As To Anarchism and Anti-Anarchist Legislation.

It is only natural that anarchists should be the leading men of Social Democracy. We are revolutionaries who demand that our aim be the intellectual and moral liberation of the working class, and yet we should not be persecuted because we are revolutionaries.

The anti-Anarchist legislation in the United States is simply a means of forcing the working class to work without free will. The capitalists do not want the working class to have any free will, and therefore they pass such legislation. The working class should fight against this legislation and demand free will.

The military despotism does not remain without a struggle. It is only natural that anarchists should be the leaders of the working class in the resistance against it. We are revolutionaries who demand that our aim be the intellectual and moral liberation of the working class, and yet we should not be persecuted because we are revolutionaries.

YOUR COUNTRY IS IN TROUBLE

MACHINERY AND CAPITALISM, AND MAN.

A deplorable squabbling by which nothing can be done constructively is now prevailing in the political and economic world, and we are witnessing an ever-increasing alienation of the people from the government, from industry, and from the interests that are attempting to impose themselves upon society. This situation is not new, but it is becoming more acute and more dangerous with each passing day. It is a situation that cannot be ignored if we are to save our democracy.

The machinery of modern industry has replaced the human element in many areas of life. This has led to a loss of the sense of community and the feeling of responsibility for one's actions. It has also led to a loss of the ability to think for oneself and to make decisions based on moral principles.

It is time for us to re-evaluate our priorities and to begin to think about the future of our country. We must remember that the machinery of industry is only a tool, and that it is the people who use it who determine its ultimate success or failure.

In the end, it is the people who will decide the fate of our country. We must work together to ensure that we have a government that is responsive to the needs of the people, and that we have a society that is based on a sense of community and cooperation.

Sincerely,

[Date]
Socialism and the Social Movement in the Nineteenth Century

By Prof. Werner Sombart of Breslau.

Translated by Amon P. Atwater, with an Introduction by John D. Clark, author of "Plutocracy and Poverty" in Columbia University.

This is a scientific work by a critic of socialism, not a propagandist, but by a critic who has the rare merit of understanding socialism and telling the truth about it. Thus it is a book that is invaluable to the socialist writer or speaker who wishes to have a clear insight into the underlying principles of socialism, while it makes an excellent propaganda work for the intellectual programs. The able and unique feature of the book is a table showing the dates of the most important events in the proletarian movement from 1790 to 1890. It is an indispensable work of reference, beautifully printed, and substantially bound in vellum with gold stamping. The purchase of this book is well worth the price.
