Defence to Mining-Buying by Col- lege Men.

Thus far the only result has been non-ness, and this is all that the colleges have been able to get out of the miners.

The natural order of things is that the miners should be the best order of things, and that the colleges should be the worst order of things.

The reason for this is that the miners are the natural order of things, and the colleges are the unnatural order of things.

The miners are the natural order of things because they are the most productive order of things, and the colleges are the unnatural order of things because they are the least productive order of things.

The miners are the most productive order of things because they are able to produce more goods and services than the colleges.

The colleges are the least productive order of things because they are not able to produce any goods or services.
