Capitalism Destroys Lincoln's Ideal As Nations Toilers Continue to Struggle

AST week brought the annual return of ceremonies venerating the memory of Abraham Lincoln. What was Lincoln's philosophy? It is recorded in his message of December 3, 1861. He believed in the frontier equality of the producing farmer, mechanic and laborer. They were the "mixed those who "neither work for others nor have others work-ing for them." He would have had them form the permanent basis of society.

Why? Because they "work for themselves on their farms, in their houses, and in their shops, taking the whole product to themselves, and asking no favors of capital on the one hand nor of hired laborers or slaves on the other." believed that the "free hired lawas not a permanent fixture in society as he could rise to a place in this "mixed class."

He warned the masses against the social philosophy of the

planter South which would de-stroy this "mixed class" ideal of self-producers "till all of liberty is lost." Slave-owning was destroyed in 1865. Sixty-eight years have passed into history. What has happened to this class of self-producers? Planter capital was destroyed. Industrial and finance capital has

taken the place of slave-owning capital. For a time Lincoln's "mixed 'lived under the illusion that it was free and independent. Then came the locust years of the eighties and nineties. It fought the rising

capitalist and banking class of the East. It was defeated.

The discovery of gold in Alaska and South Africa, rising prices of farm products, increasing value of farm lands, and better marketing facilities brought some measure of contentment. The World War and high prices for farm products seemed to give Lincoln's "mixed

class" reasonable security.

The war ended. In the decade that followed into the Fall of 1929 there was a continuous decline in the living and income of the farmer section of the "mixed class." The crash that followed in October of that year brought a rapid and continuous descent of the producing farmer into an abyss of despair. His savings, his farm, his animals and his tools more and more passed out of his hands. The usurer and tax collector swarmed like vultures over the countryside.

In the meantime, Lincoln's "free hired laborer" was being hurled out of the places of employment. First by new machines and scientific management, then by the industrial crisis and the closing of industries. The "free" wage worker could not merge into the "mixed class" because that class itself was robbed and facing destitution. Some twelve millions of "free" workers with their families are now outcasts in the civilization they helped to build.

So every section of Lincoln's "mixed class" is either reduced to stark want or remnants of it cling to slender and uncertain jobs and incomes. Every group of this class is sinking to lower levels of life. The former self-producing farmer is becoming a pariah. The former "free" worker is becoming a beggar dependent upon the hateful charity of the super-rich.

This is the end of Lincoln's philosophy of a producing "mixed class working for themselves, "taking the whole product to themselves, and living in fancied security. The values they produce do not go to

them but are taken by others.

The great valley that Lincoln knew is strewn with human wreckage. Instead of an enduring and independent "mixed class" ruling the republic a handful of great masters of capital and finance rule. Into their possession have come the great industries, the richest natural resources, the railroads and banks and the utilities empire. Supporting their mastery over us are the tens of millions of ballots by which farmers and "free" workers gave the government to these masters!

And what are the members of Lincoln's "mixed class" thinking now? Patient for years in measureless suffering, they are expressing their anger in letters to their 'representatives" at Washington. The New York Times presents a cross section of these letters. Here are a few.

program adapted to new conditions, must replace it.

First, the "Fight for Work and Relief" which we outlined on this page last week. Organize the millions for determined demands upon the legislative bodies in all the states. There is no reason why a single human being should be in need of food, clothing and shelter. There is plenty to provide for all. A few have most of it. The tens of millions in need must have enough to live.

But this is not all. The starvelings must learn to demand the surrender of the natural resources, the banks and the industries to the people, to be their collective possession and to operate them for the

welfare of all.

The class that owns is the most miserable failure in all history. A Socialist Commonwealth must take over their mismanaged power and privileges and end this frightful tragedy.

Zingara's Crazy Act

THE shots fired Wednesday at President-elect Roosevelt by an unbalanced man is one of those tragic occurrences that in periods of acute and wide-apread distress have occasionally led to repression and reaction. Fortunately, as we go to press, there is no indication of such an aftermath. Regardless of fundamental differences in social philosophy we press the views of our readers in saying that b hope that Mayor Cermak will speedily recover, d we rejoice that this attack by an irrational man

An Insult to the Jobless

ONE of the abominations, probably the chief one, in unemployment relief is that the traditions of the almshouse and the poorfarm, having their origin in the agricultural England of several centuries ago, survive in an age of mass production by power-driven machines. More or less suited to the ago of the ox-cart and the powdered wig, it is not adapted to modern capitalism. The ideas associated with it were planted in New England and the southern colonies in the colonial period and however much they may have been modified their spirit still dominates the programs of unemployment relief.

dominates the programs of unemployment relief. In the former age it was pauperism, vagrancy, dependency, orphanage and insanity that concerned the public authorities; in our age it is a problem concerning millions of normal human beings who have been locked out of their places of employment. They are not paupers requiring the constant ministration of charity but human beings who are completely deprived of a stake in the civilization which they helped to build. However, they are treated as paupers. It is a general practice not to extend relief until the depression has pauperized the applicant.

THE UNEMPLOYED IS A CLASS DISTINCT
FROM THE UNFORTUNATE HUMAN MISFITS
THAT SOCIETY HAS IN EVERY AGE CAST UP
AND AS WORKLESS HUMAN BEINGS DESIRING WORK THEY REQUIRE A DIFFERENT RRING WORK THEY REQUIRE A DIFFERENT PROGRAM AND A DIFFERENT TREATMENT.

Despite this fundamental fact the old concepts of we hundred years ago survive in this age of a somplex capitalism. Charity and poor relief and naufferable "smelling" committees continue. The competent worker is treated much in the same way the feeble minded, the aged and the physically

the feeble-minded, the aged and the physically ndicapped. The public and private collection to is passed around for alms. The result in the in that the masses themselves bear two-thirds he burden of providing for their own human skage. The sums spent for relief are only a fraction of the total wage loss due to unem-

ment each year.

The unemployed have invested their labor and skill in building and maintaining industry and to regard the jobless as having no stake in it, to cast adrift, to treat them as paupers, is a crying in a drift, to treat them as paupers, is a crying in a drift. They are not casuals and misfits. They are doubt of industry and if industry cannot on them industry should bear the heaviest cost aintaining them. Their maintenance should not of maintaining them. Their maintenance should not be a matter of "smeling" committee reports or of the whim of "hard-boiled" administrators of relief. They should automatically receive a portion of their former wages as their right out of an insurance

ormer wages an undereated by law.

Away with this policy of treating jobless weak-mind

the chew were epileptics or weak-mind ugh they were epileptics or weak-minded! It anding insult to the tens of millions who are through no fault of their own.

The World We Live In

A Socialist View of the Week

A Quack Doctor Treats Pimples

HERBERT HOOVER sang his swan song at the National Republican on Monday night. Not once in the Club on Monday night. Not once in the address did he pay tribute to "rugged individualism" and we believe it is the first time that he ignored it since 1928. Whether he has packed it with moth balls and stored it in the garret we do not know but we shall not be surprised if he drags it out again on son

The speech was superficial. Underlying it was the assumption that curren-cies, debts, reparations, exchange, tariffs and trade preferences and discriminations are responsible for the depression He can see only pimples, not a funda-mental organic disease. There can be no doubt that the capitalist statesmen of the world in their policies relating to the items Hoover mentions have made a bad situation worse but the idea that more intelligent policies in this field will

more intelligent policies in this field will necessarily bring recovery is nonsense. The whole capitalist system of production and exchange broke down and this basic collapse of production has its effects in demoralized exchange, tariff wars, etc. The system received a terrific shock in the World War, but it was a decade before it afflicted American capitalism. It is suffering from a ican capitalism. It is suffering from a basic disorder that produces pimples and Hoover, like a quack doctor, treats the effects, not causes.

Fears of Arbitrary Presidential Power

INFLUENTIAL and reactionary Demo cratic leaders at Washington favor vesting Roosevelt with arbitrary power when he becomes President. This is more likely to be the trend in this counmore likely to be the trend in this country than Fascism. The Constitution really is the fundamental law of an "elective monarchy" and is admirably adapted to the purpose of vesting the President with vast powers. The same is largely true of the state governments. The capitalist and banking oligarchy is also so supreme in this country that it isn't likely to make way for some Hitler demagogue leading uninformed masses who really do not know what they want but who would likely put capitalism into a straight-jacket instead of abolishing it. Edward F. McGrady of the A. F. of L.

last week openly challenged this pro-posed grant of unusual powers which he correctly called a "modified dictator-ship. McGrady is one of the most courageous and outspoken labor chiefs in this country. He declared that the banking clique and vested interests now actu-ally determine what the masses shall eat and wear and that their aim is the "mailed fist" according to the formula of the Italian Fascists and German

Because of this danger there is talk of an emergency meeting of the heads of trade unions to plan protest demon-strations. President Green is quoted as saying that the masses will not submit to it and that its realization would be "destructive to the labor movement and to even the present debased wage stand-ards."

The Earthquake Reaches Michigan

OPENING his campaign in Des Moines, Iowa, last June Herbert Hoover told the nation that an earth-quake had run through forty nations. World collapse was so imminent that he and his colleagues had kept the news.of the real situation from the masses. Fortunately, the forces of economic decay had been checked and he could then tell

e complete story.

This week the earthquake hit Michl-This week the earthquake hit Michigan when a proclamation by Governor Comstock closed 550 banks in an eight-day moratorium, tied up a billion and one-half doffars, and brought Federal, State and private action to the rescue. The Detroit Stock Market closed and in New York bonds declined 1 to 6 points and stocks from 1 to 434. Nevada felt the shock on October 31 when the twelve JUNGLE

banks of the Wingfield chain closed and

they are still closed.

It was the threatened crash of a \$600,000,000 chain bank, the Union Guardian Trust Co., that brought the action of the governor. It is reported that this firm had received a loan of \$15,000,000 from the Reconstruction Finance Corporation and yet this trans-fusion of financial blood did not save it. Doctor Hoover has agreed to such transfusions for many fat corporate "persons" and yet many of them do not respond to the treatment. That American capitalism is more and more rotting every day is obvious to every intelligent human being and its decline brings near er a revolutionary situation the of which no one can foretell.

In the New York Crisis Sector

New York City, most of them children, lack sufficient clothing and their suffering was acute during the cold wave. An item appearing by the side of the one announcing this clothing shortage for children gives the formula showing how a family of five can be fed on \$7.50 per week. We cannot trust ourselves to comment on these two items.

The Merchants Association repeats its

The Merchants Association repeats its demand for a 20 per cent cut in the state's school appropriation and at A!bany the New York commission to revise tax laws favors taxing all incomes of \$10 a week or more. That is not all. It recommends a retail sales tax of 1 bany the New per cent, a tax on tobacco products of 10 per cent, a 20 per cent tax on retail sale of soft drinks and patent medicines. It would also lower income tax exemp-

tions to the new Federal level.
All this means loading the working and non-working masses with the costs of the miserable mismanagement of capitalist civilization. Last week a com-mittee of the Socialist Party urged Governor Lehman to increase the tax of one of the fattest cows in the state of one of the fattest cows in the state—
the public utilities corporations—from
one-half of 1 per cent of their gross
earnings to 4 per cent. Will he act on
it? We doubt it. The utility magnates are of his class and a gentleman gover-nor will think twice before offending other gentlemen living in the upper range of society.

Commander Gaston Appears at Capital

THE pompous Edward Page Gaston, commander of the New Vigilantes, turned up in Washington the other day. Our readers will remember that we devoted the first page of our issue of January 14 to this mysterious gentleman. It appears that he is on the ground to save the nation from a wet inauguration week and is also planning an airplane tour of the country. He proposes to tap the immense reservoirs of "patriotism among our foreign-born population." Whether mountebank or professional patrioteer, this gentleman may well be exceeded. watched.

Lawrence Todd, Federated Press correspondent in Washington, calls attention to another Gaston who is now sojourning in the hoosegow, Gaston B. Means, for defrauding a woman on the pretense that he would help her find the lost Lindbergh baby. Todd writes that this Gaston was on his way to a conference with Ralph Easley of the National Civic Federation when he was agreeted. Federation when he was arrested. Civic Was this to be a consultation over another bold drive against "Reds"? We do not know. We do know that Easley's spe-cialty is to feed drugs to trade unions and to save the republic from revolution.

Rising Tempo of
The Farm Revolt
THIS is a black week in the nearly
four years of depression. In the
twenty scenes of Elmer Rice's production of "We, The People," at the Empire Theatre, one gets an idea of what
is happening to the lives, homes and
families of the masses. Like an acid
sprayed upon a solid, the depression remorselessly eats away the tissues of
social, economic and family life. They
crumble before the eyes of the audience crumble before the eyes of the audience and men, women and children are buried in the debris.

The farm revolt is only one phase of this rotting away of what only a few years ago was regarded as one of the most perfect economic structures in the A farm tax strike is threatened world. A farm tax strike is threatened in Indiana. Illinois farmers now gather at sales and by group pressure halt fore-closures. Idaho is considering a two year moratorium. In Missouri a farmer turns his 240 acres over to the county and goes to the poorhouse because he can live better there than on his acres. Wisconsin has enacted a bill giving courts the power to extend the redemp-tion time on farm and homestead mortgages two years. In Nebraska farmers

one section threaten social ostracism r those who benefit by foreclosures. Throughout the stricken Middle West the farm revolt a name. Some call it revolution and creditors call it anarchy. Whatever the name and whether the rebels are aware of it or not, it is a blind striking at the fundamentals the capitalist system and to give it telligence and direction a Socialist objective is necessary.

The Struggle for

Power in Germany

ONE effect of Hitler's rise in Germany is to raise the hopes of the treaty revisionist bloc of states headed by Italy. On the other hand France heads the Little Entente group that opposes re-vision. The French were aroused a few weeks ago when it was learned that 80,000 rifles and 200 machine guns had been sent from Italy through Austria to Hungary. With Austria secretly play-ing Italy's game while outwardly en-deavoring to placate France, Hitler's fate in Germany is considered import-

ant in its effect upon the rest of Eur The heavy hand of reaction first upon the Berlin Socialist daily V of the waerts and now it is the turn of the Communist daily Rote Fahne which, late last week, was suspended for two weeks. A Reichsbanner weckly also received the same treatment. Hugenberg, National-ist leader, has said that he believed there would be "only one more election"

in Germany.

Last week the Reichstag's committee r the defense of parliamentary rights adjourned because of Fascist violence and this week Fascists broke it up. Two Socialist members were assaulted, Paul Loebe, Socialist president, was ousted from the chair, the Centrist members were dispersed, the Fascists saying they would not proceed under the direction of a "Marxist defamer."

Fusion Debated at New Leader Dinner

Hillquit and Thomas Define Party's Position, as LaGuardia and Schieffelin Urge Anti-Tammany Fusion—Successful Dinner Sends New Leader Off on Its Tenth Year.

CLOSE to six hundred men and women, friends and supporters of The New Leader, Socialists and others interested in public affairs, gathered at a delightful and highly successful New Leader dinner at Webster Hall last week, rededicated themselves to their cause, celebrated nine years of this paper's existence, contributed generously to The New Leader's funds, and listened to an enlightening discussion on the subject, "Is Fusion the Way Out?"

Congressman Fiorello H. La-Guardia and Dr. William Jay Schieffelin argued for a fusion of all anti-Tammany forces — although each in a different vein; while Norman Thomas and Morris all anti-Tammany forces — although each in a different vein; while Norman Thomas and Morris Hillquit made telling speeches declaring that in these tragic days a mere defeat of Tammany Hall is a matter of such minor moment that it is secreely worth while that it is scarcely worth while bothering about; certainly not a cause for which the Socialist Party should surrender its independence.

It was a high-grade discussion.

Both non-Sccialists are men of
standing, integrity and intelligence, and they were listened to
with respect. But Thomas and
Hillquit were greeted with tremendous enthusiasm when, each in his own way, laid down the principles upon which the Socialist Party conducts itself.

Algernon Lee, who gracefully presided as toastmaster, first in-troduced James Oneal, editor of The New Leader, who spoke brief-ly, recalling that in the nine years of The New Leader about five years were the dismal period of prosperity illusions, and the re-maining period one of awakening masses to Socialism . He was un-able to mention all who had given generous aid in helping get out the paper but believed he was justi-fied in mentioning one, inconspicu-ous and unknown to many com-rades, but for several years Henry Halpern had given many hours of devoted labor as auditor.

Dr. Schieffelin Says-

Dr. Schieffelin, head of the Citi-ens' Union and chief promoter of projected City Party, took a strictly political anti-Tammany po-sition. He instanced Cincinnati as a perfect example of a noncity government. and

Tracy. This action defeated Low, although Tracy ran a bad third. This brought so much odium against the Republican machine, which was charged with ing an ally of Tammany Hall, that two years later the Republicans tried to redeeem themselves and took part in the fusion which nom-inated Low and triumphantly elected him. and triumphantly

"The Socialists during the past years have seen planks in their platform adopted by the other parties and have gained respect na-tionally for their arguments and ideas, but when they refuse to cooperate in a non-partisan cam-paign to turn out Tammany they are putting themselves in the un-enviable position taken by the Re-publicans in the first Low campaign.

"They are not asked to sacrifice their membership in the Socialist Party, for men and women of all parties are joining the City Party on the ground that city affairs are best conducted when national ques-tions are kept entirely separated from them.

"The Socialists say, 'We are in entire agreement with you on the question of Proportional Representation;' and we reply, 'That's fine—join with us now in the quickest way to get Proportional voting.'

"The Agreement that the Socialists

"The argument that the Socialists must remain Socialists, and nominate separate Socialists, appears naive and academic when the election of the Socialists does not oc-

Whereas, if it joins with others and supplies the needed number of votes to bring a victory, it will receive the acclaim of the friends of good government. of the friends of good government and have a better hearing for its program."

Thomas Presents Socialist View

Norman Thomas, greeted with enthusiasm, laid down the Social-ist position in clean, incisive terms. "Socialists," he said, "want above all things a changed society, a class-less society, a cooperative commonwealth. We see in Social-ism the only hope of a sore dis-tressed world which nears the end of the capitalist epoch. Our immediate concern is with a changed system, not a changed city. We cannot afford to weaken our or-ganization, divert our energies or becloud our purpose by disproportionate attention to city reforms even though we admit that some of them in themselves may be de-sirable.

"Of course we want a different city here in New York. Long ago we worked out in detail a program for New York City applying, so far as our laws and circumstances permit, Socialist principles to the government of the city. We are aware, however, that the heightening crisis has diminshed, not in-creased, what we can reasonably expect any city government to do

must be in a position to integrate our city program with our state and national program. This would be next door to impossible under any kind of fusion that I can im-agine. All we can do is to unite in demanding from the Legislature proportional representation of an effective sort.

"I am concerned in warning So-cialists that we do not want lightly to undertake the task of being re-ceivers in bankrupty for American cities without the essential power to do what must be done. Our to do what must be done. Our main energies must be concentrated on policies that must be determined nationally. It is absurd, of course, to say that in this drive on broad policies municipal affairs are unimportant. And it is even more absurd to say that there is a philosophical difference between what censtitutes good government. what constitutes good government in the city and in the nation. "The advocates of fusion in New

"The advocates of fusion in New York have not presented us with any platform; they have not presented us with any leader. A great many of those who talk about fusion would vote for Al Smith on any ticket. And Al Smith is far more likely to run on a Democratic ticket than on any fusion ticket. A great many fusionists have so little conception of the realities of little conception of the realities of city government, the record of the city government, the record of the last seven years, or what we ought to hope, that they went off into extravagant praise for Joseph McKee. This in spite of Mr. McKee's record during seven years of office when he went down the line with Tammany, including the Equitable Bus deal, despite his failure to use his power as Acting Equitable Rus deal, despite his failure to use his power as Acting Mayor to remove incompetent officials, despite his refusal to approve a program which would have done a little to give employment and to relieve the housing situation by applying R. F. C. loans to housing projects.

tion by applying R. F. C. loans to housing projects.

Tiger and Jackal

"The backbone of the fusion movement is likely to be the Republican Party. Whatever may be true about individual Republicans, the Party as a whole is worse than Tammany in the sense in which a jackal is worse than a lion or a tiger.

"Every realist knows that the uprising, such as it was, at the polls last November came first polls last November came first from disapproval, especially the disapproval of powerful forces in the Roman Catholic Church, of Mayor Walker's private life. Second it came from an overwhelming desire to reduce taxes. Tammany has met the desire of the church for respectability. It is meeting the desire of the real estate and banking interests for economy, no matter at what cost to social services. The type of good governices. The type of good government advocates, who by good government mean cheap government, is going to be hard put to it to offer to the bankers and the real

estate interests more than Mayor

estate interests more than Mayor O'Brien is offering. And there is always a reasonable fear that fusion cannot deliver the goods as well as Tammany.

"What, then, is left for fusionists to offer Socialists?—A vague dislike of Tammany, a desire for verigeance for the past. Even if a fusion movement might win more vengeance for the past. Even if a fusion movement might win more easily than a Socialist movement, of which I am by no means sure, would it last longer than the Mitchel administration?

"On the other hand, there is a chance of an enduring and genuine good government movement if and

chance of an enduring and genuine good government movement if, and when the masses of New York's workers, employed and unemployed, workers with hand and brain alike, get to realize that the city can do more for them collectively than district leaders can do for them individually. This requires a Socialist vision, a Socialist plan, and Socialist organization. That's why we Socialists must stick to our job."

stick to our job.

LaGuardia Supports Fusion
Congressman LaGuardia said
that Thomas had left the door open that Thomas had left the door open so that he could come to him, and he was also glad to hear from "Comrade" Schieffelin who appar-ently had "got religion" since he associated with John Haynes Holmes and Rabbi Wise. He believed that much of the

talk of fusion was amateurish, as the first essential task of all independents is to reform the election laws and provide for non-partisan elections and an honest count of the votes. He agreed that was hould have a real platform to should have a real platform to change the system, and that Social-ists have a following who will not permit conditions to continue; but economic issues in state and tion have no place in the city. Civilization Comes to Green Mansions

book, "Green Mansions," we get a lovely picture of the jungle wilderness in the upper reaches of the Amazon. Lacticia is on the mighty Ama zon, two thousand miles and more from the mouth of the great river, in the eastern slopes of the Andes. In that tangled jungle land there have been few surveys, and white men have had difficulty in even penetrating there.

One of the camps became a permanent, though a tiny town, and it was named by a now-forgotten Englishman after a sweetheart or a mother or a light of love; hence its name Laeticia, so incongruous in those parts.

It is hard to imagine any spot on earth less important than that, and except for one accidental fact it would never have been more than a fly speck on the larger maps of South America.

That accidental fact is that acticis is on a spit of land in a ork of the Amazon River, at a bint where several of the South can republics come together.

The people of Colombia were slow in realizing that the honor of their great country was at stake, but once aroused . . .!

It is a quaint thing, this "honor" of a nation. Someone has said that a man who talks much about his patriotism is like a woman incessantly prating of her honor; both are under suspicion. And both are under suspicion.

The flags began to wave and the Colombian equivalent of "God Save the King" began to be played in the movie theatres of Bogota and Bucaramanga, Cali and Cucuta and the other great cities of that republic. "Stand up. Cucuta and the other great cities of that republic. "Stand up, you——!" was snarled at puling pacifists who did not arise with the necessary alacrity. Radicals began to be damned as pro-Peruvians and demands by the workers for living conditions were nounced as intrigues by se paid agents of Peru.

A Wave of Patriotism
A patriotic fervor swept the

The very zenith of patrotic fervor was reached when a Colombian statesmen introduced a bill in Congress to appropriate money to build a tomb for the heroic Unknown Colombian Soldier-who is not yet dead because he has not yet begun to fight and possibly is not yet in the army! What a cosmic jest it would be if the legislator were himself to be drafted and thrown into the army to be mangled in the bloody Amazonian slime, and later to be borne reverently (in pieces) to the tomb in Bogota! yet why; but some Ecuadorean Walter Lippmann will find out and tell them in plenty of time.

But there is still another country. Brazil has no claim to Lacticia, but the Amazon runs through a large part of that republic, and possibly the statesmen at Rio de Janeiro believe that the blood that may be shed if there is a war will pollute waters running through Brazilian territory; and that makes it a Brazilian issue. Hence, a fleet of ten gunboats has been mobilized, and bombing and scouting planes are assembled at scouting planes are assembled at Manaos, just to be ready in case,

Manaos

And here we have still another cosmic jest. For what is Manaos? It is a city fifteen hundred miles up the Amazon, once a thriving, bustling metropolis of rubber. More than a half a million people dwelt there; trolley cars clanged shepherd for Andes with the with the second for the first metropolis of the first metrop

The streets were well-paved, beautiful marble homes lined ents there, for the played Parisian finery; it was a real tropical metropolis, an equatorial Paris.

But the Brazilian rubber trade died, and the city lost its primacy The traders left, and the sad city is falling into disrepair, and its population has been cut in two and is dwindling fast. The paveand is dwindling fast. The pavements are cracked, grass is growing in the streets, the irresistible jungle is creeping in on the once-populous streets and strangling the city, the squawks of macaws, the chattering of monkeys, the yelps of jaguars are heard in the night. Soon Manaos will be like Angkor-Vet. a dead and descreed night. Soon Manaos will be like Angkor-Vat, a dead and deserted city, through which scurry and scamper the Bandar-log, they whose tails hang down behind.

It is to this city that the great and progressive government of Brazil sends its ten modern gunboats, with all the devices boats, with all the devices of modern science for destroying life, has sent the cloud of planes, with bombs and gas . . . just to be on hand to see that when the fight starts Brazil will not be left out in the steaming, equatorial rain.

"From the very beginning of the depression public funds for relief have been inadequate to meet the known volume of distress in New York. Since then 22,000 have been added to home relief and 13,000 to work relief in upstate welfare districts. Even if we assume that all of these came from this waiting list, that would still leave 49,000 approved applicants for work relief. "In New York City, more than 20,000 applications for home relief were pending on January 31, 1923.

A large number of these applicants have been waiting for relief for many weeks. Undoubtedly, during the month of February, another 20,000 applications will be received. To provide \$40 a month received. To provide \$40 a month for only four-fifths of this number would require another \$1,250,000. This sum should be immediately available so as to avoid long de-

"The Emergency Work Bureau
privately financed through the Gibson Committee has received more than 60,000 applications for work relief, although its funds allowed it to add only 3,000 of these to its payroll. Another \$2,500,600 is necessary to provide work relief for 50,000 of this number. Thus, it plainly appears that \$18,000,000 is a minimum monthly requirement for public relief in the State.

A Manual for Socialist Speakers by August Claessens

(Continued from last week)

Answering Questions

An excellent feature of all propaganda meetings is the practice of encouraging and answering questions at the end of a talk. It is instructive to both speaker and audia number of topics, he is bound to arouse many questions. This should be avoided, because the best of speakers can not do Justice to a series of questions over a wide range of topics, where the answers are either too brief or too involved to saitsfy. When a speaker confines himself to a limited topic and treats it comprehensively, he may get few or no questions. If he does get questions that pertain to the topic, e should regard them seriously, because uch questions often expose some weakness material, vaguesness in thought or bad arrangement in his presentation. A good speaker heeds such questions, reexamines his speech and when he delivers it again he answers in the course of his speech. In answers in the course of his speech. In this practice, one soon develops a question-proof talk on a subject. It should also be understood that when a speaker sticks to a topic he can rule out all irrevelant questions, and an audience will usually stand by him and his judgment in this matter.

If a question invites too long and involved a discussion, it is sometimes a better tactic not to answer it, and instead, politely suggest some readings or references. The reason for this advice is that the speaker reason for this advice is that the speaker should not permit any secondary or additional discussion to blot out the impression made in his talk and destroy its effectiveness. In answering questions it is best to be brief. First make sure that you fully understand the question before you attempt to answer it. When in doubt ask the questioner to state it more clearly. If you cannot answer a question, frankly say so. A confession of ignorance is at least evidence of intelligence and honesty, while a bungled answer to a question is a bad exposure of ignorance. Moreover, there is no crime in not knowing. However, one no crime in not knowing. However, one should look up the matter without delay and inform oneself so that when such a question is again presented the answer can be given.

Interruptions and Disturbances

It is difficult to advise how to act in every instance where there is a disturbance or an interruption at a meeting. Some situations respond to no sort of treatment and the meeting is broken up or must be adjourned. In most cases, however, good results can be obtained by some knowledge of crowd

psychology. Such knowledge is indispensable to an efficient speaker. First, bear in mind that at most meetings the speaker always has the greater advantage. Unless very hostile, the audience regards the speaker more respectfully than it does anyone in the crowd. Then again any descriptions one in the crowd. Then again, crowds are often fickle, and speakers must be careful. Secondly, when you are interrupted by some heckler or disturbed by some pest, keep a cool head. Don't lose your temper and don't abuse your termentor. The audience thinks that you are the more intelligent of the two—encourage their belief. If you are interrupted in the course of your speech and if your audience is apparently with you, the best thing to do is to stop meaking for a few moments. Let the diespeaking for a few moments. Let the disturber annoy the audience and they will soon silence him or help you get rid of him or permit your committee to get into action. If you insist on arguing with the disturber, you are heading for trouble, because the crowd may get intensely interested in the contest and anxious to know who will get the best of it. And if you are not so quick and clever as your heckler, you may get the worst of it and lose the control of your audience. To repeat, keep perfectly cool during a disturbance or interruption and you will always be able to think better and act more effectively. speaking for a few moments. Let the dis-

Literature, Book Sales, Etc.

Every propaganda meeting should have a supply of literature on hand. The best speech in itself is not fully effective. It is only a means to a larger end. The speech should stimulate a desire to know more about the subject; it should make the listener eager to hear and read more. Every good Socialist meeting must have leaflet pamphlets and books for distribution and sale and the chairman or speaker must call pamphlets and books for distribution and sale and the chairman or speaker must call attention to that fact. In offering books or pamphlets for sale, it is not enough to mention a title or two and the prices. It is also bad salesmanship to announce a variety of books and trust to luck that prospective customers may remember all the titles and prices and probably purchase something. The best results are obtained when the speaker selects one pamphlet for sale, preferably one related to the subject of his talk. The speaker must inform the of his talk. The speaker must inform the audience about the contents of the book, something about its author and arouse a desire an da demand for it. Of course, a good salesman is one who is familiar with the merits of his wares, and every Socialist speaker should know the contents of the books and papers we offer for sale.

What is our common ground of cooperation? These taxpayers, landlords, who in the fat years have made tremendous fortunes and unmade tremendous fortunes and unmercifully squeezed the people in their rents now in the lean years turn around and set up a howl about taxes."

Hillquit marvelled at Dr. Schieffelin's optimism. Forty years ago he had supported Parkhurst; and Tammany came back.—Seth Low and Tammany came back. William L. Strong and Tammany came back. This school proposes to take students over 18 years of age and offer education leading to a different system from one of graft, exploit tion and pri-vate profit as its main motive.

While the school is not officially onnected with the Socialist Party it sponsors this movement as one which will bring about a more hu-mane condition of society.

Harlan, Kentucky, is a good example of the desolation and suffering which comes with a cut-throat, dog-eat-dog competitive capitalist system with no other purpose than private profit. But Harlan is no worse than other parts of Kentucky, Virginia, North Carolina, Georgia, Alabama, and Tennessee. Georgia, Alabama, and Tennessee. It's the same every place where selfish business has come in, whether in the mines, timber, or textile industry—where human life

is held cheap.

What, then, is the relation of the Highlander Folk School to such conditions? It is simply this: It proposes to educate leaders from these common people capable of understanding the social and economic forces in our present system and burning with a desire to bring about a new social order. It is a militant crusader for a social or-der based on human justice, co-operation, a livelihood for every man and fair distribution of wealth.

The school holds that there must
be a guaranteed decent wage for
every worker whether employed or
out of work, and this wage must have a minimum mark below which it cannot go in the new social or-der. It is easy for any worker to which see that the reason for all this hunger, lack of actual necessities, suffering and unemployment, is due to the greed and selfishness, which are at the center of a capitalist system, enabling too few men to amass too much wealth. They have more than their share, and men don't make fortunes honestly. Because a few have too much, thou-sands upon thousands have too

The Socialist Party, through its State Committee, has voted to get back of Senate Bill No. 211, introduced by Mr. Byrne and supported by the labor movement of the state id to throw all its strength back of it as part of its work in the conference. The party's action was taken with full realization that the bill is by no means a perfect measure, that the benefits it proposes are inadequate and that it does not provide for a general State Fund. Nevertheless, the bill establishes the principle of compulsory, noncontributory Unemployment Insurance and the party's spokesmen contributory Unemployment Insur-ance, and the party's spokesmen at legislative haerings will support it without reservations; first, how-ever, seeking to secure amendments eliminating its obvious short-

Bill and Joe Almost Come to Blows Disputing Hoover's Individualism; But a Tentative Peace Is Reached

"You're some individualist, I'll say, without a job for several months, your room rent unpaid and touching me for six bits only yesterday. Where is your equality of opportunity? Did you leave it with your rubbers under the bed?"

"Say, just go a little easy with that stuff, Bill," said Joe.
"Say, just go a little easy with that stuff, Bill," said Joe.

"EASY with you, eh! You want no state bureaucracy to regulate your life," Bill answered with mounting anger.
"You worked for one of the biggest corporations in this country. You punched a time clock, got an identity check, and you were known by your number on the corporation's books. The corporation destroyed the union and you are this immediate reform in the nacompelled to keep your union membership a secret."

"Yes, you're coming out of the coma that is induced by taking Doctor Hoover's famous narcotic," said Bill. "The fact is that we have the bureaucracy you fear both in industry and in government. It is a bureaucracy of the ruling capitalist and banking classes. In both fields that bureaucracy is satisfactory to the ruling classes. Now where is that equality of opportunity?"

MOONEY HEARING ON MARCH 25TH

The hearing in Superior Court in San Francisco, scheduled for Feb. 11, upon a motion that would lead to what is virtually a retrial of Tom Mooney and Warren K. Billings, has been postponed to March 25, to make it possible for Frank P. Walsh to appear in court person.

The object of the hearing is to secure trial of an indictment still pending and not yet tried, charging Mooney with the murder of another of the victims of the Preparedness Day explosion in 1916.

If the court grants a trial it will be possible for the first time legally to introduce in evidence proof that the testimony that sent Mooney and Billings to jail was bought and paid for perjury. In the event of such trial an acquit-tal would be inevitable, and in such case it would be impossible to keep Mooney and Billings in jail any longer on the basis of convictions on earlier indictments.

was concerned he was a new figure in public life, but Milwaukee had known him for a quarter of a century, and so had the Socialist movement. The national arena just suited him, and he became a striking and influential figure almost immediately, and so he was until the end.

Berger was born in Austria, February 28, 1860, and after studying at Budapest and Vienna, he came to the United States he came to the United States in 1878. He went west, and for a while he was reduced to hobodom, tramping the country roads, doing any job that came to hand, even to punching cattle. Back in New York, he learned the trade of metal polisher, and then drifted west to Milwaukee. And in Milwaukee he stayed, to the day of his death and to the glory of that city.

It is hard for people nowadays to realize the importance of the German gymnastic movement—the "Turners," they were called—in an earlier day. It was a genuine people's cultural movement, and through it many of the early Germans first became active as Socialists. Berger became a leader in Turner circles, reaching rather. in Turner circles, reaching rather high office in the movement, and it was his activity there that gave him the wide acquaintance that made his early Socialist work so effective.

From 1898 the story of the life of Victor L. Berger is the story of American Socialism. He was one of the founders of the Social Democracy, the Social Democratic Party, and the Socialist Party. His Milwaukee organization was one of the best organized in the country, one of the most effective, manned by able, devoted and often brilliant men and women. Where Berger led there was always the st cooperation between party

In 1904 it was reported he had been elected Mayor. He wired, "The time is not ripe. I don't want to be Mayor in a city not yet ready for us." But that year Socialists began to get themselves elected to various. get themselves elected to various offices, and from that time So-cialists became a vital force in Wisconsin life.

In the spring of 1910 the party swept the city, Emil Seidel being elected Mayor and Berger Alderman. The reactionaries howled. Berger was damned as "Boss Berger," he was depicted as compelling everyone to dance to his tune. Will the New Deal Be Turned Into a Very Old Despotism?

The Reactionary Southern Wing of the Victorious Democratic Party Is Reaching Out for the Whip—We Know What Became of Wilson's "New Freedom," Too.

LONG, long ago—as far back as last November—there was a campaign for the Presidency. If memory is not at fault the Democratic Party won. Insofar as it had a winning slogan, it was "The New Deal."

Perhaps the party also had applatform. What the several planks were is no longer even an echo.

Promises of all kinds seem to have been made. But why bring the beautiful and collapsed. Thanks to conscription, esplonage laws, anti-synchronicalism laws and a tory department. that up?

From previous accounts it appeared that it was Roosevelt that won. In his name "The New Deal" was agitated. There also was some evelt's mention of Governor Roosevelt's having teamed up with the progressive Republicans, so near were they together in purposes. By some it was even felt that with Roose-selt in the progressive element in the Democratic Party would be in

Of German culture himself, the insanity of waging war upon the German nation struck him as particularly imbecilic. There was a vacancy in the United States Senate, and he ran in a bye-election on a stopthe-war platform, polling a reran in a bye-election on a stop-the-war platform, polling a re-markable vote and nearly winning. Thereafter came the series of in-dictments against him. He was elected to Congress and indicted again and thrown out; re-elected, and again thrown out; but finally, elected in 1922, he served until 1929. 1929.

Toward the end he was a sage of the movement, looked up to as a father of the party. He wrote incessantly and well. He read enormously—his private library was one of the finest I have ever seen. He was a truly national figure, and when he was struck down on the streets of his city by a trolley car, and later died of his a trolley car, and later died of his injuries, the mourning was wide-spread, genuine and sincere.

Victor L. Berger lived a rich, full, noble life. His activities spanned an epoch. When he died he left a world vastly different from the world of the young and enthusiastic Turner of 1882. Southern Bourbons may have learnt this lesson. It may properly be assumed that the Democrats carried the last national election only because they hap-pened to be the opposition party, when the depression crushed the Republican Party. Otherwise, where would the Democratic Party

William Fox Was Gypped Out of His Vast Movie Empire and Upton Sinclair Weeps Over It - So What? By S. A. DeWitt =

UPTON SINCLAIR will always remain one of my gods. I am votary enough to forgive him any hineous deed that he may be mad or foolish enough to commit as long as he lives.

as he lives.... So it will be easy for him and you to understand why I can write as I do about his new volume, "Upton Sinclair Presents William Fox," in the manner that follows without any dread of losing his priceless friendship. And then to repeat an old epigram, the gods are good to those who hold m good in mind. .

With this attempt at apology, let me sail right in and say that Upton has done his worst job as a man of letters with this utterly redundant and inconsequential work on William Fox.

From a literary viewpoint it lines up with his best writing... As Ben Blumenberg says, "reading Sinclair is like eating peanuts... you just can't stop once you've started." The book grips you from the very beginning, not so much by the importance of his subject matter as by his simple genius as a narrator.

As a matter of choice of subject, Upton couldn't have done worse. . . .

Whatever may be the crusading passions, and however strong their urge for adventure, redundancy is a dreadful sin for a writer of Sinclair's universal standing. "The Money Changers," "Mammonmart," and the "Brass Check" are a trilogy of record and denunciation that will stand as long as men may read. "William Fox" threatens to dull their insistent brilliance.

I should really show much more human sympathy for the heroic" tale of the grubbing movie magnate.

In the first place, Mr. Fox started his life within three blocks of where my own boyhood was wasted. He is a Jew, an indefatigable worker, and he sprung from the utterly poor. . . All of which I wave aside impatiently, since I know poor. . . A.ll of which I wave aside impatiently, since I know how many of this stripe climbed to wealth and power over the sweat and suffering of their weaker and less power-hungry neighbors and pals. The sweatshops were lorded over by William Foxes. They were self-abnegating types, who skimped, saved and squeezed untiringly. Hundreds of thousands of boys and girls, starving fathers and homedrudged mothers helped to pile up bank balances for these bosses, so that they could accumulate their first \$50,000 to go into bigger and less inhuman ventures.

There is a bigger novel, to my mind, in how William Fox accumulated his first fifty grand than in the sum-staggering manipulations of the movie-czar in latter days. . . .

All through his tale of the dethroned film-Napoleon Upton hardly convinces me that he is depicting anything really big. To my irreverent vision, Fox remains no larger than the thirteen year old peddler of "lozengers" and pretzels, who was padroning a dozen other anemic, sloppy East Side kids on a commission basis. All the millions he made and controlled, all the theatres he owned, all the gigantic contracts he signed, and all of the nasty conspiracies Big Finance hatched and carried out against his empire of profit are so much chaff in the nook of a grist mill. There is no news for me in the discovery that bankers and financiers are greedy, unscrupulous and criminal. And surely it was hardly interesting to one of Sinclair's insight and understanding.... Just what fascinated Upton to spend so many laborious hours over so stale a theme as the downfall of William All through his tale of the dethroned film-Napoleon Upton ous hours over so stale a theme as the downfall of Fox is beyond me. . . . It would have bored me to an attempt at indoor golf.

I cannot even understand what Mr. Fox is so crabby about. He did get twenty millions out of the mess. He did live to see thieves who muscled him out of his racket lose everything they put into it. He is comfortable and as secure as this dying system can secure one. Really, what is all this bellyaching for and about? And strongely enough, why should so big and sincere a protagonist for the underdog even try to give brief and dignity to such a purely personal petty grudge as Mr. Fox's against the powers that licked him fairly and squarely . .?

him fairly and squarely . . . ?

No matter how devious we may be with our legal reasoning, basically we know that playing the game of capitalism implies being dirty, crooked, avaricious, treacherous, cruel. All the rules read that way. And when you enter the big gaming house of business and high finance you must be prepared to win, lose or draw without a squeal. . . And to squeal through four hundred pages of tremandously good writing that you were beaten at your own game is no sign of bigness—to me, at least.

There is something about the movie game that has never

of bigness—to me, at least.

There is something about the movie game that has never smelled very good to good and decent folk ever since it got out of the sand lots into the tinsel palaces. There has been exploitation of the meek and poor, as evil and as heartwrenching there as any sweatshop ever brought to swell up the ever mounting total of human misery. . . . Mr. Fox got many of his millions out of that system. . . . I haven't a tear for his loss. And how he retains his twenty million, and under what ethical hokum he can condone the possession of such a huge sum with half of his fellow citizens on the verge of starvation might give him pause before he ventures forth further against those who have done him such wrong. . . .

And if he still weeps for his loss of power over an em-

And if he still weeps for his loss of power over an empire, let me remind him that the days of emperors and czars is well-nigh done, and neither you nor I nor Upton Sinclair ought to drop one solitary penny into the tin cup the expeddler and ex-movie Napoleon holds forth at the book stand,

THE SPEAKERS' MANUAL

By August Claessens
The installments of my new booklet "A Manual for Socialist Speakers" printed in The New Leader the last several weeks are now coming to an end. Quite a number of letters come to me personally asking whether this manual will be printed in pamphlet form.

I take this opportunity to answer this inquiry to the many more comrades who may be interested. There are a number of publishing erganizations that would like to print this pamphlet. If they do, it will run about 32 pages and could retail for 15 cents or, at the most, 25 cts. It will include also two blue print sketches of street corner platforms that comrades in any part of the country can have built. The only dl. culty involved in the publication of this pamphlet is the hazard of printing in these times. Unless there is a su...cient demand to warrant the expense any publisher will hesitate. To clear up this uncertainty it will be necessary to know to what extent there is a demand for this pamphlet. All comrades interested can clear up this uncertainty by letting us the time.

EDUARD BERNSTEIN

EDUARD BERNSTEIN
By Irving Brown
The occasion of Bernstein's death has caused me many misgivings about the adherence of The New Leader to a true Marxian Socialist position. Such an opinion is generated as a result of your puzzling gomplimentary and eulogistic article upon Eduard Bernstein on the eccasion of his passing.

I find that you do not mention—not in one word—the basic revisionism that Bernstein attempted in his works—especially after the death of F. Enges. And yet, it was Bernstein who headed the ideological movement that challenged the basic concepts of Socialism—historical materialism; labor theory of value and surplus value; the class struggle; the social revolution. In place of these profound and energizing Marxian concepts he attempted to substitute a liberal-reformist movement that concentrated upon minute social revolution. And to top it off, it was Bernstein who started to vaporize

about Socialism as a movement and not as a goal. Such Socialism is the kind of petty-bourgeois, near-sighted utopianism that Marx attacked so logically and correctly in the Manifesto!

Added to his intellectual retrogression, what about some of Bernstein's actions in the publishing of certain of Engel's works? Especially, what about the mangling of Engels' introduction to one of Marx's pamphlets which resulted in a distortion of the former's ideas concerning revolutionary social change? Such action upon the part of the Revisionist causes one to question, very sincerely, the intellectual honesty that The New part of the Revisionist causes one to question, very sincerely, the in-tellectual honesty that The New Leader attributes to Eduard Bern-

Leader attributes to Eduard Bernstein.

In conclusion, I wish to say that on this occasion of the passing of the outstanding representative of Socialists reformism, we Socialists should recognize the tasks that history places upon us. In order to be able to realize our revolutionary goal, we must steel ourselves to the job of repudiating all desertions from true Marxism. Let us dedicate ourselves to a clear-cut adoption of the Marxian class-struggle analysis and all the logical implications involved: Thus, we shall fight for Social Revolution in the spirit of Eduard Bernstein!

Our comrade is mistaken in saying that the story he mentions carried no word regarding Bernstein's revisionism. The entire fourth paragraph was devoted to the controversy. On the other hand, we should welcome, not discourage, a re-examination and criticism of fundamentals. We disagreed with Bernstein's views but believe that the questions he raised served to clarify the movement as a whole. Marxism as a methodology provides for its self-criticism. Let us not forget that.

Mr. Lynch considers the rise of this thing as the appearance of a new aristocracy. "Its leaders, in new aristocracy. "Its leaders, in the main, are the spawn of the brothels, the gambling dens and the corrupt political machines of the law is the law of terrorism—the law of the club, the torch, the bomb and the machine gun." This aristocracy has its own code of conduct and its members live dangerously. It has tendrils that extend through many industries, into politics and governing bodies, and into labor organizations with labor grafters as its agents. Names are men-tioned, deeds are described, and the plunder estimated.

Some day the history of the evo-lution of this revolting social cancer will be written and when ti is finished it will be found that one of its most important origins lies in the swine code of our ruling groups. If the underworld criminal

Dillon, Albert E. Wiggin, Harry L. Stuart, Harley L. Clarke. FLOYD DELL'S opinion:

"There has never been a book on this subject so completely readable by ordinary people. I myself am bored with statistics, I don't like business stories, and I started this book with no hope of ever being able to read it through. It kept me awake all night -I could not stop reading it. The story has terrific interest and suspense. . . . Also it hits the public interest of the times right in the center. It will be in every middle-class home this winter, and millions of people will be talking about it. It is going to be one of the great literary sensations in the history of American publishing."

No dates have yet been announced for hearings on Unemployment Insurance or on amendments to the Election Law. The principal bills on Unemployment Insurance were referred to the Senate Finance Committee and the Assembly Ways and Means Committee.

Schenectady.—There is no city

Committee.

Schenectady.—There is no city of the state more severely hit by the depression than the one which used to boast that it "lights and hauls the world." Factory payrolls have shrunk to a fifth, some say a tenth, of what they used to be; landlords cannot collect rents; banks refuse to strangle themselves with unsalable real estate on which they are entitled to foreclose. Fully two-thirds of the working population jobless.

A strike of unionized city employees, forced by an unfriendly Democratic Mayor, is a factor in the situation. Pickets of the union are conspicuous at the City Hall, and the City Employees' Union is taking the lead in the fight to prevent breaking down wage scales by the relief agency which is headed by a representative of the General Electric. This unparalleled situation is creating renewed in Schenectady.—There is no city

AN APPEAL

THE NEW LEADER is glad to report that the unem-ployed comrade who had given who had also been imprisoned because of his anti-war views and is now unable to renew his sub to The New Leader, has had it renewed by the generosity of one of our readers.

But here is another letter from another reader in a Penn-sylvania sanatorium for tuber-culosis: "With immense regret I see that you have stopped The New Leader. I am sick of tuber-culosis. I ask you to place my name on your mailing list."

We kept this worker on the list for a year at our expense. Is there another reader who will do for this sick comrade what was done for the jobless one? We await your answer.

the nonce inspiration seems to
have abandoned the men responsible for the rest of the presentation. There is a good chorus, with
zest and grace, there are effective
scenes, all around the Becr Gardens and the Police Commissioner's other haunts in Dresden,
Germany; there are good song
possibilities. Nor can one say the in the amatory exploits of a re-forming kleptomaniac and his sweet loving pal of a gal thief; nor the Commissioner whose daughter saw through the disguise daughter saw through the disguise, yet married the guy. The Gershwins did their good share for "Of Thee I Sing"—though the feeblest part of that was the lyrics; let them come back from Dresden China indifferencies to the rich opportunities of the American

GOOD FRENCH FUN

"MON COEUR BALANCE" ("My Heart Hesitates"). At the Fifth Avenue Playhouse.

Avenue Playhouse.

Until the middle of next week there is still time to laugh at one of the most amusing of recent French farces, "My Heart Hangs in the Balance," the current film at the 5th Avenue Playhouse, where many delightful pictures have been shown. In this, the gentleman chiefly concerned, having dismissed his mistress (to a Frenchman as essential as a dog to a fireman as essential as a dog to a fire-house) returns home with a clear heart and his mind on his fiancee -to find a strange woman in his bed. The mistress, not thus easily put off, follows, finds the girl, notifies the prospective father-in-law that his daughter is sleeping with her husband two days too soon. An angry dad, discovering it's not his daughter, wants to know who the girls may be—with the ultimate result that our poor not yet married friend is traveling about with three sisters (one real) until The mistress, not thus easily

REVIVED HORROR

THE MONSTER." By Crane Wilbur. At the Waldorf.
The Wee and Leventhal revivals are one of the interesting features of the season, with valid variety. After the farce-melodrama "Whistling in the Dark" of last season, they offered Rachel last season, they offered Rachel Crothers' delightful social comedy, "As Husbands Go," and have now followed that with that thriller of the last decade, Crane Wilbur's Monster."

Within the limits of one theatrical custom, a good melodrama of one year will serve in another; and we have not grown beyond the horror technique this play employs. Re-cent devices are perhaps a bit more electrical, but the trap-doors, more electrical, but the trap-doors, underground rooms, walking dead folk and gigantic "controls" of ten seasons ago still send chills along the spine. Especially when the monster of vivisection is played by De Wolf Hopper, who bends his lank body from musical comedy lank body from musical comedy to make a foreboding and forbid-ding fiend. NEW HISTORY SOCIETY GIVES In the Noel Coward Film "The Big Drive" Official Wather Series on "PLAN-NING A NEW SOCIAL ORDER" "Cavalcade" Film at the Cameo

Tomorrow evening (Sunday) at 8:30 o'clock, the first of a series of seven public lectures on "Plan-ning a New Social Order" will be given in the Oak Room of the Ritz Carlton. These lectures will be given under the auspices of the New History Society.

The first speaker in the series will be Dr. Wilhelm Solzbacher, International Secretary of the World League of Catholic Youth.

MILD. WILD KUSSIA

Among the week-ends' unusual events was an illustrated lecture by Burton Holmes and Carveth Wells on Russia as it was, and as it is. Unusual, in that the politics of Communism played scarcely any part in the talk. Interest in Mr. Holmes' picture of old Russia was greatest at the discussion of the influence of religion upon the people; while of Russia today there were beautiful scenes of the Caucasian regions, and trips to little known sections, where the Revolution has had little chance penetrate-as the Caucasian to penetrate—as the Caucasian tribe (with splendid armor) that believes it is descended from the Crusaders, and those folk on Ararat who still exhibit splinters from Noah's ark. An evening that revealed many aspects of the wide land on which much of the world's land on which much of the world's attention is centred.

accomplished fashion: even though one occasionally sees the strings being pulled, "The Monster" is full of shudders and shrieks to last for more than evening. But, of course, it ends so that one can go home pleasant dreams.

TOWARD A PEOPLE'S THEATRE

Two items of interest. plays of seemingly direct approach toward a people's theatre, are be-fore us. The first is word that fore us. The first is word that Douglas B. The speaker that evening turned out to be none other than the stage director, Leo Bulgakov, whose subject for discourse was a course. ject for discourse was, of course, the theater. Mr. Bulgakov pro-ceeded to make the very fatal mis-take of mentioning that he was about to start rehearsal on Leslie Spiller's forthcoming pr "One Sunday Afternoon ming production of

No sooner had Mr. Bulgakov fin-ished his discourse, than the nine-teen-year-old Mary was on the rostrum.

"You're doing a play," she queried?

"Yes," was the answer.

"Well, that's fine. I'm an actress."

There was little Mr. Bulgakov could do but invite the young lady to come to the stage of the Little Theater, where he was then doing his casting. To his own surprise and to Miss Holsman's satisfaction, the director discovered what he believed to be an actress. So he gave Miss Holsman one of the two fem inine leads in Mr. Hagan's comedy

Socialism is Debated in The Canadian Parliament

Capitalism and the pressing need for Socialism reached the order of business of the Canadian House of Commons, when J. S. Woodsworth, M. P., leader of the C.C.F (Cooperative Commonwealth Federation) moved:

Whereas, Under our present ecoof our people are unemployed and without the means of earning a livelihood for themselves and their

pendents, and Whereas, The prevalence of the present depression throughout the world indicates fundamental de-fects in the existing economic system, be it therefore

Resolved, That in the opinion

this House the Government she immediately take measures looking to the setting up of a cooperative commonwealth in which all natural urces and the socially necessary achinery of production will be ed in the interests of the people used in the interests of the people and not for the benefit of the few

The resolution is reminiscent of the famous Socialist resolution in-troduced in the House of Commons of Great Britain forty years ago by J. Keir Hardie, and which the great Socialist pioneer defended in a twenty minute address that was twenty minute address that was one of the greatest speeches ever heard in the Mother of Parliaments. The resolution received two votes. Ten years ago Philip Snowden in-troduced a similar resolution, and after brilliant speeches by Arthur Henderson, J. Ramsay MacDonald, J. H. Thomas, Tom Johnson, Dan Irving and other leaders (at that time) of British Socialism it received 122 votes.

Woodsworth's motion was not. of course, expected to pass but it brilliantly accomplished its pur-pose. A heated, exciting and often pose. A neated, exciting and office of the country.

OTTAWA. - The failure of ported in the Canadian press, with ported in the Canadian press, with Socialist speeches by Woodsworth, Miss Agnes McPhail, William Irvine, A. A. Heaps, and other Socialists reported in full on the front pages of the leading Canadian newspapers, so that millions of people learned of the aims of Socialists. cialism, and at the same time were informed of the formation of the C. C. F. [explained in a recent ies of three articles in The New Leader] and of its work.

Order! Order::
In his speech opening debate upon the resolution Woodsworth said, "Does anyone mean to say the great fortunes in Canada have been built up by what could be termed honest toil? Has the Prime

Minister's own fortune been gained

by honest toil?"

That remark created a Parliamentary "scene." Members who mentary "scene." Members who could sit unperturbed in the face of desperate economic distress could not endure the "affront" to their sacred dignity and shouted "Shame! Shame! Withdraw! Withdraw!", and after a lot of excite-ment Woodsworth was allowed to go on when he explained that he was not reflecting upon Mr. Ben-nett personally but upon the means by which his personal fortunes were built up.

Conservative members explained that the C. C. F., and the Socialism it represents, is identical with Communism, which is interesting news since the Communists are violently denouncing the Socialists as "Fascists" and as "lackeys of the Tories.

The debate was of enormou value in turning the House of Com mons into a debating society with Socialism as the subject, and the big newspapers carried full reports of the debate, with the Socialist arguments featured, to the people

By Norman Thomas

Every week Norman Thomas writes in his pungent style his own comments upon the salient events of the moment.

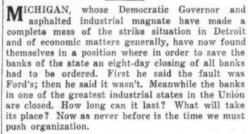

"Buy American"

To impossible to carry out the slogan: "Buy
American" and keep any sort of world trade,
have coffee, sugar, rubber, tin, or any of the other
things we need. It is impossible to carry out that

slogan and be loyal to that far greater slogan: "Workers of the World, unite!" Yet I find even some Socialist workers in-clined to fall for Hearst's latest bunk. Fortunately the Party office in its Press Service has sent out a corking editorial on this subject. From a reliable and

well-informed source I learn that Hearst has forbidden all his papers to so much as mention that significant book, "A Hundred Million Guinea Pigs." You are to "Buy American" but you are not to know what it is dangerous to huy. This book by

to buy. This book by Arthur Kallet and S. J. Shlink stating the dangers in everyday foods, drugs, and cosmetics, published by the Vanguard Press, is a book that Socialist speakers ought to be familiar with, that ought to be in Socialist homes and libraries.

A NOTHER example of that "new deal" for which the Democratic Party supposedly stands is given in New York City. Mayor O'Brien in his ponderous, dull, plodding sort of way has gone over body, soul and breeches to the banking and real estate interests of New York. His budget cuts which have met their enthusiastic approval are nearly all at the expense of vital social services. They are scarcely at all at the expense of the political chair-warmers who draw salaries from the city for running Tammany Hall. On top of his budget cuts the Mayor has now insisted on practically wiping out an entire pro-gram of public works in New York City, thereby still further reducing any likelihood of employment. Not content with that, he now announces the city will accept no loans from the Reconstruction Finance Corporation, not even loans heartily approved by a special committee set up by Governor Lehman. The ctiy will borrow money, it seems, from Tammany's banker friends or not borrow at all.

This policy is quite in line with the action of Joseph McKee when he was Mayor, refusing R.F.C. loans to finance a limited dividend housing project in the Bronx. No limited dividend housing propositions can go to the heart of New York's slum problem, but some good can be done by them. Yet not want anything to impair the value of the slum properties they hold they persuaded the Tammany administration to block even this slight gesture of decent consideration for the well-being of the millions who have to live in houses that are barracks and not homes.

It is worth pointing out that with Tammany in a mood of such gracious deference to bankers and real estate interests it is not likely there will be a very strong fusion movement. The fusion movement was based on the desire of property interests for a cheaper government. If Tammany can give it to them, why should they bother with amateur re-formers? Yet lots of good folks go around saying, as I understand Major LaGuardia said the other night in New York—mind you, he ought to know better—that the only question in city government is the question of honest and efficient administration. Nonsense! The question of city government is the same as the question of state and federal government. It is a question for whose benefit and in whose interest is government carried on in whose interest is government carried on.

A Definite Program

EVERYWHERE I go the cry goes up: "Tell to something that we can do immediately to relieve the terrible misery of the hour." Very well here is a Socialist immediate program on which invite the comments of my fellow Socialists:

1. Let the Federal government at once authorize at least a \$10 a week maintenance allowance to every unemployed family in the United States, with a \$5 allowance to single unemployed met and women. The administration of this allowance could be through local boards. We had local boards to draft men into war; we can have local boards to draft them out of poverty. This subsidy should last for six months for a first trial period with the priviso that it can be renewed or modified at the end of the six months, as experience dictates.

We must have adequate unemployment insurance, but we have not time now to build up reserves and we cannot insure jobs that have already been lost. We must have the 30-hour week, but that of itself will not cure our ills. Even although the law say the weekly wage must not be cut, I do not believ it will be possible to enforce such a law under the capitalist system. The one thing needful is to ge immediate purchasing power. We have plenty of factories. We need no more investments. Men with money in their pockets will start to buy for the needs of their family. Of course, \$10 a week is not money in their pockets will start to buy for the needs of their family. Of course, \$10 a week is not enough, but it can be supplemented by district grants from local and state bodies as need dictates.

A Housing Program

2. At once an effective commission on which labor should be represented should be set to work to draw up plans for the most useful public works So far as possible these should be remunerative. The heart of them should be a housing program. There is no single new need of America, outside of the need for food and drink, that compares with the need for decent shelter. At least a third of our people are improperly housed in shacks and slums. In a notable speech Charles Solomon during the carriage pointed out that are entire new housing campaign pointed out that an entire new housing program could be carried on for less than was program could be carried on for less than was raised in Liberty Loans for purposes of destruction in the war. How about a three billion dollar beginning on housing, which sum should be administered through a Federal housing corporation and through state and municipal corporations set up under proper regulations? Of course, all corporations were the property of the

tions must be non-profit making and controlled by society. It has been estimated that at least 85% of the cost of housing could be returned through rent.

3. As a final emergency measure state and Federal action should be taken to make it possible to bring idle factories and idle men together, so that at least the unemployed may produce for themselves. It may not be necessary to so for with this selves. selves. It may not be necessary to go far with this third measure if the first two work as effectively

as I hope they will.

Assuming that we are not as yet organized so as to put in at once a complete program of socializa-tion, this is the very best immediate program that I think is practicable. It looks definitely toward complete socialization and should be accompanie by measures for socializing public utilities and the

by measures for socializing public utilities and the banking system.

In a later issue I shall deal with the question how can we finance this program? Here I merely want to insist that it can be done if we mean business as we meant business in war. If we could finance war we can finance this war against poverty-
