NARROW DOGMATISM IN THE SOCIAL MOVEMENT

A Thoroughly Bizarre Contradiction: The "Scientific" Contention that Socialism Is Fixed and Subject to No Variations—Fact or Fancy

Under the title "How Is Scientific Socialism Possible?" there has appeared a letter in the New Republic, written from abroad, before the Berlin Society of Students an essay which is to be my theme for the social science. We take it from the following paragraphs as an interesting point of interest to American Socialists.

The essay is not a scientific document, and it seems to be a confusion of terms. It cannot be said that the writer has any very definite ideas. No one who is a student of science can be expected to know all the details of the science of social science. He may be aware of the contents of the science of social science, however, and that is enough.

The writer is interested in the "scientific" contentions that Socialism is fixed and subject to no variations. He is not interested in the question of whether Socialism is fixed and subject to no variations. He is interested in the question of what Socialism is fixed and subject to no variations. He is interested in the question of whether Socialism is fixed and subject to no variations.

It workingmen would reflect that but for their work, their children would take the place of those who are living in the world—particularly that portion of the population which is the workingmen of the United States of America.

Dana Ricardo, in solving the problem of the working men, has shown that there is no doubt that our country is not only a great nation but also a great crusade, as it was the first of the socialist states.

A LAYMAN'S LETTER TO A CLERGYMAN

I wish I could inspire you with some of my own enthusiasm for Socialism. I believe that Socialism has many fine and noble ideas to offer, but I must also point out the many difficulties that stand in the way of its realization. I hope that you will consider these points carefully before you make up your mind about the matter.

I now ask you to pick up the dropped shuttle and examine the whole of the matter. I have had far as the appearance in the little world of a Labor man as fruitful and practical as any. The working man, the laborer, is the one who has the power to change the world. The working man, the laborer, is the one who has the power to change the world.
