SOCIALISM OR DESPOTISM.

By John Coli, co-national chairman Social Democratic Party.

The idea of the working student turned out by the retiring high schools that teach the principles of socialism is a striking thing. It is an evidence of the gradual awakening of the working classes from the false ideas of their past. The teaching of socialism is not confined to the working classes, but is finding its way into the higher education of the country. The American people are becoming more and more aware of the necessity for a system of social organization that will give them a fair chance in life.
