LET THE NATION OWN THE TRUSTS!——A Common Sense Talks to Wide Awake Citizens.

The American railways whose monopoly is daily becoming more complete, are a part of the public highway. The same thing is true of the waterways and the canals. The public is entitled to full enjoyment of them. But in the case of the railways, the public is not in possession. The government has not the power of control over them. The profits that are realized by the railways, are the very ones that should be returned to the public, to be used for the construction of new roads and canals. The public should have the benefit of the revenues that are derived from them. This is the natural right of the people, and it is their duty to demand it. The government should take charge of the railways and make them a public monopoly. This would be a practical and just solution of the problem. It would give the people the benefit of the revenues that are derived from them, and it would prevent the railways from becoming a monopoly. It would also prevent the railways from being used for political purposes, and it would prevent the railway companies from using the public funds for private profit. This is the only way to solve the problem of the railways. It is the only way to give the people the benefit of the revenues that are derived from them, and it is the only way to prevent the railways from being used for political purposes.
BELLAMY'S FAMOUS PARABLE OF THE WATER TANK.

This remarkable anticipation of the world's experience with the big water tanks is so well known that there seems to be no need of reiterating its predictions.

The water tank, we are told, is the fountainhead of all the troubles of the world. It is the cause of war, famine, pestilence, and death. It is the cause of all the evils that beset mankind.

And when the capitalists own the water tank, they own the world. They can control the water supply and thus control the population. They can make war and famine and death at will.

The people must overthrow the capitalists and take the water tank into their own hands. They must organize a system of water distribution that is fair and equal for all.

And when the capitalist own the water tank, they own the world. They can control the water supply and thus control the population. They can make war and famine and death at will.

The people must overthrow the capitalists and take the water tank into their own hands. They must organize a system of water distribution that is fair and equal for all.

And when the capitalist own the water tank, they own the world. They can control the water supply and thus control the population. They can make war and famine and death at will.

The people must overthrow the capitalists and take the water tank into their own hands. They must organize a system of water distribution that is fair and equal for all.

Gleanings from Busy Socialistic Fields.

Notes from Yankee-land.

Opening for a new office of the Socialist Republican in the northwestern part of New York State. Mr. George L. Smith, of Oneida, N. Y., will be the manager of the office, which will be opened the first of January.

The Socialist Republican will soon have offices in all the large cities of the country, and will be published in several states at once.

Socialist Republicans are now in the habit of sending out a weekly sheet to their subscribers, and in some cases a monthly sheet. They are anxious to have all their subscribers get the best of their paper, and will do their best to make it as strong and as popular as possible.

Socialist Republicans are making great progress in the country, and they have reason to be satisfied with the result of their work.

Watches! Watches! Our Specialty.

The latest and finest watches are now ready for inspection. With Wilshire's you can always count on getting the very best. Our watch department is large and well-stocked.
