RELIGION AND CAPITALISM

A religious newspaper makes the assertion: "That modern civilization has despoiled the worker to such an extent that it is no longer possible to maintain the world's economic and social order." This is an absurd statement. The religious newspaper is in the wrong. The world is not despoiled by modern civilization. The world is despoiled by the greed and selfishness of the capitalist system. The world is despoiled by the greed and selfishness of the capitalist system. The world is despoiled by the greed and selfishness of the capitalist system.

Religious newspapers should be more careful in their statements. They should be more careful in their statements. They should be more careful in their statements.

One of the signs of prosperity is that the number of women who have changed their jobs in the last six months has increased. This is a good sign. It shows that the economy is doing well. It shows that the economy is doing well. It shows that the economy is doing well.

Another sign of prosperity is that the number of people who are unemployed has decreased. This is a good sign. It shows that the economy is doing well. It shows that the economy is doing well. It shows that the economy is doing well.

The economy is doing well. It is doing well. It is doing well.
