INDUSTRIALISM.

Industrial and social harmony can not be attained by recognizing the social claims of producers and binding employers to work on the part of the employers. There is no solution of the labor problem in the abstract.

The basis of the capitalistic system of industry and of the labor theory of the distribution of wealth is the recognition of the employer as the owner of the means of production. His right to use the means of production is the right of property, and it is the basis of the system of industry.

Before a problem can be solved it must be brought to the point where it can be solved. The problem of wealth production and distribution can not be solved until the problem of wealth production is solved. This can be done by the discovery of the right of property and the recognition of the employer as the owner of the means of production.

The employer is the man who owns the means of production. He is the one who can produce wealth. The employer is the one who can distribute wealth. The employer is the one who can solve the problem of wealth production and distribution.
