World Depression and Mad Imperialist Intrigues Bring Danger of Another War

Far East and Central Europe Two Sources of Imperalist Domination and Greed; Socialist Hope of Emancipation Must Not be Consumed in the Flames of War

AS capitalism continues to shake in the convulsions of the world depression, it also drifts to the bloody abyss of war. The war danger grows every day. The two sore sports are the Far East, with Japan the aggressor, and Central Europe, where the German Narie scele to imprison other aggression. the aggressor, and Central Europe, where the German Nazis seek to imprison other populations in their slave pens. In both the Far East and in Central Europe the League of Nations has been content to report and investigate, to talk and adjourn, while volcanic imperialist explosives accumulate and madmen prepare to touch the fuse.

Japanese imperialism turned bandit in raids upon China and set up the puppet state of Manchukuo. If it is ANTAGONISM IN running amuck, the Western Powers can thank themselves for teaching the Japanese

ruling class the technics of the imperialist creed.

Meantime the Russo-Japanese conflict over negotiations for the sale of the Chinese Eastern Railway has reached the danger point. Manchukuo representatives, really Japanese dummies have refused concessions to the Soviet Union and in Tokyo the police seized nine Japanese reactionaries on their way to demonstrate against the Soviet Embassy. The day before the Soviet Ambassador officially protested to the Japanese Foreign Office against the rioters in Harbin who demonstrated against the Soviet railway administration.

Huge war stores are being accumulated at Vladivostock by Russia, including war planes, in anticipation of Japanese attack. That city is only 700 miles from Tokyo, within easy reach of airplanes, but Japan

has an equal advantage in this respect. Communist leaders assert that the army is ready for attack. In London and in the European capitals it is no secret that the official view is gloomy of the danger of war. With the rise of Fascism in Germany, French imperialist policy has changed on the Continent. Having established a string of little allies across the continent, including Polandage a buffer seriest Purchase French

including Poland, as a buffer against Russia, French policy has assumed a more friendly attitude towards Russia, and its allies are now arrayed against the expansion of German Fascism.

lini intrigues with the Austrian Chancellor, Dollfuss, for an Austrian Fascist State but opposes the expansion of Hitler's brand as a danger to Italy.

Fascist Germany has solved nothing of the depression riddle. The working class and the middle classes have sunk to lower depths of destitution. In such a situation Hitler and his gangsters yearn for military glory in the hope of diverting attention from home miseries. Not yet ready for a holy war, Hitler seeks arms and is putting large sections of the population through the familiar goosestep.

The Saar is under the rule of a commission of the League and the population is to take a vote next year whether the Saar shall unite with Germany. Petitions of protest against all this are followed by a "study" by some committee of the League authorities

German Fascism, on the other hand, has been suppressed in Czechoslovakia by disbanding its organizations. Seeking to destroy the freedom of others, cocky Fascist aspirations have been given a dose of their own medicine. It has made little headway in the Scandinavian countries and is not likely to make any there.

any there.

Two forces are driving towards war, Japanese and Nazi imperialism. Should it come, millions will die of hunger and in the trenches. Such a war is not likely to be localized. It may so expand as to involve the United States in what may be another struggle to "make the world safe for democracy." Imperialist capitalism may again seek renewed life in a blood bath of millions of moreover.

of millions of workers.

The working masses must avoid hysteria in any tragic events that may occur. Our job is to conquer this capitalism, not to fight for and die for it. The Socialist hope is consumed in the flames of imperialist war: let us obbose more by all means at our command. war; let us oppose war by all means at our command.

McLevy Moves Great Headgear Workers' Unions Amalgamate Into One Body

By Aleck Miller

THE long-awaited amalgamation of the two great unions of headgear workers was finally accomplished during the past week through the intercession of William Green, president of the American Federation of Labor. Scheduled to take place over two months ago, the negotiations for the amalgamation failed of com-plete success at the last minute plete success at the last minute owing to certain differences that were outlined in the November 4th issue of The New Leader by Max Zaritsky, president of the Cloth Hat, Cap and Millinery Workers' International Union.

These changes involved the appointment of a certain official in an executive capacity to Local 42. "Our convention voted unanimously that under no circumstances could our organization accept as an officer this man who had betrayed our union," he wrote.

The former United Hatters will continue to occupy their old head-quarters at the Bible House, and the former Cloth Hat, Cap and Millinery Workers' Union will remain at their 40th Street head-quarters for the time being.

There is the greatest enthusiasm among the members of these two splendid unions for the step that has just been taken. While apparently the two organizations supplemented the work of each other in the headgear field, there were frequent jurisdictional points of dispute. This overlapping will be climinated by the amalgamation.

A net gain of 88 Socialist Party locals and branches and 46 circles of the Young People's Socialist League was made in 1933, according to the report of Clarence Senior, executive secretary, to the National Executive Committee meeting in New York over the weekend.

Senior will recommend that a conference of party organizers be held prior to the party's national convention in Detroit at the end of May, with the education and agenda

Illinois, Connecticut and California have shown the largest gains in membership during the past year, Senior's report shows; while Ohlahoma, Pennsylvania, New Jersey and Illinois have shown outstanding gains in forming new local organizations. A gain of 35 per cent in membership for California is especially noteworthy, in spite of Upton Sinclair and strenuous efforts of Communists to disous efforts of Communists to dis-rupt the state organization.

Income Returns

A REPORT of the Department of Commerce on the distribution of incomes since 1928 reveals some remarkable shifts. In 1928 there were 511 persons paying taxes on incomes of a million or more dollars per year, but in 1932 this number fell to 20. In 1928 the persons with annual incomes up to \$50,000 numbered 43,200, but in 1932 they declined to 7,430. Those with incomes of \$5,000 or less in 1928 numbered 3,060,000, while the same income group numbered 3,421,000 in 1932, an increase of 361,000. The increase in the last-named group is what

The increase in the last-named group is what would expect. While many have fallen out We would expect. While many have fallen out of this group in the depression period, it has been recruited by others who had received much larger incomes. Making allowance for tax-dodging in the higher brackets, the figures still show that Federal income from this upper section is certain to be much smaller at a time when the need for government revenue is enormously increased.

Where will the vast revenue required be obtained? It will be obtained from the middle classes and the lower economic sections of the population in general, thus increasing their dissatisfaction with capitalism. As the *United States* News points out, "if every cent of income of all persons in the United States earning \$10,000 a year or over in 1932 were confiscated by taxation, the money would not pay a third of this year's the money would not pay a third of this year's deficit." Think it over, fellow shrimps.

Workers' Incomes

WHAT of the incomes of the working class in what of the incomes of the working class in the period of 1928-1932? There was a "significant divergence" in the declining trends of property and labor income. That is, labor income suffered a heavier decline than property income, the latter falling 30 per cent and the former 40 per cent. Labor "got it in the neck" as usual. But a 40 per cent decline for workers is a greater hardship than a 50 per cent decline would be for property holders. Then note this regarding wages as a whole:

Wages have suffered the most severely in the general decline since 1929, with a falling-off of 60 per cent in those industries in which it was possible to segregate this item. Salaries dropped 40 per cent, much less rapidly than wages, with the most severe curtailment occurring in 1932.

This report on the distribution of incomes forms the text for forceful Socialist agitation against a capitalism that is rotten ripe for depositing in the garbage cart.

A National Scandal

GRAFT, corruption and payment of political favors are linked with the Civil Works Administration throughout the country. The relief agencies of the Public Works Administration are also involved. Reports of this are flooding Washington from many states and it may prove a national scandal on a very large the Nazi vandals to power.

scale. The New Leader is constantly receiving letters from victims who have suffered from this outrage.

Needy persons requiring a political "pull' to get relief; relief supplies that have mysteriously gone astray, and chiseling small amounts from relief funds appear to be a few of the methods employed by ghouls. It is bad enough when millions of capitalism's outcasts are required to accept rations and ill-paid jobs to keep them alive, but to have scoundrels pocket relief for them-selves or to use it to intimidate voters is equal to a bully kicking a child in the face. It is a revolting revelation of how low capitalist politics can sink.

Bankrupt Railroads

THE report of Joseph B. Eastman, Federal Coordinator of Transportation, looking for-Coordinator of Transportation, looking forward to ultimate public ownership of railways, is another flower laid on the grave of Hoover's "rugged individualism." However, it caused little repercussion in Wall Street. About seventy companies are facing acute financial difficulties and the mileage of railways in bankruptcy doubled in 1932, the total being in excess of 44,000 miles.

Having plundered these vast enterprises since the Civil War, we have little doubt that the gamblers would like to make a last deal with the New Deal to take them over under conditions New Deal to take them over under conditions that will give the gamblers one more juicy melon to eat. If taken over, the big shots should be told that they have enjoyed a skin game long enough and that they should forego a demand for compensation lest we demand restitution for the blackjacking that has continued since the outbreak of the Civil War.

A New Sociology

FOUR volumes by Vilfredo Pareto, the Italian scholar, will soon appear in an English translation in this country. He presents a new sociology. A year before his death Mussolini made him a Senator, but he had formulated his views many years before Mussolini came to

A digest of Pareto's philosophy presented by his American publisher states that Pareto be-lieves that "there must be a ruling class and a subject class." Being frank about this, his works subject class." Being frank about this, his works are not intended for general circulation "as certain truths which history reveals can do more harm than good if they are known to the plain man. . . . Pareto therefore addressed his book to the ruling class of the western world," including the United States.

Now the only thing original in this philosophy is its frankness, for it is a basic concept of every ruling property regime in history. John Adams, Alexander Hamilton, Fisher Ames, Harrison Gray Otis and others in the early history of the American republic expressed similar views. As the workers acquired the suffrage, these views were concealed from "the plain man." In the South similar frankness was observed in the last thirty years of the slave system.

That the old frankness now emerges in a system of sociology intended exclusively for the ruling classes and their retainers need not be surprising in these days of a stricken capitalism.

Socialists Point the Way for City to Save Itself from the Bankers Grip

By William M. Feigenbaum

IN the crisis in which New York City finds itself the Socialists, ND THE SOCIALISTS ALONE, can point a way out that is not a surrender to the bankers who have the city by

the throat.

That the city is faced with bankruptcy and financial collapse is no
secret. That swift action is imperative is manifest. That there
are only two possible alternatives
to collapse is plain.

One plan is Mayor LaGuardia's,

one plan is Mayor Laguardas, to save money at every point, to discharge city employees over 70 (without caring what happens to them), to refuse firemen an eighthour day, TO CUT WAGES OF ALL CITY EMPLOYEES BY ALL CITY EMPLOYEES BY DOCKING THEM A MONTH'S

That plan may permit of a bal-anced budget, and as a result La-Guardia may be able to wangle money from the RFC. for subways

and housing.

BUT THAT PLAN LEAVES

UNTOUCHED THE LOOT THAT HAS BROUGHT THE CITY TO ITS PRESENT PLIGHT.

There is another way of saving the city, the Socialist way. It is the ONLY way the city can go to solvency and at the same time safeguard the interests of all the way in the same time.

useful people.

In the city's desperate crisis it is the duty of the Socialists cease-lessly to urge the one method that will best serve the masses of the city and TO MAKE THEIR SEN-

TIMENTS FELT WITHIN THE
WALLS OF THE CITY HALL.
The city needs money. Even if
every grafter were removed from

the payroll, every padded expense account corrected, every fraudulent bill disallowed, there still would be a tremendous deficit. Ordinary sources of income have dried up. What then? Is the city to retrench on its social services, close schools, abandon libraries, save money on hospitals, parks, public health? Is it to cut wages? THAT IS THE LAGUARDIA METHOD.

services, increase wages to meet the rising cost of living—AND FIND MONEY TO MEET THE INCREASED EXPENSES? That is the Socialist demand.

But where will the money come

There are two sources that have not occurred to the LaGuardia administration—or if they have, the Mayor dare not try them, his back-ing being what it is.

ONE is a steeply graduated system of taxation and super-taxation.
WHY NOT? The bankers profited and are still profiting to the tune of hundreds of millions on the city's debt to them, money loaned to the city on the basis of hugely inflated valuations since collapsed. The Mayor wants some sort of dictato-rial power. Very well—why not to -why not to use the powers of taxation to effect a readjustment of values in the public interest rather than to add to the burdens of those unable to bear them?

He won't do it; it is our job to reate the public sentiment for it.

TWO, a drastic revision of the whole debt structure; the city's debt being \$2,294,688,191 UPON

The bankers have an agreement The bankers have an agreement with the city by which they promise to help New York over the shoals ON CONDITION, among other things, THAT THE DEBT SERVICE AS A FIRST CHARGE IS NOT DISTURBED.

Very well for an administration that would rather slash wages of street cleaners and discharge men over 70 than risk a fight with the

But are the masses of New York satisfied that the bankers continue to get their blood money IN FULL? Everything else has been revised downward—foreign debts, private downward—foreign debts, private debts owned American bankers by German industrialists, wages, sala-ries, the standard of living. Every-body else has had to take drastic cuts, from governments to the mass of working people and jobless.
WHY NOT THE BANKERS?

They think they have the law on their side. Maybe they have, but ways have been found in the past to induce people not to be so fanatical in their legalistic demands in critical times.

For example, many cities in other countries conduct municipal banks.
WHY NOT NEW YORK? Why cannot our city do its own banking, and offer banking facilities to all our citizens? A mere threat to take such a step would bring the banks to their knees to consent to a drastic revision of the debt struc-

The last speaker, James Oneal, editor of The New Leader, demon-strated that war has been immi-nent since the adoption of the peace treaties. The danger of war will continue as long as capitalism survives, he pointed out. "Even the United States has made some original contributions to the imperialist philosophy which had been accepted by the old German and other European imperialists." He cited Admiral Mahan's im-

perialist philosophy, the arrogant imperialist speeches in the Re-publican convention of 1900, and the modification of constitutional theory by the Supreme Court when the United States became an over seas power. Turning to the present period, the speaker said that our main hope lies in the Socialist and labor organizations of the world. Although in many countries they had been caught in the hysteria of war, grim disappointment at the fruits of the struggle should make the bonds of international oppo-sition stronger than in 1914, he concluded.

or dying. The Economic Conference is already buried. As for the ence is already buried. As for the League of Nations, nobody knows how long it will survive the on-slaughts upon it from every side. There is a danger to peace in the Hitler situation. The French mili-tary establishment is also looked upon with fear by the rest of Europe.

"Socialists must be on their guard against minimizing the psy-chological, emotional and political chological, emotional and political elements in the war situation." In concluding, Page stressed the ne-cessity of building up a psychology of resistance to war which would help to stem the tide swirling the world into a new conflict.

Nathaniel Peffer, for eight years a resident in the Far East as editor and foreign correspondent and author of "The White Man's Dilemma" and other volumes, devoted his talk mostly to the situation in the Far East. "The conflict there, ering for many years, is coming

to a head," he declared. "Japan and Russia may fight this spring— or they may wait. In all proba-bility, they will not wait long."

Fannie Hurst, novelist presided as chairman and Rabbi Stephen S. Wise acted in the capacity of honorary chairman. The debate was held under the auspices of the Brooklyn Forum, with Harry Kritzer and Abe Belsky deserving great credit for its success.

Dr. Holmes, his shock of irongrey hair bristling as his silver-tongued voice boomed out over the audience, advanced the theory that civilization is doomed if the present capitalist system continues. "Only through the socialization of our economic forces can we hope to drive out the cancer that is now barbarism when it does come."

Clarence Darrow, characterized by Miss Hurst "the arch-rebel," and apparently suffering from a bad cough, was forced to use a specially-installed microphone. In marked contrast to the brilliant oratorical style of his adversary, Darrow chatted informally with Darrow chatted informally with Darrow chatted informally with his audience. "This isn't much of a debate," he declared. "Dr. Holmes and myself agree on too many points. We are doomed if the present capitalist form of govern-ment remains. Our only real dif-ference lies in that Dr. Holmes is optimistic and I am pessimistic on whether Socialism is adopted be-fore we revert to barbarism. "Picture it as a race, if you will. N.E.C. HONORED SUNDAY

THE National Executive Committee of the Socialist Party is

THE National Executive Committee of the Socialist Party is holding its quarterly meeting in New York during the weekend of Saturday and Sunday, January 27th and 28th.

The local Socialists are tendering a dinner in honor of the members of the committee Sunday evening, January 28th, at the Park Palace, 110th Street and Fifth Avenue.

Every party branch in the city is expected to reserve at least one table, which means that there will be a representation of at least ten members from each branch. In addition, many unions and fraternal organizations will send delegations.

The dinner will be the largest and most impressive held by local Socialists in many years, it is expected.

The last N.E.C. dinner held in New York was in 1929, which coincided with the 60th birthday of the late revered Morris Hillquit, and it was in the nature of a vast birthday party to the party's beloved leader as well as his welcome by the party in his newly-elected capacity as National Chairman.

The guests of honor Sunday will be National Chairman Leo M. Krzycki and N.E.C. Members Daniel W. Hoan, Jasper McLevy, Lilith M. Wilson, Darlington Hoopes, Powers Hapgood, Albert Sprague Coolidge, Norman Thomas, James D. Graham, John C. Packard and John M. Collins, and National Secretary Clarence Senior.

Reservations are to be made at once at the Party Office, 7 East 15th Street.

BAZAAR TO BE **HELD MARCH 23-25**

THE Socialist Party has arranged an International Bazaar to take place Friday, Saturday and Sunday March 23, 24 and 25, at 7 East 15th

Street.

A large committee, representative of the entire city organization, has been formed to handle the various phases of the bazaac, and the outlook is good for a very successful undertaking from both a financial and organization point of view. Plans have been devised by which the various bracches can share in bargain sales, music, dancing and the profits. The three-day bazaar festival will be days of festivity, bargain sales, music, dancing and general good fellowship.

Communications are being issued

Communications are being issued to all branches in the city and Socialist organizations in the outskirts of the greater city; also to labor unions and fraternal bodies, to cooperate in making this bazaar the most outstanding and success. the most outstanding and successful affair in years.

All information in connection with the projected affair will be supplied in personal or by mail by the International Bazaar Committee, 7 East 15th Street.

On behalf of the Organization Committee of the Socialist party of Kings County, Emil Bromberg, chairman of the committee, has been making a tour of the Brook-lyn branches during the winter

lyn branches during the winter season.

Bromberg visits six or eight branches a week, addresses them on work that is going on, instructs the newer branches on their activities and in general coordinates party work in the various sections of the borough.

As a direct result of the work of Bromberg and the Committee a number of new branches has been organized, and older ones strengthened.

The present task of the committee is to prepare the branches for nominating conventions and to se-cure the strongest possible local ticket for the 1934 elections.

Ladies' Garment Workers to Start Their Own University

I.L.G.W.U. Resumes Notable Educational Work Under Direction of Fannia M. Cohn—Centers in All Cities.

WITH the tremendous recent growth of the International Ladies' Garment Workers' Union under the leadership of President David Dubinsky, the activities of the Educational Department have been widely extended.

Miss Fannia Cohn, Educational Director, in a special statement to The New Leader, outlines the program of her department.

"Our educational program." she

"Our educational program," she says, "is already beginning to func-tion. We have been busily engaged for the past few weeks in starting our activities in various new cen-ters, and, in accordance with our program, there will be discussions of some of the complex problems of our industry, such as the jobbing and the contracting system, and of the permanent union features such as our agreements and the various codes adopted for our trades. This will involve, of course, a discussion of the NRA.

Our program also includes diseussions of the economic, social, and political problems of the present turbulent period and of the plans suggested for leading us out of the current depression. In the headcurrent depression. In the head-quarters of some of our local unions, groups are already meeting weekly to review the highlights of past and recent history of our Inter-national Union. This should help them to understand our past strug-gles for the right to organize and to compare these with our present position, aiding them not only to visualize the future, but to work

for it.

"To serve as guides for discussion leaders and lecturers, we are now revising the outlines on (1) the economics and problems peculiar to our industry and our International Union; and (2) the history and the structure and functioning of the I.L.G.W.U. from shop meeting to the final authority, the biennial convention; (3) the history of

"In many places the Educational Department has made arrange-ments with local labor colleges and classes for those of our members who wish to study more intensively. Plans have also been made with Brookwood Labor College to present in the various localities specially prepared dramatic skits.

"Our members everywhere are to have in the headquarters of each local union a room equipped for education and social activities. Such rooms are to be attractively furnished, with reading tables, book cases and supplied with current literature they can read there or

"Workers' education again comes into its own in the I.L.G.W.U. There was never a greater need for it. It is destined to make its contribution to the Labor movement by assisting the local union in its in portant task of helping our new recruits to interpret their daily experiences, to be come conscious members of the great army of or-ganized labor to which they belong, to function intelligently and ef-fectively within their local union, their International, and the labor movement, in support of both immediate achievements and wider goals, and finally, to develop a sound workers' ideology and new social and cultural values."

At the same time the Dress-akers', Local 22, is developing its ducational educational work, and President Dubinsky will lecture on "The Future of Unionism in America," at the Washington Irving High School, New York, Sunday night at the opening of the educational forum of that branch of the International.

Shipping Clerks Find Many Code Violations

Amicus Most, president of the union, said, "It is almost unbeliev-

Hardest-Working Railway Workers Cruelly Exploited and Have No Redress—A. F. of L. Head Demands They Be Placed Under Emergency Transportation Act.

The Socialist Commonwealth

OCCASIONALLY we receive inquiries regarding precise details of the organization of the future Socialist society. Each is to be fitted into its proper place and when completed the net result will be a Socialist Commonwealth. However, we have no such final

a Socialist Commonwealth. However, we have no such management of the social struggle,"

In his book on the Erfurt Program, "The Class Struggle,"
Karl Kautsky wrote that "A new social form does not come into existence through the activity of certain especially gifted men. No man or group of men can conceive of a plan, convince people by degrees of its utility, and undertake the construction of a social edifice according to their plan."

That is true of all periods of fundamental social change. This does not imply that Socialists have ignored these problems. On the contrary, Kautsky in the work mentioned de-

lems. On the contrary, Kautsky in the work mentioned devotes an entire chapter to them and the book is still worth reading although published 42 years ago. For us of the living generation these problems are speculative and provisional. Our task is one of education and organization to win power so that we can socialize production and distribution.

Greeley's View of Depressions

IN his lecture on "Reforms and Reformers," Horace Greeley presented some economic contrasts and contradictions of the industrial depression of 1857. This has a modern ring.

"I write in sad and chill November... The shop windows and doors are choked with ship-loads of wares adapted to

their (workers') urgent physical needs,-everything requisite their (workers') urgent physical needs,—everything requisite to eat, and burn, and wear. All these were produced by labor; and the needy are most willing to give labor in exchange for them. The owners, on the other hand, want to sell them—bought them for that purpose, and must break if the end is not attained. Yet here the two classes stand eyeing each other—a thin plate of glass dividing them—the man within anxious to sell, and he without eager to buy—yet some malignant spell seems to keep them still blankly, helplessly, staring at each other.

each other.

"Perhaps a mere combination of the hungry, thin-clad thousands who wishfully, fruitlessly gaze into those windows, would secure the desired result; for here are persons of all kinds as well as grades of ability anxiously seeking work—that is, seeking opportunity to coin their own exertions into the bread and clothes and shelter they so pressingly need. Say there is no work f.r them, and their own hunger and rags give you the lie: they themselves collectively afford that very market for their labor for want of which they severally shiver and famish.

Two Civil War Shots

WHILE this historical mood is upon us, let us call your attention to a tragic human episode in the passing of the old slave order. Edmund Ruffin was a proud and cultivated Virginia owner of plantations and slaves. He fired two shots in the Civil War, the first one at Fort Sumpter, the beginning of the war, and the second one through his head when his beloved regime collapsed in ruin about him! Like many others of his class he believed that his social order was perfection and that Northern vandals had wrecked all hopes of social peace. Greeley and the utopian Socialists of the North were disgusting to fine old gentlemen such as he.

peace. Greeley and the utopian Socialists of the North were disgusting to fine old gentlemen such as he.

Before his passing Ruffin had contributed something to that notable literature of his class that presented human bondage as the solution of all social problems. His "Political Economy of Slavery," like the writings of Hammond, Fitzhugh, Stringfellow and others, included a scathing criticism of northern capitalism. He called labor subjection in the South "domestic slavery" and in the North "class slavery."

Ruffin contended that Northern wage workers were dependent upon factory owners for a living; that competition between workers reduced wages to a subsistence level, rendering them dependent upon the owners of capital. Therefore, wage workers had to be content with a small wage while the excess produced above this wage enriched the exploiting capitalists. He had no objection to exploitation but he protested against the hypocrisy that criticised direct exploitation in the South but accepted indirect exploitation in the North. In both sections, he contended, leisure, the cultivation of the mind, the refinement of manners, and the patronage of literature and the arts were impossible without a working class subjected to toil. Negro bondage had one advantage over wage bondage. When textile plants closed in the North workers were turned advit to starve; when slaves working in tobacco

subjected to toil. Negro bondage had one advantage over wage bondage. When textile plants closed in the North workers were turned adrift to starve; when slaves working in tobacco plants in Virginia could no longer be employed their owners provided shelter, clothing, meals and medical attendance. Ruffin's view was supported by other southern writers and there was no real effective answer to them.

Edmund Ruffin's two shots fired in a titanic class struggle were the beginning and end of it. If the old aristocrat is peering through

HOW HITLER FOLLOWED

The old saying that "history repeats itself" is not true, but occasionally one will find a striking parallel in events of two epochs. Karl Marx in his "Eighteeenth Brumaire" described the usurpation of power by Louis Bonaparte in France, elected President of the Republic in 1848, when he made himself Emperor Napoleon III in 1851, a usurpation "ratified" shortly after by a referendum vote. When he, in utter disregard of his oath to uphold the constitution, decided to strangle the republican constitution, he knew that the enconstitution, he knew that the entire armed power of the state, the army, the police, the gendarmerie, were behind him, and opposed to him were only the political parties, fighting each other, paralyzing each other, partly too gullible, partly outbluffed and consequently incapable of effective resistance.

The world was amazed how asily the manteau of power could e bestowed upon an ignominious adventurer.

But despite the fact that he was in control of all bayonets and can-

Unnerved by the years of unrest and misery, and besotted by a propaganda that had sunk to the lowest level of unscrupulousness, a considerable part of the people was like a sick man who in description runs to a quack when peration runs to a quack when the physician seems to prove ineffectual.

Even if the lavishly promulgated phrases of "national honor" and "community of the people" should not pull satisfactorily, millions would nevertheless vote "yes" the capitalists who perceived in the new man the most reliable sentry in front of their vaults, the manufacturers who hoped that through him the threatened economic crisis might be averted, the bourgeoisie whose meager savings ran through their fingers, and also many laborers who were dissatisfied with the republic because it had not kept its promises, and especially the farmers who had been en-chanted by agitators of the bandit with all sorts of promises—tax

The Workers Cheered Hitler They Were Told When to Cheer

A DOLF HITLER chose to make his final appeal for votes in the November 12th "election" at the Siemens works in Berlin, delivering his harangue from a huge dynamo to the workers assembled before him. A picture of Hitler making the speech to the vast audience of workingmen was printed in every paper in Germany, as well as the text of the speech. The speech was broadcast

throughout Germany, and every "loyal" German was instructed to listen in on pain of heavy penalties. The fact that a proletarian audience assembled to hear the Führer just before the balloting was strongly stressed by the Nazi spokesmen, to indicate what they alled the working class character

of the Nazi regime.

The pose fooled no one, but there is now available definite proof of

the methods used by Hitler's hoodlums to create the outward effect of working class support for his murderous regime. No worker was allowed to enter

the meeting place without a card, upon which detailed instructions were printed. The instructions provided for "Entrance to the dynamo hall only in a closed file, bearing the number . . . and only in work-ing clothes (not brown shirt). . . . In the latter part of 193° a commercial organization took over the paper, leaving 49 per cent of the ownership in the hands of the Labor party and pledging itself to continue the old editorial policy.

It is also obvious that those who favor some rigid tactical formula regardless of objective conditions will have both to approve and oppose the Spanish Socialist Party because it has followed not method but every possible method within the range of Socialist tactics.

What made this possible in

By James Oneal N concluding this consideration of Socialist tactics and how they have been influenced by changing material conditions in an abnormal period, the writer has been able to consider only some basic factors because of the limitations of space. In reviewing tactics in nine nations last week it is evident that they varied throughout Europe and within each nation according to than each nation according to changing conditions except in Italy and Germany. In these two countries opposite policies were followed and yet the workers of

both nations met defeat.

Belgian Socialists Reject Coalition

"POPULAIRE," principal daily of the French Socialists, in its issue of Jan. 4th, reports of a new coalition offer tendered by the Belgian government to the Socialist leaders. The offer was made to the president of the Workers' (Socialist) Party, Emile Vandervelde, and was promptly turned down

The Socialist Party, declared the veteran Socialist, will observe strictly the decisions of its last congress. It will not consider participation in any coalition government unless each and every partner agrees to the "Plan of Action," the program of immediate realization of socialization recently adopted by the party. And since the present ruling parties are not ready the party. And since the present ruling parties are not ready to accept such a condition, the Socialist Party will continue its general attack on the government and hopes to achieve its general attack on the government and its objective in the next general elections.

its objective in the next general elections.

These popular elections may not be far off. The present conservative government is a minority government. It is able to exist only because a few Liberal deputies tolerate it. Because of this the Cabinet leads since the last general election a very precarious existence. The conservative premier, de Broqueville, has proposed many times to the 70 Socialist deputies a governmental coalition. But it was refused each time. The latest rejection was even more emphatic. For the party is bound now by its decision not to accept any governmental collaboration except upon the basis of the plan of immediate socialization in all its details and by all the partners to the coalition.

French Socialists Discuss Immediate Socialization

THE "Plan of Action" of the Belgian Socialists made a strong impression on all European comrades, "Le Popu-laire" of Paris, "Het Volk" of Amsterdam, "Die Arbeiter-Zeitung" of Vienna, the "Daily Herald" of London and the "Neue Vorwärts" of the German Social Democracy in Karls-bad—all of them treat the "Plan" as a rare historic event in the annals of the international Socialist movement. Their

bad—all of them treat the France in the annals of the international Socialist movement. Their comment is very illuminating and I may have to return to them in our next issue.

It found, however, its greatest echo in France, where the party leaders, Leon Blum and Jean Zyczmski, wrote a seriest of articles about this plan. What's more, the party decided to imitate the Belgian comrades. The National Executive Committee of the party, at its session of Dec. 27-28, elected a committee of six to prepare a similar plan for France. A general draft of this plan of immediate socialization will be ready for the coming convention of the party. The convention of the party. ready for the coming convention of the party. The congress opens Feb. 11th and the plan is one of the three points on the agenda.

9 Communist Deputies Turn Socialist

THE same session of the N.E.C. of the French Socialist THE same session of the N.E.C. of the French Socialist
Party considered the offer of the 9 independent Communist deputies and their "Party of Proletarian Unity" to
join the Socialist Party. Paul Louis and his Communist
friends wanted to know the conditions under which the S.P.
would admit them. The answer was: Welcome! You can join
on the same basis upon which all the Socialist groups
and parties united into one party in 1905, namely "freedom
of opinion" accompanied by "unity of action."

With the 9 Communist deputies joining the party, the French
Parliament will have 139 Socialist deputies to 10 Communists.
What a change in the relative strength of the two movements

What a change in the relative strength of the two movements since the Congress of 1920, when the Commintern captured the Socialist Party, took over an overwhelming majority of its membership, got hold of its entire press, its local and national headquarters, homes and institutions together with a majority of its elected representatives! A little more of such progress and even the highly emotional, revolutionary and anarchosyndicalist French worker will forget there ever was a Comnunist Party in France,

The Austrian Drama Approaches Its Climax

A RECENT decree issued by Dollfuss abolished Shop Council elections in all the industrial establishments of Austria. The members of the Shop Councils will in the future be appointed by the government instead of being elected by

be appointed by the government instead of being elected by a universal, direct, equal and secret ballot of the workers.

This order drew an immediate answer from the organized workers. Wage earners and employees of all the factories and shops adopted on Jan, 5th identical resolutions of protest against the appointed Shop Councils and expressed their determination to boycott them. In the resolutions the wage earners also reaffirm their loyalty to the Socialist class organizations of the workers.

The persistence of the working class to answer with a general strike and civil war any attempt of the present semi-Fascist but anti-Nazi government to deprive labor of its three fortresses—Free Trade unions, the Socialist municipality of Vienna and the Social-Democratic Party—found a new expression at the first session of the newly elected National Council of the party.

The 698,181 members of the party recently elected this National Council of 60. No officers of the party or the unions, and no public officers of any kind (congressman, assemblyman, alderman, etc.) could be elected to this new party institution. It consists at present of 47 workers, 10 employees, 1

that sort or advice ringing in their ears.

And what? So they grew up to find the most highly bepraised national administration in decades spending hundreds of millions of dollars as a bribe to farmers not to work, to destroy their crops, plow under their produce, to slaughter their hogs and bury the carcasses, to go easy; urging the nation .o work not quite so hard, to loaf 'urselves into riches.

And so, Fellow-Citizens, vote for an administration that will be economical and save money....
You know that line, too. And you

away in the savings banks so that some time you might grow up and become a banker and be able to play golf, too.

And here we have an administration seeking to spend the country out of the red, that rejoices in piling up ten billion in additional debts, that urges people not to save money but to squander it.

When the night of depression settled down upon us, and a lot of

settled down upon us, and a lot of us began losing our jobs and tear-ing our hair, we were told that we should have saved our money so that we might have had something for a rainy day. That is, for a while. Then we were told that we ought to take the rubber band off the bankroll an shoot the works, that the way to get back prosperity was to spend all we had. And a lot of people did just that—and found themselves broke just before they, too, lost their jobs and had nothing left to fall back on.

Every dear little morality that used to e held up as a high and a noble ideal was torsed into the garbage can and we were told to do something diametrically opposite.

Save our money and spend it: work hard and create wealth, and loaf on the job and destroy what we make; save our money and be

we make; save our money and be thriftless and looney.

Who's crazy now?

What the world needs is goods to eat, wear, live in and otherwise enjoy. When we have what we need, we cught to have brains enough to stop. But we haven't. We go right on until we stop because we have too much, and the professional moralisis tell us to try

somersault.

The whole issue of the morality with which our lives should be guided should be referred to a mittee of Billy Sunday, Charles M. Schwab, Henry Ford, Bruce Barton and the editor of the Saturday Evening Post. Then when they render their report the order of business should be to toss it into the sewer and to adopt a resolution to use our brains and work for a system of Socialism.

Then we can teach our dear little grandchildren how smart we were in the Grand Old Days of the Goofy Era.

"When you inquire into the causes of the counter-revolutionary successes, there you are met on every hand with the ready reply that it was Mr. This or Citizen That who 'betrayed' the people. Which reply may be true or not, according to circumstances, but under no circumstances, but under no circumstances does it explain anything—not even show how it came to pass that the 'people' allowed themselves to be thus betrayed. And what a poor chance stands a political party whose entire stock in trade consists in a knowledge of the solitary fact that Citizen So-and-So is not to be trusted." Historical materialism is the philosophy of the proletariat. Against it is ranged the ideological, the theological and even the impressionistic interpretation of historical events. The latter three points of view too often find a place in our own movement despite the fact that they are the intellectual weapons of the ruling classes. They all have an element of mysticism and it is no accident that both German and Italian Fascism turn back to other centuries for their intellectual artillery.

An executive in 1924 our party had to make a that decision. An executive in Europe could not have made that decision for us. Its members would have known little of the historical grounds of that movement. Collapse Threatens C.W.A.

Wages Being Drastically Cut

DRASTIC cuts in civil works pay, through reducing hours, focused public attention on the danger of early collapse of the civil works emergency program and marked yielding of the Administration to low wage employers interests which have been protesting against civil works pay scales as "too high."

While lack of money was given as the primary reason for re-trenchment in the civil works program, it is known that complaints against civil works wages were another factor. Civil works wages, low as they have been, were higher than the pay author-ized under some NRA codes and

also higher than farm wages.

President Roosevelt himself said President Roosevelt himself said in a press conference that complaints had poured in from all sides against "high" civil works pay and that Harry L. Hopkins, Civil Works and Relief Administrator, was "correcting" this condition by lessening hours instead of cutting rates of pay The result, however, is the same as far income is concerned. The pay of many was cut to \$4.50 a week in small communities and not much more in large cities. This pay is hardly conducive to early "recovery."

stifle our own thought and initiastrice was tive, making us wooden automatons acting as a button was pressed acting as a button across the Atlantic.

"Though not in substance," wrote Marx and Engels, "yet in form, the struggle of the proletariat with the bourgeoisie is at first a national struggle. The proletariat of each country must, of course, first of all settle matters with as own bour-geoisie." That still remains true. In "substance" the struggle is not a national but an international strug-gle; in "form" it must be fought out by the workers in each nation because they are on the battlefield, they must choose their methods, organize their forces and formulate their programs of action.

Variation in program and methods, unity of aim in all nations, and cooperation of the workers of the world for the realization of our international ideal are the essen-tials of an effective International. Even within each nation it often occurs that some variation in occurs that some variation in program is necessary because of the difference in economic regions. In this country a farmer program suitable to the great wheat belt would not be adapted for the cotton belt and a program for the latter would not be suitable for the fruit growers of Florida and California.

Unless we keep in mind the ma-terial and objective forces in which the movement must function, and especially the changes we face in an abnormal period, what appears to be a short cut to victory may prove to be a short circuit that will destroy us and render our struggle ore difficult than what it is

It is plain th... someone blundered if the civil works program is not estimating the money needed for continued. in estimating the money needed for the civil works program, which as a consequence faced breakdown. There was unnecessary delay in asking Congress for additional funds; nothing was done the first few days of the session. The an-nouncement January 18 that the program was in danger of collapse in a few days brought action and the President this week asked an the President this week asked an appropriation of more than a bil-lion dollars to carry on to June 30.

MILLIONS OF TOILERS TO BE DISCHARGED

Administrator Hopkins admitted there had been a "bad guess" as to the size of payrolls and average pay. A study of CWA finances re-vealed there was barely enough wealed there was barely enough money to carry the program through another week. It had been planned to carry it to February 15 and then gradually "taper" it off. Hopkins cut the work period from 30 to 24 hours in cities and 15 hours in smal towns and rural communities. Job giving under the program was ended immediately and purchase of further supplies was stopped.

The administrator said he had The administrator said he had estimated the average weekly pay roll on a basis of \$12 per person "It ran that way for a while," he added. "Projects calling for skilled labor came in and the average wage jumped to \$14.37. This indicated we were running behind from \$8,000,000 to \$9,000,000 a week."

Hopkins expects to return employment to 30 hours a week n as funds are available. as soon as funds are available. It is planned, however, to reduce the civil works force 1,000,000 men every week after February 15. What will become of the men and women laid off is not explained. Even the Administration officials must know that private employment will be unable to absorb them, barring a miraculous sorb them, barring a miraculous jump in business and industrial activity.

Curtailment of the civil works program brought a tremendous lood of protest. Senators and Repnood of protest. Senators and Rep-resentatives joined in the protest and Senator Dill of Washington declared the program would not only have to be continued but enlarged with greater inheritance taxes to pay the bill. He added the project should be less permanent.

Dill was one of the few men high in Washington who have ventured to mention publicly the need of continued government work relief. From the President down, officialdom has professed confidence that expected business recovery would absorb the unemployed. It is true the President may have changed his mind since his earlier utterances, as he has stated that civil and public works have a definite place in his long-term plan, involving a possible expenditure of \$500,000,000 yearly out of current revenues when the budget is bal-

anced again. anced again.

The general alarm over the curtailment of civil works was reflected by the executive committee of the United States Conference of of the United States Conference of Mayors who said warning had been issued to all municipalities that "the Civil Works Administration would begin tapering off." The statement denounced the hour reduction order as the "first blow against 4,000,000 persons who have been given work at regular wages." It added that "30 cents an hour for 15 hours means 34.50 a week."

Mayor Walmsley of New Orleans, prominent in the mayor's confer-ence, predicted riots in many cities

ITALIAN FASCISTS ACTIVE IN U.S.A.

Nazi propaganda in the United States in recent months has somewhat overshadowed Italian Fascist propaganda here, which, however, is still going on, though more quietly than in the earlier years of

Mussolini's advent to power.

The spotlight again has been thrown on Fascist activities by the demand of a group of Washington anti-Fascists that the United States Government deport Piero Parini, formerly head of the department of propaganda under the Mussolini dictatorship. Parini arrived here not long ago, ostensibly on private business. A petition presented to the Department of State by the Washington group charges that Parini is really here to push Fascist propaganda and that he is urging Italians in the United States to maintain allegiance to the Musso-lini government. The petition de-clares that an organization already

clares that an organization already exists here with the avowed purpose of spreading the creed of loyalty to Fascist Italy.

The Washington anti-Fascists are prepared to back up their charges with documentary evidence. They point out that Socialists and organized workers have a direct interest in preventing the spread interest in preventing the spread of Fascist ideas in America, as Socialism and trade unionism been as ruthlessly destroyed Fascism in Italy as under Hitler's brand of Fascism in Germany.

CUTTING WAGES OF FEDERAL WORKERS

The fight for restoration of Federal workers' pay seems lost for the present, and the government will continue to cut the pay of its own employees, while strivof its own employees, while striving to raise pay in private industry by means of the NRA. On the specious plea of "balancing the budget," the government is doing exactly what it condemns when done by private employers. The budget is no more balanced now than it was when the pay cuts went into effect, but a little thing like that doesn't phase the government's "economy" advocates.

The House showed, by its vote on the so-called gag rule, made to prevent a vote on the question of eliminating the wage cuts from an appropriation bill, that it favored

appropriation bill, that it favored intinuance of a 10 per cent pay it, as urged by the President. abor will continue its fight in the Senate for restoration of Federal pay scales, but early "ictory is not sight.

Friends of the government Friends of the government workers can gain nothing by kidding themselves about the pay cut situation. It is well to take into account that apparently a great body of public opinion favors continuance of the lower government salaries. Workers in private employment have had their pay cut so drastically that most of them can't get very excited over a 10 or 15 per cent cut in Federal pay. It is true that enforced furloughs It is true that enforced furlo have brought the cut to as high as 30 per cent in the case of some Federal workers, but even this is low compared to the pay slashes in private employment. Then, too, most of the government workers have kept their jobs, while workers private in private industry have been laid

off by the millions.

So it is not strange that people refuse to get indignant over Federal pay cuts. Many of them feel that it won't hurt the government workers to experience a little of what millions of other workers

How CWA Jobs Go to Good **Democrats**

That's the Way It Works Out in West Virginia—See Your District Leader and He'll Fix It for You.

By J. F. Higgins State Secretary, Socialist Party of West Virginia

THE CWA job-hunter finds that politicians hold the work key. A plaintive cry is heard on every side, "I need a job, but I don't know any politicians. Things don't look so good for me." In West Virginia every Things don't look so good for me." In West Virginia every Democratic politician who can swing a block of votes is snugly berthed in the offices or in one or another of the Departments of the CWA. These appointments ments are made regardless of ability of the appointees.

Estimates are that only about 20 per cent of the jobless of this state are at work on the different projects. No new jobs are given the clamoring jobless unless they have the approval of their Democratic ward heeler.

Some of the workers hired in December, and summarily fired for political reasons, are unable to get their pay checks. Some of these unfortunates go twice a day to CWA headquarters seeking their pay. They are generally told to come back the next day when their checks will be waiting for them, but the next day finds no check

forthcoming.

Day after day these unpaid workers besiege the offices of the CWA only to hear tomorrow, tomorrow. The rankest favoritism is shown and party politics are being played to the hilt. Many persons have been put to work by their Democratic political overlords who absolutely

put to work by their Democratic political overlords who absolutely do not need the work.

An aged and well known Socialist of Lewis County, in his effort to find why he was not called out for work, was told by a CWA official that "If it wasn't for you damied radicals the country would not be in the shape that it is in."

The procedure to get a job is something like this: after being registered the worker must go to the local Democratic leader and swear undying fealty to this henchman, to the Democratic party, and faithfully promise that every voting member of his family will cast a straight Democratic ballot in the next election! If the local politician approves of the applicant he is told to go back to CWA headquarters. In the meantime a telephone message is received at the office telling the officials to nut the applicant to sage is received at the office telling work. He is called for work the next day. Need of work by applicants has little to do with landing

This shameful mal-administration of the CWA is an eye-opener to those unfortunates who hoped to and deliverance from grinding overty in this measure. Discon-ent and dissatisfaction with it are find rife. Frequently, Government In-vestigators come to the different offices in this state, but as they invariably take the statements of rife. the maladministrators they always

report everything in ship shape.
The state press also is a party
to suppressing the news. In glow ing terms they report the CWA one hundred per cent efficient, that all the jobless are being taken care of, that all are receiving fat pay checks each week, and that the 'Blue Eagle' honks high.

have gone through. They do not see the inconsistency and hypocrisy of the government's policy, and they fail to recognize that instead of "promoting recovery," the government's policy is a factor in represent tarding it.

In this folk-drama of life in the
back country of Georgia, a pathetic, even tragic, story of "whitetrash" days is unfolded amid customs so alien, so hard for us to
accept as actual, that the tension
lapses to the easier flow of a picturesque, even amusing piece of lapses to the easier flow of a picturesque, even amusing piece of local color. Although Jeeter Lester wants desperately to hold on to his father's land, everything else about him is so shiftless, all the usual standards of honesty and decency and marital and family love are so unconcernedly disregarded that the action seems to take place in a sort of back-wash of nowhere.

When Grandma Lester disappears, perhaps caught in the field-fire, perhaps unable to hobble out of the sedge—somewhere nearby

fire, perhaps unable to hobble out of the sedge—somewhere nearby dying, her son remarks: "I'll go out and take a look around for her, one of these days." He is the head one of these days." He is the head of a family in which one boy marries an ardent woman preacher so he can blow her automobile horn (incidentally, he runs over and kills his mother) and one girl prefers running to Augusta (there, no doubt, to become a prostitute) to sleeping with her husband.

In the midst of this curious melange of pathos and shiftless-

In the midst of this curious melange of pathos and shiftlessness, we note the ownership of the land passing from the pioneer who settled it to the squire who spread slaves over it, then to the bank. And in the midst of an excellent company that carries this tragedy in a mud-hole, we watch Henry Hull in one of the most effective characterizations of recent years, as the shiftless old farmer who cannot earn a living, but will die on the ground he was born on, and hope not to be laid in the corn-bin, where the rats will eat off his face. where the rats will eat off his face.

Meantime, his son drives around breaking off parts of the woman-preacher's new automobile.

Boris Karloff brings his newes thrill characterization "The Ghoul" to the Rialto Theatre with Dorothy Hyson and Anthony Bushell comprising the romantic interest this chilly mystery drama. Although "The Ghoul" is less grue-some than some of the other pict-ures Karloff has starred in, it is said to be not less effective in its

drama.

The story by Frank King and Leonard J. Hines, concerns an Egyptologist who has a jewel stolen from a tomb, which he believes can bestow the blessing of eternal life. He asks to be buried with the jewel clasped in his right hand. Others are anxious to secure the jewel and immediately following the professor's death there are many complications. The climax of the picture is the professor's return from the tomb when things get into a turmoil.

Norway (Lie), as well as the Norway (Lie), as well as the leaders of the ruling Socialist parties in Czechoslovakia (Soukup, Stivin, de Witte), Denmark (Jörgensen) and Sweden, travelled especially last October to Vienna to tell the Austrian workers that tell the Austrian workers that Labor in their countries is ready

Labor in their countries is ready to help them.

In expressing their solidarity with the Austrian workers, the leaders of international Socialism warned the Dollfuss government that their respective parties are exercising all the pressure they can on their governments with the object of preventing Hitlerism or Fascism in Austria. Some of them threatened with economic and financial boycott, others went still farther and intimated a possible farther and intimated a possible military alliance with Socialist workers of Austria.

And they could easily afford to be outspoken. For they knew that

in this case even the ruling classes of their countries, will support an intervention against a Hitlerist annexation of Austria. Neither France, nor Czechoslovakia or Italy could at present afford to have at their border a Hitlerized Germany with a population artificially in-creased by another 10 million.

C.W.A. Should Be Continued

RECENT visits to Cincinnati, O., Cumberland, Md., and Keyser, West Va., make me surer than ever that with all its faults, C.W.A. is what has been holding things together. It is ridden with politics; some of the jobs are a ridiculous form of made work; it is bringing no fundamental cure to our deep-seated diseases, but it is relieving human

but it is relieving human beings. It is highly im-portant that it should be continued unless and until something better can be done. It should not only be continued but the amount

continued but the amount of relief at the disposal of C.W.A. and F.E.R.A. should be increased far beyond the President's immediate proposals.

I have not set visited a place where there were not from half to four times as many waiting to get on C.W.A. as were already employed. A sound labor program for dealing with the immediate unemployment emergency ought

unemployment indemnity, with employers contributing, can be set up.

A government which can throw around money the way R.F.C. has been doing can take care of the unemployed. But, never forget, no care of the unemployed can take the place of the fundamental processes of socialization. What we have to do is not to redistribute the national income very badly by a policy of unemployed benefits and taxation, but to set up a properly functioning system.

FRANK CROSSWAITH and others have recently FRANK CROSSWAITH and others have recently called my attention to the fact that the Negroes are the chief sufferers. N.R.A. hasn't done much for them. They get second-hand attention under C.W.A. They form a large portion of the cropsharers of the South. They and their white fellow-sufferers are simply going to be driven off the land, perhaps to the extent of 500,000 to 800,000, by this policy of holding land out from cultivation and paying the benefits thereof to the landlords. The more need to keep up our work among these people and push it diligently. Especially must we give the best of support in New York to our staunch Harlem friends.

The Big Navy Program

OUR big navy program has to be considered in the light of its bearing on foreign affairs. Temporarily we have let up on imperialism in the Western hemisphere. Recognition of Cuba should be followed by a renunciation of the Platt Amendment that gives America a right to interfere almost at will. But no temporary renunciation of imperialism will mean much to the world when it sees us building up our navy when we are protected on both sides by oceans, have no unredeemed father-land to reclaim, and no particular enemies in sight. land to reclaim, and no particular enemies in sight. In every foreign war that we have fought we were the aggressors in the sense that we were not first attacked. Our armament simply increases the armament rate. It is not enough to make us safe against war or sure of victory in war. It cannot be enough against any conceivable combination of enemies. It is enough to keep up our own military spirit and to alarm our neighbors. Socialists and workers! Our great fight must be against this new race in armaments!

The Road to Power

FROM time to time I expect to comment on som of the interesting resolutions now being presented for Socialists' attention. A good place to begin is the widely circulated statement by a group which so far as my copy shows remains anonymous. It is a compact and well ordered document, Nevertheless it is an amazing—even an alarming—document from a Socialist standpoint. I quote three sentences: (1) "The road to power for Socialists is through preparation for a workers' dictatorship." (2) "We do not object to the establishment of the workers' state without violence, but we must be prepared for violence if it is necessary." (3) "Just as we are opposed to capitalist war, so are we opposed to capitalist solutions for war, such as the League of Nations, Disarmament conferences, etc., because permanent peace for the workers can only come after capitalism has been destroyed." On the basis of these opinions the authors believe that the Socialists can achieve a united front with labor and with the farmers!

Socialists can achieve a united front with labor and with the farmers!

Let us look at them. They do not say that what we want is a workers' democracy, but a workers' dictatorship. They do not call attention to the imperfections of what passes for democracy. They do not insist that we should put Socialism first rather than a mechanical concept of democracy that would be worth while. But they simply proclaim the Communist principle, and this in a country where inevitably a workers' dictatorship would be a dictatorship of one party against other workers' parties.

Which party shall it be, and how shall it treat the other party? Does not the dictatorial principle help to divide, not unite, Communists?

the other party? Does not the dictatorial principle help to divide, not unite, Communists?

What trust would farmers have in a workers' dictatorship when they know that the Russian workers' dictatorship, with all that can be said in its favor, by its mistakes in policy and blundering created a famine in the Ukraine and other fertile areas of Russia? There is no dispute that such famine was created, though there is a great dispute as to the magnitude of it. That famine is probably

famine was created, though there is a great dispute as to the magnitude of it. That famine is probably now over—thanks to some improvements in policy and to a good harvest last summer. It is not an example of the infallibility of dictatorship to invite farmers to join in urging it in America. Nor is there any proof at all either in this statement by Socialists or in world history that dictatorship rather than a proper expression of democracy is the line of progress for the workers now.

Still more appalling is the patronizing statement that we do not object to the establishment of the workers' state without violence. Again notice, our comrades do not say that workers have no right to renounce violence in a world that does not renounce violence. That would be a correct statement. They merely don't object to a peaceful achievement of a workers' state. As a matter of fact, unless a workers' state in modern times and under present conditions is achieved with a minimum of violence, it is not likely to be achieved at all. We shall go in for Dark Ages.

This everlasting threat of violence can have only

or Dark Ages.

This everlasting threat of violence can have only one effect, to scare away our own natural supporters and to play into the hands of Fascists who, while they may proclaim a little violence, have shown a genius in managing its psychological appeal that Socialists and Communists have lacked. And finally, one may well point out from a Socialist standpoint the imperfections and inadequacies of the League of Nations and the Disarmament Conference. But the standard of the League of Nations and the Disarmament Conference. say that we are opposed to these solutions for war, just as we are opposed to capitalist war, is the last way in the world to get a united front. It will alienate all those who want to do what they can even now to prevent particular wars while we seek to change the system that is the mother of war.

Perhaps our authors mean something more reasonable than they say, but their form of saying it is disastrous, and these mistakes in the way of saying things do much to vitiate the truth that is in their document. For instance, they have a pretty sound declaration on a trade union policy, but the way they say it is likely to alienate equally the A. F. of L. and the independent unions. All in all, were I a Communist, Fascist or plain follower of Roosevelt, I would want nothing much better than these particular statements I have quoted and some others that I might quote to go out and rouge the countries. veit, I would want particular statements I have quoted and some ountry that I might quote to go out and rouse the country not for Socialism and the Socialist Party but against As a Communist I should say: "If you favor not for Socialism and the Socialist Party but against them. As a Communist I should say: "If you favor our policy so nearly, why not join us outright or at least join one of our factions?" As a Fascist I should denounce the Red peril and make my denunciation sound reasonable. As a Rooseveltian I should plead that my way at least did not involve an acceptance of virtually unlimited violence under a dictatorship that is not even defined. If what I said was not a hundred row cont covered it would be a support to the said was not a hundred row cont covered it would be a support to the said was not a hundred row cont covered it would be a support to the said was not a bundred row cont covered it. was not a hundred per cent correct, it would be near enough to it to impress an audience. We are responsible as Socialists both for what we say and how we say it. And we have a vital appeal

to make to a real workers' democracy.
