange value which he pays to the laborer, the laborer has to produce a larger sum of exchange value than he did before. The value of capital is raised in proportion to the value of labor. The division of social wealth between capital and la

social wealth between capital and la-bor has become more disproportion-ate. The capitalist commands a larger amount of labor with the same amount of capital. The power of the capitalist class over the laboring class is in-creased. The social position of the la-borer has deteriorated, and is de-pressed another degree below that of

the capitalist.
What, then, is the general law which determines the rise and fall of wages

determines the rise and fall of wages and profit in their reciprocal relation. They stand in inverse proportion to one another. Capital's exchange value, profit rises in the same proportion in which exchange value of labor, wages, sinks, and conversely. The rise in profit is exactly measured by the

fall in wages, and the fall in profit by

the rise in wages.

The objection may perhaps be made that the capitalist may have gained a profit by advantageous exchange of his products with other capitalists, or by products with other capitalists, or by a rise in the demand for his goods, whether in consequence of the opening of new markets, or a greater demand in the old market; that the profit of the capitalist may thus increase by means of overreaching another capi-talist, independently of the rise and fall of wages and the exchange wine of fall of wages and the exchange value of labor; or that the profit of the capi-talist may also rise through an improvement in the implements of la-bor, a new application of natural forces

met marriess be admitted that the result remains the same. although it is brought about in a dif-ferent way. The capitalist has acquired a larger amount of exchange value with the same amount of labor with out having had to pay a higher price for the labor on that account. That is to say, a lower price has been paid for the labor in proportion to the net it which it yields to the capitalist

Besides, we must remember that in spite of the fluctuations in the price of commodities, the average price of each commodity—the proportion in which it exchanges for other commodities—is determined by its cost of production. The overreaching and tricks that go on within the capitalist class therefore necessarily cancel one another. Improvements in machinery and new ap-plications of natural forces to the service of production enable them to turn out in a given time with the same amount of la-bor and 'capital a larger quantity of products, but by no means a large quantity of exchange value. If by th application of the spinning-jenny I can turn out twice duction has been halved; or becau cost I can turn out double the

Finally, in whatsoever proportion the capitalist classes—the bourgeoisie— whether of one country or of the market of the whole world-share among themselves the net profits of producprofits always consists merely of the amount by which, taking all in all, direct labor has been increased by means of stored-up labor. The sum total in creases therefore, in the proportion in which labor augments capital; that is, in the proportion in which profit rises as compared to wages.

Thus we see that even if we confine

ourselves to the relation between cap-ital and wage labor, the interests of capital are in direct antagonism to the interests of wage-labor,
A rapid increase of capital is equal-

to a rapid increase of profits. Profits can only make a rapid increase, if the exchange value of labor—the relative wage-makes an equally rapid decline The relative wage may decline, al-hough the actual wage rises along with the nominal wage, or money price of labor; if only it does not rise in the same proportion as profit. For instance. if when trade is good, wages rise 5 per cent, and profits, on the other hand, 30 per cent, then the proportioal or relative wage has not increased, but de-

Thus the receipts of the laborer increase with the rapid advance of cap-ital, yet at the same time there is a widening of the social gulf which separates the laborer from the capitalist, and also an increase in the power of capital over labor and the dependence

of labor upon capital.

The meaning of the statement that the laborer has an interest in the rapid se of capital is merely this: The the laborer increases his master's dominion, the richer will be the crumbs that he will get from his table; and the greater the number of laborers that can be employed and called into existence, the greater will be the num-ber of slaves of which capital will be

centuries before the formulation of the doctrines of scientific so-cialism, its ideals had been pictured by Utopians. The first and greatest of these was Plato, and his "Republic" has been the source from which all ent writers have drawn for has up to the present time been the exclusive property of the leisure class, having been printed only in the original Greek or in English editions that rere too expensive for workingmen to my. We are therefore glad to announce that Chas. H. Kerr & Co. have issued Book I of the "Republic of Plato" in an entirely new English version, by Alexander Kerr, professor of Greek in

the University of Wisconsin.

The first book does not develop Pia to's thought of an ideal commonwealth, but clears the ground by a discussion of ethics, and it is interesting to note that one of the characters in this dialogue nearly 2,300 years old suggests the Socialist theory that "good" conduct is conduct that haronizes with the interests of the rul sixty-four pages, printed on extra book paper, and the price is 15 cents, post-

A Precedent.

Because the jury at Omaha declared James Calladan "not guitty" of kid-naping the son of Edward Cudahy, the millionaire pork packer, the New Orieans Picayune, in substance, suggests proletariat be not allowed to serve on juries which are to pass upon robberies and exactions of ransoms

That is to say, when a capitalist, by brute economic force, has wrested from the producers millions of dollars worth of their labor product, and some one, by physical force, or otherwise wrests from the capitalist a few hun-dreds or thousands of dollars of his stolen millions, none but capital are to sit upon the jury that is to try

All Aboard.

The time is drawing near for two important events. The first is the Fourth of July pienic at Rinkel's Grove, given by the party; the other is the excur-sion to Montesano on Sunday, July 14, for the benefit of Missouri Socialist and the Arbeiter-Zeitung. These two undertakings deserve your careful attention from now on. They can both be pushed at one time successfully. The picnic on the Fourth is free. The tickets to the excursion are twenty-five cents. Be thinking about taking all your relatives and friends to the picnic, and buy your tickets for the excursion now. You can sell a man a ticket to the excursion, and at the same time present him with a complimentary ticket to the picnic. Try this scheme, One-half of all the money for tickets will be giv-en to the two Socialist papers as clear profit. This is our arrangement with the boat company. As all tickets returned by the 14th will have to paid for, comrades taking tickets to sell must either return them to this office by the 13th or pay for them. Call at headquarters and get a supply of tickets for both events.

A Model Branch.

The Seventeenth Ward branch is is now the banner branch of the city. Organized only a few weeks, it now has thirty-two members and five applica-tions are already secured for next meeting. Six members were admitted meeting. Six members were admitted last week. These figures speak for themselves. The success of this branch can be duplicated in every ward in town if the members will take hold with courage. The results obtained in the Seventeenth Ward were not obtained by any secret process. The com-rades went to see parties who they heard were inclined to Socialism and asked them to join the party. That was all that was necessary. The people are ready and willing to join the So cialist movement. They are waiting for an invitation and it is the duty of our members to see that they get it. It re-quires no legerdemain, nor long-wind-ed scheme to build up a ward branch. Social Democratic Party of America.

The Social Democratic Party of the Cal-ed States, in convention assembled, reaf-

ciery into two artigionists classes the cert into two artigionists classes. The contests are consistent classes the production and distribution thank mines, inachinery, and means of transportation and communication, and the large and ever increasing class of wage-workers, possessing no means of production. This economic supremery has secured to the densimant class the full control of the government, the pulpit, the schools and the public press; it has thus made the capitalist class the arbiter of the fate of the workers, whom it is reducing to a condition of dependence, economically exploited and oppressed intellectually at physically crippled and degraded, and their political equality rendered a bitter moglery.

The contest between these two classes grows ever sharper. Hand in hand with the growth of monopolies goes the annihilation of small industries and of the middle class depending upon them; ever larger grows the multitude of Jestitute wage-workers and of the unemployed, and ever fiercer the struggle between the class of the exploiter and the exploited, the capitalists and the wage workers.

The evil effects of capitalist production are intensified by the recurring industrial crises which reader the existence of the greater part of the population still more precarious and uncertain.

These facts amply prove that the modern means of production have outgrown the existing secial order hased on production for profit:
