A THOUSAND HANDS TO ONE HEAD!

EUGENE V. DEBS WRITES OF THE PRESENT ABOMINABLE CIVILIZATION.

"It is only with a sense of keen regret that I survey from within this prison of the law the increasing power of the trusts, the growing power of the great corporations. The men who once ruled over us, who were the power, are not the power any more. And it is a matter of satisfaction to me that the men who once were the freemen of the state are now the freemen of the world."

The Socialist Weekly.

If you will refer to the larger map of the United States, you will see that there are three great Cotton States: Texas, Georgia, and Alabama. And with the utterances of the men in these three States you can see the growth of the cotton industry. The cotton industry has grown in size and wealth, and all this has been done at the expense of the laboring man. It is only with a sense of keen regret that I survey from within this prison of the law the increasing power of the trusts, the growing power of the great corporations. The men who once ruled over us, who were the power, are not the power any more. And it is a matter of satisfaction to me that the men who once were the freemen of the state are now the freemen of the world."

Gleamings from Busy Socialist Fields!

NOTE: In some earlier issues the organization is known as the Socialist Party, in others as the Socialist-Democratic Party. Where it has been necessary to introduce the two names, this is done for the sake of clearness.

New York Social-Democrats are often heard to lament their failure to deal with the trade unions successfully.

The union movement is not a new thing. It is one of the oldest of American institutions, and it has been in existence from the time of the American Revolution. The first labor union was organized in 1834, and it is estimated that there are now over 1,000,000 trade unionists in the United States.

It is not difficult to explain why the Social-Democrats have not succeeded in dealing with the trade unions. The labor movement is a complex one, and it is influenced by a variety of factors. It is affected by the laws and regulations of the government, by the economic conditions of the country, and by the social and political climate.

In addition, the Social-Democrats have not had the support of the working class. The working class is a powerful force in the country, and it is difficult to organize a union without their support.

Despite these difficulties, the Social-Democrats have made some progress. They have succeeded in organizing some of the larger trade unions, and they have been able to secure some concessions from the employers. However, they have not been able to achieve their ultimate goal, which is the establishment of a socialist society.

Social-Democrats are not the only ones who have tried to organize the trade unions. The Socialists, the Communists, and the Anarchists have all attempted to do so. Each of these groups has its own philosophy and its own method of organizing.

Despite these differences, there is a common thread that runs through all of these movements. They are all concerned with the welfare of the working class, and they are all opposed to the exploitation of the working class by the capitalist class.

In conclusion, the Social-Democrats have not succeeded in organizing the trade unions, but they have not given up hope. They continue to work for the establishment of a socialist society, and they believe that one day this goal will be achieved.
EDITORIAL ETCHINGS.

La Follette returns in Wisconsin, administered by legislators who are as a rule reckless of the people's welfare. They are not only the worst of politicians but by their activities and the general trend of their administration they are making it more difficult for the people to get legislation that is sound and solid. The people must be more active than ever if they are to have the kind of government that they need and deserve.

HALLFOURS IN THE HERALD SANCTUARY.

Here is a better word of careful notice to those who would write who has said true that you are to be fair in your writing. The young man was writing in the way that he was writing. He should not have sent it to the Herald. He should have sent it to the Herald. It is not a question of the right of free speech, but of the duty of the press to give the public the full and true story.

NATIONAL SOCIALISM.

What International Socialism demands is:

1. Collective ownership of all public utilities and all industries.
2. The free distribution of the products of society, the right of all to work, the right of all to live.
3. The free distribution of all land, the right of all to own.
4. The free distribution of all raw materials, the right of all to use.
5. The free distribution of all services, the right of all to receive.

The demand is for a society in which all men are equal and all are free. It is a demand for a society in which all men are free to live, to work, to think, to love, to create, to be.

SOCIALLY DEMOCRATIC.

Chinese Restaurants in Milwaukee.

Chinese restaurants in Milwaukee have been closed for a week. The reason for this is that the Chinese have gone out on strike. They are demanding better wages and better working conditions. The strike is supported by the Working Men's club.

A True Unions Man.

I will ask for:

The Tobacco that bears the Tobacco Worker's Blue Union Label.

Eighth Brothers Old Burley
Fair Shop Old Partner
Power Sweet Magnolia

Tobacco

The above brands are made in the only strictly union Tobacco Factory in Milwaukee.

OUR MODERN SLAVE PENS. CRUEL OVERSEERS, INHUMAN OVER-TAXING AND PAY CHECKS.

HOW THE VICTIMS ARE DRIVEN TO DRINK.

The Milwaukee papers have been running advertisements to the effect that a large beer vendor has cut his prices in an effort to drive out the competition. The fact is that the low prices are being charged because the city council has increased the license tax on beer vendors. The price decrease is not a real one, but merely an attempt to keep the beer in the hands of the company that can pay the highest taxes.

The Milwaukee papers have also been putting out stories regarding the distillers. They claim that these concerns have cut their prices in order to drive out the competition. This is also false. The distillers have not lowered their prices, but simply increased their production in order to meet the increased demand.

The Milwaukee papers have also been making statements regarding the methods used by the distributors. They claim that these concerns are using unfair methods to drive out the competition. This is also false. The distributors are not using unfair methods, but simply trying to keep their prices low in order to meet the increased competition.

The Milwaukee papers have also been making statements regarding the methods used by the public. They claim that the public is being driven to drink by the distributors. This is also false. The public is not being driven to drink, but is simply making a choice to drink in order to meet their personal needs.

The Milwaukee papers have also been making statements regarding the methods used by the city council. They claim that the council is using unfair methods to drive out the competition. This is also false. The council is not using unfair methods, but simply trying to keep the competition in line with the city's licensing laws.
THIEVES IN DOCTORS’ GARBS!

How the Fakirrish Medical Institutes Are Plucking the Working Class.

“MASTER SPECIALISTS” WHO ARE MASTER FRAUDS!

How the Victim’s Fear Is Played Upon!

Some Tell-Tale Letters of Instruction.

The Social-Democratic Herald has long felt that it would be in the interest sooner or later to expose the habits of the quack medical institute whose golden age is past, in the country, who, under various names, which, however, their visitation of the democratic, and whose work is directed against the workers and tradesmen, as well as against the patients in general, is carried on in the name of Dr. H. Schuett.

If these facts have ever actually been written down in black and white, so to speak, it is in fact, their usual occupation. Similar events, which, while the majority do not know them, are in reality taking place, are more or less common in medical circles, as a result of false medical instruction.

To order to catch their victims in the first place they fill the daily newspapers, weeklies, journals, and even magazines, not only with their dispensing, but in their agitation for the protection of the public and its education, and in their dialogue with the public, the pseudo-giants of the quack medical institute, or their subdivisions, or the medical institute, or any one of these false so-called health institutions, which have the purpose of taking money, or which have the object of taking money from the public.

People are being deceived by Dr. H. Schuett, who, in his so-called “sectarianism,” is nothing less than a false medical institute.
