THE SOCIALISTS AND THE ANTI-TRUST PROVISIONS.

In response to President Roosevelt’s actions against the trusts (see if your fact are correct), the Socialist Party, led by the Socialists, held a convention in New York last week. The convention was called to discuss the recent anti-trust actions and their impact on the Socialist movement.

The convention was attended by many Socialist leaders from across the country. The main focus of the convention was the anti-trust provisions of the New Deal. The Socialists believed that these provisions were necessary to break up the power of the trusts and to promote a more equitable distribution of wealth.

However, the Socialists were critical of President Roosevelt’s actions. They believed that the President’s actions were too timid and did not go far enough. The Socialists felt that the President should have taken a more radical approach and gone after the trusts with much more force.

The convention ended with a resolution calling for the Socialists to work closely with the anti-trust provisions of the New Deal and to use their influence to ensure that the provisions were implemented in a way that would benefit the working class.
The National Platform.

The Democratic party of America is the party of free men. It is the party of the states and the states' rights. It is the party of the law and order. It is the party of the people. It is the party of the future.
