A VOICE OUT OF RUSSIA

Class Power

BY EUGENE V. DEBS

Do not allow any of the retail or wholesale merchants, the salesmen, the small manufacturers, the workers with their silly little unions to talk to you of class against class. That is a lie. It is a lie.

The class enemies have always been the masters of every situation. They do all they can to make the workers believe that they are the natural enemies of each other. They are the masters of the situation, and they use the workers to defend their own position. The workers must be educated to see through this deception.

The workers must understand that they are not divided by any close line but are all part of the same class. They are all exploited by the same masters. The workers must unite to fight against this common enemy.

NEWS AND VIEWS — A WEEKLY SURVEY

Edited by C. E. Rutenberg

Dr. Jekyll & Mr. Hyde: A tale about a man who finds his true self in his work.

The workers have nothing to gain through a decrease in the number of employees, as they are paid a fixed wage and the employment of part of their work would be beneficial to their overall production.

Democracy — A Comparison

Washington, D.C. — In the United States, democracy is often described as a system where the government is elected by the people. However, in practice, this is not always the case.

Under the Russian Soviet form of government, the workers are the source of political and economic power. Under the Soviet system, the workers are represented in the government by their elected representatives, who are responsible for making decisions on behalf of the workers.

The Berne Conference

The Berne International Socialist and Labor Conference has established a new organization to promote international socialist cooperation. This organization aims to bring together workers from different countries to discuss and coordinate their efforts in the struggle for a better world.

How the Spy Law Worked

The recently enacted spy law has enabled the government to prosecute individuals who are suspected of espionage. This law has been criticized by some as being too vague and giving the government too much power.

More Light on Russia

Evidence picked up by the Soviet government indicates that there is a very small minority of the people who are being influenced by the new Leftist movements in Russia. However, the government is keeping a close watch on all suspected activities.

Spartacists Make Appeal

A group of anarchists and socialists have issued a statement appealing for support. They argue that the current system is unsustainable and that a new society is needed.

New Trial For Socialists

The aftermath of the recent trials of socialists continues to be a topic of discussion. While some see it as a victory for the government, others believe that it is a smear campaign against political dissent.
