REPUBLIC A BIG ADVANCE?

Some people say that there can be no true democracy unless it is a republic. But a republic is a sham.

If the difference between a republic and a monarchy is that the conditions of the masses are concerned, then the republic is a sham.

For two hundred years, the people of the United States have been governed by a republic. But the people have been governed by the rich and powerful, not by the masses. The rich and powerful have always held the reins of power in this country. If the republic is a sham, what is a true democracy?

That every citizen in the United States has equal rights and opportunities is the central idea of the republic. But this is not the case in the United States. There are many citizens who are denied equal rights and opportunities. This is why the republic is a sham.

The people of the United States have been governed by a republic for two hundred years. But the people have not been governed by the masses. The people have been governed by the rich and powerful. If the republic is a sham, what is a true democracy?
