THE PROLETARIAT.

THE INDIVIDUAL CITIZEN.

Editorial Shearings.

After all it is necessary to recognize the fact that the laboring class not only is the foundation of life in society but it is also the source of its wealth. They not only produce the products of industry but they also maintain the means of production. Without the labor of the working class society would grind to a halt. Therefore, it is the duty of the working class to organize and to assert their rights. This can only be done through a strong labor movement.

The Movement Abroad.

These are the Parasites.

The eighth section of the Democratic convention at Cleveland, held last week, adopted a platform which included the following plank: "A strong and prosperous nation is essential to the welfare of the world."

The Proletariat.

The general plan of organization adopted for the labor movement is to establish local unions, state federations, and national organizations. These organizations will endeavor to create a sense of solidarity among the working class and to assert the rights of the working class in the struggle for freedom.
