Democratic in Name Only

Victor L. Berger writes of Davis and West Virginia.

West Virginia continues to play a prominent role in the present campaign. The state is considered a bellwether one, because its outcome is usually a harbinger of the national election. The Republican Party has long been associated with the Democrats in West Virginia, and the Democratic Party has traditionally been the stronger of the two.

Berger notes that the Republican Party in West Virginia is divided. The party is deeply divided on economic issues, with some members supporting free-market policies, while others favor interventionist policies. This division has hurt the party's ability to attract a broad base of support.

Berger also points out that the Democratic Party in West Virginia has been able to capitalize on the economic divisions within the Republican Party. The Democratic Party has been able to attract moderate voters who are dissatisfied with the Republican Party's economic policies.

Berger predicts that the Democratic Party will continue to dominate the political landscape in West Virginia. He notes that the party's success in the state is due to its ability to appeal to a wide range of voters, including working-class supporters, suburbanites, and middle-class voters.

Berger concludes by saying that the Democratic Party's success in West Virginia is a testament to its ability to adapt to changing political circumstances and to appeal to a diverse range of voters. He predicts that the party will continue to be a force to be reckoned with in the state's political landscape.
