through Harry L. Hopkins, national director, arranged for the obtaining of coal, surplus foodstuffs and staples, out of a \$300,000,000 fund for the unemployed. This plan was endorsed by Eric Biddle, state director, who said that these surpluses would not only aid the unemployed, but would reduce unemployment by putting thousands of unemployed Pennsylvania coal miners back to work, which is consistent with the

Sees Danger In Local Help "However, through the efforts of a few misguided people it may be possible to so organize communities as to prevent the importation of these commodities into Berks county. The government, for reasons of economy, would probably prefer this. If any community assumes the duty of taking care of its own the government will gladly withdraw its help. The erection of a committee to take care of anticipated shortage would hasten, rather than retard, the withdrawal of government aid. Anticipation and prediction often promote realization.

"When any community assumes the duty of taking care of their own they have their greatest success at the time of the plan's inception. The committee is enthusiastic. Old clothing and wood are abundant. Local resources are being supplemented by government goods.

"But gradually government help is withdrawn; wood becomes more difficult to get; the supply of old clothing becomes exhausted and with it goes your enthusiasm. The unemployed no longer look to the government, but to you, for their existence. You have relieved the government of its duty, and when you assume the duty you also assume the responsibility.

CASSEL'S STORES SHOW INGREASE IN PROFITS

That Cassel's Stores, an independent chain of 35 food stores in and around Reading, is steadily increasing it's volume of sales and earnings, and that it is expanding by adding new stores to their chain, was revealed today in a statement made by Amos M. You imagine that you have a notion that you can go ahead Kulp, R. as individual units, as before, and "make money." But you Machmer, D. . 7,958 15,204 23,162 can't. Them days is went. You're going to "sleep" long enough, soon enough, anyhow; how about a little heart-comfort for a change, while here?

While you could hang on the former graft, O.K.—nobody by almost two to one, the vote becould stop you. But it's gone! It is only a few months since the expenditure of \$238,000,000 for naval construction was authorized as part of the public works program, but no militarist was ever yet satisfied with the size of his armament.

The result of our building program, of course, will be that the military leaders of Japan, England, and the other great maritime powers will likewise persuade their nations to increase their naval establishment and we will thus embark upon another armament race that may again lead to war.
