White Wash At Glen Lake Doesn’t Go

The political wash-out by district court judges of conditions at the lakes has not been a great newsworthy event, but it is a matter of concern to those who look at the justice system with the hope that it will improve. The decision of the district court judges to allow the use of noxious water at Glen Lake is a setback for the efforts of the community to clean up the lake. The judgment was made by a few judges at the expense of the entire community. The decision was made without any public input or discussion. The community has a right to know why this decision was made.
