The Next War
How It Will Begin
Everything Ready - Only A Dress Rehearsal - New York Wiped Out - Aircraft Destroy British Factories

by Bertram D. Wolfe

TWO DAYS AHEAD, THE NEXT WAR is about to begin. The German and British armies have already been mobilized, and the German air force has been ready for several weeks in anticipation of the attack. The entire German population is aroused and eager for the outbreak of hostilities.

The plan of invasion is as follows: The German army will attack Belgium, Holland, and France simultaneously, while the British fleet will sail into the North Sea and attack the British coast. The German air force will bomb British cities and factories, causing widespread destruction and panic. The German navy will take control of the English Channel and the North Sea, preventing any British reinforcement or supplies from reaching the continent.

The British are completely unprepared for this attack, and their defenses are薄弱. The German air force will quickly overwhelm the British air force, and the German army will advance swiftly through Belgium and Holland, reaching the French border within days.

The British government is in a state of confusion and panic, with no plan in place to counter the invasion. The British people are being urged to take shelter in their homes and avoid contact with the Germans.

The war will be short and brutal. The British will suffer heavy losses, and their economy will be in shambles. The war will be a turning point in history, with the defeat of Britain leading to the eventual collapse of the British Empire.

The only hope for the British is to evacuate their citizens to safety and to mobilize their remaining forces for a counterattack. The British must act quickly and decisively to prevent the German victory.

The war will change the course of history, and the world will never be the same again. The next war will be the Second World War, and it will be fought with all the resources and technologies of the modern age. The outcome of this war will determine the future of the world for generations to come.

The war will be a检验 of the strength and determination of the British people. The British will rise to the occasion and fight for their freedom and their way of life. But the war will be costly, and the British will pay a heavy price for their stand.
