The testimony given by this class of the poor shows that the politicians have not understood the nature of the problem. The poor man has been so long a victim of the system that he has forgotten the power it has bestowed on him. The rich men have not understood the nature of the problem. They have been so long a victim of the system that they have forgotten the power it has bestowed on them.

As a consequence of this, the politicians have not understood the nature of the problem. They have been so long a victim of the system that they have forgotten the power it has bestowed on them.

To be permitted to work long hours and suffer all the physical strain and mental strain of the working class, is to be permitted to work long hours and suffer all the physical strain and mental strain of the working class.

There is no such thing as a working class. People working in the night of slavery are not free, they are not independent, they are not free to make any decision of their own. They are not free to vote, they are not free to speak, they are not free to act. They are not free to be themselves.

Exploitation, exploitation everywhere. The working class is exploited by the capitalist class. The capitalist class is exploiting the working class. The working class is not free to make any decision of their own. They are not free to vote, they are not free to speak, they are not free to act. They are not free to be themselves.

The only solution is to overthrow the capitalist system and establish a socialist system.
