A Contemplative Car Properly Answered.

A contemplative car, one Cap. A. H. B., of East St. Louis, Illinois, rushed into print of the Territorial Advocate, of St. Louis, Missouri, the other day, and asked what was the sentiment of the Social Democratic party to the contemplative car. The Advocate replied to the contemplative car in the following language:

"To stop the flimsy cars, we want a solid car, and a solid car we will get. If you like contemplative cars, have one made of the solid kind, and you will have a car that will last you for years."

The Advocate's language is clear, and it is to the point. The contemplative car is a fraud, and it is time that it was stopped.

A capital idea, by the way, was that of the Michigan Central Railroad, of carrying passengers in gondolas. The Michigan Central has a large number of gondolas, and they are used for carrying passengers in the summer months. The gondolas are comfortable, and they are a great improvement on the old-fashioned railroad cars.

In short, the Michigan Central is doing things right, and it is to be hoped that other railroads will follow its example.

The Advocate is right in saying that the contemplative car is a fraud, and it is to be hoped that it will be stopped. The contemplative car is a thing of the past, and it is time that it was put out of business. The contemplative car is a fraud, and it is to be hoped that it will be stopped. The contemplative car is a thing of the past, and it is time that it was put out of business.

Only a strong daily socialist press in the United States can save the people from political and economic subjugation.
